### 1 Description

The 6.2 mm **PLC-OS.../300DC/1** PLC INTERFACE module with screw or spring-cage connection has an integrated solid-state relay.

#### 1.1 Input Voltages From 5 V to 230 V

PLC-OS.../300DC/1 is available on the control side in all common industrial voltages from 5 V to 230 V. A further advantage is the ready-integrated input circuit. It consists of a status indicator and polarity reversal protection function, and ensures that the operating state is displayed clearly, also preventing destruction of the optical electronics should the polarity be accidentally reversed.

#### 1.2 Plug-In Bridges Save Wiring

The PLC INTERFACE module achieves maximum efficiency with the user-friendly FBST plug-in bridge system. PLC-OS.../300DC/1 makes effective use of the bridging options for the A1/A2 connection on the control side and for the supply at connection 13 on the load side. Especially efficient here are the 500 mm long color-insulated continuous plug-in bridges that can easily be cut to the required length and quickly inserted in the bridge shafts. They eliminate the need for complicated and time-consuming loop bridges.

#### 1.3 Additional Advantages

- Switching power of up to 300 V DC/1 A
- Wear-resistant switching
- Integrated protective circuit
- Resistant to vibrations and shocks
- 4 kV<sub>rms</sub> electrical isolation between input and output

<sup>1</sup> The PLC-ATP BK insulating plate must be installed for voltages greater than 250 V (L1, L2, L3) between the same terminal points on adjacent modules (see "Accessories"). FBST 8-PLC... or FBST 500... is then used for potential bridging.

For the protection of input and output, inductive loads must be dampened with an effective protective circuit.

### Accessories

Description	Type	Order No.	Pcs./Pck.
Insulating plate	PLC-ATP BK	2966841	25

The PLC-ATP BK insulating plate should be used in the following cases: always fit at the start and end of a PLC terminal strip for voltages greater than 250 V (L1, L2, L3) between the same terminal points on adjacent modules (FBST 8-PLC... or FBST 500... can be used for potential bridging) and for safe isolation between adjacent modules.
