General Description

The CL520 is a fixed, linear current regulator designed for driving LEDs at 20mA. With a maximum rating of 90V, it is able to withstand transients without the need for additional transient protection circuitry. It is ideally suited for applications employing single or multiple LEDs.

The minimum dropout voltage of 1.0V accommodates extra LEDs, permits lower supply voltages, and provides more efficient operation.

The CL520 is offered in TO-252(D-PAK) and TO-92 packages.

Absolute Maximum Ratings

| Parameter | Value |
|--------------------------------|-----------------|
| Supply voltage, V_{DD} | -0.5V to +100V |
| Output voltage, V_{OUT} | -0.5V to +100V |
| Operating junction temperature | -40°C to +125°C |
| Storage temperature | -65°C to +150°C |

Absolute Maximum Ratings are those values beyond which damage to the device may occur. Functional operation under these conditions is not implied. Continuous operation of the device at the absolute rating level may affect device reliability. All voltages are referenced to device ground..
