1.0 General Descriptions

1.1 Introduction

The TVL-55728D070J-LW-I-AAN is a color active matrix thin film transistor (TFT) liquid crystal display (LCD) that uses amorphous silicon TFT as a switching device. It is composed of a TFT LCD panel, a backlight system, column driver and row driver circuit. This TFT LCD has a 7.0-inch diagonally measured active display area with resolution 800 horizontal by 480 vertical pixels array.

1.2 Features

- 7.0" TFT LCD Panel
- LED Backlight System
- Supported 800x480 pixels resolution
- Compatible with RoHS standard

1.3 Product Summary

Items	Specifications	Unit
Screen Diagonal	7.0	Inch
Active Area	153.60 (H) x86.64 (V)	mm
Pixels H x V	800(RGB) x480	-
Pixel Pitch	0.192(H)x0.1805 (V)	mm
Pixel Arrangement	R.G.B. Vertical Stripe	-
Display Mode	Normally White	-
White Luminance	500	cd /m ²
Contrast Ratio	500	-
Response Time	16	msec
Input Voltage	3.0	V
Weight	TBD	g
Outline Dimension	165.0(H) x104.0(V) x5.1(D)	mm
Electrical Interface (Logic)	TTL	-
Support Color	6 bits / 6 bits+HFRC	-
Optimum Viewing Direction	6 O' clock	-
Surface Treatment	Antiglare, Hard-Coating (3H) with EWV film	-

Document Title	TVL-55728D070J-LW-I-AAN Product Information			Page No.	5/25
Document No.		Issue date	2013/03/18	Revision	04

2.0 Absolute Maximum Ratings

Table 1 Electrical Absolute Rating

Item	Symbol	Min.	Max.	Unit	Conditions
Power Supply Voltage	V_{CC}	-0.3	5.0	V	GND=0
	V_{GH}	0.3	40	V	GND=0
	V_{GL}	-20	0.3	V	GND=0
	AV_{DD}	0.5	15	V	GND=0
	V_{COM}	0	6	V	-
Logic Signal Input Level	V_I	-0.3	$V_{CC}+0.3$	V	-

Note (1) Permanent damage may occur to the LCD module if beyond this specification. Functional operation should be restricted to the conditions described under normal operating conditions.

(2) Operating temperature 25□, humidity 55%.

(3) Test Condition: LED current TBDmA.

Table 2 Reliability Absolute Rating

Item	Symbol	Min.	Max.	Unit	Note
Operating Temperature	TOP	-20	70	°C	(1),(2)
Storage Temperature	TST	-30	80	°C	(1),(2)
Vibration(non-operating)	V_{nop}	-	1.5	G	(3)
Shock(non-operating)	S_{nop}	-	240	G	(4)

Note (1) There is no display function fail occurred, all the cosmetic specification is judged before the reliability stress. The criteria is fit by KYD provided IIS.

(2) The storage /operating temperature. Maximum Wet-Bulb should be 39 degree C. There is no condensation on the panel surface.

(3) 10-500Hz, random vibration, 1h for X, Y, Z axis

(4) 2ms, half sine wave, one time for X, Y, Z axis

4.0 Optical Characteristics

The optical characteristics are measured under stable conditions as following notes

Table 3 Optical Characteristics

Item	Conditions		Min.	Typ.	Max.	Unit	Note		
Viewing Angle (CR>10)	Horizontal	θ_L	60	70	-	degree	(1),(2),(3)		
		θ_R	60	70	-				
	Vertical	θ_T	40	50	-				
		θ_B	50	60	-				
Contrast Ratio	Center		400	500	-	-	(1),(2),(4)		
Response Time	Rising		-	-	-	ms	(1),(2),(5)		
	Falling		-	-	-	ms			
	Rising + Falling		-	16	-	ms			
Color Chromaticity (CIE1931)	Red	x	Typ. -0.03	TBD	Typ. +0.03	-	(1),(2)		
	Red	y		TBD		-			
	Green	x		TBD		-			
	Green	y		TBD		-			
	Blue	x		TBD		-			
	Blue	y		TBD		-			
	White	x		0.305		0.310		0.315	-
	White	y		0.280		0.330		0.380	-
White Luminance	Center		400	500	-	cd/m ²	(1),(2),(6)		
Luminance Uniformity	9Points		70	-	-	%	(1),(2),(6)		

Document Title	TVL-55728D070J-LW-I-AAN Product Information			Page No.	8/25
Document No.		Issue date	2013/03/18	Revision	04

Note (1) Measurement Setup:

The LCD module should be stabilized at given temperature(25°C) for 15 minutes to Avoid abrupt temperature change during measuring. In order to stabilize the luminance, the measurement should be executed after lighting backlight for 15 minutes in a windless room.

Figure 2 Measurement Setup

Note (2) The LED input parameter setting as: I_LED: TBD

Note (3) Definition of Viewing Angle

Figure 3 Definition of Viewing Angle

Note (4) Definition Of Contrast Ratio (CR)

Document Title	TVL-55728D070J-LW-I-AAN Product Information	Page No.	9/25
Document No.		Issue date	2013/03/18
		Revision	04

The contrast ratio can be calculated by the following expression

$$\text{Contrast Ratio (CR)} = L63 / L0$$

L63: Luminance of gray level 63, L0: Luminance of gray level 0

Note (5) Definition Of Response Time (T_R , T_F)

Figure 4 Definition of Response Time

Note (6) Definition Of brightness Luminance

$$\text{Luminance uniformity} = \frac{(\text{Min Luminance of 9 points})}{(\text{Max Luminance of 9 points})} \times 100\%$$

H—Active area length V—Active area width

Figure 5 Measurement Locations

14.0 General Precaution

13.1 Use Restriction

This product is not authorized for use in life supporting systems, aircraft navigation control systems, military systems and any other application where performance failure could be life-threatening or otherwise catastrophic.

13.2 Handling Precaution

- (1) Please mount LCD module by using mounting holes arranged in four corners tightly.
- (2) Do not disassemble or modify the module. It may damage sensitive parts inside LCD module, and may cause scratches or dust on the display. KYD does not warrant the module, if customers disassemble or modify the module.
- (3) If LCD panel is broken and liquid crystal spills out, do not ingest or inhale liquid Crystal, and do not contact liquid crystal with skin. If liquid crystal contacts mouth or eyes, rinse out with water immediately. If liquid crystal contacts skin or cloths, wash it off immediately with alcohol and Rinse thoroughly with water.
- (4) Disconnect power supply before handling LCD module
- (5) Refrain from strong mechanical shock and /or any force to the module.
- (6) Do not exceed the absolute maximum rating values, such as the supply voltage variation, input voltage variation, variation in parts' parameters, environmental temperature; etc otherwise LCD module may be damaged. It's recommended employing protection circuit for power supply.
- (7) Do not touch, push or rub the polarizer with anything harder than HB pencil lead. Use fingerstalls of soft gloves in order to keep clean display quality, when Persons handle the LCD module for incoming inspection or assembly.
- (8) When the surface is dusty, please wipe gently with absorbent cotton or other soft Material. When cleaning the adhesives, please use absorbent cotton wetted with a little Petroleum benzene or other adequate solvent.
- (9) Wipe off saliva or water drops as soon as possible. If saliva or water drops Contact with polarizer for a long time, they may causes deformation or color Fading.

Document Title	TVL-55728D070J-LW-I-AAN Product Information			Page No.	25/25
Document No.		Issue date	2013/03/18	Revision	04

(10) Protection film must remove very slowly from the surface of LCD module to Prevent from electrostatic occurrence.

(11) Because LCD module uses CMOS-IC on circuit board and TFT-LCD panel, it is Very weak to electrostatic discharge, Please be careful with electrostatic Discharge .Persons who handle the module should be grounded through adequate methods.

(12) Do not adjust the variable resistor located on the module.

13.3 Storage Precaution

- (1) Please do not leave LCD module in the environment of high humidity and high temperature for a long time.
- (2) The module shall not be exposed under strong light such as direct sunlight. Otherwise, Display characteristics may be changed.
- (3) The module should be stored in a dark place. It is prohibited to apply sunlight or fluorescent light in storage.

13.4 Operation Precaution

- (1) Do not connect or disconnect the module in the "Power On" condition.
- (2) Power supply should always be turned on/off by 9.0 "Power on/off sequence"
- (3) Module has high frequency circuits. Sufficient suppression to the electromagnetic interference should be done by system manufacturers. Grounding and shielding methods may be important to minimize the interference.
- (4) After installation of the TFT Module into an enclosure, do not twist nor bend the TFT Module even momentary. At designing the enclosure, it should be taken into consideration that no bending/twisting forces are applied to the TFT Module from outside. Otherwise the TFT Module may be damaged.

13.5 Others

- (1) Ultra-violet ray filter is necessary for outdoor operation.
- (2) Avoid condensation of water which may result in improper operation or disconnection of electrode.
- (3) If the module keeps displaying the same pattern for a long period of time, the image may be "sticked" to the screen.
- (4) This module has its circuitry PCB's on the rear side and should be handled carefully in order not to be stressed.

13.6 Disposal

When disposing LCD module, obey the local environmental regulations.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
