## Low Resistance Antenna Aperture Switch

### Features

- Designed for high-linearity antenna aperture switching and RF tuning applications
- Multiple selectable switch configurations: SP4T/SP3T/SPDT/SPST
- Ultra low  $R_{ON}$  resistance of  $1.0\ \Omega$  at each port in ON state
- Low  $C_{OFF}$  capacitance of 270 fF at each port in OFF state
- High max RF voltage OFF state handling
- Low harmonic generation
- MIPI RFFE control interface
- Hardware Pin swapping function to select 2 USID addresses
- Supply voltage range: 2.3 to 3.6 V
- No RF parameter change within supply voltage range
- Small form factor 1.1 mm x 1.5 mm
- RoHS and WEEE compliant package

1.1 x 1.5 mm<sup>2</sup>

### Application

- Impedance Tuning
- Antenna Tuning
- Inductance Tuning
- Tunable Filters

### Product validation

Qualified for industrial applications according to the relevant tests of JEDEC47/20/22

- RoHS and WEEE compliant package

## Description

The BGSA141MN10 is a versatile Single-Pole Quad Throw (SP4T) / Single Pole Triple Throw (SP3T) / Single Pole Double Throw (SPDT) and Single Pole Single Throw (SPST) RF antenna aperture switch optimized for low  $C_{off}$  as well as low  $R_{on}$  enabling applications up to 4.0 GHz. Including a RFFE digital control interface, this switch offers the possibility to adopt a SP4T, SP3T, SPDT along with SPST topology for a better flexibility in RF Front-End designs.

The BGSA141MN10 includes 4 ultra-low  $R_{on}$  ports making it ideal for antenna aperture switching and switchable capacitors of high values. This single supply chip integrates on-chip CMOS logic driven by a simple, single-pin CMOS or TTL compatible control input signal. Unlike GaAs technology, the 0.1 dB compression point exceeds the switch maximum input power level, resulting in linear performance at all signal levels and external DC blocking capacitors at the RF ports are only required if DC voltage is applied externally. Due to its very high RF voltage ruggedness, it is suited for switching any reactive devices such as inductors and capacitors in RF matching circuits without significant losses in quality factors.

BGSA141MN10 empower its users with a smart USID selection feature. Default USID is 0b1100 when data signal is routed to pin 5 and clock signal to pin 6. Default USID is 0b1101 when data signal is routed to pin 6 and clock signal to pin 5. This Infineon patented feature allows to drive 2 identical BGSA141MN10 parts with the same MIPI RFFE bus opening higher degree of flexibility and freedom in the PCB design.

## Low Resistance Antenna Aperture Switch

### Maximum Ratings

## 2 Maximum Ratings

**Figure 1:** RF operating voltage measurement configuration

**Table 1: Maximum Ratings, Table I** at  $T_A = 25\text{ }^\circ\text{C}$ , unless otherwise specified

Parameter	Symbol	Values			Unit	Note / Test Condition
		Min.	Typ.	Max.		
Frequency Range	$f$	0.1	–	–	GHz	<sup>1)</sup>
Supply voltage <sup>2)</sup>	$V_{DD}$	-0.5	–	6	V	only for infrequent and short duration time periods
Storage temperature range	$T_{STG}$	-55	–	150	$^\circ\text{C}$	–
RF input power	$P_{RF\_max}$	–	–	39	dBm	Pulsed RF input duty cycle of 25 % and 4620 $\mu\text{s}$ in ON-state, measured per 3GPP TS 45.005
RF voltage	$V_{RF\_max}$	–	–	44	V	Short term peaks (1 $\mu\text{s}$ in 0.1% duty cycle), exceeding typical linearity, $R_{on}$ and $C_{off}$ parameters, in Isolation mode, test condition schematic in Fig. 1
ESD capability, CDM <sup>3)</sup>	$V_{ESD\_CDM}$	-1	–	+1	kV	
ESD capability, HBM <sup>4)</sup>	$V_{ESD\_HBM}$	–	–	Class1B	-	
ESD capability, system level (RFc port) <sup>5)</sup>	$V_{ESD\_ANT}$	-8	–	+8	kV	RFc vs system GND, with 27 nH shunt inductor
Junction temperature	$T_j$	–	–	125	$^\circ\text{C}$	–

<sup>1)</sup> Switch has a lowpass response. For higher frequencies, losses have to be considered for their impact on thermal heating. The DC voltage at RF ports  $V_{RFDC}$  has to be 0V.

<sup>2)</sup> Note: Consider potential ripple voltages on top of  $V_{DD}$ . Including RF ripple,  $V_{DD}$  must not exceed the maximum ratings:  $V_{DD} = V_{DC} + V_{Ripple}$ .

<sup>3)</sup> Field-Induced Charged-Device Model JESD22-C101. Simulates charging/discharging events that occur in production equipment and processes. Potential for CDM ESD events occurs whenever there is metal-to-metal contact in manufacturing.

<sup>4)</sup> Human Body Model ANSI/ESDA/JEDEC JS-001 ( $R = 1,5\text{ k}\Omega$ ,  $C = 100\text{ pF}$ ).

<sup>5)</sup> IEC 61000-4-2 ( $R = 330\ \Omega$ ,  $C = 150\text{ pF}$ ), contact discharge.

## Low Resistance Antenna Aperture Switch

### Maximum Ratings

**Table 2: Maximum Ratings, Table II** at  $T_A = 25\text{ }^\circ\text{C}$ , unless otherwise specified

Parameter	Symbol	Values			Unit	Note / Test Condition
		Min.	Typ.	Max.		
Maximum DC-voltage on RF-Ports and RF-Ground	$V_{RFDC}$	0	–	0	V	No DC voltages allowed on RF-Ports
RFFE Supply Voltage	$V_{IO}$	-0.5	–	3.6	V	–
RFFE Control Voltage Levels	$V_{SCLK}$ , $V_{SDATA}$	-0.7	–	$V_{IO}+0.7$ (max. 3.6)	V	–

**Warning: Stresses above the max. values listed here may cause permanent damage to the device. Maximum ratings are absolute ratings; exceeding only one of these values may cause irreversible damage to the integrated circuit. Exposure to conditions at or below absolute maximum rating but above the specified maximum operation conditions may affect device reliability and life time. Functionality of the device might not be given under these conditions.**

## Low Resistance Antenna Aperture Switch

### MIPI RFFE Specification

## 6 MIPI RFFE Specification

All sequences are implemented according to the 'MIPI Alliance Specification for RF Front-End Control Interface' document version 1.10 - 26. July 2011.

**Table 13: MIPI Features**

Feature	Supported	Comment
Register write command sequence	Yes	
Register read command sequence	Yes	
Extended register write command sequence	No	Up to 4 Bytes
Extended register read command sequence	No	Up to 4 Bytes
Register 0 write command sequence	Yes	
Trigger function	Yes	Trigger assignment to each control register is supported
Programmable USID	Yes	3 register command sequence and extended register command sequence
Status Register	Yes	Register for debugging
Reset	Yes	By VIO, Power Mode and RFFE_STATUS
Group SID	Yes	
USID_Sel pin	Yes	External pin for changing USID: 1: Pin 5=SDATA and Pin 6=SCLK→ 1100, 2: Pin 5=SCLK and Pin 6=SDATA→ 1101
Full speed write	Yes	
Half speed read	Yes	
Full speed read	Yes	

**Table 14: Startup Behavior**

Feature	State	Comment
Power status	LOW POWER	The chip is in low power mode after startup
Trigger function	ENABLED	Trigger function is enabled after startup. Trigger function can be disabled via PM_TRIG register.

**Figure 4:** Received clock signal constraints

**Table 15: MIPI RFFE Operating Timing**

Parameter	Symbol	Values			Unit	Note / Test Condition
		Min.	Typ.	Max.		
SCLK Frequency	FSCLK	0.032	-	26	MHz	Full speed
		0.032	-	13	MHz	Half speed
SCLK Period	TSCLK	0.038	-	32	$\mu$ s	Full speed
		0.077	-	32	$\mu$ s	Half speed

#### IMPORTANT NOTICE

The information given in this document shall in no event be regarded as a guarantee of conditions or characteristics ("Beschaffungsgarantie"). With respect to any examples, hints or any typical values stated herein and/or any information regarding the application of the product, Infineon Technologies hereby disclaims any and all warranties and liabilities of any kind, including without limitation warranties of non-infringement of intellectual property rights of any third party. In addition, any information given in this document is subject to customer's compliance with its obligations stated in this document and any applicable legal requirements, norms and standards concerning customer's products and any use of the product of Infineon Technologies in customer's applications. The data contained in this document is exclusively intended for technically trained staff. It is the responsibility of customer's technical departments to evaluate the suitability of the product for the intended application and the completeness of the product information given in this document with respect to such application.

For further information on technology, delivery terms and conditions and prices, please contact the nearest Infineon Technologies Office ([www.infineon.com](http://www.infineon.com)).

#### WARNINGS

Due to technical requirements products may contain dangerous substances. For information on the types in question please contact your nearest Infineon Technologies office.

Except as otherwise explicitly approved by Infineon Technologies in a written document signed by authorized representatives of Infineon Technologies, Infineon Technologies products may not be used in any applications where a failure of the product or any consequences of the use thereof can reasonably be expected to result in personal injury.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
