## Features

| Order code | $V_{DS} @ T_J$<br>max. | $R_{DS(on)}$<br>max. | $I_D$ | $P_{TOT}$ |
|------------|------------------------|----------------------|-------|-----------|
| STD10NM60N | 650 V                  | 0.55 $\Omega$        | 10 A  | 70 W      |
| STF10NM60N |                        |                      |       | 25 W      |
| STP10NM60N |                        |                      |       | 70 W      |
| STU10NM60N |                        |                      |       |           |

- 100% avalanche tested
- Low input capacitance and gate charge
- Low gate input resistance

## Applications

- Switching applications

## Description

These devices are N-channel Power MOSFETs developed using the second generation of MDmesh™ technology. This revolutionary Power MOSFET associates a vertical structure to the company's strip layout to yield one of the world's lowest on-resistance and gate charge. It is therefore suitable for the most demanding high efficiency converters.

Table 1. Device summary

| Order code | Marking | Package  | Packing       |
|------------|---------|----------|---------------|
| STD10NM60N | 10NM60N | DPAK     | Tape and reel |
| STF10NM60N | 10NM60N | TO-220FP | Tube          |
| STP10NM60N | 10NM60N | TO-220   | Tube          |
| STU10NM60N | 10NM60N | IPAK     | Tube          |

# 1 Electrical ratings

Table 2. Absolute maximum ratings

| Symbol         | Parameter                                                                                                                                  | Value       |                   |      |      | Unit               |
|----------------|--------------------------------------------------------------------------------------------------------------------------------------------|-------------|-------------------|------|------|--------------------|
|                |                                                                                                                                            | TO-220      | TO-220FP          | IPAK | DPAK |                    |
| $V_{GS}$       | Gate- source voltage                                                                                                                       | $\pm 25$    |                   |      |      | V                  |
| $I_D$          | Drain current (continuous) at $T_C = 25\text{ }^{\circ}\text{C}$                                                                           | 10          | 10 <sup>(1)</sup> | 10   |      | A                  |
| $I_D$          | Drain current (continuous) at $T_C = 100\text{ }^{\circ}\text{C}$                                                                          | 5           | 5 <sup>(1)</sup>  | 5    |      | A                  |
| $I_{DM}^{(2)}$ | Drain current (pulsed)                                                                                                                     | 32          | 32 <sup>(1)</sup> | 32   |      | A                  |
| $P_{TOT}$      | Total dissipation at $T_C = 25\text{ }^{\circ}\text{C}$                                                                                    | 70          | 25                | 70   |      | W                  |
| $dv/dt^{(3)}$  | Peak diode recovery voltage slope                                                                                                          | 15          |                   |      |      | V/ns               |
| $V_{ISO}$      | Insulation withstand voltage (RMS) from all three leads to external heat sink<br>( $t = 1\text{ s}$ ; $T_C = 25\text{ }^{\circ}\text{C}$ ) |             | 2500              |      |      | V                  |
| $T_J$          | Operating junction temperature                                                                                                             | - 55 to 150 |                   |      |      | $^{\circ}\text{C}$ |
| $T_{stg}$      | Storage temperature                                                                                                                        |             |                   |      |      |                    |

1. Limited by maximum junction temperature.
2. Pulse width limited by safe operating area.
3.  $I_{SD} \leq 10\text{ A}$ ,  $di/dt \leq 400\text{ A}/\mu\text{s}$ ,  $V_{DS\text{ peak}} \leq V_{(BR)DSS}$ ,  $V_{DD} = 80\% V_{(BR)DSS}$ .

Table 3. Thermal data

| Symbol         | Parameter                                | Value  |          |      |      | Unit                        |
|----------------|------------------------------------------|--------|----------|------|------|-----------------------------|
|                |                                          | TO-220 | TO-220FP | IPAK | DPAK |                             |
| $R_{thj-case}$ | Thermal resistance junction-case max.    | 1.79   | 5        | 1.79 |      | $^{\circ}\text{C}/\text{W}$ |
| $R_{thj-amb}$  | Thermal resistance junction-ambient max. | 62.50  |          | 100  |      | $^{\circ}\text{C}/\text{W}$ |
| $R_{thj-pcb}$  | Thermal resistance junction-pcb max.     |        |          |      | 50   | $^{\circ}\text{C}/\text{W}$ |

Table 4. Avalanche characteristics

| Symbol   | Parameter                                                                                                                 | Value | Unit |
|----------|---------------------------------------------------------------------------------------------------------------------------|-------|------|
| $I_{AS}$ | Avalanche current, repetitive or not-repetitive<br>(pulse width limited by $T_J$ max.)                                    | 4     | A    |
| $E_{AS}$ | Single pulse avalanche energy<br>(starting $T_J = 25\text{ }^{\circ}\text{C}$ , $I_D = I_{AS}$ , $V_{DD} = 50\text{ V}$ ) | 200   | mJ   |

## 2 Electrical characteristics

( $T_{\text{case}} = 25\text{ °C}$  unless otherwise specified)

**Table 5. On/off-states**

| Symbol                      | Parameter                                               | Test conditions                                                      | Min. | Typ. | Max.      | Unit          |

## 4 Package information

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK® packages, depending on their level of environmental compliance. ECOPACK® specifications, grade definitions and product status are available at: [www.st.com](http://www.st.com). ECOPACK is an ST trademark.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,  
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
