

Description

Switched mode power supply (SMP) for rail mounting, three-phase supply voltage, high efficiency, integral input filter and temperature protection, high power reserve and optional parallel mode.

Features and Benefits

- Wide range voltage input from AC 340 to 575 V
- Efficiency up to 90%
- Integral input filter and temperature protection
- Parallel mode for performance improvement (selectable by switch)

Typical applications

Process control, industrial switch- and controlgear, machine construction, telecommunication systems

Order numbering code

Type No.

SMP23 Three-phase switch-mode power supply for rail mounting

Connector design

L pcb-mounted

Terminal design

20 screw terminals

Output voltage

DC24V DC 24 V

Output current

20 A

SMP2320-DC24V-20A ordering example

Approvals

Approval authority	Standards
UL	UL508, CSA C22.2 No. 107.1 (listed) UL 60950-1, CSAC22.2 No. 60950-1 (recognized)
TÜV Rheinland	EN 60950-1, EN61558-1, EN61558-2-16

EMC

EN 61000-6-3, EN 61000-6-2, EN 61204-3

SMP23-L20-DC24V-20A

Technical data ($T_U = 25^\circ\text{C}$, $U_B = \text{AC } 400\ldots 500 \text{ V}$, $I_0 = 20 \text{ A}$)

Operating data

Input voltage ranges U_E	AC 340...575 V
Operating voltage range U_B	AC 400...500 V
Effective output	480 W
Output voltage U_0	24 V SELV
Output current rating I_0	20 A
Efficiency	88 % min. / 90 % typically

General data

Switching frequency	80 kHz
Insulation voltage between input and output	AC 3000 V, DC 4242 V
input and protective conductor	AC 1500 V, DC 2121 V
output and protective conductor	AC 500 V, DC 710 V
Insulation resistance	100 MΩ (DC 500 V) between input and output
Ambient temperature	-30°C...+71°C
Derating factor (see curve)	2.5 % / °C
Storage temperature	-40°C...+85°C
Relative humidity	20...95 % RH
MTBF to Bellcore, ed. 6	411,000 hours at 40°C, GB
Max. altitude in operation to IEC 60068-2-13	5000 m above sea level
Cooling	by convection
Mounting direction	wall-mounted (see dimensions)
Pollution degree	2

Input circuit

Input rated voltage	three-phase or single phase* AC 400...500 V
Input voltage ranges	AC 340...575 V
Input current	0.93 A typically at $U_B = \text{AC } 500 \text{ V}$ 1.1 A typically at $U_B = \text{AC } 400 \text{ V}$
Max. input current	1.4 A typically at $U_B = \text{AC } 340 \text{ V}$
Supply frequency	47...63 Hz

* with single phase supply voltage the output current is only 75% of the rated current

Technical data ($T_U = 25^\circ\text{C}$, $U_B = \text{AC } 400\ldots 500 \text{ V}$, $I_0 = 20 \text{ A}$)

Inrush current at AC 380 V / 480 V	20 A typically, 25 A max.
Power loss (at U_B 400 V, I_0 20 A)	58 W typically
power factor compensation (passive)	typically 0.65
Output circuit	
Rated voltage U_0	DC 24 V SELV
Current rating I_0	20 A
Output voltage accuracy	0...+1 %
Min. load	0 %
Supply regulation	$\pm 0.5 \%$ at U_E min. ... U_E max.
Load regulation	
Single mode	$\pm 1 \%$
Parallel mode	$\pm 5 \%$
Voltage adjustment range	DC 22.5...28.5 V at $0.8 \times I_0$
Continuous load	20 A at $U_0 = \text{DC } 24 \text{ V}$, 16.8 A at $U_0 = \text{DC } 28.5 \text{ V}$
Power boost factor	typically 115 % (110%...135%, see output curve)
Short circuit behaviour	U/I trip curve continuous mode hiccup mode discontinuous mode disconnection after 3 s, reconnection after 30 s
Exposure time	20 ms min.
ON delay at:	
resistive load	1 s
capacitive load of 7,000 μF	1.5 s
Rise time at:	
resistive load	150 ms
capacitive load of 7,000 μF	0.5 s
Release time	150 ms
Residual ripple	100 mV, spectrum = 20 MHz
Power back immunity	DC 35 V min.
Capacitive load	7,000 μF max.
Parallel mode	3 power supplies max. at $0.1 \times I_0 \ldots 0.9 \times I_0$

Technical data ($T_U = 25^\circ\text{C}$, $U_B = \text{AC } 400\ldots 500 \text{ V}$, $I_0 = 20 \text{ A}$)

Control and protection circuit

input protection	internal fuse T3.15A / AC 600 V per phase
Recommended back-up fuse	3-pole MCB, e.g. E-T-A type 4230
Current rating	6 A / 10 A $\rightarrow$ max. 20 A
Characteristic curve	B / C / D
Internal overvoltage protection	varistor
available power (output RDY)	Contact closed at: DC 17.6...19.4 V
Insulation voltage	DC 500 V (to output)
Contact load at	DC 60 V / 0.3 A
Overvoltage protection	30...33 V at $0.8 \times I_0$
Temperature protection:	100 $^\circ\text{C}$...110 $^\circ\text{C}$ measured at the heat sink, disconnection of output voltage, automatic reset after temperature reduction

Degree of protection IP20

Physical data

Dimensions (h x w x d) version with screw terminals:	124 x 150 x 118.8 mm (4.88 x 5.91 x 4.87 inches)
Housing material:	metal
Mass	approx. 1720 g
Vibrations (random vibration to IEC 60068-2-6)	mounted on symmetrical rail, 10 - 500 Hz, 2 g, on X, Y & Z axis, 60 minutes per axis
Shock (to IEC 60068-2-27,)	15 g (11 ms), 3 axes, 6 sides, 3 times per side

Tolerances

Mounting and Installation

Mounting	snap onto DIN rail (TS35/7.5 or TS35/15)	
Ventilation / cooling	normal air convection, recommended distance on each side 25 mm	
Mounting position	wall-mounted with the input terminals pointing downwards (see dimensions)	
Version with screw terminals:		
Screw terminals	input terminal AWG24-10 (0.2 mm ² – 4 mm ²) flexible/rigid output terminal AWG24-10 (0.2 mm ² – 4 mm ²) flexible/rigid	
Tightening torque	input connector Output terminal	1 Nm / max. 0.6 Nm / max.
Wire stripping length	8 mm	

Pin assignment - Display - Controls

pin no.	name	Description
1.2	V -	output voltage -
3.4	V +	output voltage +
5	L3	input voltage, phase conductor
6	L2	input voltage, phase conductor
7	L1	input voltage, phase conductor
8	PE	earth conductor
9	RDY	limit value DC ON, relay contact (make contact)
10		
	DC ON	visual status indication with LED
	DC LO	DC LOW output voltage LED indication
	Vout Adj	potentiometer for adjustment of the output voltage U_o
	S/P C/D	single / parallel mode switch-over continuous short circuit / intermittent short circuit continuous / discontinuous

Schematic diagram

Typical output trip curve - continuous mode

Derating curve

Typical efficiency curve

Current-voltage curve

current-voltage-curve → short circuit → continuous mode

current: — 10 A / Div
voltage: - - - 10 V / Div
time 5 s / Div.

Current-voltage curve

current-voltage-curve → short circuit → discontinuous mode

current: — 10 A / Div
voltage: - - - 10 V / Div
time 5 s / Div.

Application example with protection by 4230-T and REF16-S

Current-voltage curve

current-voltage-curve → short circuit → output
REF16-S101-DC24V-6A (F5)

current: — 2 A / Div
voltage: - - - 10 V / Div
time 20 ms / Div.

Notes for installation

- The power distribution system must only be installed by qualified personnel.
- Only after expert installation must the device be supplied with power.
- The user has to ensure that the cable cross section complies with the applicable current rating.
- The national standards (e.g. for Germany DIN VDE 0100) have to be observed for installation and selection of feed and return cables.
- Recommended circuit breaker for the primary input cable protection: E-T-A type 4230 IN max. 20 A
- Recommended selective overcurrent protection for the secondary output protection: E-T-A types ESS., ESX., and REF...
- In addition special precautions must be taken in the system or machine (e.g. use of a safety PLC) which reliably prevent an automatic re-start of parts of the system (cf. Machinery Directive 98/37/EG and EN 60204-1, Safety of Machinery). In the event of a failure (short circuit/overload) the load circuit will be disconnected by the circuit breaker/protector or the switched mode power supply.

All dimensions without tolerances are for reference only. E-T-A reserves the right change specifications at any time in the interest of improved design, performance and cost effectiveness, the right to make changes in these specifications without notice is reserved. Product markings may not be exactly as the ordering codes. Errors and omissions excepted.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
