MTD6501G
12V 3-Phase BLDC Sensorless Fan Controller Daughter Board User's Guide (ADM00534)

Note the following details of the code protection feature on Microchip devices:

- Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these methods, to our knowledge, require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Most likely, the person doing so is engaged in theft of intellectual property.
- Microchip is willing to work with the customer who is concerned about the integrity of their code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as "unbreakable."

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.

Microchip received ISO/TS-16949:2009 certification for its worldwide headquarters, design and wafer fabrication facilities in Chandler and Tempe, Arizona; Gresham, Oregon and design centers in California and India. The Company's quality system processes and procedures are for its PIC® MCUs and dsPIC® DSCs, KEELOQ® code hopping devices, Serial EEPROMs, microperipherals, nonvolatile memory and analog products. In addition, Microchip's quality system for the design and manufacture of development systems is ISO 9001:2000 certified.

NOTES:

Object of Declaration: MTD6501G 12V 3-Phase BLDC Sensorless Fan Controller Daughter Board

EU Declaration of Conformity

Manufacturer: Microchip Technology Inc.
2355 W. Chandler Blvd.
Chandler, Arizona, 85224-6199
USA

This declaration of conformity is issued by the manufacturer.

The development/evaluation tool is designed to be used for research and development in a laboratory environment. This development/evaluation tool is not a Finished Appliance, nor is it intended for incorporation into Finished Appliances that are made commercially available as single functional units to end users under EU EMC Directive 2004/108/EC and as supported by the European Commission's Guide for the EMC Directive 2004/108/EC (8th February 2010).

This development/evaluation tool complies with EU RoHS2 Directive 2011/65/EU.

This development/evaluation tool, when incorporating wireless and radio-telecom functionality, is in compliance with the essential requirement and other relevant provisions of the R&TTE Directive 1999/5/EC and the FCC rules as stated in the declaration of conformity provided in the module datasheet and the module product page available at www.microchip.com.

For information regarding the exclusive, limited warranties applicable to Microchip products, please see Microchip's standard terms and conditions of sale, which are printed on our sales documentation and available at www.microchip.com.

NOTES:

Preface

NOTICE TO CUSTOMERS

All documentation becomes dated, and this manual is no exception. Microchip tools and documentation are constantly evolving to meet customer needs, so some actual dialogs and/or tool descriptions may differ from those in this document. Please refer to our website (www.microchip.com) to obtain the latest documentation available.

Documents are identified with a "DS" number. This number is located on the bottom of each page, in front of the page number. The numbering convention for the DS number is "DSXXXXXXXXA", where "XXXXXXXX" is the document number and "A" is the revision level of the document.

For the most up-to-date information on development tools, see the MPLAB® IDE online help. Select the Help menu, and then Topics to open a list of available online help files.

INTRODUCTION

This chapter contains general information that will be useful to know before using the MTD6501G 12V3-Phase BLDC Sensorless Fan Controller Daughter Board (ADM00534). Items discussed in this chapter include:

- Document Layout
- Conventions Used in this Guide
- Recommended Reading
- The Microchip Website
- Customer Support
- Document Revision History

DOCUMENT LAYOUT

This document describes how to use the MTD6501G 12V3-Phase BLDC Sensorless Fan Controller Daughter Board as an evaluation tool to debug on a target motor system. The manual layout is as follows:

- **Chapter 1. "Product Overview"** – Important information about the MTD6501G 12V3-Phase BLDC Sensorless Fan Controller Daughter Board.
- **Chapter 2. "Installation and Operation"** – Includes instructions on how to get started with the MTD6501G 12V3-Phase BLDC Sensorless Fan Controller Daughter Board.
- **Appendix A. "Schematics and Layouts"** – Shows the schematic and layout diagrams for the MTD6501G 12V3-Phase BLDC Sensorless Fan Controller Daughter Board.
- **Appendix B. "Bill of Materials (BOM)"** – Lists the parts used to build the MTD6501G 12V3-Phase BLDC Sensorless Fan Controller Daughter Board.

CONVENTIONS USED IN THIS GUIDE

This manual uses the following documentation conventions:

DOCUMENTATION CONVENTIONS

Description	Represents	Examples
Arial font:		
Italic characters	Referenced books	*MPLAB® IDE User's Guide*
	Emphasized text	...is the *only* compiler...
Initial caps	A window	the Output window
	A dialog	the Settings dialog
	A menu selection	select Enable Programmer
Quotes	A field name in a window or dialog	"Save project before build"
Underlined, italic text with right angle bracket	A menu path	*File>Save*
Bold characters	A dialog button	Click **OK**
	A tab	Click the **Power** tab
N'Rnnnn	A number in verilog format, where N is the total number of digits, R is the radix and n is a digit.	4'b0010, 2'hF1
Text in angle brackets < >	A key on the keyboard	Press <Enter>, <F1>
Courier New font:		
Plain Courier New	Sample source code	`#define START`
	Filenames	`autoexec.bat`
	File paths	`c:\mcc18\h`
	Keywords	`_asm, _endasm, static`
	Command-line options	`-Opa+, -Opa-`
	Bit values	`0, 1`
	Constants	`0xFF, 'A'`
Italic Courier New	A variable argument	*`file`*`.o`, where *`file`* can be any valid filename
Square brackets [ ]	Optional arguments	`mcc18 [options]` *`file`* `[options]`
Curly brackets and pipe character: { | }	Choice of mutually exclusive arguments; an OR selection	`errorlevel {0|1}`
Ellipses...	Replaces repeated text	`var_name [, var_name...]`
	Represents code supplied by user	`void main (void) { ... }`

RECOMMENDED READING

This user's guide describes how to use the MTD6501G 12V3-Phase BLDC Sensorless Fan Controller Daughter Board. Other useful documents are listed below. The following Microchip documents are available and recommended as supplemental reference resources.

- **MTD6501C/D/G Data Sheet**– ***"3-Phase Brushless DC Sinusoidal Sensorless Fan Motor Driver"*** **(DS22263)**
- **MCP8063 Data Sheet** – ***"3-Phase Brushless Sinusoidal Sensorless Motor Driver"*** **(DS20005257)**
- **MCP8063 User Guide** – **"*12V 3-Phase BLDC Sensorless Fan Controller Demonstration Board*" (DS50002248)**

THE MICROCHIP WEBSITE

Microchip provides online support via our website at www.microchip.com. This website is used as a means to make files and information easily available to customers. Accessible by using your favorite Internet browser, the website contains the following information:

- **Product Support** – Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- **General Technical Support** – Frequently Asked Questions (FAQs), technical support requests, online discussion groups, Microchip consultant program member listing
- **Business of Microchip** – Product selector and ordering guides, latest Microchip press releases, listing of seminars and events, listings of Microchip sales offices, distributors and factory representatives

CUSTOMER SUPPORT

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Field Application Engineer (FAE)
- Technical Support

Customers should contact their distributor, representative or field application engineer (FAE) for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in the back of this document.

Technical support is available through the website at:
http://www.microchip.com/support.

DOCUMENT REVISION HISTORY

Revision A (September 2016)

- Initial release of this document.

NOTES:

Chapter 1. Product Overview

1.1 INTRODUCTION

In order to easily use the MTD6501 device, Microchip provides daughter boards for each MTD6501 device version: MTD6501D, MTD6501G and MTD6501C daughter boards. This document covers the MTD6501G Daughter Board.

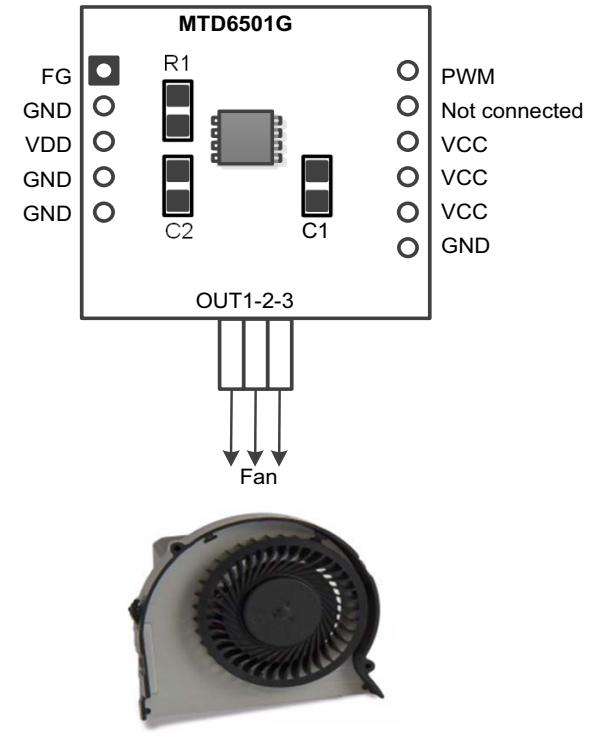
The MTD6501G Daughter Board is a small board with the minimum required components that are necessary to operate the MTD6501G device.

The MTD6501G Daughter Boards are designed to be used with the ADM00532 motherboard, but can also be used as standalone boards using their connectors.

The MTD6501G Daughter Boards come with a kit of three boards.

Note: In order to operate with a 3-phase BLDC motor, ensure you have direct access to the three phases (also called U, V, W) of the motor. See Figure 1-3.

The MTD6501G Daughter Board footprint and connections are represented in Figure 1-1.



Note 1: R1 is the FG pull-up resistor

2: C1 is the V_{DD} decoupling capacitor.

3: C2 is the V_{DD} decoupling capacitor.

FIGURE 1-1: *MTD6501G Daughter Board Footprints and Connectors.*

The board overview is represented in Figure 1-2.

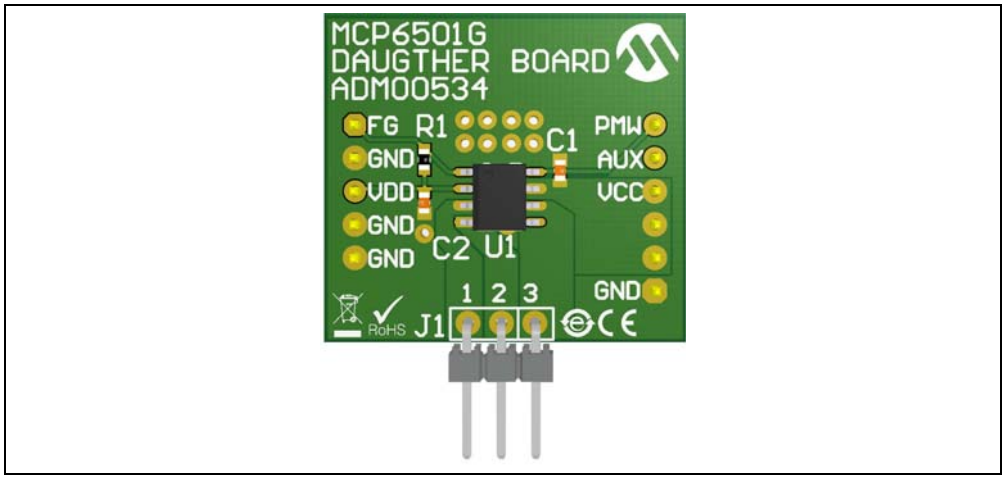


FIGURE 1-2: *Existing MTD6501G 12V 3-Phase BLDC Sensorless Fan Controller Daughter Board.*

For more information, see **Appendix A. "Schematics and Layouts".**

1.2 MTD6501G DAUGHTER BOARD FEATURES

The MTD6501G Daughter Board can be used as standalone board (see **Section 2.1 "Getting Started"**) but it is strongly recommended to use the MTD6501G Daughter Board with the help of the MCP8063 12V 3-Phase BLDC Sensorless Fan Controller Demonstration Board (ADM00532).

The MTD6501G 12V 3-Phase BLDC Sensorless Fan Controller Daughter Board allows the control and monitoring of Microchip 12V fan driver devices, such as the MCP8063 or MTD6501. The MTD6501G 12V 3-Phase BLDC Sensorless Fan Controller Daughter Board is controlled through PC software, via a USB connection.

The MTD6501G 12V 3-Phase BLDC Sensorless Fan Controller Daughter Board's Software provides several features, such as:

- Fan driver power supply control and monitoring
- Pulse-width modulation (PWM) control
- Speed and current consumption monitoring
- Automatic application testing.

See more information about the MCP8063 kit on the Microchip website.

Figure 1-3 shows how the software, the board and the fan interact with one another.

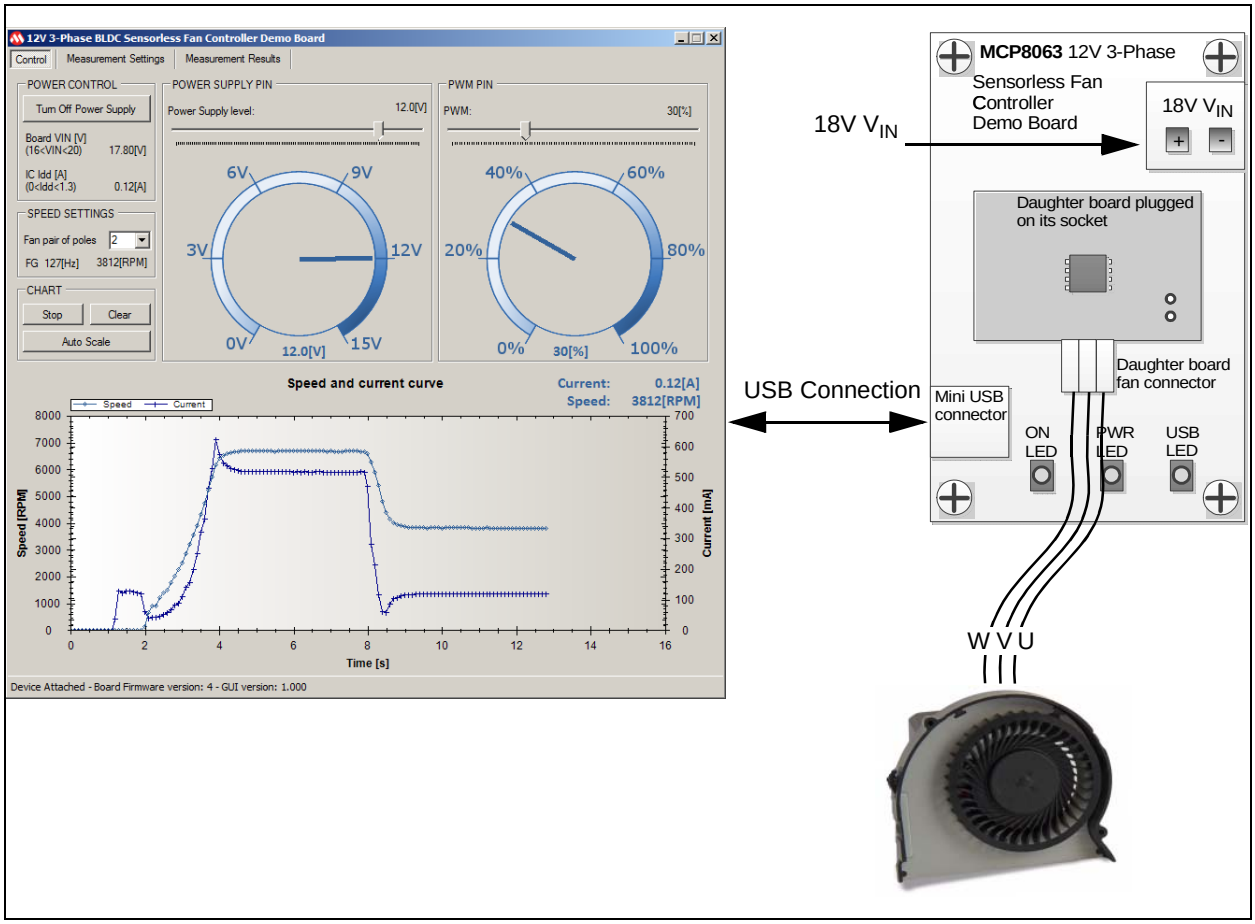

FIGURE 1-3: *System Overview*.

1.3 WHAT THE MTD6501G 12V 3-PHASE BLDC SENSORLESS FAN CONTROLLER DAUGHTER BOARD INCLUDES

Depending on the daughter board version, the MTD6501G 12V 3-Phase BLDC Sensorless Fan Controller Daughter Board includes:

- MTD6501G Daughter Board (ADM00534)
- Important Information Sheet

NOTES:

Chapter 2. Installation and Operation

2.1 GETTING STARTED

In Standalone mode, a power supply (2V to 14V) is required to supply the board using the VCC and the GND connector, to operate with the daughter boards. Ensure that the power supply can provide enough current for the application (maximum is 800 mA).

A function generator with the frequency range of 0.02 kHz to 100 kHz can be used for the PWM pin. The PWM pin can be driven open-drain (internal pull) or logic 0V-3V. The PWM pin can be left open in order to operate with a PWM = 100%. The FG pin allows the electrical speed of the motor to be read. The assembled R1 resistor is used as a pull-up to VDD, so the signal will switch between 0V and 3V.

Figure 2-1 shows the connection to operate the MTD6501 Daughter Board.

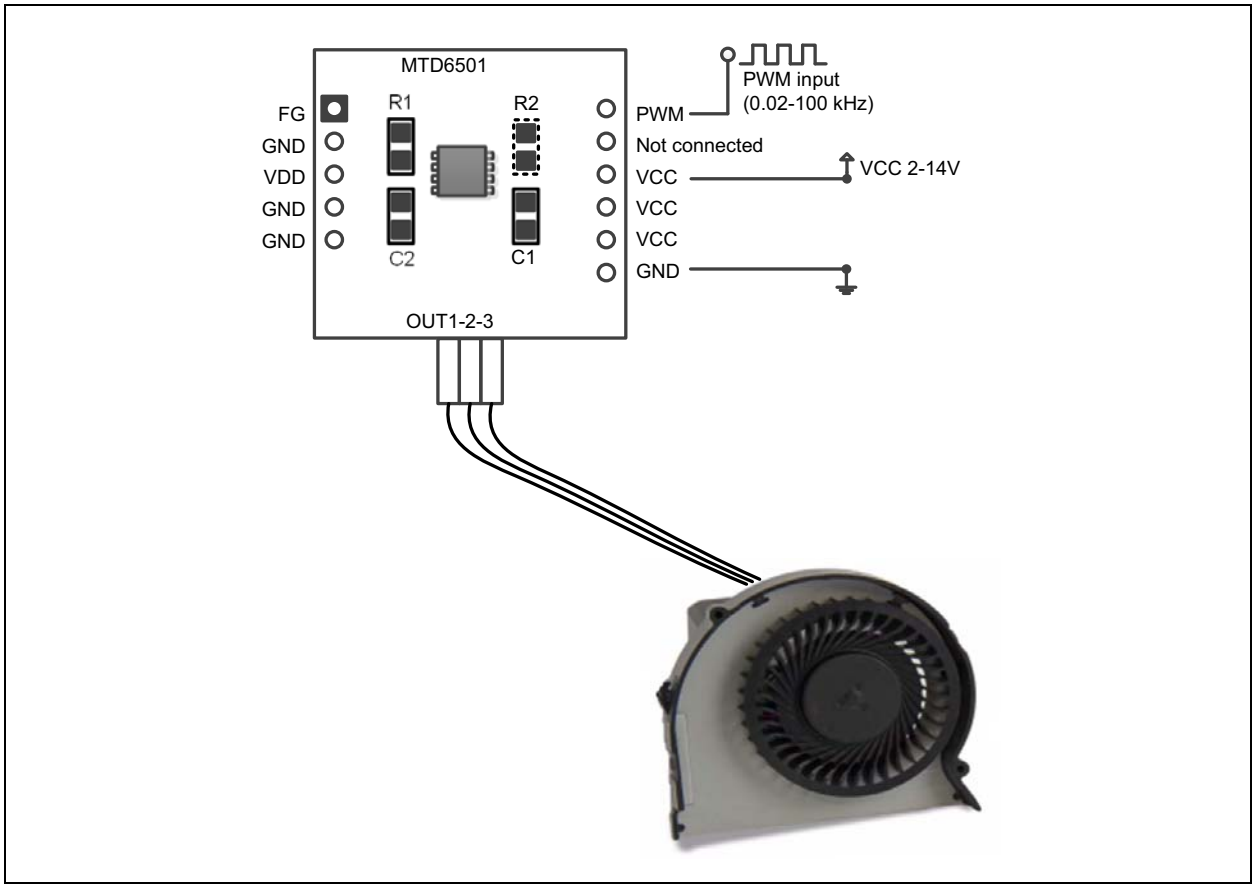

FIGURE 2-1: *MTD6501 Daughter Board Operation.*

NOTES:

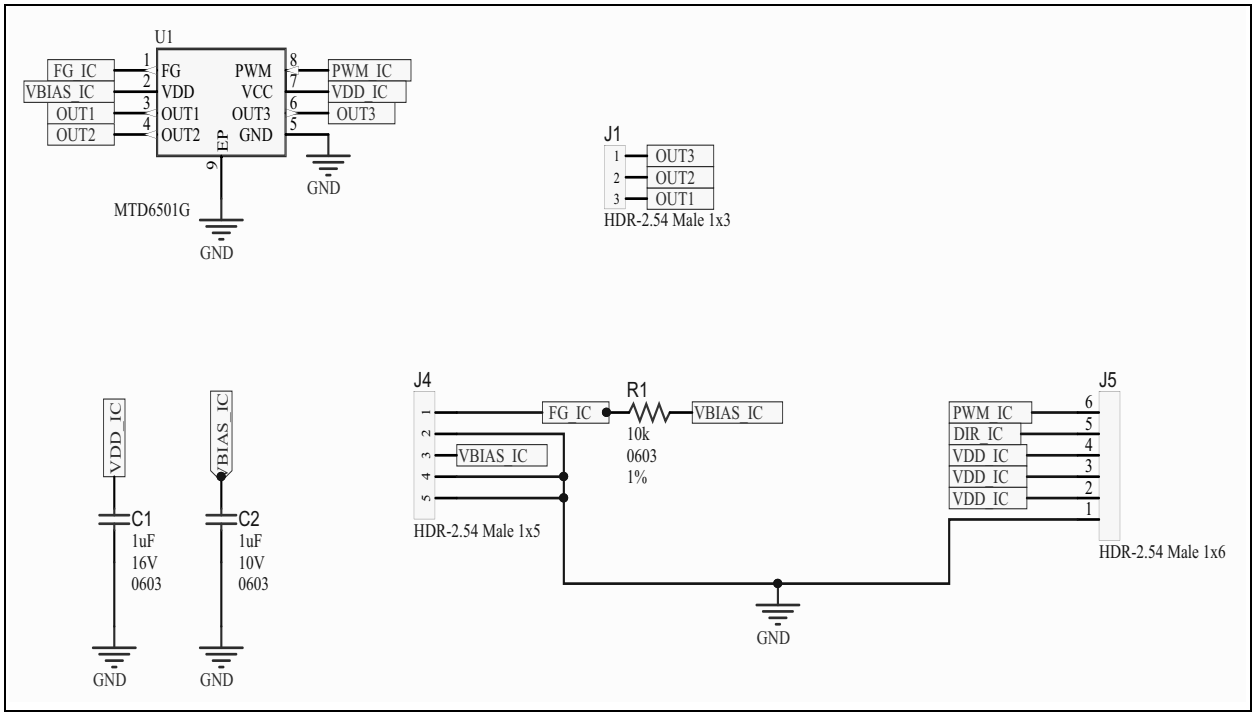
Appendix A. Schematics and Layouts

A.1 INTRODUCTION

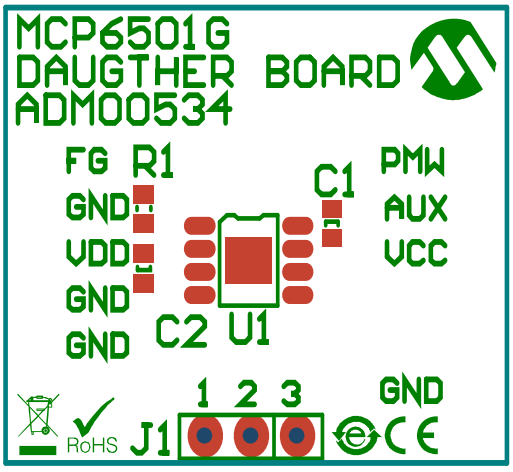
This appendix contains the schematics and layouts for the following devices which are included in the MTD6501G 12V 3-Phase BLDC Sensorless Fan Controller Daughter Board:

- **MTD6501G Daughter Board (ADM00534)**:
  - MTD6501G Daughter Board – Schematic
  - MTD6501G Daughter Board – Top Silk
  - MTD6501G Daughter Board – Top Copper and Silk
  - MTD6501G Daughter Board – Top Copper
  - MTD6501G Daughter Board – Bottom Copper
  - MTD6501G Daughter Board – Bottom Copper and Silk
  - MTD6501G Daughter Board – Bottom Silk

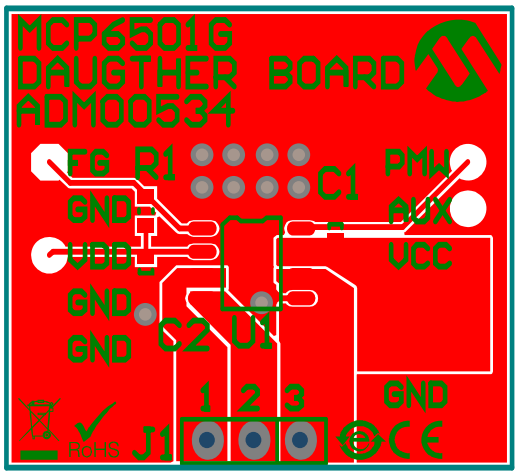
A.2 MTD6501G DAUGHTER BOARD – SCHEMATIC



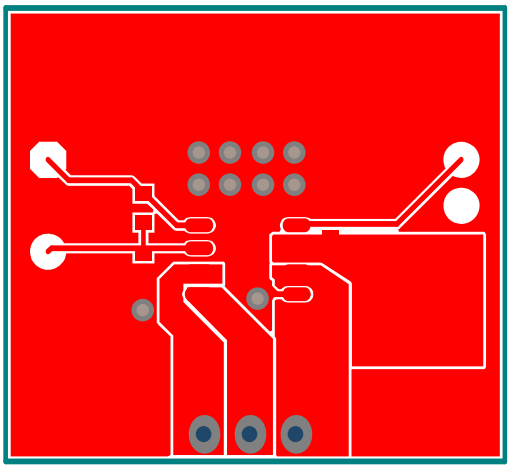
A.3 MTD6501G DAUGHTER BOARD – TOP SILK



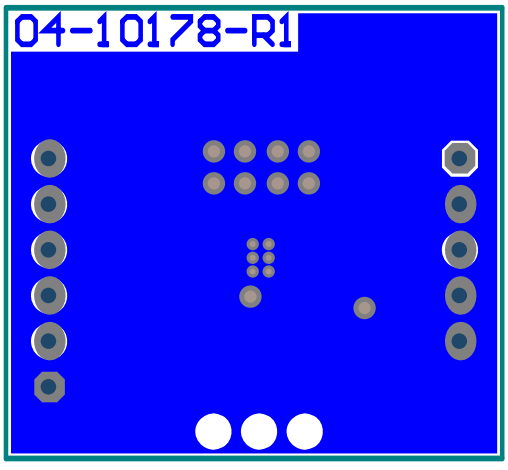
A.4 MTD6501G DAUGHTER BOARD – TOP COPPER AND SILK



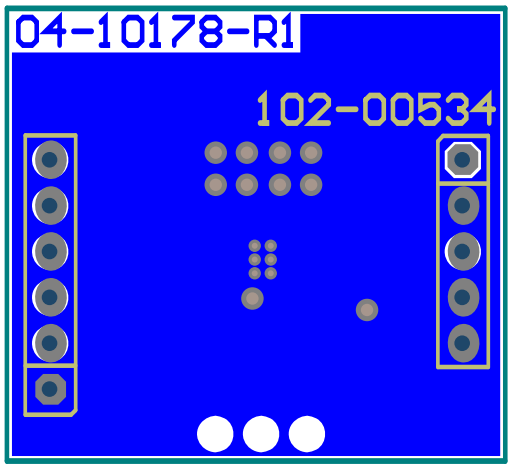
A.5 MTD6501G DAUGHTER BOARD – TOP COPPER



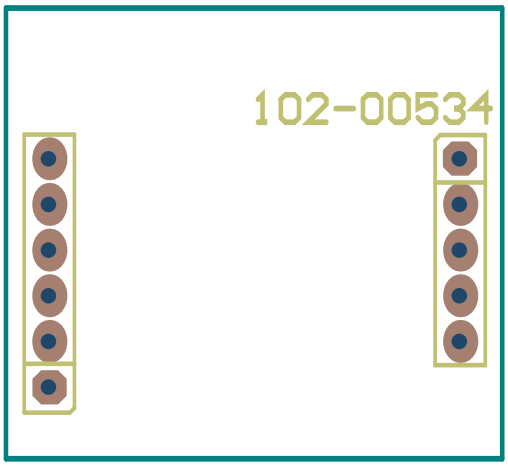
A.6 MTD6501G DAUGHTER BOARD – BOTTOM COPPER



A.7 MTD6501G DAUGHTER BOARD – BOTTOM COPPER AND SILK



A.8 MTD6501G DAUGHTER BOARD – BOTTOM SILK



Appendix B. Bill of Materials (BOM)

TABLE B-1: BILL OF MATERIALS (BOM) - MTD6501G DAUGHTER BOARD (ADM00534)

Qty	Reference	Description	Manufacturer	Part Number
1	C1	Capacitor ceramic 1 µF 16V 10% X7R SMD 0603	Taiyo Yuden Co., Ltd.	EMK107B7105KA-T
1	C2	Capacitor ceramic 1 µF 10V 20% X7R SMD 0603	TDK Corporation	C1608X7R1A105M
1	J1	Connector Header-2.54 Male 1x3 Tin 6.2 MH TH. R/A	Molex®	0022288030

OCEAN CHIPS
Океан Электроники
Поставка электронных компонентов

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «**JONHON**», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «**FORSTAR**».

AVIC JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
