Safety equipment, alarms, copiers, telecommunications devices, computers, etc.

### About Cd-free contacts

We have introduced Cadmium free type products to reduce Environmental Hazardous Substances. (The suffix "F" should be added to the part number. The Suffix "F" is required only for 1 Form C, 2 Form C contact type. The 4 Form C and 4 Form C bifurcated (twin) contact type is originally cadmium-free, the suffix "F" is not required.)

Please replace parts containing Cadmium with Cadmium-free products and evaluate them with your actual application before use because the life of a relay depends on the contact material and load.

**Compliance with RoHS Directive**

## DIMENSIONS

HC relays are unified to standard sizes. Please refer to standard type information.

## NOTES

When mounting TM types, use washers to prevent damage or distortion to the polycarbonate cover. When tightening fixing screws, the optimum torque range should be 0.294 to 0.49 N·m, (3 to 5 kgf·cm). If screws are over tightened, the cover may distort, resulting in poor sealing. Moreover, to prevent loosening, use washers.

**For Cautions for Use, see Relay Technical Information.**

### DIMENSIONS (Unit: mm inch)

#### Mounting rail

ATA48011

#### Fastening plate

ATA4806

### Compliance with RoHS Directive

## MOUNTING METHOD

### 1. DIN terminal socket mounting

1. Enables 'one-touch' attachment to, and easy removal from, mounting rail (35 mm DIN46277 standard rail) on device.

2. By doing away with installation tasks, large cost savings are possible.

3. As well as HC relays, PDX timers, and CDX and CDF time relays can be attached.

#### Attachment

By applying pressure into the rail, secure attachment is possible.

#### Removal

Extraction is easy when a slot head screwdriver or similar tool is used to pull outward the protrusion used for removal.

### 2. Wire-pressed terminals

When using wire-pressed terminals, please use the parts listed below or parts made with similar specifications.
