LC824206XA

Advance Information

5:1 Micro USB Switch with Accessory detection and OVP

Overview

The LC824206XA is the IC suitable for use in multi function and high performance switch as well as compatible accessory detector which supports micro USB connector for DSC, DVC and mobile phone.

This IC includes low impedance USB supply switch (100 mΩ) which enables high speed battery charge as well as USB2.0-capable switch with low input capacitance, negative input-capable low distortion audio switch, UART, microphone (Mono, Stereo), and various video signal switches, in addition MHL (Mobile High definition Link) switch is integrated.

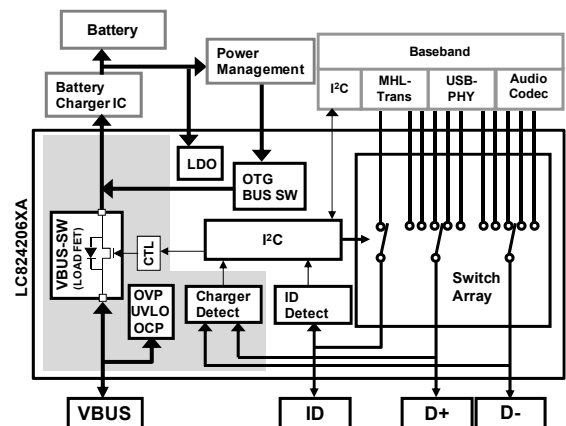

Also, this IC integrates auto detector for accessories which is capable of detecting accessories compliant to CEA936-A automotive kit, ACA standard and Battery Charging Specification (BCS) rev.1.2 which includes MCPC standard established in June 2010. In addition, it's capable of detecting a lot of charger accessories, such as Dedicated (D+/D-short) charger, Apple charger, SONY charger, CDP (Charging Downstream Port) charger, USB charger and so on. Switching operation is controlled via I²C serial interface.

Function

- Configuration
 - Audio-SW (Mono/Stereo, Negative signal capable)
 - USB2.0-SW (LowSpeed/ FullSpeed/ HighSpeed-capable)
 - MHL-mode : MHL-TMDS signal by USB-2ch
 - UART-SW
 - CBUS/Video-SW
 - MHL-mode : MHL-CBUS signal
 - NTSC-mode : Composite (CVBS) signal
 - MIC-SW (DP/VBUS switch, Mono/Stereo-capable)
 - VBUS-SW
 - High speed battery charge –capable (100 mΩ)
 - Integrated OVP, OCP, TSD
 - DP/DM short-circuit detection, VBUS auto detection
 - Various charger detection (Dedicated, Apple, SONY, CDP, USB)
 - ID detection function
 - Integrated 5-bit ADC
 - I²C Interrupt function
- Package
 - WLCSP Pin25, 2.17 mm × 2.17 mm, 0.4 mm pitch
 - Halogen-free, lead-free-capable
- Operating temperature
 - -30 to 85°C
- Supply voltage
 - VBAT: 3.1 to 4.6 V
 - VBUS: 4.5 to 5.5 V
- ID detection for the accessories
 - MCPC standard, CEA936-A automotive kit standard, ACA standard-compliant, Battery Charging Specification rev.1.2 compliant
- Application
 - DSC, DVC, mobile phone

Function Description

Charger Detection

By using charger detector circuit including built-in D+/D- short-circuit detector, you can judge the connection of DP pin and DM pin and then detect charger according to USB Charger and Battery Charging Specification Revision 1.2 as well as CEA936-A automotive kit specification. This IC can detect the charger of the following list.

Detectable charger list
Standard Downstream Port (USB mode)
Dedicated Charging Port (D+/D- short ACC)
Charging Downstream Port (USB mode)
Apple Charger
SONY Charger
D- High Charger (Basic CarKit Type1,2 ACC)
VBUS only ACC (No Charger Detect)

Accessory ID Detection

Accessory is detected according to CEA936-A automotive kit and ACA standard including MCPC standard using ID detection circuit including built-in 5-bit ADC. Accessories are judged from the resistance value of accessory (RID) connected to ID pin. ID range of RID varies depends on each standard. See Resistance (RID) and Detectable accessory for the further details.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «**JONHON**», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «**FORSTAR**».
