

TAS5352DDV6EVM

This user's guide describes the operation of the evaluation module for the TAS5352 Digital Amplifier Power Output Stage using TAS5518 Digital Audio PWM Processor from Texas Instruments. The user's guide also provides measurement data and design information like schematic, bill of materials, and printed-circuit board layout.

1 Overview

The TAS5352DDV6EVM PurePath Digital™ customer evaluation module demonstrates the integrated circuits TAS5352DDV and TAS5518PAG from Texas Instruments (TI).

The TAS5352DDV is a high-performance, integrated stereo Digital Amplifier Power Stage designed to drive four speakers at up to 125 W per channel. The device incorporates TI's Equibit™ technology and is designed to be used with TI's Equibit™ modulators. This system requires only a simple passive demodulation filter to deliver high-quality, high-efficiency audio amplification.

TAS5518PAG is a high-performance, 32-bit (24-bit input) multichannel PurePath Digital™ pulse width modulator (PWM) based on Equibit™ technology with fully symmetrical AD modulation scheme. The device also has digital audio processing (DAP) that provides 48-bit signal processing, advanced performance, and a high level of system integration. The device has interfaces for headphone output and power supply volume control (PSVC).

This EVM is configured with four BTL channels, one PBTL (parallel BTL) channel for the center channel, and a subwoofer lineout using the DRV600 line driver.

The DRV600RTJ is a stereo line driver designed to allow the removal of the DC-blocking capacitors for reduced component count and cost. The DRV600RTJ is ideal for single-supply electronics where size and cost are critical design parameters. The DRV600RTJ is capable of driving 2 V_{rms} into a 600-Ω load with a 3.3-V supply. The DRV600RTJ has a fixed gain of –1.5 V/V. Independent shutdown control for the left and right audio channels is implemented.

This EVM, together with a TI Input-USB board 2, is a complete 5-channel plus subwoofer line output digital audio amplifier system which includes digital input (S/PDIF), analog inputs, interface to a personal computer (PC), and DAP features like digital volume control, input and output mixers, automute, tone controls, loudness, EQ filters, and dynamic range compression (DRC). Configuration options are available for power stage failure protection.

Table 1. TAS5352DDV6EVM Specification

Key Parameters	
Output stage supply voltage:	0 V – 34.5 V
Number of channels	2 x BTL, 1 x PBTL
Load impedance BTL:	4–8 Ω
Load impedance PBTL:	2–8 Ω
Output power BTL	140 W / 4 Ω 10% THD or 1.3 W / 6 Ω / 10% THD
Output power PBTL	268 W / 2 Ω / 10% THD
DNR	>110 dB
PWM processor	TAS5518PAG
Output stage	TAS5352DDV
Other features	DRV600 – Subwoofer line output

Overview

This 5-channel system plus subwoofer line output is designed for home theater applications such as A/V receivers, DVD receivers, DVD minicomponent systems, or home theater in a box (HTIB).

This document covers EVM specifications, audio performance and power efficiency measurements graphs, and design documentation that includes schematics, parts list, layout, and mechanical design.

Gerber (layout) files are available at www.ti.com.

The EVM is delivered with cables and an Input-USB board 2 to connect to an input source and be controlled from a PC.

1.1 TAS5352DDV6EVM Features

- 5/6-channel PurePath Digital™ evaluation module
- Subwoofer line output (LFE output)
- Self-contained protection system (short circuit and thermal)
- Standard I²S™ and I²C™/control connector for TI input board
- Double-sided plated-through PCB layout

Figure 1. Integrated PurePath Digital™ Amplifier System

1.2 PCB Key Map

Physical structure for the TAS5352DDV6EVM is illustrated in [Figure 2](#).

Figure 2. Physical Structure for the TAS5352DDV6EVM (Approximate Layout)

2 Quick Setup Guide

This section describes the TAS5352DDV6EVM board in regards to power supplies and system interfaces. The section provides information regarding handling and unpacking, absolute operating conditions, and a description of the factory default switch and jumper configuration.

This section provides a step-by-step guide to configuring the TAS5352DDV6EVM for device evaluation.

2.1 Electrostatic Discharge Warning

Many of the components on the TAS5352DDV6EVM are susceptible to damage by electrostatic discharge (ESD). Customers are advised to observe proper ESD handling precautions when unpacking and handling the EVM, including the use of a grounded wrist strap at an approved ESD workstation.

CAUTION

Failure to observe ESD handling procedures may result in damage to EVM components.

2.2 Unpacking the EVM

On opening the TAS5352DDV6EVM package, check to ensure that the following items are included:

- 1 pc. TAS5352DDV6EVM board using one TAS5518PAG and three TAS5352DDV
- 1 pc. TI Input-USB board 2 for interfacing TAS5352DDV6EVM with SPDIF/analog sources and PC for control
- 1 pc. Signal and Control Interface IDC cable for connection to an I²S front-end like the attached TI Input-USB board 2
- 1 pc. Cable for connecting Input-USB board 2 to a USB port on a PC for TAS5018 control by software
- 1 pc. Power supply cable for a regulated power supply (H-bridge supply)
- 1 pc. AC to DC external 15-V power supply (system supply)
- 4 pc. AC input clips for external 15-V power supply (US, Europe, UK, and Australia)
- 1 pc. PurePath CD-ROM

If any of these items are missing, contact the Texas Instruments Product Information Center nearest you to inquire about a replacement.

Connect Input-USB board 2 to TAS5352DDV6EVM using the delivered IDC cable.

2.3 Power Supply Setup

To power up the EVM, two power supplies are needed. One for system power, logic and gate-drive, and one for output stage supply. The H-bridge power supply is connected to the EVM using the delivered white/black power cable. The system power supply is provided in the enclosed external 15-V wall plug adapter.

Table 2. Recommended Supply Voltages

Description	Voltage Limitations	Current Requirement	Cable
Output stage power supply	0 – 34.5 V	10 A	White/Black

CAUTION

Applying voltages above the limitations given in [Table 2](#) may cause permanent damage to your hardware

Note: The length of power supply cable must be minimized. Increasing length of PSU cable is equal to increasing the distortion for the amplifier at high output levels and low frequencies.

2.4 Speaker Connection

CAUTION

Both positive and negative speaker outputs are floating and may not be connected to ground (e.g., through an oscilloscope)

2.5 GUI Software Installation

The TAS5518 graphical user interface (GUI) provides easy control of all registers in TAS5518. To install the GUI, run the setup file from the PurePath CD-ROM.

After installation, turn on the power supplies, and connect the USB cable to the Input-USB board 2.

Start the GUI program from the Windows™ menu. The start-up of the GUI takes a few seconds.

Figure 3. TAS5518 GUI Window

From the files menu, load the configuration file:

TAS5352DDV6EVM Configuration (1.00).cfg

The file is located on the PurePath CD-ROM. This file contains all settings for a default setup of the EVM.

For easy access of the file, it is recommended to copy the files into the directory where the GUI is installed. The default location is C:\Program Files\Texas Instruments Inc\TAS5518\

For more advanced use of the GUI, see the GUI User's Guide and data sheet for the TAS5518 device.

3 Protection

This section describes the short-circuit protection and fault reporting circuitry of the TAS5352 device.

3.1 Short-Circuit Protection and Fault-Reporting Circuitry

The TAS5352 is a self-protecting device that provides fault reporting (including high-temperature protection and short-circuit protection). The TAS5352 is configured in back-end auto-recovery mode and therefore resets automatically after all errors (M1, M2, and M3 is set low); see the data sheet for further explanation. This means that the device re-starts itself after an error occasion and reports shortly thereafter through the $\overline{SD}$ error signal.

3.2 Fault Reporting

The $\overline{OTW}$ and $\overline{SD}$ outputs from TAS5352 indicate fault conditions. See the TAS5352 data sheet for a description of these pins.

Table 3. TAS5352 Warning/Error Signal Decoding

$\overline{\text{OTW}}$	$\overline{\text{SD}}$	Device Condition
0	0	High-temperature error and/or high current error
0	1	High-temperature warning
1	0	Undervoltage lockout or high-current error
1	1	Normal operation, no errors/warnings

The temperature warning signals at the TAS5352DDV6EVM board are wired-OR to one temperature warning signal ($\overline{\text{OTW}}$ – pin 22 in control interface connector).

The shutdown signals are wired-OR into one shutdown signal ($\overline{\text{SD}}$ – pin 20 in control interface connector).

The shutdown signals together with the temperature warning signal give chip state information as described in Table 3. Device fault-reporting outputs are open-drain outputs.

4 TAS5352DDV6EVM Performance

Table 4. General Test Conditions

General Test Conditions		Notes
Output stage supply voltage:	34.5 V	Laboratory power supply (EA-PS 7065-10A)
Load impedance BTL:	4-8 Ω	
Load impedance PBTl:	2-4 Ω	
Input signal	1 kHz sine	
Sampling frequency	48 kHz	
Gain setting in TAS5518	0 dB	
Measurement filter	AES17 and AUX0025	
TI Input Board	Input-USB 2	Rev 1
EVM configuration file	Ver 1.00	TAS5352DDV6EVM Configuration (1.00).cfg

Note: These test conditions are used for all tests, unless otherwise specified.

Table 5. TAS5518 Register Settings

Register	Register	Value	Notes
Modulation Index Limit Register	0x16	0x02	Set Modulation Index to 97.7%
Master Volume Register	0xD9	0x00 00 00 48	Master Volume set to 0 dB

Note: These register settings are used for all test, unless otherwise specified

Table 6. Electrical Data

Electrical Data		Notes/Conditions
Output power, BTL, 4 Ω :	107 W	1 kHz, unclipped (0dBFS), $T_A = 25^\circ\text{C}$
Output power, BTL, 4 Ω :	140 W	1 kHz, 10% THD+N, $T_A = 25^\circ\text{C}$
Output power, BTL, 6 Ω :	78 W	1 kHz, unclipped (0 dBFS), $T_A = 25^\circ\text{C}$
Output power, BTL, 6 Ω :	103 W	1 kHz, 10% THD+N, $T_A = 25^\circ\text{C}$
Output power, BTL, 8 Ω :	61 W	1 kHz, unclipped (0 dBFS), $T_A = 25^\circ\text{C}$
Output power, BTL, 8 Ω :	80 W	1 kHz, 10% THD+N, $T_A = 25^\circ\text{C}$
Output power, BTL, 2 Ω :	209 W	1 kHz, unclipped (0 dBFS), $T_A = 25^\circ\text{C}$
Output power, BTL, 2 Ω :	268 W	1 kHz, 10% THD+N, $T_A = 25^\circ\text{C}$
Output power, BTL, 3 Ω :	152 W	1 kHz, unclipped (0 dBFS), $T_A = 25^\circ\text{C}$
Output power, BTL, 3 Ω :	200 W	1 kHz, 10% THD+N, $T_A = 25^\circ\text{C}$

Table 6. Electrical Data (continued)

Electrical Data		Notes/Conditions
Maximum peak current, BTL:	>12 A	1-kHz burst, 1 Ω , $R_{OC} = 27\text{ k}\Omega$
Maximum peak current, PBTL:	>25 A	1-kHz burst, 1 Ω , $R_{OC} = 27\text{ k}\Omega$
Output stage efficiency:	90%	2 x channels, 8 Ω
Damping factor BTL:	7.6	1 kHz, relative to 4 Ω load
Damping factor PBTL:	6.8	1 kHz, relative to 2 Ω load
H-bridge supply current:	<225 mA	1 kHz, –60 dBFS signal
Idle power consumption:	7.8 W	H-Bridge supply, –60 dBFS input signal

Table 7. Audio Performance

Audio Performance			Notes/Conditions
THD+N, BTL, 4 Ω :	1 W	<0.065%	1 kHz
THD+N, BTL, 4 Ω :	10 W	<0.13%	1 kHz
THD+N, BTL, 4 Ω :	50 W	<0.11%	1 kHz
THD+N, BTL, 6 Ω :	1 W	<0.085%	1 kHz
THD+N, BTL, 6 Ω :	10 W	<0.07%	1 kHz
THD+N, BTL, 6 Ω :	50 W	<0.09%	1 kHz
THD+N, BTL, 8 Ω :	1 W	<0.09%	1 kHz
THD+N, BTL, 8 Ω :	10 W	<0.06%	1 kHz
THD+N, BTL, 8 Ω :	50 W	<0.08%	1 kHz
THD+N, PBTL, 2 Ω :	1 W	<0.08%	1 kHz
THD+N, PBTL, 2 Ω :	10 W	<0.14%	1 kHz
THD+N, PBTL, 2 Ω :	50 W	<0.13%	1 kHz
THD+N, PBTL, 2 Ω :	100 W	<0.13%	1 kHz
THD+N, PBTL, 2 Ω :	150 W	<0.31%	1 kHz
THD+N, PBTL, 3 Ω :	1 W	<0.11%	1 kHz
THD+N, PBTL, 3 Ω :	10 W	<0.06%	1 kHz
THD+N, PBTL, 3 Ω :	50 W	<0.09%	1 kHz
THD+N, PBTL, 3 Ω :	100 W	<0.12%	1 kHz
Dynamic range:		>110 dB	Ref: rated power, A-weighted, AES17 filter, 4 ch avg
Noise voltage:		<63 μVrms	A-weighted, AES17 filter
Click/pop, DC step BTL:		6 mV	Mute/unmute, no signal, 6 Ω
Click/pop, DC step PBTL:		8 mV	Mute/unmute, no signal, 4 Ω
Channel separation:		>61 dB	1 kHz
Frequency response:		0.0 / –0.7 dB	90 W / 4 Ω , unclipped (0 dBFS)

Table 8. Audio Performance Subwoofer Line Output

Audio Performance			Notes/Conditions
Full-scale output voltage swing, =0 dBFS:		2 Vrms	100 Hz, 10-k Ω load
Full scale output voltage swing,		2.35 Vrms	100 Hz, 10- k Ω load
THD+N, 10 k Ω :	1 V	0.017%	100 Hz
THD+N, 10 k Ω :	100 mV	<0.011%	100 Hz
Frequency response:		+1, –3 dB	20 Hz – 1.7 kHz
Dynamic range:		>105.5 dB	20 Hz – 1.7 kHz
Noise voltage:		<11 μV	20 Hz – 1.7 kHz

Table 9. Thermal Specification

Thermal specification**	THEATSINK*	Notes/Conditions
Idle, all channels switching	34°C	1 kHz, 15 min, -60 dBFS signal, T _A = 25°C
4x12.5 W, 4 Ω + 1x25 W, 2 Ω (1/8 power)	63°C	1 kHz, 1 hour, T _A = 25°C
2x100 W, 4 Ω	90°C	1 kHz, 5 min, T _A = 25°C

*Measured on surface of heatsink.

NOTES

SCHEMATIC DISCLAIMER

The schematic information and materials ("Materials") provided here are provided by Texas Instruments Incorporated ("TI") as a service to its customers and/or suppliers, and may be used for informational purposes only, and only subject to the following terms. By downloading or viewing these Materials, you are signifying your assent to these terms.

- 1.) These evaluation schematics are intended for use for ENGINEERING DEVELOPMENT AND EVALUATION PURPOSES ONLY and are not considered by Texas Instruments to be fit as a basis for establishing production products or systems. This information may be incomplete in several respects, including but not limited to information relating to required design, marketing, and/or manufacturing-related protective considerations and product safety measures typically found in the end-product incorporating the goods.
- 2.) Accordingly, neither TI nor its suppliers warrant the accuracy or completeness of the information, text, graphics, links or other items contained within the Materials. TI may make changes to the Materials, or to the products described therein, at any time without notice. TI makes no commitment to update the Materials.
- 3.) TI assumes no liability for applications assistance, customer product design, software performance, or services that may be described or referenced in the Materials. The user assumes all responsibility and liability for proper and safe design and handling of goods. Accordingly, the user indemnifies TI from all claims arising from its use of the Materials.
- 4.) TI currently deals with various customers for products, and therefore our arrangement with the user will not be exclusive. TI makes no representations regarding the commercial availability of non-TI components that may be referenced in the Materials.
- 5.) No license is granted under any patent right or other intellectual property right of TI covering or relating to any combination, machine, or process in which such TI products or services might be or are used. Except as expressly provided herein, TI and its suppliers do not grant any express or implied right to you under any patents, copyrights, trademarks, or trade secret information.
- 6.) Performance tests and ratings, to the extent referenced in the Materials, are measured using specific computer systems and/or components and reflect the approximate performance of TI products as measured by those tests. Any difference in system hardware or software design or configuration may affect actual performance. Buyers should consult other sources of information to evaluate the performance of systems or components they are considering purchasing.
- 7.) Resale of TI's products or services with statements different from or beyond the parameters stated by TI for that product or service in official TI data books or data sheets voids all express and any implied warranties for the associated TI product or service, and is an unfair and deceptive business practice, and TI is not responsible for any such use.
- 8.) The Materials are copyrighted and any unauthorized use may violate copyright, trademark, and other laws. You may only download one copy for your internal use only, unless you are specifically licensed to do otherwise by TI in writing. This is a license, not a transfer of title, and is subject to the following restrictions: You may not: (a) modify the Materials (including any associated warranties, conditions, limitations or notices) or use them for any commercial purpose, or any public display, performance, sale or rental; (b) decompile, reverse engineer, or disassemble software Materials except and only to the extent permitted by applicable law; (c) remove any copyright or other proprietary notices from the Materials; (d) transfer the Materials to another person. You agree to prevent any unauthorized copying of the Materials. TI may terminate this license at any time if you are in breach of the terms of this Agreement. Upon termination, you will immediately destroy the Materials.
- 9.) THE MATERIALS ARE PROVIDED "AS IS" WITHOUT ANY EXPRESS OR IMPLIED WARRANTY OF ANY KIND INCLUDING WARRANTIES OF MERCHANTABILITY, NONINFRINGEMENT OF INTELLECTUAL PROPERTY, OR FITNESS FOR ANY PARTICULAR PURPOSE. IN NO EVENT SHALL TI OR ITS SUPPLIERS BE LIABLE FOR ANY DAMAGES WHATSOEVER (INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF PROFITS, BUSINESS INTERRUPTION, LOSS OF INFORMATION) ARISING OUT OF THE USE OF OR INABILITY TO USE THE MATERIALS, EVEN IF TI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

5	J101 J102 J103 J104 J117	2 pins / 1 row / 3.96mm Pitch Vertical Male Pin header Header	JST	B2P-VH
1	J901	4 pins / 1 row / 3.96mm Pitch Vertical Male Pin header Header	JST	B4P-VH
1	J600	Horizontal Female w. Switch Coax Phono socket	Chunfeng	RJ843-4W
1	J10	profile IDC 26 pins IDC Box header	Molex	87834-2611
1	X10	13.5MHz 13.5MHz SMD Crystal (HCM49)	Citizen	HCM49-13.500MABJT
1	PCB1	A831-PCB-001_1.00 / TAS5352DDV6EVM Printed Circuit Board (ver. 1.00)	Printline	A831-PCB-001(1.00)
1	HEATSINK630	TIC-HSINK-053_1.00 / Heatsink for 3 DDV packages length 114 mm	Phonotech	TIC-HSINK-053(1.00)

TAS5352DDV6EVM (A831)

PCB SPECIFICATION

Version 1.00

BOARD IDENTIFICATION:	A831-PCB-001(1.00)
BOARD TYPE:	DOUBLE-SIDED PLATED-THROUGH BOARD
LAMINATE TYPE:	FR4
LAMINATE THICKNESS:	1.6 mm
COPPER THICKNESS:	70 μm (INCL. PLATING EXTERIOR LAYER)
COPPER PLATING OF HOLES:	>25 μm
MINIMUM HOLE DIAMETER	0.3 mm
SILKSCREEN COMPONENT SIDE:	WHITE - REMOVE SILKSCREEN FROM SOLDER AREA & PRE-TINNED AREAS
SILKSCREEN SOLDER SIDE:	None
SOLDER MASK COMPONENT SIDE:	GREEN
SOLDER MASK SOLDER SIDE:	GREEN
PROTECTIVE COATING:	SOLDER COATING AND CHEMICAL SILVER ON FREE COPPER
ELECTRICAL TEST:	PCB MUST BE ELECTRICAL TESTED
MANUFACTURED TO:	PERFAG 2E (www.perfag.dk)
APERTURE TABLE:	PERFAG 10A (www.perfag.dk)
BOARD SIZE:	114 x 149 mm
COMMENTS:	SEE DRILL INFORMATION FILE (PCBDOC.ZIP).

Jonas L. Holm

SCALE: 1:1.5
PROFILE: TIC-HSINK-050(1.00)
DIMENSIONS: mm
MATERIAL: ALUMINUM
INTERNAL SCREW THREADS: M3
SURFACE: FREE OF SHARP EDGES
SURFACE TREATMENT: BLACK ANODIZED
TOLERANCES: +/- 0.1 mm

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
