
3A Load Switch IC

NO. EA-312-150320

OUTLINE

The R5527K is an N-channel load switch IC with low supply current, Typ. 40 μ A. By using an Nch transistor as a driver transistor, the features of low on resistance and the reverse current protection at on/off state are realized. The R5527K is an ideal load switch IC to supply power from the battery to the load circuit. The R5527K is available in an ultra-small DFN (PLP)1612-4D package which can achieve high-density mounting on boards.

FEATURES

- Input Voltage Range 1.8V to 5.5V
- Typical RON 48m Ω ($V_{IN}=5V$)
46m Ω ($V_{IN}=4.5V$)
45m Ω ($V_{IN}=3.8V$)
68m Ω ($V_{IN}=1.8V$)
- Slew Rate/Inrush Control with t_R 1.5ms (Min.)
- 3A Maximum Continuous Current Capability
- Low Off Switch Current <1 μ A (R5527K001B/D), <2 μ A (R5527K001A/C)
- Reverse Current Blocking (RCB)
- Package DFN(PLP)1612-4D

APPLICATION

- Smart Phones, Tablet PCs
- Storage, Portable Devices

BLOCK DIAGRAMS

PIN DESCRIPTION

• DFN(PLP)1612-4D

Pin No	Symbol	Pin Description
1	V_{IN}	Supply Input Pin
2	GND	Ground Pin
3	ON	ON/OFF Control Pin, Active High/Low
4	V_{OUT}	Switch Output Pin

*1 The tab on the bottom of the package enhances thermal performance and is electrically connected to GND (substrate level). It is recommended that the tab be connected to the ground plane on the board, or otherwise be left floating.

SELECTION GUIDE

The ON pin polarity and the auto-discharge function for the ICs are user-selectable options.

Product Name	Package	Quantity per Reel	Pb Free	Halogen Free
R5527K001*-TR	DFN(PLP)1612-4D	5,000 pcs	Yes	Yes
*: Specify a combination of the ON pin polarity and the auto-discharge function. (A) "L" Active, without auto-discharge function at off state (B) "H" Active, without auto-discharge function at off state (C) "L" Active, with auto-discharge function at off state (D) "H" Active, with auto-discharge function at off state				

Auto-Discharge function quickly lowers the output voltage to 0V by releasing the electrical charge in the external capacitor when the ON signal is switched from the active mode to the standby mode.

ABSOLUTE MAXIMUM RATINGS

Symbol	Item		Rating	Unit
V_{IN}	Input Voltage		-0.3 to 6.0	V
V_{ON}	Input Voltage (ON Pin)		-0.3 to 6.0	V
V_{OUT}	Output Voltage		-0.3 to 6.0	V
I_{OUT}	Output Current		3.0	A
P_D	Power Dissipation (DFN(PLP)1612-4D)*1	Standard Land Pattern	610	mW
T_a	Ambient Temperature		-40 to 85	°C
T_{stg}	Storage Temperature		-55 to 125	°C

*1 Refer to *PACKAGE INFORMATION* for detailed information.

ABSOLUTE MAXIMUM RATINGS

Electronic and mechanical stress momentarily exceeded absolute maximum ratings may cause the permanent damages and may degrade the life time and safety for both device and system using the device in the field. The functional operation at or over these absolute maximum ratings are not assured.

RECOMMENDED OPERATING CONDITIONS (ELECTRICAL CHARACTERISTICS)

All of electronic equipment should be designed that the mounted semiconductor devices operate within the recommended operating conditions. The semiconductor devices cannot operate normally over the recommended operating conditions, even if when they are used over such conditions by momentary electronic noise or surge. And the semiconductor devices may receive serious damage when they continue to operate over the recommended operating conditions.

ELECTRICAL CHARACTERISTICS

$V_{IN} = 1.8$ to $5.5V$, $I_{OUT} = 1mA$, $C_{IN} = 1\mu F$, $C_{OUT} = \text{None}$, unless otherwise noted.

The specifications surrounded by are guaranteed by design engineering at $-40^{\circ}C \leq T_a \leq 85^{\circ}C$.

R5527K001A

($T_a = 25^{\circ}C$)

Symbol	Item	Conditions	Min.	Typ.	Max.	Unit
V_{IN}	Input Voltage		1.8		5.5	V
$I_{Q(OFF)}$	Off Supply Current	$V_{ON} = V_{IN}, V_{OUT} = \text{OPEN}$		1	2	μA

^{*1} Refer to the *TIMING CHART* for detailed information.

TYPICAL APPLICATION

R5527K Typical Application

TECHNICAL NOTES

- Basically, the R5527K does not require a bypass capacitor between V_{IN} and GND, however, considering the spike noise, use 0.1 μ F or more capacitor (1 μ F [Ceramic] recommended) as a bypass capacitor. More capacitance is also acceptable depending on the application.
- When a voltage is remained in the output pin at the restart, the startup time (the time until R5527K is able to fully drive the output load from ON signal input) takes longer than the t_{ON} definition. Refer to the following graph for the maximum value of the startup time. When returning from the reverse current blocking (RCB) trip point, the following startup time is necessary based on the RCB protection release trip point.

PACKAGE INFORMATION

Power Dissipation (DFN(PLP)1612-4D)

Power Dissipation (P_D) depends on conditions of mounting on board. This specification is based on the measurement at the condition below:

Measurement Conditions

	Standard Test Land Pattern
Environment	Mounting on Board (Wind velocity=0m/s)
Board Material	Glass cloth epoxy plastic (Double sided)
Board Dimensions	40mm*40mm*1.6mm
Copper Ratio	Top side: Approx. 50%, Back side: Approx. 50%
Through-holes	ϕ 0.54mm * 24pcs

Measurement Result

($T_a=25^{\circ}\text{C}$, $T_{j\text{max}}=125^{\circ}\text{C}$)

	Standard Test Land Pattern
Power Dissipation	610mW
Thermal Resistance	$\theta_{ja} = (125-25^{\circ}\text{C})/0.61\text{W} = 164^{\circ}\text{C/W}$
	$\theta_{jc} = 48^{\circ}\text{C/W}$

Measurement Board Pattern

 IC Mount Area (Unit : mm)

Package Dimensions (DFN(PLP)1612-4D)

※) The tab on the bottom of the package enhances thermal performance and is electrically connected to GND (substrate level). It is recommended that the tab be connected to the ground plane on the board, or otherwise be left floating.

Mark Specification (DFN(PLP)1612-4D)

1. The products and the product specifications described in this document are subject to change or discontinuation of production without notice for reasons such as improvement. Therefore, before deciding to use the products, please refer to Ricoh sales representatives for the latest information thereon.
2. The materials in this document may not be copied or otherwise reproduced in whole or in part without prior written consent of Ricoh.
3. Please be sure to take any necessary formalities under relevant laws or regulations before exporting or otherwise taking out of your country the products or the technical information described herein.
4. The technical information described in this document shows typical characteristics of and example application circuits for the products. The release of such information is not to be construed as a warranty of or a grant of license under Ricoh's or any third party's intellectual property rights or any other rights.
5. The products listed in this document are intended and designed for use as general electronic components in standard applications (office equipment, telecommunication equipment, measuring instruments, consumer electronic products, amusement equipment etc.). Those customers intending to use a product in an application requiring extreme quality and reliability, for example, in a highly specific application where the failure or misoperation of the product could result in human injury or death (aircraft, spacevehicle, nuclear reactor control system, traffic control system, automotive and transportation equipment, combustion equipment, safety devices, life support system etc.) should first contact us.
6. We are making our continuous effort to improve the quality and reliability of our products, but semiconductor products are likely to fail with certain probability. In order to prevent any injury to persons or damages to property resulting from such failure, customers should be careful enough to incorporate safety measures in their design, such as redundancy feature, fire containment feature and fail-safe feature. We do not assume any liability or responsibility for any loss or damage arising from misuse or inappropriate use of the products.
7. Anti-radiation design is not implemented in the products described in this document.
8. Please contact Ricoh sales representatives should you have any questions or comments concerning the products or the technical information.

Ricoh is committed to reducing the environmental loading materials in electrical devices with a view to contributing to the protection of human health and the environment.

Ricoh has been providing RoHS compliant products since April 1, 2006 and Halogen-free products since April 1, 2012.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
