## Description

AQD-D3L8GN18-MG is a DDR3L 1866Mbps U-DIMM high-speed, memory module that use 8pcs of 512Mx 64 bits DDR3L SDRAM in FBGA package and a 4K bits serial EEPROM on a 240-pin printed circuit board. AQD-D3L4GN18-MG is a Dual In-Line Memory Module and is intended for mounting into 240-pin edge connector sockets.

Synchronous design allows precise cycle control with the use of system clock. Data I/O transactions are possible on both edges of DQS. Range of operation frequencies, programmable latencies allow the same device to be useful for a variety of high bandwidth, high performance memory system applications.

Storage temperature	TSTG	-55~+100	°C	1,2

Note:

1. Stress greater than those listed under “Absolute Maximum Ratings” may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect reliability.
2. Storage Temperature is the case surface temperature on the center/top side of the DRAM. For the measurement conditions, please refer to JESD51-2 standard.
