

ELR W 3/9-400

ELR W 3/9-500

Electronic Reversing-Load Relay for 3-Phase Networks

Data Sheet

01/2005

Features

Electronic Reversing-Load Relay

ELR W 3/9... electronic reversing-load relays are the practical and user-friendly further development of electronic load relays for 3-phase networks.

These components feature high switching frequencies, virtually unlimited service life, no spark interference, and completely silent switching at zero voltage crossing. The compact, DIN rail-mountable modules meet all the requirements of an electronic reversing contactor circuit that has been designed specifically for industrial applications. Both the interlocking of control inputs and the complete wiring of the load contacts are incorporated in the device. Costly locking switches and contact wiring are thus a thing of the past.

Cabling has been reduced to an absolute minimum. Only the following must be applied:

- Control voltage, supply voltage input and output
- 3-phase load

The status is clearly indicated by separate LEDs for "right rotation", "left rotation", "operating voltage" or "impermissible control".

A short circuit between two phases at the moment of switching is prevented by the integrated delay between the control pulse and the load control.

RCV protective circuits on the output side reduce voltage peaks that occur in the load circuit to a safe level and prevent damage to the output electronics.

ELR W 3/9...

The ELR W 3/9... is the fully electronic alternative to mechanical contactors. It features a compact design and low control power. A further advantage is the high-quality, safe screw connection technology.

In accordance with DIN VDE 0110 and DIN VDE 0636, a conductor cross section of 1.5 mm² (16 AWG), which must be fitted with one fuse each (10 A slow-blow as mains protection), is required to connect the electronic load relay to the 3-phase network.

Technical Data

| Input Data (Input) | ELR W 3/9-400 | ELR W 3/9-500 |
|---|---|---------------|
| Operating voltage U_B | 24 V DC +25%; -20% ¹ | |
| Maximum current consumption | 40 mA | |
| Control voltage right/left | 24 V DC +25%; -20% ¹ | |
| Input current right/left | 6 mA, approximately | |
| Right rotation/left rotation switchover time (switch-on time) | 20 ms | |
| Input wiring | LED, diode for protection against polarity reversal, surge protection | |

¹ The operating voltage and control voltage inputs must be operated with power supply modules according to DIN 19240 (maximum 5% residual ripple). To prevent the inductive or capacitive coupling of disturbing pulses in long control cables, we recommend the use of shielded cables.

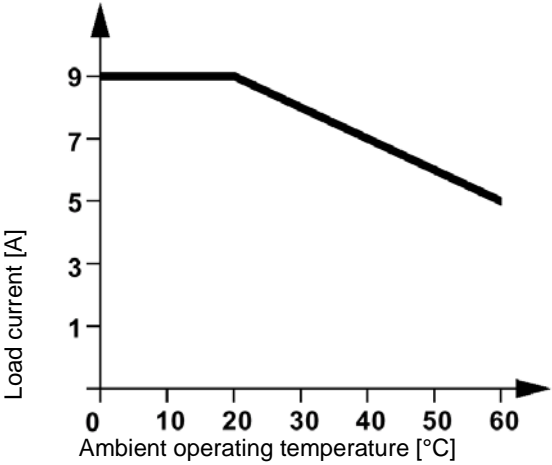

| Output Data (Output) | ELR W 3/9-400 | ELR W 3/9-500 | | | | | | | | |
|--|---|---------------------|------------------------------------|------------------|---|---|----|---|----|---|
| Operating voltage (conductor voltage) 50 Hz/60 Hz | 400 V AC | 500 V AC | | | | | | | | |
| Operating voltage range | 110 V AC - 440 V AC | 110 V AC - 550 V AC | | | | | | | | |
| Reverse voltage | 1000 V | 1200 V | | | | | | | | |
| Maximum continuous load current | 3 x 9 A | | | | | | | | | |
| Load current depending on the ambient operating temperature Operating time: 100% operating factor |  <p>The graph plots Load current [A] on the y-axis (0 to 9) against Ambient operating temperature [°C] on the x-axis (0 to 60). The current remains constant at 9 A from 0°C to 20°C. From 20°C to 60°C, the current decreases linearly to 5 A.</p> <table border="1"> <caption>Data points for Figure 1</caption> <thead> <tr> <th>Ambient operating temperature [°C]</th> <th>Load current [A]</th> </tr> </thead> <tbody> <tr> <td>0</td> <td>9</td> </tr> <tr> <td>20</td> <td>9</td> </tr> <tr> <td>60</td> <td>5</td> </tr> </tbody> </table> | | Ambient operating temperature [°C] | Load current [A] | 0 | 9 | 20 | 9 | 60 | 5 |
| Ambient operating temperature [°C] | Load current [A] | | | | | | | | | |
| 0 | 9 | | | | | | | | | |
| 20 | 9 | | | | | | | | | |
| 60 | 5 | | | | | | | | | |

Figure 1 Load current depending on the ambient operating temperature

| Output Data (Output) (Continued) | ELR W 3/9-400 | ELR W 3/9-500 |
|--|---|---------------|
| Power dissipation depending on the load current Operating time: 100% operating factor | <p>Figure 2 Power dissipation depending on the load current</p> | |
| Surge current | 230 A (t = 10 ms) | |
| Minimum load current | 150 mA | |
| Residual voltage at I_N | 1.7 V, typical | |
| Residual current in the OFF state | 6 mA, typical | |
| Reversing frequency right rotation/left rotation ($\cos \varphi = 0.5$) | 10 Hz, maximum | |
| Output wiring | RCV circuit, red LED (error message) | |

| General Data | |
|---|--|
| Housing dimensions (length x width x height) | 84 mm x 62 mm x 110 mm (3.307 x 2.441 x 4.331 in.) |
| Insulating housing version | Polycarbonate (PC), color: green |
| Test voltage I/O | 2.5 kV _{rms} |
| Ambient operating temperature range | -20°C to +60°C (-4°F to +140°F) |
| Standards/specifications | EN 61000-4-4/DIN EN 61000-4-4/VDE 0847-4-4; EN 61000-4-5/DIN EN 61000-4-5/VDE 0847-4-5; IEC 60664/IEC 60664 A/DIN VDE 0110, basic insulation |
| Degree of protection according to IEC 60529/EN 60529/DIN VDE 0470-1 | IP20 |
| Mounting position | Vertical (DIN rail horizontal) |
| Mounting | Can be mounted with spacing ≥ 20 mm (0.787 in.) |

Connection Data

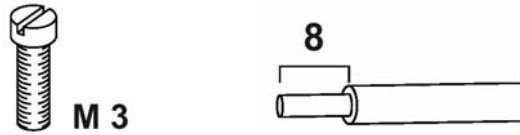

Figure 3 Connection data

The following cable cross sections can be connected:

| Solid [mm ²] | Stranded [mm ²] | AWG | Stripping Length L [mm] |
|--------------------------|-----------------------------|---------|-------------------------|
| 0.2 - 6 | 0.2 - 4 | 25 - 10 | 8 mm (0.31 in.) |

Block diagram

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
