

# SFH757 and SFH757V

## Transmitter for Polymer Optical Fiber Applications

### Data Sheet

### Description

The SFH757 is a low-cost transmitter diode for optical data transmission with polymer optical fiber. Its InGaAlP LED chip provides enhanced resistance to humidity and is designed to emit light at 650 nm. The robust SFH757 can be used for speeds up to 100 MBd and complements the Avago SFH250 photodiode receiver and SFH551/1-1 integrated photo detector receiver.

The SFH series is optimized for easy coupling. No fiber stripping is required; just insert the cut fiber into the selected SFH component.

### SFH757

The transparent plastic package has an aperture where a 2.2 mm fiber end can be inserted. This very easy coupling method is extremely cost-effective.

### SFH757V

The V-housing allows easy coupling of unconnectorized 2.2 mm polymer optical fiber with an axial locking screw.

### Ordering Information

**SFH757**

**SFH757V**

| Type    | Ordering Code |
|---------|---------------|
| SFH757  | SP000063871   |
| SFH757V | SP000063858   |

### Features

- High speed transmitter for up to 100MBd applications (with peaking circuits)
- 2.2mm aperture holds standard 980/1000/2200µm plastic fibers
- No fiber stripping required
- Molded microlens for efficient coupling

### Plastic Direct Fiber Connector housing (V-housing)

- Locking screw attached to the connector
- Interference-free transmission by the light-tight housing
- Transmitter and receiver can be positioned flexibly
- No cross talk
- Auto insertable and wave solderable
- Supplied in tubes

### Applications

- Household electronics
- Power electronics
- Optical networks
- Light barriers

### Application Literature

| AN # | Description                                                                                                              |

## Package Dimensions

### SFH757

### SFH757V

### Package V-housing Color

SFH V-series components are color coded just like other Avago fiber optic components. The SFH757V transmitter has a white colored housing; the SFH250V and SFH551/1-1V receiver components have a black colored housing. This prevents mistakes while making connections. Product designation and date of manufacture are printed on the housing.

### Package V-housing mounting pins

SFH V-series components have two pins that are electrically isolated from the inner circuit. The pins are only designed for mounting the V-housing to the PCB surface. This helps increase stability, which is needed during fixing the fiber end by the axial locking screw.

The retention force between the soldered mounting pins and the V-housing of the SFH component is about 20 N (with a vertical exertion of force). This is an approximate value.

### Package V-housing axial locking screw

Components of the SFH V-series are equipped with an axial locking screw for easy coupling to the unconnectorized 2.2 mm polymer optical fiber. The force that is necessary to pull a jammed fiber out of the V-housing is typically 50 N (with a torque of 15 cNm for tightening the locking screw). This is an approximate value that is very dependent on the fiber and torque combination.

Package V-housing mounting pins

Package V-housing axial locking screw

## Technical Data

### Absolute Maximum Ratings

| Parameter                                             | Symbol            | Min | Typ  | Max  | Unit | Notes | Figure |
|-------------------------------------------------------|-------------------|-----|------|------|------|-------|--------|
| Operating Temperature range                           | T <sub>C</sub>    | -40 |      | +85  | °C   |       |        |

|                                                   | P <sub>OPT</sub>  | -12.5 |      | -1.5 | dBm  | 3,5   | 3      |

| Coefficient                             | Symbol            | Value | Unit | Notes | Figure |
|-----------------------------------------|-------------------|-------|------|-------|--------|
| Optical Power Temperature Coefficient   | T <sub>POPT</sub> | -0.4  | %/K  | 6,7   |        |
| Forward Voltage Temperature Coefficient | T <sub>VF</sub>   | -1.8  | mV/K |       |        |
| Wavelength Temperature Coefficient      | T <sub>λ</sub>    | 0.16  | nm/K |       |        |

\* Typical value = mean value at TA = 25°C

Notes:

1. Given switching time values can be reduced by suitable driver circuits. Also an increase of LED-Current leads to a reduction of the switching times.
2. Measured at 25°C
3. The optical output power coupled into a polymere optical fiber (NA=0.5) is measured with a large area detector at the end of a short fiber (about 1m).
4. Driver circuit for the characterization process: see Figure 2 (Vcc=5.0V; installed R<sub>ILED</sub> = 100Ohm)
5. Value<sub>dBm</sub>=10\*log(Value<sub>measured</sub>/1mW)
6. Only valid for a used LED-current in the range of 10mA to 50mA (DC-Current). Optical Power Temperature Coefficient for temperatures between -40°C and 25°C is almost 0%/K.
7. Value for +25°C to +85°C

# OCEAN CHIPS

## Океан Электроники

### Поставка электронных компонентов

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

#### Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибутором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибутором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,  
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
