

DOG SERIES 3.3V

INCL. CONTROLLER ST7036 FOR 4-/8-BIT, SPI (4-WIRE)

available for 1 pc. off !
even with LED: 5.8mm flat

TECHNICAL DATA

- * HIGH-CONTRAST LCD SUPERTWIST DISPLAY
- * OPTIONAL LED BACKLIGHT UNITS IN DIFFERENT COLORS
- * 1x8, 2x16 AND 3x16 WITH 12.0 mm / 5.6 mm AND 3.6 mm CHARACTER HEIGHT
- * ST 7036 CONTROLLER FOR 4-BIT, 8-BIT AND SPI (4-WIRE) INTERFACE
- * POWER SUPPLY +3.3V OR +5V SINGLE SUPPLY (typically 250µA)
- * NO ADDITIONAL VOLTAGES REQUIRED
- * OPERATING TEMPERATURE RANGE -20 THROUGH +70°C
- * LED BACKLIGHT 3 through 80mA@3.3V or 2 through 40mA@5V
- * NO MOUNTING REQUIRED, SIMPLY SOLDER INTO PCB

ORDERING CODE

LCD MODULE 1x8 - 11.97mm
LCD MODULE 2x16 - 5.57 mm
LCD MODULE 3x16 - 3.65mm

x: **B** = blue background

E = yellow/green background

L = yellow/green background (cannot be backlit)

S = black background

W = white background

EA DOG SERIES

With its EA DOG series, ELECTRONIC ASSEMBLY presents the world's first display series which will run on 3.3 V systems without auxiliary power. They can, of course be used on traditional 5 V systems.

Unlike normal LCD modules, you order the display and the corresponding backlight separately. This gives you a wealth of possible combinations.

Designed for compact hand-held devices, this modern LCD range provides a number of real benefits with or without backlight:

- * extremely compact at 55 x 31 mm at the standard font size of 5.57 mm (2 x 16)
- * ultra-flat at 2.0 mm without backlight or 5.8 mm including LED backlight
- * 4-bit, 8-bit and SPI interface (4-wire)
- * typical power consumption of only 250µA in full operation (LED white backlight as of 3mA)
- * easy installation by simply soldering into the board
- * A whole range of design variants (63) can be supplied as of single units
- * Changing background color

SETTING THE CONTRAST

The contrast on all displays of the EA DOG series can be set with a command. This is done using bits C0 through C5 in the commands "Contrast Set" and "Power/Icon Control/Contrast Set". Generally, the contrast is set once and kept constant across the entire operating temperature range (-20 through +70°C) thanks to the integrated temperature compensation function.

Even when run at 3.3 V, the displays do not require any additional negative voltage!

LED BACKLIGHTS

6 different variants are available for individual backlighting: white, yellow/green, blue, red, amber and full color.

For monochrome backlights, 2 separate LED paths are available, which can be switched in parallel or in series to ideally match the system voltage. This means that all the backlights can be run either at 5 V or at 3.3 V.

Operation of the backlight requires an external series resistor for current limiting. This can be calculated from $R=U/I$; you will find the values in the table. To improve life time it is recommended to use a current source only.

The operating life of the yellow/green, red and amber backlights is 100,000 hours and that of the white and blue backlights much shorter.

Important: Never operate the backlight directly on a 5 V/3.3V supply, as this can immediately destroy the LEDs!

INSTALLATION

First, the display and the corresponding backlight are clipped together. The complete unit is then inserted into a PCB and soldered. Note that the 4 pins for the backlight must also be soldered from the top.

Important: There are one or two protective films on the display (top and/or rear side) and one on each backlight. Those have to be removed during or after production.

| yellow/green EA LED55x31-G | Forwar voltage | Current max. | Limiting resistor | |
|-------------------------------|-------------------|-----------------|-------------------|--------|
| | | | @ 3,3 V | @ 5 V |

EA DOG-M

5 DIFFERENT TECHNOLOGIES

As a standard we provide 5 different technologies as STN and FSTN:

| display type | technology | optional backlight | readability | display color non backlighted | display color with backlighted | recommended backlight color |
|--|------------------------------------|--------------------------------------|-----------------------------------|-------------------------------|-------------------------------------|-----------------------------|
|  | FSTN pos. transmissive | it's fine with and without backlight | readable even without backlight | black on white | black on backlight color | white, blue, RGB |
|  | STN pos. yellow/green transmissive | backlight unit required | readable even without backlight | dark green on yellow/green | black on yellow/green or amber | yellow/green, amber |
|  | STN neg. blue transmissive | usage only with backlight | --- | --- | backlight color on blue background | white, yellow/green |
|  | FSTN neg. transmissive | usage only with backlight | --- | --- | backlight color on black background | white, RGB |
|  | STN pos. yellow/green reflective | no backlight possible | finest readable without backlight | dark green on yellow/green | --- | --- |

3 DIFFERENT DISPLAYS

These displays are available for mentioned technologies:

6 DIFFERENT BACKLIGHTS

6 different backlight colors are available to match equipments design as much as possible. The most effective and brightest one is the white one EA LED55x31-W.

EA LED55x31-W
White

EA LED55x31-G
Yellow/Green

EA LED55x31-B
Blue

EA LED55x31-R
Red

EA LED55x31-A
Amber

EA LED55x31-RGB
Full Color

When you can see black and white pictures only here on this page then you're able to download a coloured version from our website <http://www.lcd-module.de/eng/pdf/doma/dogme.pdf>

APPLICATION EXAMPLES

Different wiring must be used depending on the interface and the power supply. 2 additional capacitors are required for 3.3 V operation.

Note that the COG technology means that the current capacity of the outputs is limited. Therefore, a large load on the bus may cause signal loops and unclear levels. If in doubt, additional pull-down resistors (8051) are required or additional waits/NOPs must be incorporated.

USB-TEST BOARD EA 9780-2USB

For easy startup, a USB test board is available that can be connected to a PC. An USB cable and a Windows software is supplied with the product. This allows individual text and to be displayed directly on the connected display.

SIMULATION WITH WINDOWS

A simulator window also displays the contents of the display. The software can simulate all the displays and colors even without the hardware. You can download the software free from our website: http://www.lcd-module.de/deu/disk/startdog_v20.zip

EA DOG-M

CHARACTER SET

The below show character set is already built-in. In addition to that you are able to define 8 characters by your own.

| b7-b4 b3-b0 | 0000 | 0001 | 0010 | 0011 | 0100 | 0101 | 0110 | 0111 | 1000 | 1001 | 1010 | 1011 | 1100 | 1101 | 1110 | 1111 |

Initialisation for 5V

DIMENSIONS

alle dimensions are in mm

Note:
 - LC-displays are not suited for wave soldering or reflow soldering. Temperatures above +80°C may damage lcd-module.
 - Surfaces of display and backlight are with protection foils protected against scratching. Please remove before use.

| Pin | Symbol | Level | Function |
|-----|--------|----------------------|-------------------------------|
| 1 | NC | (A1+; LED backlight) | |
| 2 | NC | (C1-; LED backlight) | |
| 3 | PSB | H/L | L= Serial Mode, H= Parallel M |
| 4 | VOULT | - | Voltage Booster Output |
| 5 | VIN | - | Voltage Booster Input |
| 6 | VDD | H | Power Supply +3.3..5V |
| 7 | VSS | L | Power Supply 0V (GND) |
| 8 | D7 | H/L | Display Data (MSB) |
| 9 | D6 | H/L | Display Data |
| 10 | D5 | H/L | Display Data |
| 11 | D4 | H/L | Display Data |
| 12 | D3 | H/L | Display Data |
| 13 | D2 | H/L | Display Data |
| 14 | D1 | H/L | Display Data |
| 15 | D0 | H/L | Display Data (LSB) |
| 16 | E | H | Enable (falling edge) |
| 17 | FW | H/L | L= Write, H=Read |
| 18 | CSB | L | Chip Select |
| 19 | RS | H/L | L= Command, H= Data |
| 20 | NC | (A2+; LED backlight) | |
| 21 | CAPIN | - | Voltage Booster - (0.1..1uF) |
| 22 | CAPIP | - | Voltage Booster + (0.1..1uF) |
| 23 | PSB | H/L | L= Serial Mode, H= Parallel M |
| 24 | VOULT | - | Voltage Booster Output |
| 25 | VIN | - | Voltage Booster Input |
| 26 | VDD | H | Power Supply +3.3..5V |
| 27 | VSS | L | Power Supply 0V (GND) |
| 28 | D7 | H/L | Display Data (MSB) |
| 29 | D6 | H/L | Display Data |
| 30 | D5 | H/L | Display Data |
| 31 | D4 | H/L | Display Data |
| 32 | D3 | H/L | Display Data |
| 33 | D2 | H/L | Display Data |
| 34 | D1 | H/L | Display Data |
| 35 | D0 | H/L | Display Data (LSB) |
| 36 | E | H | Enable (falling edge) |
| 37 | FW | H/L | L= Write, H=Read |
| 38 | CSB | L | Chip Select |
| 39 | RS | H/L | L= Command, H= Data |
| 40 | RESET | L | Reset |

Note: The 4 LED pins A1, C1, A2 and C2 (or A, R, G, B) must be soldered from the top to ensure a clean contact.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
