

FEATURES

- Operate with 3.3 V supply**
- Interoperable with 5 V logic**
- EIA RS-422 and RS-485 compliant over full common-mode range**
- Data rate options**
 - ADM3483/ADM3488: 250 kbps**
 - ADM3485/ADM3490/ADM3491: 10 Mbps**
- Half- and full-duplex options**
- Reduced slew rates for low EMI (ADM3483 and ADM3488)**
- 2 nA supply current in shutdown mode (ADM3483/ADM3485/ADM3491)**
- Up to 32 transceivers on the bus**
- 7 V to +12 V bus common-mode range**
- Specified over the -40°C to +85°C temperature range**
- 8 ns skew (ADM3485/ADM3490/ADM3491)**
- 8-lead SOIC and 14-lead SOIC (ADM3491 only) packages**

APPLICATIONS

- Low power RS-485/RS-422 applications**
- Telecom**
- Industrial process control**
- HVAC**

GENERAL DESCRIPTION

The ADM3483/ADM3485/ADM3488/ADM3490/ADM3491 are low power, differential line transceivers designed to operate using a single 3.3 V power supply. Low power consumption, coupled with a shutdown mode, makes the ADM3483/ADM3485/ADM3488/ADM3490/ADM3491 ideal for power-sensitive applications.

The ADM3488/ADM3490/ADM3491 feature full-duplex communication, while the ADM3483/ADM3485 are designed for half-duplex communication.

The ADM3483/ADM3488 feature slew rate limited drivers that minimize EMI and reduce reflections caused by improperly terminated cables, allowing error-free data transmission at data rates up to 250 kbps.

The ADM3485/ADM3490/ADM3491 transmit at up to 10 Mbps. The receiver input impedance is 12 k Ω , allowing up to 32 transceivers to be connected on the bus. A thermal shutdown circuit prevents excessive power dissipation caused by bus contention or by output shorting. If a significant temperature increase is detected

FUNCTIONAL BLOCK DIAGRAMS

Figure 1.

Figure 2.

Figure 3.

in the internal driver circuitry during fault conditions, then the thermal shutdown circuit forces the driver output into a high impedance state. If the inputs are unconnected (floating), the receiver contains a fail-safe feature that results in a logic high output state. The parts are fully specified over the commercial and industrial temperature ranges. The ADM3483/ADM3485/ADM3488/ADM3490 are available in 8-lead SOIC_N; the ADM3491 is available in a 14-lead SOIC_N.

¹ The transceivers are put into shutdown by bringing the \overline{RE} high and DE low. If the inputs are in this state for less than 80 ns, the parts are guaranteed not to enter shutdown. If the parts are in this state for 300 ns or more, the parts are guaranteed to enter shutdown.

ABSOLUTE MAXIMUM RATINGS

$T_A = 25^\circ\text{C}$, unless otherwise noted.

Table 6.

Parameter	Rating
V_{CC} to GND	7 V
Digital I/O Voltage (DE, $\overline{\text{RE}}$, DI)	-0.3 V to +6 V
Digital I/O Voltage (RO)	$V_{CC} - 0.5 \text{ V}$ to $V_{CC} + 0.5 \text{ V}$
Driver Output/Receiver Input Voltage	-7.5 V to +12.5 V
Operating Temperature Range	-40°C to +85°C
Storage Temperature Range	-65°C to +125°C
θ_{JA} Thermal Impedance	
8-Lead SOIC	121°C/W
14-Lead SOIC	86°C/W
Lead Temperature	
Soldering (10 sec)	300°C
Vapor Phase (60 sec)	215°C
Infrared (15 sec)	220°C

Stresses above those listed under Absolute Maximum Ratings may cause permanent damage to the device. This is a stress rating only; functional operation of the device at these or any other conditions above those indicated in the operational section of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

ESD CAUTION

ESD (electrostatic discharge) sensitive device. Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

PIN CONFIGURATIONS AND FUNCTION DESCRIPTIONS

CIRCUIT DESCRIPTION

The ADM3483/ADM3485/ADM3488/ADM3490/ADM3491 are low power transceivers for RS-485 and RS-422 communications. The ADM3483/ADM3488 transmit and receive at data rates up to 250 kbps; the ADM3485/ADM3490/ADM3491 transmit at up to 10 Mbps. The ADM3488/ADM3490/ADM3491 are full-duplex transceivers, while the ADM3483/ADM3485 are half-duplex transceivers. Driver enable (DE) and receiver enable ($\overline{\text{RE}}$) pins are included on the ADM3483/ADM3485/ADM3491. When disabled, the driver and receiver outputs are high impedance.

DEVICES WITH RECEIVER/DRIVER ENABLES (ADM3483/ADM3485/ADM3491)

Table 8. Transmitting Truth Table

Transmitting Input			Transmitting Output		Mode
$\overline{\text{RE}}$	DE	DI	B ¹	A ¹	
X ²	1	1	0	1	Normal
X ²	1	0	1	0	Normal
0	0	X ²	High-Z ³	High-Z ³	Normal
1	0	X ²	High-Z ³	High-Z ³	Shutdown

¹ A and B outputs are Y and Z, respectively, for full-duplex part (ADM3491).

² X = don't care.

³ High-Z = high impedance.

Table 9. Receiving Truth Table

Receiving Input			Receiving Output	Mode
$\overline{\text{RE}}$	DE ¹	A – B	RO	
0	0	$\geq +0.2\text{ V}$	1	Normal
0	0	$\leq -0.2\text{ V}$	0	Normal
0	0	Inputs Open	1	Normal
1	0	X ²	High-Z ³	Shutdown

¹ DE is a don't care; X for the full-duplex part (ADM3491).

² X = don't care.

³ High-Z = high impedance.

DEVICES WITHOUT RECEIVER/DRIVER ENABLES— ADM3488/ADM3490

Table 10. Transmitting Truth Table

Transmitting Input	Transmitting Output	
DI	Z	Y
1	0	1
0	1	0

Table 11. Receiving Truth Table

Receiving Input	Receiving Output
A – B	RO
$\geq +0.2\text{ V}$	1
$\leq -0.2\text{ V}$	0
Inputs open	1

REDUCED EMI AND REFLECTIONS (ADM3483/ADM3488)

The ADM3483/ADM3488 are slew rate limited transceivers, minimizing EMI and reducing reflections caused by improperly terminated cables.

LOW POWER SHUTDOWN MODE (ADM3483/ADM3485/ADM3491)

A low power shutdown mode is initiated by bringing $\overline{\text{RE}}$ high and DE low. The devices do not shut down unless both the driver and receiver are disabled (high impedance). In shutdown mode, the devices typically draw only 2 nA of supply current. For these devices, the t_{PSH} and t_{PSL} enable times assume the part is in the low power shutdown mode; the t_{PZH} and t_{PZL} enable times assume the receiver or driver was disabled, but the part is not shut down.

DRIVER OUTPUT PROTECTION

Two methods are implemented to prevent excessive output current and power dissipation caused by faults or by bus contention. Current limit protection on the output stage provides immediate protection against short circuits over the whole common-mode voltage range (see the Typical Performance Characteristics section). In addition, a thermal shutdown circuit forces the driver outputs into a high impedance state if the die temperature rises excessively.

PROPAGATION DELAY

Skew time is the difference between the low-to-high and high-to-low propagation delays. Small driver/receiver skew times help maintain a symmetrical mark-space ratio (50% duty cycle). The receiver skew time ($|t_{\text{prlh}} - t_{\text{prhl}}|$) is under 10 ns (20 ns for ADM3483/ADM3488). The driver skew times are 8 ns for ADM3485/ADM3490/ADM3491 and typically under 100 ns for ADM3483/ADM3488.

TYPICAL APPLICATIONS

The ADM3483/ADM3485/ADM3491 transceivers are designed for half-duplex bidirectional data communications on multipoint bus transmission lines, Figure 32 and Figure 33 show typical network applications circuits. The ADM3488 and the ADM3490 full-duplex transceivers are designed to be used in a daisy-chain network topology or in a point-to-point application, see Figure 34 and Figure 35. The ADM3491 can be used as line repeat Figure 36. To minimize reflections, the line must be terminated at both ends in its characteristic impedance, and stub lengths off the main line must be kept as short as possible. The slew rate limited ADM3483/ADM3488 are more tolerant of imperfect termination.

LINE LENGTH vs. DATA RATE

The RS-485 and RS-422 standards cover line lengths up to 4000 feet. For line lengths greater than 4000 feet, see Figure 36.

NOTES
1. R_T IS EQUAL TO THE CHARACTERISTIC IMPEDANCE OF THE CABLE.

¹ Z = RoHS Compliant Part.

NOTES

NOTES

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
