Precautions

■ Connection

With the SSR for DC switching, the load can be connected to either positive or negative output terminal of the SSR.

■ Protective element

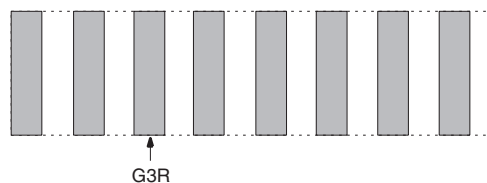

Since the SSR does not incorporate an overvoltage absorption component, be sure to connect an overvoltage absorption component when using the SSR under an inductive load.

■ Precaution of Mounting Output Modules

With up to four G3R SSRs mounted closely and side by side, 2-A loads can be switched.

With a G3R SSRs mounted every other slot, 2-A loads can be switched.
