

# QUICK START GUIDE FOR DEMONSTRATION CIRCUIT 1118A-A POLYPHASE HIGH DENSITY POWER MODULE

## LTM4601EV

### DESCRIPTION

Demonstration circuit 1118A-A features the LTM<sup>®</sup>4601EV, the high efficiency, high density switch mode step-down power modules. The input voltage range is from 5V to 20V. The output voltages are 3.3V and 2.5V; refer to step down ratio curve in the LTM4601 datasheet. The rated load currents are 10 A for 3.3V output and 12A for 2.5V output, while derating is necessary for certain  $V_{IN}$  and thermal conditions. The output of U2 is set to coincidentally track with the 3.3V output. Margining function is provided for the user who wants to stress their system by

varying supply voltages during testing; refer to data-sheet for functional diagram. The DC1118A-A has onboard 180 degree interleaving clock generator at 750 KHz. Integrated input and output filters enable a simple PCB layout. Only bulk input and output capacitors are needed.

**Design files for this circuit board are available. Call the LTC Factory.**

 , LTC, LT and LTM are registered trademarks of Linear Technology Corporation.

**Table 1. Performance Summary ( $T_A = 25\text{ }^\circ\text{C}$ )**

PARAMETER	CONDITION	VALUE
Minimum Input Voltage		5V
Maximum Input Voltage		20V
Output Voltage $V_{OUT1}$	$V_{IN} = 5 \text{ to } 20\text{V}$ , $I_{OUT} = 0 \text{ to } 10\text{A}$	$3.3\text{V} \pm 2\%$
Output Voltage $V_{OUT2}$	$V_{IN} = 5 \text{ to } 20\text{V}$ , $I_{OUT} = 0 \text{ to } 12\text{A}$	$2.5\text{V} \pm 2\%$
Default Operating Frequency		750kHz
Load Transient	$V_{IN} = 12\text{V}$ , $V_{OUT} = 3.3\text{V}$	See Figure 3 and Table 1 for details
	$V_{IN} = 12\text{V}$ , $V_{OUT} = 2.5\text{V}$	See Figure 4 and Table 1 for details

### QUICK START PROCEDURE

Demonstration circuit 1118A-A is easy to set up to evaluate the performance of the LTM4601EV. Please refer to Figure 1 for proper measurement equipment setup and follow the procedure below:

1. Place jumpers in the following positions for a typical application:

RUN	U1 & U2 MARG0	U1 & U2 MARG1
ON	LO	LO

2. With power off, connect the input power supply, load, and meters as shown in Figure 1. Preset

the load to 0A and  $V_{IN}$  supply to be less than 20V.

3. Turn on the power at the input. The output voltage of U1 should be  $3.3\text{V} \pm 2\%$ , while the output voltage of U2 should  $2.5\text{V} \pm 2\%$ .
4. Once the proper output voltage is established, adjust the load within the operating range and observe the output voltage regulation, ripple voltage, efficiency and other parameters. When measuring the input or output voltage ripple, care must be taken to avoid a long ground lead on the oscilloscope probe. Measure the input or output voltage ripple by touching the probe tip directly across the  $V_{IN}$  or  $V_{OUT}$  capacitors. See Figure 2 for proper scope probe technique.

# QUICK START GUIDE FOR DEMONSTRATION CIRCUIT 1118A-A POLYPHASE HIGH DENSITY POWER MODULE

- For tracking function test, shut down the power supply, discharge the output capacitors until outputs read 0V. Use single trigger of the oscilloscope to capture the input waveform and output waveforms of U1 and U2.
- For Margining function test, place jumper MARG0 and MARG1 in the configurations shown

in the following table, measure the output voltage at Vo+ and Vo-.

MARG1	MARG0	Vout
LO	LO	0
LO	HI	+5%
HI	LO	-5%
HI	HI	0

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
