Revision History

Date	Revision Level	Description	Page No
May 2008	10	Added Z8F6423FT020 to Introduction section.	1
		Removed Application Notes from Documentation section.	3
March 2008	09	Changed document title to Z8 Encore! XP® F64XX Series Development Kit User Manual.	All
November 2007	08	Replaced Z8 Encore!® with Z8 Encore! XP® and Z8 Encore!® 64K Series MCUs with Z8 Encore! XP® 64K Series Flash Microcontrollers throughout the document.	All
November 2007	07	Replaced ZiLOG with Zilog. Updated Zilog logo. Updated Documentation and MCU sections.	All 3, 7
December 2006	06	Changed Figure 1 to Figure 2.	6
July 2006	05	Added reference to USB Smart Cable.	1
November 2005	04	Removed the word Preliminary from all page footers and updated trademarks.	All

Introduction

Zilog's Z8 Encore! XP[®] F64XX Series MCUs are a part of the line of Zilog[®] microcontroller products.

The Z8 Encore! XP F64XX Series Development Kit (Z8F64200100KITG) allows you to get familiar with the hardware and software tools available with this product. This kit consists of the 64 KB version of the Z8 Encore! XP Development Board that supports and presents the features of the Z8 Encore! XP F64XX Series. The software development tool kit allows you to write application software and contains all supporting documents.

Z8F6423FT020 is the silicon used in the board. For more details, refer to *Z8 Encore! XP[®] F64XX Series Product Specification (PS0199)* available for download at www.zilog.com.

This user manual acquaints you with the Z8 Encore! XP F64XX Series Development Kit, and provides instructions on setting up and using the tools to start building designs and applications.

Safeguards

The following precautions must be observed when working with the devices described in this document.

Caution: *Always use a grounding strap to prevent damage resulting from electrostatic discharge (ESD).*

Kit Contents

The Z8 Encore! XP F64XX Series Development Kit contains the following hardware and software:

Hardware

The hardware in Z8 Encore! XP F64XX Series Development Kit includes:

- Z8 Encore! XP Z8F642 Development Board
- USB Smart Cable for PC to Z8 Encore! XP[®] Z8F642 development board (Previous versions of the development kit used a serial smart cable. Refer your original documentation for information on using the serial smart cable).
- 5 V DC power supply

**Figure 1. Z8 Encore! XP MCU Development Kit Contents
(USB Smart Cable not shown)**

Software (on CD-ROM)

The software in Z8 Encore! XP F64XX Series Development Kit includes:

- ZDS II - Z8 Encore! IDE with ANSI C-Compiler
- Sample code
- Document browser
- Acrobat Reader

Documentation

- Z8 Encore! XP® F64XX Series Development Kit Quick Start Guide (QS0028)
- Z8 Encore! XP Z8F642 technical documentation (on CD-ROM):
 - Z8 Encore! XP® F64XX Series Development Kit User Manual (UM0151)
 - Zilog Developer Studio II - Z8 Encore!® User Manual (UM0130)
 - eZ8™ CPU User Manual (UM0128)
 - Z8 Encore! XP® F64XX Series Product Specification (PS0199)
 - Z8 Encore! XP® F64XX Series Product Brief (PB0124)
 - Programmer's Reference Sheet

The sample code is installed with ZDS II and resides in the <installation directory>\samples folder.

The documentation can be installed with the DemoShield interface or can be viewed on the CD-ROM using the DemoShield menus and a PDF reader. A copy of the Acrobat installer is provided on the CD-ROM and can be installed from the DemoShield install screen. After installing the documentation Windows Explorer can be used to select any document to be viewed with PDF file viewer.

System/Software Requirements

IBM PC (or compatible computer) with the following minimum configurations:

Supported Host System Configuration

- Win98 Second Edition/WinNT 4.0 Service Pack 6 (USB Smart Cable not supported)/Win2000 Service Pack 4/Windows XP Professional
- PentiumII/233 MHz processor or higher up to Pentium IV, 2.8 GHz
- 96 MB RAM or more
- 25 MB hard disk space or more (no documentation)
- Super VGA video adapter
- CD-ROM
- One or more RS-232 communication ports
- USB high-speed port (when using USB Smart Cable)

Installation

Refer to the directions provided in the Quick Start guide for software installation and setup of the Z8 Encore! XP® F64XX Series development kit.

F64XX Series Development Board

Introduction

The Z8 Encore! XP® F64XX Series development board is a development and prototyping board for the Z8 Encore! XP Z8F642 microcontroller. The board allows you to evaluate features of Z8 Encore! XP F64XX Series and to develop an application before building the hardware.

Figure 2. Z8 Encore! XP F64XX Series Development Board

Features

The features of Z8 Encore! XP F64XX Series development board includes:

- Z8 Encore! XP MCU
- 3 LEDs
- RS-232 interface (P1)
- IrDA transceiver (U4)
- Two pushbuttons, RESET and TEST
- 5 V DC power connector (J1)
- On-Chip Debugger interface (P2)
- Crystal Oscillator (Y1)
- Header for Analog-to-Digital Converter (ADC) input (J2)
- Prototyping area
- External interface connectors JP1 and JP2 (not populated)

MCU

The Z8 Encore! XP Z8F642 MCU is member of a family of Zilog® micro-controller products based on Zilog's 8-bit eZ8™ core CPU. The Flash in-circuit programming capability allows for faster development time and program changes in the field. The eZ8 core CPU is upward compatible with existing Z8® instructions. The rich peripheral set of the Z8 Encore! XP Z8F642 makes it suitable for various applications including motor control, security systems, home appliances, personal electronic devices, and sensors.

The development board contains circuitry to support and present all the features of the Z8 Encore! XP® Z8F642. The main features of the Z8 Encore! XP Z8F642 MCU are:

- eZ8™ core CPU
- Up to 64 KB of Flash memory with in-circuit programming capability
- Up to 4 KB of register RAM
- Either eight or twelve channels, 10-bit ADC
- Two Full-duplex UART
- I²C interface (Master Mode only)
- Serial Peripheral Interface (SPI)
- Infrared Data Association (IrDA)-compliant infrared encoder/decoder
- Three or four 16-bit timers with capture, compare, and PWM capability
- Watchdog Timer (WDT) with internal RC oscillator
- Thirty one, forty six or sixty I/O pins
- Programmable priority interrupts
- On-Chip Debugger (OCD)
- Voltage Brownout Protection (VBO)
- Power-on Reset (POR)
- 2.7 V to 3.6 V operating voltage with 5 V-tolerant inputs
- Operating temperature: 20 °C ± 10 °C

For more information on the Z8 Encore! XP family of devices, refer to *Z8 Encore! XP® F64XX Series Product Specification (PS0199)* available for download at www.zilog.com.

IrDA Transceiver with Endec

The Z8 Encore! XP® Z8F642 contains a fully-functional, high-performance UART with Infrared Encoder/Decoder (Endec). The Infrared Endec is integrated with an on-chip UART to allow easy communication between the Z8 Encore! XP Z8F642 and IrDA transceivers. Infrared communication provides secure, reliable, low-cost, point-to-point communication between PCs, PDAs, cell phones, printers and other infrared enabled devices.

Power and Communication Interfaces

[Table 1](#) provides jumper information concerning the shunt status, functions and devices affected by selected jumpers.

Table 1. Jumpers JP3 and JP4

Jumper	Status	Device Affected	Status	Default
JP3	OUT*	IrDA interface	Enable	
JP3	IN	IrDA interface	Disable	X
JP4**	OUT*	RS-232	Enable	X
JP4	IN	RS-232	Disable	
<p>* These jumpers must not be OUT at the same time.</p> <p>** If the module is plugged onto an eZ80® Development platform or eZ80 demonstration board the local RS-232 can be disabled by connecting header JP2 pin 50 to the corresponding GND on the mating connector.</p>				

External Interface Connectors JP1 and JP2

The external interface connectors are not populated when the board is shipped. You can insert 0.1" space headers of choice.

► **Note:** *Only Power and GND nets on connector JP1 are used on this module.*

Schematics

This section provides schematics for the Z8 Encore! XP[®] F64XX Series Development Board.

Warning: DO NOT USE IN LIFE SUPPORT

LIFE SUPPORT POLICY

ZILOG'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS PRIOR WRITTEN APPROVAL OF THE PRESIDENT AND GENERAL COUNSEL OF ZILOG CORPORATION.

As used herein

Life support devices or systems are devices which (a) are intended for surgical implant into the body, or (b) support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in a significant injury to the user. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system or to affect its safety or effectiveness.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
