

RFLA9002

Dual Low Noise Amplifier Module
698MHz to 960MHz

RFMD's RFLA9002 is a dual Low Noise Amplifier module with external connections to both LNAs. These LNAs feature a shutdown mode to turn off the LNA and provide up to 15dBm drive level without gain expansion and self-biasing in shutdown mode. Noise figure of 1.0dB and P1dB of 0dBm makes this component ideal for receiver input lineups. The RFLA9002 is packaged in a small 4.0mm x 4.0mm leadless laminate MCM. This module is internally matched to 50Ω on all RF ports making it easy to use with no use with no external matching components required.

Package: MCM, 24-pin,
4.0mm x 4.0mm

Features

- Frequency Range 698MHz to 960MHz
- Internally Matched to 50Ω on All RF Ports
- Shutdown Mode with +40dB Isolation
- Gain = 16dB per LNA
- Noise Figure of 1.0dB Typical
- Single +4.0V Supply
- Small 24-Pin, 4.0mm x 4.0mm, Multi-Chip Module (MCM)
