

# **Improved Precision Micropower Shunt Voltage Reference with Multiple Reverse Breakdown Voltages**

## **General Description**

The LM4040 is a precision two-terminal shunt mode, bandgap voltage reference available in fixed reverse breakdown voltages of 2.048V, 2.500V, 3.000V, 3.3V, 4.096V, and 5.000V. Ideal for space-critical applications, the LM4040 is offered in the subminiature 3-pin SC70 surface-mount package (1.8mm × 1.8mm), 50% smaller than comparable devices in SOT23 surface-mount packages (SOT23 versions are also available).

Laser-trimmed resistors ensure precise initial accuracy. With a 100ppm/°C temperature coefficient, the device is offered in four grades of initial accuracy ranging from 0.1% to 1%. The LM4040 has a 60μA to 15mA shunt current capability with low dynamic impedance, ensuring stable reverse breakdown voltage accuracy over a wide range of operating temperatures and currents.

The LM4040 does not require an external stabilizing capacitor while ensuring stability with any capacitive load.

The LM4040 is guaranteed over the temperature range of -40°C to +125°C.

For a 1.225V output version, refer to the LM4041 data sheet.

## **Applications**

Portable, Battery-Powered Equipment  
 Notebook Computers  
 Cell Phones  
 Industrial Process Controls

## **Features**

- ◆ Ultra-Small 3-Pin SC70 Package
- ◆ 0.1% (max) Initial Accuracy
- ◆ 100ppm/°C (max) Temperature Coefficient  
 Guaranteed over -40°C to +125°C Temperature Range
- ◆ Wide Operating Current Range: 60μA to 15mA
- ◆ Low 28μVRMS Output Noise (10Hz to 10kHz)
- ◆ 2.048V, 2.500V, 3.000V, 3.3V, 4.096V, and 5.000V  
 Fixed Reverse Breakdown Voltages
- ◆ No Output Capacitors Required
- ◆ Tolerates Capacitive Loads

## **Pin Configuration**

Ordering Information appears at end of data sheet.

# LM4040

## Improved Precision Micropower Shunt Voltage Reference with Multiple Reverse Breakdown Voltages

### ABSOLUTE MAXIMUM RATINGS

Reverse Current (cathode to anode) .....20mA  
 Forward Current (anode to cathode) .....10mA  
 Continuous Power Dissipation ( $T_A = +70^\circ\text{C}$ )  
     3-Pin SC70 (derate 2.17mW/ $^\circ\text{C}$  above  $+70^\circ\text{C}$ ) .....174mW  
     3-Pin SOT23 (derate 4.01mW/ $^\circ\text{C}$  above  $+70^\circ\text{C}$ ) .....320mW

Operating Temperature Range  
     LM4040\_I\_ \_ ..... $-40^\circ\text{C}$  to  $+85^\circ\text{C}$   
     LM4040\_E\_ \_ ..... $-40^\circ\text{C}$  to  $+125^\circ\text{C}$   
 Storage Temperature Range ..... $-65^\circ\text{C}$  to  $+150^\circ\text{C}$   
 Junction Temperature ..... $+150^\circ\text{C}$   
 Lead Temperature (soldering, 10s) ..... $+300^\circ\text{C}$   
 Soldering Temperature (reflow) ..... $+260^\circ\text{C}$

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

### ELECTRICAL CHARACTERISTICS—2.048V

( $I_R = 100\mu\text{A}$ ,  $T_A = T_{\text{MIN}}$  to  $T_{\text{MAX}}$ , unless otherwise noted. Typical values are at  $T_A = +25^\circ\text{C}$ .) (Note 1)

|                                                                 |                       |                                                  | LM4040D        | 0.5       |       | 1.5       |                 |
| Wideband Noise                                                  | $e_N$                 | $I_R = 100\mu A$ , $10Hz \leq f \leq 10kHz$      |                | 80        |       |           | $\mu V_{RMS}$   |
| Reverse Breakdown Voltage Long-Term Stability                   | $\Delta V_R$          | $T = 1000h$                                      |                | 120       |       |           | ppm             |

**Note 1:** All devices are 100% production tested at  $T_A = +25^\circ C$  and are guaranteed by design for  $T_A = T_{MIN}$  to  $T_{MAX}$ , as specified.

**Note 2:** The overtemperature limit for Reverse Breakdown Voltage Tolerance is defined as the room-temperature Reverse Breakdown Voltage Tolerance  $\pm[(\Delta V_R/\Delta T)(\max \Delta T)(V_R)]$ , where  $\Delta V_R/\Delta T$  is the  $V_R$  temperature coefficient,  $\max \Delta T$  is the maximum difference in temperature from the reference point of  $+25^\circ C$  to  $T_{MIN}$  or  $T_{MAX}$ , and  $V_R$  is the reverse breakdown voltage. The total overtemperature tolerance for the different grades in the temperature range where  $\max \Delta T = +65^\circ C$  is shown below:

A grade:  $\pm 0.75\% = \pm 0.1\% \pm 100ppm/^\circ C \times 65^\circ C$

B grade:  $\pm 0.85\% = \pm 0.2\% \pm 100ppm/^\circ C \times 65^\circ C$

C grade:  $\pm 1.15\% = \pm 0.5\% \pm 100ppm/^\circ C \times 65^\circ C$

D grade:  $\pm 1.98\% = \pm 1.0\% \pm 150ppm/^\circ C \times 65^\circ C$

The total over-temperature tolerance for the different grades in the extended temperature range where  $\max \Delta T = +100^\circ C$  is shown below:

A grade:  $\pm 1.1\% = \pm 0.1\% \pm 100ppm/^\circ C \times 100^\circ C$

B grade:  $\pm 1.2\% = \pm 0.2\% \pm 100ppm/^\circ C \times 100^\circ C$

C grade:  $\pm 1.5\% = \pm 0.5\% \pm 100ppm/^\circ C \times 100^\circ C$

D grade:  $\pm 2.5\% = \pm 1.0\% \pm 150ppm/^\circ C \times 100^\circ C$

Therefore, as an example, the A-grade LM4040-2.5 has an over-temperature reverse breakdown voltage tolerance of  $\pm 2.5V \times 0.75\% = \pm 19mV$ .

**Note 3:** Guaranteed by design.

### Pin Description

| PIN | NAME | FUNCTION                                                         |
|-----|------|------------------------------------------------------------------|
| 1   | +    | Positive Terminal of the Shunt Reference                         |
| 2   | -    | Negative Terminal of the Shunt Reference                         |
| 3   | N.C. | No connection. Leave this pin unconnected or connected to pin 2. |

### Detailed Description

The LM4040 shunt references use the bandgap principle to produce a stable, accurate voltage. The device behaves similarly to an ideal zener diode; a fixed voltage is maintained across its output terminals when biased with 60µA to 15mA of reverse current. The LM4040 behaves similarly to a silicon diode when biased with forward currents up to 10mA.

Figure 3 shows a typical operating circuit. The LM4040 is ideal for providing a stable reference from a high-voltage power supply.

### Applications Information

The LM4040's internal pass transistor is used to maintain a constant output voltage ( $V_{SHUNT}$ ) by sinking the necessary amount of current across a source resistor. The source resistance ( $R_S$ ) is determined from the load current ( $I_{LOAD}$ ) range, supply voltage ( $V_S$ ) variations,  $V_{SHUNT}$ , and desired quiescent current.

Choose the value of  $R_S$  when  $V_S$  is at a minimum and  $I_{LOAD}$  is at a maximum. Maintain a minimum  $I_{SHUNT}$  of 60µA at all times. The  $R_S$  value should be large enough to keep  $I_{SHUNT}$  less than 15mA for proper regulation when  $V_S$  is maximum and  $I_{LOAD}$  is at a minimum. To prevent damage to the device,  $I_{SHUNT}$  should never exceed 20mA.

Therefore, the value of  $R_S$  is bounded by the following equation:

$$\frac{[V_S(\text{MIN}) - V_R]}{[60\mu\text{A} + I_{LOAD}(\text{MAX})]} > R_S > \frac{[V_S(\text{MAX}) - V_R]}{[20\text{mA} + I_{LOAD}(\text{MIN})]}$$

Choosing a larger resistance minimizes the total power dissipation in the circuit by reducing the shunt current ( $P_{D(TOTAL)} = V_S \times I_{SHUNT}$ ). Provide a safety margin to incorporate the worst-case tolerance of the resistor used. Ensure that the resistor's power rating is adequate, using the following general power equation:

$$PDR = I_{SHUNT} \times (V_S(\text{MAX}) - V_{SHUNT})$$

### Output Capacitance

The LM4040 does not require an external capacitor for frequency stability and is stable for any output capacitance.

Figure 3. Typical Operating Circuit

### Temperature Performance

The LM4040 typically exhibits an output voltage temperature coefficient within  $\pm 15\text{ppm}/^\circ\text{C}$ . The polarity of the temperature coefficient may be different from one device to another; some may have positive coefficients, and others may have negative coefficients.

### High Temperature Operation

The maximum junction temperature of the LM4040 is  $+150^\circ\text{C}$ . The maximum operating temperature for the LM4040\_E\_ is  $+125^\circ\text{C}$ . At a maximum load current of 15mA and a maximum output voltage of 5V, the part will dissipate 75mW of power. The power dissipation limits of the 3-pin SC70 call for a derating value of  $2.17\text{mW}/^\circ\text{C}$  above  $+70^\circ\text{C}$  and thus for 75mW of power dissipation, the part will self-heat to  $35.56^\circ\text{C}$  above ambient temperature. If the ambient temperature is  $+125^\circ\text{C}$ , the part operates at  $159.56^\circ\text{C}$ , thereby exceeding the maximum junction temperature value of  $+150^\circ\text{C}$ . For high-temperature operation, care must be taken to ensure the combination of ambient temperature, output power dissipation and package thermal resistance does not conspire to raise the device temperature beyond that listed in the *Absolute Maximum Ratings*. Either reduce the output load current or the ambient temperature to keep the part within the limits.

+Denotes a lead(Pb)-free/RoHS-compliant package.

T = Tape and reel.

### Chip Information

PROCESS: BiCMOS

### Package Information

For the latest package outline information and land patterns (footprints), go to [www.maximintegrated.com/packages](http://www.maximintegrated.com/packages). Note that a "+", "#", or "-" in the package code indicates RoHS status only. Package drawings may show a different suffix character, but the drawing pertains to the package regardless of RoHS status.

| PACKAGE TYPE | PACKAGE CODE | OUTLINE NO.             | LAND PATTERN NO.        |
|--------------|--------------|-------------------------|-------------------------|
| 3 SOT23      | U3+1         | <a href="#">21-0051</a> | <a href="#">90-0179</a> |
| 3 SC70       | X3+2         | <a href="#">21-0075</a> | <a href="#">90-0208</a> |

# LM4040

## Improved Precision Micropower Shunt Voltage Reference with Multiple Reverse Breakdown Voltages

### Revision History

| REVISION NUMBER | REVISION DATE | DESCRIPTION                                                                                                | PAGES CHANGED    |
|-----------------|---------------|------------------------------------------------------------------------------------------------------------|------------------|
| 0               | 8/00          | Initial release                                                                                            | —                |
| 5               | 7/05          | Updated <i>Electrical Characteristics</i> .                                                                | 2–7              |
| 6               | 4/11          | Updated <i>Selector Guide</i> , <i>Absolute Maximum Ratings</i> , and <i>Ordering Information</i> .        | 1, 2, 12, 13, 14 |
| 7               | 11/11         | Add /V+ automotive-qualified identification to the <i>Selector Guide</i> and <i>Ordering Information</i> . | 1, 12            |
| 8               | 3/13          | Updated <i>Ordering Information</i> and removed <i>Selector Guide</i> .                                    | 1, 13, 14        |

Maxim Integrated cannot assume responsibility for use of any circuitry other than circuitry entirely embodied in a Maxim Integrated product. No circuit patent licenses are implied. Maxim Integrated reserves the right to change the circuitry and specifications without notice at any time. The parametric values (min and max limits) shown in the *Electrical Characteristics* table are guaranteed. Other parametric values quoted in this data sheet are provided for guidance.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,  
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
