*Amphenol Aerospace, Amphenol Commercial Air,  
and Amphenol Industrial Operations Main Facility in Sidney, NY USA*

## ABOUT AMPHENOL AEROSPACE:

Amphenol Aerospace, a Division of Amphenol Corporation, is one of the largest manufacturers of interconnect products in the world for the Military, Commercial Aerospace and Industrial markets. Amphenol designs, manufactures and markets circular and rectangular, electronic, fiber optic, EMI/EMP filter, and a variety of special applications connectors and interconnect systems.

Our state-of-the-art facility is nestled at the foothills of the Catskill Mountains in Sidney, NY. The Amphenol complex houses many technologies including CNC machining, die-casting, molding, impact and extruding, plating, screw machining and process controls. Our fully equipped material evaluation lab and engineering organization utilize the latest in computer aided design software and analysis tools, allowing us to design, test, and qualify advanced interconnect systems. Amphenol's interconnect products are supplied to thousands of OEMs worldwide and are supported by our worldwide sales and engineering force, including the largest global network of electronic distributors.

### Customer-Centric:

Our **#1 priority** is our customers who deserve quality product on time.

### Accountable:

Clear owners, clear actions, clear results.

### Reliable:

What we build matters and quality is imperative.

### Enthusiastic:

Challenges create rewarding opportunities. Enthusiasm is contagious and we will spread it.

## QUALITY ASSURANCE:

Amphenol Aerospace has been awarded both AS9100 - Revision C and ISO9001:2008 Quality Assurance Certifications.

- X Completely tooled.
- + Majority of tooling is completed (contact Amphenol Aerospace for availability).
- ◆ Not tooled for 02-R.
- P Available with Pin contacts only
- S Available with Socket contacts only
- P/S Available with Pin contacts or Socket contacts
- \* Ground plane proprietary option available. Arrg. 9-5 is exclusively ground plane type.
- Not Mil-Qualified.
- ◇ 21-75 is Mil-Qualified with twinax contacts only.  
Note: MS connector 21-75 is supplied with size 8 twinax.  
Commercial connector 21-75 is supplied with size 8 coax.

- HD designates High Density 38999 Series III insert patterns which use size 23 contacts only. Not rated over 175°C.
- \* Hermetic inserts - solder termination standard. (Contact Amphenol Aerospace for optional PCB or eyelet termination).
- \*\* Two size 16 contacts dedicated to fiber optics. See the Fiber Optic section for more information.
- \*\*\* For use in MIL-STD-1760 applications (see pages 75 and 76).  
For RG 180/U and RG 195/U cables only.
- † Size 8 Coax and Twinax are interchangeable.
- †† Size 8 Coax and Twinax are interchangeable.
- (2) Not Tooled for RP or 02RE
- (3) Pin inserts only, not tooled for RP or 02RE (Consult Amphenol Aerospace for avail.)
- (5) MS Connector 21-79 has provision for two size 8 coax contacts. Coax contacts are not supplied unless specified by customer.

- X Completely tooled.
- + Majority of tooling is completed (contact Amphenol Aerospace for availability).
- ◆ Not tooled for 02-R.
- P Available with Pin contacts only
- S Available with Socket contacts only
- P/S Available with Pin contacts or Socket contacts
- \* Ground plane proprietary option available. Arrg. 9-5, 26-62 is exclusively ground plane type.
- Not Mil-Qualified.
- ◇ 21-75 is Mil-Qualified with twinax contacts only.
- \* Hermetic inserts - solder termination standard. (Contact Amphenol Aerospace for optional PCB or eyelet termination).
- HD designates High Density 38999 Series III insert patterns which use size 23 contacts only. Not rated over 175°C.
- \*\* Two size 16 contacts dedicated to fiber optics. See the Fiber Optic Section for more information.
- \*\*\* For use in MIL-STD-1760 applications (see pages 75 and 76).
- † For RG 180/U and RG 195/U cables only.
- †† Size 8 Coax and Twinax are interchangeable.
- (2) Not Tooled for RP or 02RE
- (3) Pin inserts only, not tooled for RP or 02RE (Consult Amphenol for avail.)
- (4) MS connector 21-75 is supplied with size 8 twinax. Commercial connector 21-75 is supplied with size 8 coax.
- (5) MS Connector 21-79 has provision for two size 8 coax contacts. Coax contacts are not supplied unless specified by customer.
- (PWR) Suffix at end of part number to replace coax, twinax, and fiber contacts with power contacts.

- X Completely tooled.
- + Majority of tooling is completed (contact Amphenol Aerospace for availability).
- ◆ Not tooled for 02-R.
- P Pin inserts only (contact Amphenol Aerospace for socket availability).
- ★ Ground plane proprietary option available. Arrangement 9-5, 25-62 is exclusively ground plane type.
- Not Mil-Qualified.
- \* Hermetic inserts - solder termination standard. (Contact Amphenol Aerospace for optional PCB or eyelet termination).
- \*\* Two size 16 contacts dedicated to fiber optics. See the Fiber Optic section for more information.
- \*\*\* For use in MIL-STD-1760 applications (pgs. 75 and 76).
- † For RG 180/U and RG 195/U cables only.
- †† Size 8 Coax and Twinax are interchangeable.
- Note: 25L-3 and 25L-7 use longer shells.
- (PWR) Suffix at end of part number to replace coax, twinax, and fiber contacts with power contacts.

# Amphenol RoHS Compliant Platings

## Alternative to Cadmium

38999

### DURMALON™

Amphenol's Answer to EU RoHS/ELV/Cadmium Free Restrictions  
Commercial, industrial & military markets are rapidly moving away from restricted materials such as Cadmium (Cd) & Hexavalent Chromium (Cr(VI)). Both of these restricted materials are toxic and are known carcinogens. Amphenol is offering an alternative finish that complies with all customer requirements tied to these specifications.

MIL-DTL-38999, Rev L has established new service classes for alternative finishes addressing these requirements for Cadmium replacement. Amphenol is using this and European Union Directive 2002/95/EC RoHS (Regulation of Hazardous Substances) as a guide to qualification for all domestic, global, commercial, industrial, & military specifications requiring the reduction or elimination of these restricted materials.

Amphenol has qualified Durmalon, with internal part number coding "DT" finish, which meets or exceeds the 38999 designated class "T" finish, Nickel Fluorocarbon Polymer. Durmalon is also EU RoHS compliant and is Cadmium free, Lead free, and Hexavalent Chromium free.

We also offer additional platings such as "DX", (Durmalon, heavy duty final plate) to support JSF, F-35 program. The DX plating is intended to meet higher corrosion Sulfur Dioxide (SO<sub>2</sub>)/salt fog requirements of JSF.

Cadmium has been applied to numerous components of land, sea and air weapon systems and NASA systems for many years as it provides sacrificial corrosion protection and excellent lubricity for threaded applications.

The Defense Logistics Agency (DLA) has added the following cadmium alternative finishes to MIL-DTL-38999, Rev L (and other connector specs):

- Nickel Fluorocarbon Polymer
- Zinc-Nickel

### AMPHENOL'S DURMALON™

Durmalon, like Olive-Drab Cadmium plating (Class W), meets 500 hours of dynamic salt spray, combined with 500 mating cycles and meets specified millivolt drop shell-to-shell conductivity. Durmalon also meets a 200° C temperature rating. Durmalon has been proven to meet this requirement as well as Potassium Formate-Deicer fluid testing performed by Boeing.

### BLACK ZINC NICKEL

Black Zinc Nickel is Amphenol's 2nd RoHS Compliant Plating Alternative to Cadmium

Amphenol is now offering a new RoHS compliant alternative to Cadmium. Black Zinc Nickel is a non-reflective and conductive black finish approved for 500 hrs salt spray making it an excellent choice for harsh environments. Black Zinc Nickel has been qualified by the DLA, with internal part number coding "DZ" finish, which meets or exceeds the 38999 designated class "Z" finish. Black Zinc Nickel is compatible with other platings and available on a wide variety of connectors and accessories including all MIL-DTL-38999 Series III connectors.

### APPLICATIONS

Interest for non-hazardous alternative finishes are gaining momentum & many customers are currently using Black Zinc Nickel for a broad number of applications. Black Zinc Nickel is typically used on applications for commercial aerospace and military defense, who are now moving away from toxic Cadmium to more environmentally friendly options.

### TESTING

Amphenol Aerospace has performed extensive testing on numerous alternative platings including Black Zinc Nickel. For specific applications please contact Amphenol Aerospace.

**DURMALON™**  
Alternative to Cadmium

### APPLICATIONS

Interest for non-hazardous alternative finishes is gaining momentum & many customers are currently using Durmalon for a broad number of applications. Durmalon combines the unique lubrication and anti-wetting properties of PTFE with corrosion resistance, high conductivity and EU RoHS compliance in a non-reflective finish.

### TESTING

Amphenol Aerospace has performed extensive testing on numerous alternative platings with the most consistent performer being the Durmalon. For specific applications please contact Amphenol Aerospace.

## TRI-START™ MIL-DTL-38999 SERIES III WITH METAL SHELLS - ALUMINUM, STAINLESS STEEL, CLASS K FIREWALL

Amphenol® Tri-Start MIL-DTL-38999\* Series III Connectors offer the highest performance capabilities for both general duty and severe environment applications. Meeting or exceeding MIL-DTL-38999 Series III requirements, the Tri-Start connector with standard metal shells (aluminum or stainless steel with several finish options) offers these features:

- **EMI Shielding** - solid metal-to-metal coupling, grounding fingers, electroless nickel plating, and thicker wall sections provide superior EMI shielding capability of 65dB minimum at 10 GHz
- **Contact Protection** - recessed pins in this 100% scoop-proof connector minimize potential contact damage
- **Moisture Resistance** - improved interfacial seal design helps prevent electrolytic erosion of contacts
- **Corrosion Resistance** - shells of stainless steel or cadmium over nickel plating withstand a 500 hour salt spray exposure
- **Vibration/Shock** - operates under severe high temperature vibration, through 200°C
- **Firewall Capability** - available in a stainless steel shell, class RK, RS
- **Lockwiring Eliminated** - unique, self-locking, quick coupling connector eliminates lockwiring
- **Quick Coupling** - completely mates and self-locks in a 360° turn of the coupling nut
- **Inventory Support Commonality** - uses standard MIL-DTL-38999 contacts, application tools, insert arrangements
- **Electrostatic Discharge Protection (ESD)** - protection for sensitive circuitry without diodes, varistors, etc., with the use of the Faraday Cage principle which shunts high voltage, high current discharge events (see page Amphenol Filter Section)
- **Hermetic**- air leakage limited to  $1 \times 10^{-7}$  cm<sup>3</sup> per second optional
- **Qualified Specifications** - Stainless Steel qualified to BACC63DB and BACC63DC specifications

### OFFER MORE VERSATILITY & OPTIONS THAN ANY OTHER INTERCONNECTION FAMILY!

HD38999

High reliability and increased versatility best describe Amphenol MIL-DTL-38999, Series III circular connectors. Originally designed for the harshest of environments and most demanding of applications, Amphenol MIL-DTL-38999 Series III, Tri-Start connectors continue to evolve in pace with the needs of an ever-changing market.

DUALOK

Amphenol Tri-Start connectors can be configured with a number of application specific technologies like:

- High Density HD38999
- Dualok
- PC Tails
- Filters
- Fail Safe
- CLUTCH-LOK
- Fiber Optics
- High Speed Contacts
- Hermetics
- Flex

FILTER

PC TAILS

FAIL SAFE

Flexibility aids in design optimization through the combination of different technologies within a common, time-tested, harsh environment connector body.

## Test Data

### TRI-START, SERIES III TYPICAL SHIELDING EFFECTIVENESS TEST DATA

EMI/EMP SHIELDING EFFECTIVENESS dB  
TESTING BY TRIAXIAL METHOD

### TRI-START, SERIES III TYPICAL SHIELDING EFFECTIVENESS TEST DATA

EMI/EMP SHIELDING EFFECTIVENESS dB  
TESTING BY MODE STIRRING METHOD

### AMPHENOL® TRI-START CONNECTORS PROVIDE EMI/ EMP SHIELDING CAPABILITY WHICH EXCEEDS MIL-DTL-38999 SERIES III REQUIREMENTS.

The TV and CTV Series III connector with standard solid metal-to-metal coupling, EMI grounding fingers and conductive finishes have proven to be the ultimate in EMI/EMP shielding effectiveness. The charts illustrate shielding effectiveness data which is typical of Tri-Start connectors tested with the nickel finish (Class F-metal, Class M-composite) over a wide frequency range.

The vibration capability of the Tri-Start Series is shown in the chart below. This illustrates the most severe vibration envelope of any qualified connector available today.

These capabilities along with a +200°C, -65°C temperature rating and superior moisture sealing protection provide the user with a connector that can withstand the most rigorous application.

### TRI-START VIBRATION CRITERIA

\* Dependant on shell finish

Test data beyond 2GHz is subject to equipment variation.

NOTE: For test data information on the new Clutch-Lok Tri-Start, high vibration connectors, consult Amphenol Aerospace.

# MIL-DTL-38999, Series III TV

## Weight Comparisons (Composite vs. Metal)

Depending on the shell style, shell size and contact count, weight savings can range from 17% to 40% compared to standard aluminum product.  
**Tri-Start Weight in Ounces** (includes contacts)

# High Vibration Dualok, 38999 Series III Type

## Features and Benefits

38999

The Dualok represents the latest in high performance connector designs from Amphenol. Featuring a newly developed locking mechanism, the Dualok plug ensures rock-solid coupling and metal-to-metal bottoming in the most severe vibration environments.

### DUALOK FEATURES AND BENEFITS INCLUDE:

- Mates with standard D38999 receptacles and utilizes standard D38999 inserts.
- Designed to withstand and stay mated under vibration levels that exceed MIL-DTL-38999 levels
- Dualok stainless steel provides a weight savings of up to 42% compared to standard D38999 stainless steel designs
- Stainless steel, aluminum, composite, or aluminum bronze materials of construction
- Dualok aluminum provides ~ 10% weight reduction over D38999 Aluminum
- Coupling mechanism that does not "settle" under vibration levels exceeding MIL-DTL-38999
- Metal-to-metal bottoming for maximum EMI shielding under extreme vibration

New High Vibration Dualok Connector

Weight Comparison Size #9 (Less Inserts)

### CLUTCH-LOK™ MIL-DTL-38999, SERIES III HIGH VIBRATION CONNECTOR

### OPTIONAL SHELL GEOMETRIES

Amphenol offers a number of different shell configurations to fit your needs

- Deep Reach Shells - For increased panel thickness
- Stand-off Flange Shells - For attachments to Printed Circuit Boards.
- Connector with Integral Strain Reliefs

The Tri-Start option CLUTCH-LOK offers all advantages of stainless steel/Class K firewall for MIL-DTL-38999 Series III connectors, plus a unique clutch design that actually tightens itself under vibration.

Features include:

- High degree of differential torque
- No settling back to the next ratchet tooth
- Completely intermateable with all existing MIL-DTL-38999
- Series III connectors
- Offers advantage in inaccessible, hard to reach areas where mating torque is difficult to apply and complete coupling is not verifiable by inspection

See page 34 for description,  
44 – 46 for ordering.

Series III

A

# High Density Interconnects

## HD38999: 9 to 187 Contacts

The HD38999 family of connectors has 30% more contact density than the highest density Mil Spec 38999 connectors of its size. This series of connectors was designed to utilize mil-specified 38999 components with the exception of the contacts and inserts arrangement. Utilizing existing mil-qualified 39029 size 23 contacts and 38999 insert materials, these connectors are essentially a drop-in replacement for the standard 38999 connector.

This connector design benefits users in a couple of different ways. For those users who need to increase the amount of contacts in their application, the HD38999 series allows them to do so without increasing the size of their connector. For users who are looking to decrease the overall size of their system, they can do so by using smaller shell sizes without decreasing the number of contacts.

Amphenol has qualified this series of connectors to the requirements of MIL-DTL-38999. Amphenol also manufactures this high density series in Filter, Hermetic and customized versions to fit our customer's needs. Please contact us if additional information is required.

### TECHNICAL DATA

HD38999 series was designed to meet and/or exceed the specifications of MIL-DTL-38999. The connector series has been tested to all the requirements of 38999 with the use of AS39029 size 23 contacts. Test reports are available upon request. The following is a summary of some of the performance requirements.

#### EMI SHIELDING EFFECTIVENESS:

Solid metal to metal coupling, EMI grounding fingers and conductive finishes have proven to be the ultimate in EMI/EMP shielding effectiveness. The following chart illustrated shielding effectiveness data which is typical in HD38999 connectors.

#### ELECTRICAL:

- 22 AWG: 5.0 AMPS
- 24 AWG: 3.0 AMPS
- 26 AWG: 2.0 AMPS
- 28 AWG: 1.5 AMPS

Insulation Resistance: 5000 megohms min. @500 VDC 25C  
Dielectric Withstanding Voltage: 1000 VRMS@sea level

#### MECHANICAL:

- Metallic Shells:** Material: Aluminum alloy, Stainless Steel  
Protection: Electroless Nickel, O.D. Cadmium, Durmalon (Nickel PTFE), Zinc Nickel
- Composite Shells:** Material: Thermoplastic  
Protection: Electroless Nickel, O.D. Cadmium, Durmalon (Nickel PTFE), Zinc Nickel
- Contacts:** Material: Copper Alloy  
Protection: Gold over Nickel

Insert Retention to Shell: 100 psi in axial load

Durability: 500 full mating and unmating cycles

Vibration: 60G sine per MIL-DTL-38999L Para 4.5.23.2.1  
5G2 Random per EIA-364-28E, Test condition A  
1G2 Random per EIA-364-28E, Test condition I

Shock: Per EIA-364-27B, 300g

#### ENVIRONMENTAL:

Operating Temperature: -65°C to +175°C

Salt Spray: Metallized: Electroless Nickel: 48 hours  
Anodic Coating, O. D. Cadmium, Durmalon, Zinc Nickel: 500 hours

Salt Spray Composite: Electroless Nickel: 1000 hours  
O. D. Cadmium, Durmalon, Zinc Nickel: 500 hours

# Custom Designed HD38999 Connectors and Alignment Disks

38999

NEW CUSTOM DESIGNED HD38999 CONNECTORS - PROVIDE MORE INTERCONNECT SOLUTIONS:

## ALIGNMENT DISKS

Alignment disks keep contacts aligned for easier insertion into circuit boards. These are typically ordered with the connector - see step 7 of How to Order on page 47.

## FILTERED HD38999 CONNECTORS - FOR EMI/EMP PROTECTION

High density patterns are available in filter 38999 connectors - consult Amphenol Aerospace for ordering.

| Shell Size | D Dia. ±.010 |
|------------|--------------|
| 9          | .234         |
| 11         | .350         |
| 13         | .500         |
| 15         | .725         |
| 17         | .750         |
| 19         | .850         |
| 21         | .953         |
| 23         | 1.147        |
| 25         | 1.250        |

## HD38999 FOR GIGABIT ETHERNET APPLICATIONS

The HD38999 is available for high speed (Gigabit Ethernet) data transmission in the size 9-9 insert pattern.

Data transmission performance of this connector insert:

- 10 Base T, 100 Base TX, and 1000 Base T networks using Cat 5e per TIA/EIA568B and Class D per ISO/IEC 11801.  
(Test report available - consult Amphenol Aerospace for more information)

### 4. SELECT A SHELL SIZE & INSERT ARRANGEMENT SEE PAGES 2-5

Shell Size & Insert Arrangements are on pages 2-5. First number represents Shell Size, second number is the Insert Arrangement.

| Triple Start Threads |    |    |    |    |    |    |    |    | Mil Shell Size      |
|----------------------|----|----|----|----|----|----|----|----|---------------------|
| A                    | B  | C  | D  | E  | F  | G  | H  | J  | Amphenol Shell size |
| 9                    | 11 | 13 | 15 | 17 | 19 | 21 | 23 | 25 |                     |

### 5. CONTACT TYPE

|          |  |
|----------|--|
| <b>P</b> | 500 Cycle Pin Contacts, if require Less Contacts place (LC) at the end of part number    |
| <b>S</b> | 500 Cycle Socket Contacts, if require Less Contacts place (LC) at the end of part number |
| <b>H</b> | 1500 Pin Cycle Contacts  |
| <b>J</b> | 1500 Socket Cycle Contacts   |
| <b>A</b> | Less Pin Contacts  |
| <b>B</b> | Less Socket Contacts   |
| <b>X</b> | Eyelet contacts, hermetics only  |

### 6. ALTERNATE KEY POSITION

| Key/Keyway Position |   |   |   |   |   |
|---------------------|---|---|---|---|---|
| N                   | A | B | C | D | E |

#### KEY/KEYWAY POSITION

A plug with a given rotation letter will mate with a receptacle with the same rotation letter. The angles for a given connector are the same whether it contains pins or sockets. Master key stays fixed, minor keys rotate. Inserts are not rotated in conjunction with the master key/keyway.

\* An "N" designation is used on D38999 military part number but not on the commercial versions

### KEY/KEYWAY POSITION

A plug with a given rotation letter will mate with a receptacle with the same rotation letter. The angles for a given connector are the same whether it contains pins or sockets. Master key stays fixed, minor keys rotate. Inserts are not rotated in conjunction with the master key/keyway.

### RECEPTACLE (FRONT FACE SHOWN)

### PLUG (FRONT FACE SHOWN)

### Alignment Disc

| Shell Size | D Dia. ±.010 |
|------------|--------------|
| 9          | .234         |
| 11         | .350         |

A

# Clutch-Lok™ Plug

## Commercial (26)

Designed for high vibration and harsh environments such as aircraft gas turbine engines, the CLUTCH-LOK is also an ideal choice for demanding applications such as aircraft, space and military ground vehicles. The unique clutch design of the Amphenol CLUTCH-LOK means that you don't have to compromise the need for quick, smooth mating of plugs and receptacles in order to get increased uncoupling torque.

The CLUTCH-LOK has proven to not only remain mated and pass all the Series III specification requirements, it also has proven to actually tighten itself under vibration. This is a powerful advantage over the traditionally high vibration application connectors. The CLUTCH-LOK is also a tremendous advantage in inaccessible, hard to reach areas where mating torque is difficult to apply and complete coupling is not verifiable by inspection.

### CLUTCH-LOK FEATURES AND BENEFITS:

- High degree of differential torque
- Infinite free coupling and positive metal-to-metal bottoming with each mating
- No settling back to the next ratchet tooth
- Available with stainless steel shells and Class K firewall inserts
- All the advantages of MIL-DTL-38999 Series III including EMI/RFI shielding, electrolytic erosion resistance and contact protection with recessed pins
- Enhanced connector performance at affordable prices
- Completely intermateable with all existing MIL-DTL-38999 Series III connectors
- Fully QPL'd

| <b>PART #</b>   | Base Number | Coded Shell Size | Insert Arrg. | Contact Type/Alt. Keying | Shell Finish | Tail Length |
| See chart below | 10-626      | 501              | -35          | P                        | 1            | B           |

## HOW TO ORDER

### 1. BASE NUMBER:

|               |   |
|---------------|---|
| <b>10-626</b> | Base Number for MIL-DTL-38999 Series III Hermetic with PCB Tail |
|---------------|---|

### 2. SELECT A CODED SHELL SIZE:

See chart below **501-509**, designates size 9-25 shell size.  
Example: **501** = Size 9 Shell

### 3. SELECT AN INSERT ARRANGEMENT:

Refer to insert availability chart on page 2-5 and pin-out illustrations on pages 14-28. Please enter the second number which represents the Insert Arrangement number.

|            |                                      |
|------------|--------------------------------------|
| <b>-35</b> | Designates Insert Arrangement Number |
|------------|--------------------------------------|

### 4. CONTACT TYPE/ALTERNATE KEYING POSITIONS:

Refer to page 46 for alternate rotation letters to use.

|          |   |
|----------|---|
| <b>P</b> | Designates Pin Contacts in Normal Position    |
| <b>S</b> | Designates Socket Contacts in Normal Position |

### 5. SELECT A SHELL FINISH:

|          |  |
|----------|--|
| <b>1</b> | Hermetic seal, passivated Stainless Steel, 200°C |
| <b>2</b> | Hermetic seal, Stainless Steel w/Nickel Plate    |
| <b>3</b> | Carbon Steel w/reflowed tin plate                |

### 6. SELECT A TAIL LENGTH:

|          |          |
|----------|----------|
| <b>B</b> | .100±.03 |
| <b>D</b> | .200±.03 |
| <b>F</b> | .300±.03 |

| Shell Size | Part Number            | B Thread 0.1P-0.3L-TS (Plated) | R1    | R2    | S ±.010 | T ±.008 | TT ±.008 |
|------------|------------------------|--------------------------------|-------|-------|---------|---------|----------|
| 9          | 10-626 <b>501</b> -XXX | .6250                          | .719  | .594  | .938    | .128    | .216     |

### 2. SELECT A CODED SHELL SIZE:

See chart below 481-489, designates size 9-25 shell size.

### 3. SELECT AN INSERT ARRANGEMENT:

Refer to insert availability chart on page 2-5 and pin-out illustrations on pages 14-28. Please enter the second number which represents the Insert Arrangement number.

|            |                                      |
|------------|--------------------------------------|
| <b>-35</b> | Designates Insert Arrangement Number |
|------------|--------------------------------------|

### 4. CONTACT TYPE/ALTERNATE KEYING POSITIONS:

Refer to page 46 for alternate rotation letters to use.

|          |   |
|----------|---|
| <b>P</b> | Designates Pin Contacts in Normal Position    |
| <b>S</b> | Designates Socket Contacts in Normal Position |

### 5. SELECT A SHELL FINISH:

|          |  |
|----------|--|
| <b>1</b> | Hermetic seal, passivated Stainless Steel, 200°C |
| <b>2</b> | *Hermetic seal, Stainless Steel w/Nickel Plate   |
| <b>3</b> | *Carbon Steel w/reflowed tin plate               |

### 6. SELECT A TAIL LENGTH:

|          |          |
|----------|----------|
| <b>B</b> | .100±.03 |
| <b>D</b> | .200±.03 |
| <b>F</b> | .300±.03 |

† Red band indicates fully mated

## HOW TO ORDER

### 1. BASE NUMBER:

|               |   |
|---------------|---|
| <b>10-626</b> | Base Number for MIL-DTL-38999 Series III Hermetic with PCB Tail |
|---------------|---|

### 2. SELECT A CODED SHELL SIZE:

See chart below **491-499**, designates size 9-25 shell size.

### 3. SELECT AN INSERT ARRANGEMENT:

Refer to insert availability chart on page 2-5 and pin-out illustrations on pages 14-28. Please enter the second number which represents the Insert Arrangement number.

|            |                                      |
|------------|--------------------------------------|
| <b>-35</b> | Designates Insert Arrangement Number |
|------------|--------------------------------------|

### 4. CONTACT TYPE/ALTERNATE KEYING POSITIONS:

Refer to page 46 for alternate rotation letters to use.

|          |   |
|----------|---|
| <b>P</b> | Designates Pin Contacts in Normal Position    |
| <b>S</b> | Designates Socket Contacts in Normal Position |

### 5. SELECT A SHELL FINISH:

|          |  |
|----------|--|
| <b>1</b> | Hermetic seal, passivated Stainless Steel, 200°C |
| <b>2</b> | *Hermetic seal, Stainless Steel w/Nickel Plate   |
| <b>3</b> | *Carbon Steel w/reflowed tin plate               |

### 6. SELECT A TAIL LENGTH:

|          |          |
|----------|----------|
| <b>B</b> | .100±.03 |
| <b>D</b> | .200±.03 |

# Series III, TV Breakaway Fail-Safe Connectors

## Quick-Disconnect with an Axial Pull of Lanyard

38999

Amphenol® Tri-Start Breakaway Fail-Safe Connectors provide unequalled performance in environments requiring instant disengagement.

The “Breakaway” Fail-Safe connector family offers a wide range of electrical and mechanical features:

- Instant decoupling and damage free separation
- Completely intermateable with standard receptacles (D38999/20 and /24)
- Inventory support commonality through the use of standard insert arrangements and contacts

Breakaway unmating is initiated by applying a pull force to the lanyard which causes the operating sleeve on the plug to move away from the receptacle. Coupling segments on the plug then move away from the mating receptacle while expanding, thus releasing the receptacle. After completion of the unmating sequence, spring compression returns the sleeve and segments to their original positions. Unmating of the plug may also be accomplished by normal rotation of the coupling ring without affecting the breakaway capability.

The Tri-Start Breakaway Fail-Safe connector exceeds the MIL-Spec Series III requirements for EMI/EMP shielding and features include:

- Solid metal-to-metal coupling
- EMI grounding fingers
- Conductive finishes

Amphenol Breakaway Fail-Safe connectors are qualified to MIL-DTL-38999/29, /30 and /31 (for MIL-STD-1760 Stores Management applications). Amphenol also manufactures custom breakaway connectors including those with:

- Highly durable non-metallic operating sleeves in a variety of lengths and diameters
- Increased pull-force capability
- Low-profile designs
- Custom lanyard lengths and backshells
- Low force separation capabilities
- Low insertion/separation force contacts
- Non-cadmium finishes

Contact your local Amphenol representative. Whether you need a standard Breakaway, one of our custom Breakaways, or a unique Breakaway design.

TYPE 2

TYPE 6

TYPE 1

**Amphenol offers a variety of lanyard plug styles including MIL-STD-1760 types 1, 2 and 6 for Stores Management applications.**

*Breakaway with Coax Contacts*

Special configuration Fail-Safe used on space telescope application. Lanyard is replaced by a swivel ring for remote disconnect and “wing arms” have been added for manual actuation accessibility by gloved astronauts.

# TV Breakaway Fail-Safe Lanyard Release Plug

RECEPTACLE (FRONT FACE SHOWN)

PLUG (FRONT FACE SHOWN)

Series III

A

# TV Breakaway Fail-Safe Lanyard Release Plug

## Commercial (88-5565 & 91-5565)

### HOW TO ORDER - COMMERCIAL

Ordering procedure for example part number 88-556529-EP is shown below:

| 1. Service Class | 2. Connector Type Identification | 3. Shell Size & Insert Arrg. Code | 4. Required Field | 5. Lanyard Length Code | 6. Contact Type/Alternate Keying Position |
|------------------|----------------------------------|-----------------------------------|-------------------|------------------------|---|
| 88               | -5565                            | 29                                | 0                 | E                      | P   |

#### 1. SERVICE CLASS

|    |   |
|----|---|
| 88 | Designates corrosion resistant olive drab cadmium plate over nickel, 500 hour extended salt spray, EMI -50dB @ 10 GHz specification min., 175°C |
| 91 | Designates electroless nickel plated aluminum, optimum EMI shielding effectiveness -65dB @ 10 GHz specification min., 48 hour salt spray, 200°C |

These are standard finishes. Consult Amphenol Aerospace for other variations.

#### 2. CONNECTOR TYPE IDENTIFICATION

|       |   |
|-------|---|
| -5565 | Designates MIL-DTL-38999, Series III Tri-Start Lanyard Release Plug |
|-------|---|

#### 3. SELECT A COMMERCIAL SHELL SIZE & INSERT ARRANGEMENT CODE

MIL-DTL-38999, see insert availability chart on page 71.

#### 4. REQUIRED FIELD

|   |                                  |
|---|----------------------------------|
| 0 | THE REQUIRED FIELD IS ALWAYS A 0 |
|---|----------------------------------|

#### 5. SELECT A LANYARD LENGTH CODE

| Lanyard Length (in.) ± .236 | Lanyard Length (mm) ± 6.0 | Lanyard Length Code For Part Number |
|-----------------------------|---------------------------|-------------------------------------|
| 4.016                       | 102                       | A                                   |
| 4.528                       | 115                       | B                                   |
| 5.000                       | 127                       | C                                   |
| 5.512                       | 140                       | D                                   |
| 6.024                       | 153                       | E                                   |
| 6.535                       | 166                       | F                                   |
| 7.008                       | 178                       | G                                   |

| 11.024                      | 280                       | P                                   |
| 11.535                      | 293                       | R                                   |
| 12.008                      | 305                       | S                                   |
| 12.520                      | 318                       | T                                   |
| 13.031                      | 331                       | U                                   |
| 14.016                      | 356                       | V                                   |
| 15.000                      | 381                       | W                                   |
| 16.024                      | 407                       | X                                   |
| 17.008                      | 432                       | Y                                   |
| 18.031                      | 458                       | Z                                   |

#### 6. SELECT A CONTACT TYPE/ALTERNATE KEYING POSITION

P designates pin, S designates socket for normal positioning of contacts. When an alternate position of the connector is required to prevent cross-mating, a different letter (other than P or S) is used. See alternate positioning on page 72, then convert to Amphenol Commercial coding by the following chart.

| Pin Contacts |                   | Socket Contacts |                   |
|--------------|-------------------|-----------------|-------------------|
| MS Letter    | Amphenol letter   | MS Letter       | Amphenol Letter   |
| PN           | <b>P (normal)</b> | SN              | <b>S (normal)</b> |
| PA           | <b>G</b>          | SA              | <b>H</b>          |
| PB           | <b>I</b>          | SB              | <b>J</b>          |
| PC           | <b>K</b>          | SC              | <b>L</b>          |
| PD           | <b>M</b>          | SD              | <b>N</b>          |
| PE           | <b>R</b>          | SE              | <b>T</b>          |

### QUICK-DISCONNECT WITH AN AXIAL PULL OF LANYARD

Amphenol offers a commercial version of D38999/31 series III, type 6 connectors. Built from the same time-tested and quality components used in its Mil-Spec counterpart, Amphenol's commercial variant is designed to accept a wider variety of insert arrangements the Mil-Spec does not include. Available in shell size 25, these fail-safe connectors adopt an incredible amount of versatility without sacrificing performance or durability. Consult Amphenol Aerospace for more information.

### FEATURES AND BENEFITS

- More versatile than the mil-spec
- 25 lanyards lengths
- Available in all size 25 arrangements
- Low force separation capabilities
- Compatible with all mil-spec backshells and accessories
- Mates to existing D38999 receptacles

# TV Breakaway Fail-Safe Lanyard Release Connector

## Commercial (88-725014 & 88-725041) Version of D38999/31 Type 6

38999

### 88-725041 INTEGRATED BANDING PLATFORM

### 88-725014 EXTENDED BACKSKIRT

Series III

A

# D38999 Type Hybrid Breakaway – Series III

## Lower Profile Lanyard Release Plug, Crimp

### METAL SHELLS WITH COMPOSITE OPERATING SLEEVE

New Hybrid Lanyard Breakaway Fail-Safe connector with a composite thermoplastic outer operating sleeve for greater durability.

This new hybrid breakaway is the breakaway of choice for the Navy F-18 Program. Amphenol's hybrid lanyard design offers greater durability over D38999 aluminum and composite designs because of its ability to handle abuse taken after weapons release.

Other advantages include:

- Lower profile compared to full metal breakaway Fail-Safe connectors
- Less weight

This Hybrid Breakaway meets the applicable requirements of MIL-DTL-38999/31 including random & sine vibration, ice resistance, fluid immersion and hydrolytic stability tests. (Test reports are available upon request).

Currently the hybrid breakaway is available in shell sizes 25 and 17. It uses standard inserts available for breakaway plugs sizes 25 and 17, and is also available with inserts 25-20 and 25-11 for MIL-STD-1760. These hybrid connectors will accommodate the standard backshells for breakaway connectors shown on Accessories section or the backshell section.

[Consult Amphenol Aerospace for ordering of the new hybrid breakaway connectors.](#)

(Metal inside shells and Composite,  
lower profile outer sleeves)*

| CONDITION/TEST             | DESCRIPTION   | REFERENCE                |
|----------------------------|---|--------------------------|
| Durability                 | 400 complete mating/unmating cycles   | MIL-DTL-38999/31D        |
| High Impact Shock          | Nine hammer blows from 1,3 and 5 feet, three each in three axes on mounting panel.  | MIL-S- 901D              |
| Vibration                  | 10 to 2000Hz in three perpendicular axes, 4 hours in each axis for a total of 12 hours with no fracturing or breaking of parts. | MIL-STD-202F, Method 204 |
| Ice Resistance             | Pull tested after conditioned with Ice water at -18C for 35 minutes.  | MIL-DTL-38999/31D        |
| Fail Safe Disengagement    | Rotationally unmated 180° from full mate position and pull tested in both a straight direction and at 15°.                      | MIL-DTL-38999/31D        |
| High Speed Pull Separation | 100 cycles at 30 feet per second.   | MIL-DTL-38999/31D        |

### STORES MANAGEMENT TYPE II, RAIL LAUNCH

#### Plugs and Receptacles that meet MIL-STD-1760

Amphenol provides a Breakaway Rail Launch connector that is designed for use on aircraft that carry rail launch missiles such as AMRAAM.

These connectors are designed for blindmating of stores on rail launch applications. They consist of a buffer plug and a missile receptacle that meet the specifications of MIL-STD-1760 Stores Management.

Other features and benefits include:

- Designed to MIL-C-83538 specifications
- Bayonet and push pull coupling
- Use standard MIL-DTL-38999 crimp termination with power, coax and twinax contacts also available
- Buffer provides flame barrier
- Buffers are replaceable

[Consult Amphenol Aerospace for more information and ordering.](#)

Series I LJT

Series II JT

## FEATURES & BENEFITS

Amphenol® LJT and JT Series subminiature cylindrical connectors are qualified to MIL-DTL-38999\*, Series I and II respectively. These connectors were developed to meet the needs of the aerospace industry, and provided the impetus for development of the MIL-C-38999 specifications, which has been superseded by MIL-DTL-38999. Meeting or exceeding MIL-DTL-38999 requirements, Amphenol® JT/LJT connectors feature:

- Lightweight, Space Saving Design
- Contact Protection - 100% scoop-proof LJT design prevents bent pins and short circuits during mating
- Quick Positive Coupling - 3 point bayonet lock system
- Mismatching Eliminated - with 5 key/keyway design
- Error Proof Alternate Positioning - insured by different key/ keyway locations
- EMI Shielding - grounding fingers standard in LJT Series; optional in JT Series
- Nine Shell Sizes and a Variety of Shell Styles
- Contact Options - size 8, 10, 12, 16, 20, 22M and 22D Crimp, Solder, PCB, Wire wrap, Coax, Twinax, Triax, Thermocouple, Fiber Optic and Filter
- Fixed Solder Contacts - Amphenol MIL-DTL-38999 Series I LJT and II JT, are available in solder versions as both Commercial and Military qualified to MIL-DTL-27599
- Hermetic - air leakage limited to  $1 \times 10^{-7}$  cm<sup>3</sup> per second optional
- “Breakaway” Lanyard Release Style - available in LJT plugs. Provides quick disconnect of the connector plug and receptacle with axial pull on the lanyard. See pages 94-96.
- Inventory Support Commonality - uses standard MIL-DTL-38999 contacts, insert arrangements and application tools.
- RoHS Compliant Product Available - Consult Amphenol Aerospace Operations.

# MIL-DTL-38999, Series II JT MIL-DTL-38999, Series I LJT

## COMPONENTS

Shell components are impact extruded or machined bar stock aluminum. Standard plating on shell components is cadmium over nickel. Many finishes are optional (see "Specifications" page 32). Hermetic seal receptacles are available in carbon steel or stainless steel shells. Dependable 5 key/keyway polarization with bayonet lock coupling is incorporated to aid and assure positive mating.

Insert material is a rigid dielectric with excellent electrical characteristics, providing durable protection for molded-in solder type contacts. Contrasting letter or number designations are used on insert faces.

A fluorinated silicone interfacial seal wafer is featured on the mating face of "crimp type pin" inserts. This assures complete electrical isolation of pins when connector halves are mated. In addition, a main joint gasket is installed in the receptacle for moisture sealing between connector halves. Both features are also available for hermetic receptacles.

## CONTACTS

Maximum design flexibility is built into the JT/LJT Series, with a minimum of 2 to a maximum of 128 circuits per connector in a wide variety of contact arrangements. Contacts are available in sizes 8, 10, 12, 16, 20, 22, 22D and 22M with standard 50 micro inch minimum gold plating (100 micro inches optional). All socket contacts are probe proof. Crimp type rear removable contacts are featured in JT-R and LJT-R connectors. Solder termination contacts are also available, as well as PCB, wire wrap, thermocouple, fiber optic, coaxial, triaxial and twinax contact options.

## OPTIONAL FEATURES

High temperature capability of 392°F is available only in JTS or LJTS crimp type connectors. High temperature versions feature gold plated contacts, high temperature shell plating, stainless steel coupling nut spring, and epoxy inserts/fluorinated silicone grommet combination. Standard temperature capability for both solder and crimp is 302°F.

The JTN or LJTN type connectors are available for  $N_2O_4$  resistance provided they are mated, and un-grommeted rear faces are suitably protected.

For information on Fail-Safe Lanyard Release style plugs, see pages 141.

MIL-DTL-38999  
Series I LJT

MIL-DTL-38999  
Series II JT

Where proof of high reliability and lot control is required, MS approved equivalents to most proprietary JT and LJT connectors are available.

\* MIL-DTL-38999 Series I supersedes MIL-C-38999 Series I.  
MIL-DTL-38999 Series II supersedes MIL-C-38999 Series II.

### 7. SELECT AN ALTERNATE KEYING POSITION

“A” designates Alternate keying connector assembly. Other basic alternate keys are “B”, “C” and “D”. No letter required for normal rotation (no rotation) position.

A plug with a given rotation letter will mate with a receptacle with the same rotation letter. The AB angle for a given connector is the same whether it contains pins or sockets. Only the master key/keyway rotates in the shell, and the minor keys are fixed.

AB angles shown are viewed from the front face of the connector, a receptacle is shown below. The angles for the plug are exactly the same except the direction of rotation is opposite of that shown for the receptacle.

The “N” designation is not referenced in part number, it is omitted.

1. 2. 3. 4. 5.

## PART #

See chart below

| 1. Shell Finish | 2. Base Number | 3. Coded Shell Size | 4. Insert Arrg. | 5. Contact Type/Alt. Keying |
|-----------------|----------------|---------------------|-----------------|-----------------------------|
| 88/91           | 569            | 731                 | -35             | P                           |

## HOW TO ORDER

### 1. SELECT A SHELL FINISH:

|           |  |
|-----------|--|
| <b>88</b> | Designates olive drab cadmium plated connector shell |
| <b>91</b> | Designates electroless nickel plated connector shell |

Consult Amphenol Aerospace for ordering of composite styles.

### 2. BASE NUMBER:

|            |             |
|------------|-------------|
| <b>569</b> | Base Number |
|------------|-------------|

### 3. SELECT A CODED SHELL SIZE:

See chart below **731-739**, designates size 9-25 shell size.

Example: **731** = Size 9 Shell

### 4. SELECT AN INSERT ARRANGEMENT:

Refer to insert availability chart on page 2-5 and pin-out illustrations on pages 14-28.

|            |                                      |
|------------|--------------------------------------|
| <b>-35</b> | Designates Insert Arrangement Number |
|------------|--------------------------------------|

### 5. CONTACT TYPE/ALTERNATE KEYING POSITIONS:

Refer to page 89 for alternate rotation letters to use.

|          |   |
|----------|---|
| <b>P</b> | Designates Pin Contacts in Normal Position    |
| <b>S</b> | Designates Socket Contacts in Normal Position |

## HOW TO ORDER

### 1. BASE NUMBER:

|               |   |
|---------------|---|
| <b>10-626</b> | Base Number for MIL-DTL-38999 Series III Hermetic with PCB Tail |
|---------------|---|

### 2. SELECT A CODED SHELL SIZE:

See chart below **431-439**, designates size 9-25 shell size.

### 3. SELECT AN INSERT ARRANGEMENT:

Refer to insert availability chart on page 2-5 and pin-out illustrations on pages 14-28.

|            |                                      |
|------------|--------------------------------------|
| <b>-35</b> | Designates Insert Arrangement Number |
|------------|--------------------------------------|

### 4. CONTACT TYPE/ALTERNATE KEYING POSITIONS:

Refer to page 89 for alternate rotation letters to use.

|          |   |
|----------|---|
| <b>P</b> | Designates Pin Contacts in Normal Position    |
| <b>S</b> | Designates Socket Contacts in Normal Position |

### 5. SELECT A SHELL FINISH:

|          |  |
|----------|--|
| <b>1</b> | Hermetic seal, passivated Stainless Steel, 200°C |
| <b>2</b> | Hermetic seal, Stainless Steel w/Nickel Plate    |
| <b>3</b> | Carbon Steel w/reflowed tin plate                |

### 6. SELECT A TAIL LENGTH:

|          |          |
|----------|----------|
| <b>B</b> | .100±.03 |
| <b>D</b> | .200±.03 |
| <b>F</b> | .300±.03 |

|-----------------|-------------|------------------|--------------|---------------------------------------|--------------|-------------|
| See chart below | Base Number | Coded Shell Size | Insert Arrg. | Contact Type/<br>Alt. Keying Position | Shell Finish | Tail Length |
|                 | 10-626      | 451              | -35          | P                                     | 1            | B           |

## HOW TO ORDER

### 1. BASE NUMBER:

|               |   |
|---------------|---|
| <b>10-626</b> | Base Number for MIL-DTL-38999 Series III Hermetic with PCB Tail |
|---------------|---|

### 2. SELECT A CODED SHELL SIZE:

See chart below **451-459**, designates size 9-25 shell size.

### 3. SELECT AN INSERT ARRANGEMENT:

Refer to insert availability chart on page 2-5 and pin-out illustrations on pages 14-28.

|            |                                      |
|------------|--------------------------------------|
| <b>-35</b> | Designates Insert Arrangement Number |
|------------|--------------------------------------|

### 4. CONTACT TYPE/KEYING POSITIONS:

Refer to page 89 for alternate rotation letters to use.

|          |   |
|----------|---|
| <b>P</b> | Designates Pin Contacts in Normal Position    |
| <b>S</b> | Designates Socket Contacts in Normal Position |

### 5. SELECT A SHELL FINISH:

|          |  |
|----------|--|
| <b>1</b> | Hermetic seal, passivated Stainless Steel, 200°C |
| <b>2</b> | Hermetic seal, Stainless Steel w/Nickel Plate    |
| <b>3</b> | Carbon Steel w/reflowed tin plate                |

### 6. SELECT A TAIL LENGTH:

|          |          |
|----------|----------|
| <b>B</b> | .100±.03 |
| <b>D</b> | .200±.03 |
| <b>F</b> | .300±.03 |

| Shell Size | Part Number            | L<br>+.011<br>-.010 | N<br>+.001<br>-.005 | GG<br>+.011<br>-.010 | KK<br>+.001<br>-.005 |
|------------|------------------------|---------------------|---------------------|----------------------|----------------------|
| 8          | 10-626 <b>451</b> -XXX | .078                | .473                | .687                 | .562                 |

### 3. SHELL SIZE

See table on page 2-5

Shell Size & Insert Arrangement are on pages 2-5. First number represents Shell Size, second number is the Insert Arrangement. Place Shell Size in box 3 and Insert Arrangement in box 5.

### 4. FINISHES

| Finish                                     | Military Finish Data |
|--|----------------------|
| Cadmium plated nickel base 175°C           | <b>A</b>             |
| Olive drab cadmium plate nickel base 175°C | <b>B</b>             |
| Electroless nickel 200°C                   | <b>F</b>             |
| Electroless nickel, space compatible 200°C |                      |
| Anodic coating (Alumilite) 200°C           | <b>C</b>             |
| Chromate treated (Iridite 14-2) 125°C      |                      |
| Passivated steel 200°C                     | <b>E</b>             |
| Nickel-PTFE 175°C                          |                      |

### 4. HERMETIC FINISHES

| Finish                                   | Military Finish Data |
|--|----------------------|
| Carbon steel shell tin plated & contacts | <b>D</b>             |
| Stainless steel shell passivated         | <b>N</b>             |
| Stainless steel nickel plated            | <b>N</b>             |

### 5. INSERT ARRANGEMENT

See table on page 2-5

### 6. CONTACTS

|          |                 |
|----------|-----------------|
| <b>P</b> | Pin Contacts    |
| <b>S</b> | Socket Contacts |

### 7. ALTERNATE KEYING POSITION

"A" designates Alternate keying connector assembly. Other basic alternate keys are "B", "C" and "D". No letter required for normal rotation (no rotation) position.

A plug with a given rotation letter will mate with a receptacle with the same rotation letter. The AB angle for a given connector is the same whether it contains pins or sockets. Only the master key/keyway rotates in the shell, and the minor keys are fixed. AB angles shown are viewed from the front face of the connector, a receptacle is shown below. The angles for the plug are exactly the same except the direction of rotation is opposite of that shown for the receptacle.

The "N" designation is not referenced in part number, it is omitted.

RELATIVE POSSIBLE POSITION OF ROTATED MASTER KEYWAY (front face of receptacle shown)

### LJT Key/Keyway Rotation

| AB ANGLE OF ROTATION (Degrees) |        |     |     |      |      |
|--------------------------------|--------|-----|-----|------|------|
| Shell Size                     | Normal | A   | B   | C    | D    |

### 5. ALTERNATE KEYING POSITION

“A” designates Alternate keying connector assembly. Other basic alternate keys are “B”, “C” and “D”. No letter required for normal rotation (no rotation) position.

RELATIVE POSSIBLE POSITION OF ROTATED MASTER KEYWAY (front face of receptacle shown)

A plug with a given rotation letter will mate with a receptacle with the same rotation letter. The AB angle for a given connector is the same whether it contains pins or sockets. Only the master key/keyway rotates in the shell, and the minor keys are fixed.

AB angles shown are viewed from the front face of the connector, a receptacle is shown below. The angles for the plug are exactly the same except the direction of rotation is opposite of that shown for the receptacle.

The “N” designation is not referenced in part number, it is omitted.

### LJT Key/Keyway Rotation

| AB ANGLE OF ROTATION (Degrees) |        |     |     |      |      |
|--------------------------------|--------|-----|-----|------|------|
| Shell Size                     | Normal | A   | B   | C    | D    |
| 9                              | 95°    | 77° | -   | -    | 113° |
| 11                             | 95°    | 81° | 67° | 123° | 109° |
| 13                             | 95°    | 75° | 63° | 127° | 115° |
| 15                             | 95°    | 74° | 61° | 129° | 116° |
| 17                             | 95°    | 77° | 65° | 125° | 113° |
| 19                             | 95°    | 77° | 65° | 125° | 113° |
| 21                             | 95°    | 77° | 65° | 125° | 113° |
| 23                             | 95°    | 80° | 69° | 121° | 110° |
| 25                             | 95°    | 80° | 69° | 121° | 110° |

### 6. SELECT A STRAIN RELIEF OPTION OR FINISH VARIATION SUFFIX

Strain Relief Options: “SR” designates a strain relief clamp. Strain reliefs are available only on Service Class “C” and “RE” (see step 3. Service Class)

Finish Variation Suffix: See finish variations available in table to your right.

#### 6. HERMETIC FINISHES

| Finish                                   | Finish Suffix |
|--|---------------|

| <b>PART #</b>   | Shell Finish | Base Number | Coded Shell Size | Insert Arrg. | Contact Type/Alt. Keying |
| See chart below | 88/91        | 569         | 701              | -35          | P                        |

## HOW TO ORDER

### 1. SELECT A SHELL FINISH:

|           |  |
|-----------|--|
| <b>88</b> | Designates olive drab cadmium plated connector shell |
| <b>91</b> | Designates electroless nickel plated connector shell |

Consult Amphenol Aerospace for ordering of composite styles.

### 2. BASE NUMBER:

|            |             |
|------------|-------------|
| <b>569</b> | Base Number |
|------------|-------------|

### 3. SELECT A CODED SHELL SIZE:

See chart below **701-709**, designates size 9-25 shell size. Example: **701**= Size 9 Shell

■ (+) .005 DIA (M)

| Shell Size | Coded Shell Size | L Max. | M +.000 - .005 | N Dia. | P Max. Panel Thickness | R (TP) | S +.011 - .010 | T Dia. ±.005 | V Thread Class 2A (Plated) | SS Dia. +.000 - .016 |
|------------|------------------|--------|----------------|--------|------------------------|--------|----------------|--------------|----------------------------|----------------------|
| 9          | <b>701</b>       | .453   | .820           | .572   | .234                   | .719   | .938           | .128         | .4375-28 UNEF              | .662                 |

| <b>PART #</b>   | Shell Finish | Base Number | Coded Shell Size | Insert Arrg. | Contact Type/Alt. Keying |
| See chart below | 88/91        | 628         | 701              | -35          | P                        |

## HOW TO ORDER

### 1. SELECT A SHELL FINISH:

|           |  |
|-----------|--|
| <b>88</b> | Designates olive drab cadmium plated connector shell |
| <b>91</b> | Designates electroless nickel plated connector shell |

Consult Amphenol Aerospace for ordering of composite styles.

### 2. BASE NUMBER:

|            |             |
|------------|-------------|
| <b>628</b> | Base Number |
|------------|-------------|

### 3. SELECT A CODED SHELL SIZE:

See chart below **701-709**, designates size 9-25 shell size. Example: **701** = Size 9 Shell

■ (+) .005 DIA (M)

| Shell Size | Coded Shell Size | L Max. | M +.000<br>-.005 | N Dia. | P Max. Panel Thickness | R (TP) | S +.011<br>-.010 | T Thread       | V Thread Class 2A (Plated) | SS Dia. +.000<br>-.016 |
|------------|------------------|--------|------------------|--------|------------------------|--------|------------------|----------------|----------------------------|------------------------|
| 9          | <b>701</b>       | .453   | .820             | .572   | .234                   | .719   | .938             | .112-40UNJC-3B | .4375-28 UNEF              | .662                   |

### HOW TO ORDER

#### 1. BASE NUMBER:

**10-626** Base Number for MIL-DTL-38999 Series III Hermetic with PCB Tail

#### 2. SELECT A CODED SHELL SIZE:

See chart below **401-409**, designates size 9-25 shell size.

#### 3. SELECT AN INSERT ARRANGEMENT:

Refer to insert availability chart on page 2-5 and pin-out illustrations on pages 14-28.

**-35** Designates Insert Arrangement Number

#### 4. CONTACT TYPE/ALTERNATE KEYING POSITIONS:

Refer to page 117 for alternate rotation letters to use.

- P** Designates Pin Contacts in Normal Position
- S** Designates Socket Contacts in Normal Position

#### 5. SELECT A SHELL FINISH:

- 1** Hermetic seal, passivated Stainless Steel, 200°C
- 2** Hermetic seal, Stainless Steel w/Nickel Plate
- 3** Carbon Steel w/reflowed tin plate

#### 6. SELECT A TAIL LENGTH:

- B** .100±.03
- D** .200±.03
- F** .300±.03

## HOW TO ORDER

### 1. BASE NUMBER:

**10-626** Base Number for MIL-DTL-38999 Series III Hermetic with PCB Tail

### 2. SELECT A CODED SHELL SIZE:

See chart below **421-429**, designates size 9-25 shell size. Example: **421** = Size 9 Shell

### 3. SELECT AN INSERT ARRANGEMENT:

Refer to insert availability chart on page 2-5 and pin-out illustrations on pages 14-28.

**-35** Designates Insert Arrangement Number

### 4. CONTACT TYPE/ALTERNATE KEYING POSITIONS:

Refer to page 117 for alternate rotation letters to use.

- P** Designates Pin Contacts in Normal Position
- S** Designates Socket Contacts in Normal Position

### 5. SELECT A SHELL FINISH:

- 1** Hermetic seal, passivated Stainless Steel, 200°C
- 2** Hermetic seal, Stainless Steel w/Nickel Plate
- 3** Carbon Steel w/reflowed tin plate

### 6. SELECT A TAIL LENGTH:

- B** .100±.03
- D** .200±.03
- F** .300±.03

All dimensions for reference only.  
Weld mounting hermetic receptacle also available.  
Consult Amphenol for availability and dimensions.

# Series I, LJT Breakaway Fail Safe

## Lanyard Release Plug How to Order, cont.

### HOW TO ORDER-MILITARY FAIL SAFE MS27661

| 1. MS Number   | 2. Service Class | 3. Shell Size | 4. Finish | 5. Insert Arrg. | 6. Contact Style | 7. Alternate Position |
|----------------|------------------|---------------|-----------|-----------------|------------------|-----------------------|
| <b>MS27661</b> | <b>T</b>         | <b>17</b>     | <b>B</b>  | <b>35</b>       | <b>P</b>         | <b>A</b>              |

#### 1. MS27661 NUMBER

MS Number designates MIL-DTL-38999, Series I LJT Lanyard Release Plug

#### 2. SELECT A SERVICE CLASS

- E** For environmental crimp applications (inactive for new design)
- T** For environmental crimp applications with serrations on rear threads of shell

#### 3. SELECT A SHELL SIZE

MIL-DTL-38999, sizes 11 through 25, see chart on page 140.

#### 4. SELECT A FINISH

- B** Designates corrosion resistant olive drab cadmium plated aluminum, 500 hour extended salt spray, EMI shielding effectiveness -50dB @ 10 GHz specification min., 175°C
- F** Designates electroless nickel plated aluminum, 48 hour salt spray, EMI shielding effectiveness -65dB @ 10 GHz 500 specification min., 200°C

These are standard finishes. Consult Amphenol Aerospace for variations.

#### 5. SELECT AN INSERT ARRANGEMENT

MIL-DTL-38999, see insert identification chart on page 140.

#### 6. SELECT A CONTACT STYLE

- P** Designates Lanyard Release plug with pin contacts
- S** Designates Lanyard Release plug with socket contacts

#### 7. ALTERNATE KEYING POSITION

For alternate position of connector (to prevent cross-mating) see LJT key/keyway rotation below. (No letter is required for normal)

#### LJT Key/Keyway Rotation

##### AB ANGLE OF ROTATION (Degrees)

| Shell Size | Normal | A   | B          | C    | D    |
|------------|--------|-----|------------|------|------|
| <b>9</b>   | 95°    | 77° | -          | -    | 113° |
| <b>11</b>  | 95°    | 81° | 67°        | 123° | 109° |
| <b>13</b>  | 95°    | 75° | 63°        | 127° | 115° |
| <b>15</b>  | 95°    | 74° | 61°        | 129° | 116° |
| <b>17</b>  | 95°    | 77° | 65°        | 125° | 113° |
| <b>19</b>  | 95°    | 77° | <b>65°</b> | 125° | 113° |
| <b>21</b>  | 95°    | 77° | 65°        | 125° | 113° |
| <b>23</b>  | 95°    | 80° | 69°        | 121° | 110° |
| <b>25</b>  | 95°    | 80° | 69°        | 121° | 110° |

### HOW TO ORDER-COMMERCIAL FAIL SAFE 88-5388 OR 91-5388

| 1. Finish | 2. Connector Type Identification | 3. Shell Size & Insert Arrangement | 4. Lanyard Length Code | 5. Contact Type Alternate Rotation of Insert |
|-----------|----------------------------------|------------------------------------|------------------------|--|
| <b>88</b> | <b>5388</b>                      | <b>29</b>                          | <b>40</b>              | <b>P</b>                                     |

#### 1. SELECT A FINISH

- 88** Designates corrosion resistant olive drab cadmium plate over nickel, 500 hour extended salt spray, EMI -50dB @ 10 GHz specification min., 175°C
- 91** Designates electroless nickel plated aluminum, optimum EMI shielding effectiveness -65dB @ 10 GHz specification min., 48 hour salt spray, 200°C

These are standard finishes. Consult Amphenol Aerospace, Sidney, NY for variations.

#### 2. CONNECTOR TYPE IDENTIFICATION

- 5388** Designates MIL-DTL-38999, Series I LJT Lanyard Release Plug

#### 3. SELECT A SHELL SIZE & INSERT ARRANGEMENT

Shell sizes are MIL-DTL-38999, Series III from sizes 11 thru 25. The basic part number selected specifies the insert arrangement. See Table I (page 140) for coded part number that correlates to insert arrangement.

#### 4. SELECT A LANYARD LENGTH CODE

See Table II (page 140) for lanyard length code number.

#### 5. SELECT A CONTACT TYPE/ALTERNATE ROTATION OF INSERT

- P** Designates Lanyard Release plug with pin contacts
- S** Designates Lanyard Release plug with socket contacts

When an alternate position of the connector is required to prevent cross-mating, a different letter (other than P or S) is used. See alternate positioning for LJT (to your left), then convert to Amphenol commercial coding by the following chart below.

| Pin Contacts |                 | Socket Contacts |                 |
|--------------|-----------------|-----------------|-----------------|
| MS Letter    | Amphenol Letter | MS Letter       | Amphenol Letter |
| P            | P (normal)      | S               | S (normal)      |
| PA           | E               | SA              | F               |
| PB           | R               | SB              | T               |
| PC           | W               | SC              | X               |
| PD           | Y               | SD              | Z               |

# Series I, LJT Breakaway Fail Safe

## Lanyard Release Plug Insert Availability

38999

### INSERT AVAILABILITY

| Shell Size / Insert Arrangement | Service Rating | Total Contacts | Contact Size |    |    |    |         |         |          |  |

I  
SJT  
Access  
Aquacon

Series I

Amphenol LJT Breakaway Fail Safe Connectors provide unequalled performance in environments requiring instant disengagement.

Designed to provide quick disconnect of a connector plug and receptacle with an axial pull on the lanyard, the “Breakaway” Fail Safe connector family offers a wide range of electrical and mechanical features:

- Instant decoupling and damage free separation
- Completely intermateable with standard LJT receptacles
- Inventory support commonality through the use of standard insert arrangements and contacts

Breakaway un-mating is initiated by applying a pull force to the lanyard which causes the operating sleeve on the plug to move away from the receptacle. Coupling segments on the plug then move away from the mating receptacle while expanding, thus releasing the receptacle. After completion of the un-mating sequence, spring compression returns the sleeve and segments to their original positions. Un-mating of the plug may also be accomplished by normal rotation of the coupling ring without affecting the breakaway capability.

The LJT Breakaway Fail Safe connector features which provide EMI EMP shielding in excess of MIL-DTL-38999 Series I requirements:

- Solid metal-to-metal coupling
- EMI grounding fingers
- Conductive finishes

Contact Amphenol Aerospace for more information on breakaway, quick-disconnect connectors. Other Amphenol cylindrical families (MIL-DTL-38999 Series III, MIL-DTL-26482, MIL-DTL-83723) also offer breakaway quick-disconnect connectors.

### LJT Breakaway Fail Safe

In addition to standard Breakaway connectors, Amphenol also manufactures custom breakaway connectors including those with:

- Increased pull-force capability
- Custom lanyard lengths and backshells
- Low force separation capabilities
- Low insertion/separation force contacts
- Non-cadmium finishes

Custom JT Series Breakaway designs have been developed for special applications; however the LJT Series is recommended over the JT Series for the quick-disconnect breakaway style.

# Amphenol SJT

## Features, Specifications

Amphenol® SJT connectors combine unique design features of the scoop-proof LJT series within standard mounting dimensions of JT types. Available in a wide range of shell sizes, finishes, insert arrangements and accessories.

### Components

Standard connectors use aluminum shells. Standard plating on shell components is cadmium over nickel with many optional finishes available. A dependable 5-key/keyway shell polarization with bayonet-lock coupling is incorporated to aid and assure positive mating.

The insert material is a high-temperature, rigid dielectric polymer providing excellent electrical characteristics. A fluorinated silicone interfacial seal is featured on the mating face of the pin inserts, assuring complete electrical isolation of the pins when connector halves are mated. Contrasting letter or number designations are used on the insert faces. A main joint gasket is installed in the receptacles for moisture sealing between connector halves.

Serrated and threaded shells, with a moisture sealing pilot for back shells, accept a wide range of accessories. Hermetic seal receptacles are available in carbon steel or stainless steel shells.

### Contacts

Rear insertable/rear release crimp contacts are standard in SJT connectors. Power contacts are available in sizes 10, 12, 16, 20, 22M and 22D. All socket contacts are probe proof. Standard contact plating is 50 mμ minimum gold. Coaxial contacts are available in sizes 8, 12 and 16 to accommodate a wide range of coaxial cables; see Coaxial contact information in the High Speed Contact section of this catalog. Size 8 and 12 Twinax contacts are also available; see Concentric Twinax contact information in the High Speed Contact section of this catalog.

### Optional Features

Special adaptations of the SJT are available for hermetic and high temperature applications. The SJTS high temperature connector is rated at 392°F. SJT hermetic receptacles are described on page 150.

### Specials

Special types are available, such as connectors less contacts and circular rack and panel connectors with solderless wrap contacts. A complete listing of connector types, shell styles and service classes appears on page 145, How to Order. For further information on special application requirements, contact an Amphenol Sales Person or visit [www.amphenol-aerospace.com](http://www.amphenol-aerospace.com) for more information.

### SJT features:

- 100% scoop-proof design – basic MIL-DTL-38999 Series I\* lengths
- Standard mounting dimensions – MIL-DTL-38999, Series II\*\* dimensions
- Compliance with European Specifications – PAN6433-2, LN29729, VG96912

### 2. SHELL SIZE & INSERT ARRANGEMENT SEE PAGE 145

First number represents Shell Size, second number is the Insert Arrangement.

### 4. ALTERNATE KEYING POSITION

A plug with a given rotation letter will mate with a receptacle with the same rotation letter. The AB angle for a given connector is the same whether it contains pins or sockets. Inserts are not rotated in conjunction with the master key/keyway.

AB angles shown are viewed from the front face of the connector. A receptacle is shown below. The angles for the plug are exactly the same, except the direction of rotation is opposite of that shown for the receptacle.

#### KEY/KEYWAY ROTATION AB ANGLE OF ROTATION (DEGREES)

| Shell Size | Normal | A  | B  | C   | D   |
|------------|--------|----|----|-----|-----|
| 8          | 95     |    |    |     |     |
| 10         | 95     | 81 | 67 | 123 | 109 |
| 12         | 95     | 75 | 63 | 127 | 115 |
| 14         | 95     | 74 | 61 | 129 | 116 |
| 16         | 95     | 77 | 65 | 125 | 113 |
| 18         | 95     | 77 | 65 | 125 | 113 |
| 20         | 95     | 77 | 65 | 125 | 113 |
| 22         | 95     | 80 | 69 | 121 | 110 |
| 24         | 95     | 80 | 69 | 121 | 110 |

RELATIVE POSSIBLE POSITION OF ROTATED MASTER KEYWAY (front face of receptacle shown)

### 3. CONTACT TYPE

◆ Not tooled for 02-RE

\* Pin inserts only (contact Amphenol for socket availability).

\*\* twinax contacts for MIL-C-17/176-00002 cable.

\*\*\* Two size 16 contacts dedicated to fiber optics. Consult Amphenol or Fiber Optic Section for more information.

† Must be ordered separately

†† Coax Contacts for RG180 or RG195 cable.

††† Size 8 Coax and Twinax are interchangeable.

For availability of size 12 twinax contacts, consult Amphenol Aerospace.

## Design Features

The Amphenol® Aquacon Series of connectors has been designed to provide maximum service in oceanic or fluid immersion applications.

The AJ Aquacon offers the following features:

- 1500 PSI Capability
- “O” Ring Sealing, Thread
- Threaded Coupling
- Visual Mating Indication
- Design Flexibility

A specially designed aluminum bronze coupling nut and type 316 stainless steel shells resist corrosion and provide a pressure withstanding connector. Positive threaded coupling. “O” rings, and a color band visual indicator assure sealing and proper mating. A rear accessory thread provides for the use of EMI hardware or molding adapters.

Aquacon Connectors are available in a straight plug and two receptacle styles (see photos at right), with numerous MIL-DTL-38999 insert patterns.

AJ Aquacons use JT (38999 type) inserts that incorporate contact sizes 22D, 22M, 22, 20 or 16. AS Aquacons use SJT (38999 type) inserts that incorporate size 12 contacts. Hermetically sealed (1 X 10<sup>-6</sup> cc/sec leakage rate) arrangements are also available.

### DESIGN FEATURES OF AQUACON SERIES CONNECTORS

1. Corrosion resistant aluminum bronze coupling nut and stainless steel sleeve
2. Hermetic and non-hermetic inserts in MIL-DTL-38999 patterns. Glass or hard dielectric material.
3. Visual mating indicator
4. 1500 PSI sealing capability assured by threaded coupling and “O” ring
5. Pin or socket contacts in either plug or receptacle
6. Environmental resistant molded cable terminations with or without EMI accessory

### AQUACON SERVICE RATINGS

| Service Rating | Suggested Operating Voltage (Sea Level) |      |
|----------------|---|------|
|                | AC (RMS)                                | DC   |
| M              | 400                                     | 550  |
| I              | 600                                     | 850  |
| II             | 900                                     | 1250 |

The establishment of electrical safety factors is left entirely in the designer's hands, as he can best determine what peak voltage, switching surges, transients, etc. can be expected in a particular circuit.

### ALTERNATE POSITIONING

Alternate positioning of connectors allows connectors with identical insert arrangements to be mounted side by side by providing a positive means of eliminating inadvertent cross-mating or cross-plugging.

Alternate positioning of Aquacon Series is achieved by a rotation of the master key/keyway, relative to the insert, as part of the shell manufacturing operation.

Recommended practice is to use alternate position inserts only when necessary.

### AQUACON MASTER KEY/KEYWAY ROTATION

| Shell Size | AB Angle of Rotation (Degrees) |    |    |     |     |
|------------|--------------------------------|----|----|-----|-----|
|            | Normal                         | A  | B  | C   | D   |
| 8          | 100                            | 82 |    |     | 118 |
| 10         | 100                            | 86 | 72 | 128 | 114 |
| 12         | 100                            | 80 | 68 | 132 | 120 |
| 14         | 100                            | 79 | 66 | 134 | 121 |
| 16         | 100                            | 82 | 70 | 130 | 118 |
| 18         | 100                            | 82 | 70 | 130 | 118 |
| 20         | 100                            | 82 | 70 | 130 | 118 |
| 22         | 100                            | 85 | 74 | 126 | 115 |
| 24         | 100                            | 85 | 74 | 126 | 115 |

Fused compression glass sealed inserts. Leakage rate less than 1.0x10<sup>-6</sup> cc/sec at 15 psi differential; with interfacial seal.

## 2. CONTACT TYPE

| Receptacle |   |
|------------|---|
| C          | Non-Removable Solder Termination                            |
| R          | Removable Crimp Termination                                 |
| H          | Hermetic (Glass Seal) Solder Termination (Receptacles only) |
| Plug       |   |
| C          | Non-Removable Solder Termination                            |

## 5. ALTERNATE POSITIONING

Alternate positioning of Aquacon Series is achieved by a rotation of the master key/keyway, relative to the insert, as part of the shell manufacturing operation. Recommended practice is to use alternate position inserts only when necessary.

### AQUACON MASTER KEY/KEYWAY ROTATION

| Shell Size | AB Angle of Rotation (Degrees) |    |    |     |     |
|------------|--------------------------------|----|----|-----|-----|
|            | Normal                         | A  | B  | C   | D   |
| 8          | 100                            | 82 |    |     | 118 |
| 10         | 100                            | 86 | 72 | 128 | 114 |
| 12         | 100                            | 80 | 68 | 132 | 120 |
| 14         | 100                            | 79 | 66 | 134 | 121 |
| 16         | 100                            | 82 | 70 | 130 | 118 |
| 18         | 100                            | 82 | 70 | 130 | 118 |
| 20         | 100                            | 82 | 70 | 130 | 118 |
| 22         | 100                            | 85 | 74 | 126 | 115 |
| 24         | 100                            | 85 | 74 | 126 | 115 |

## 3. SELECT A SHELL SIZE & INSERT ARRANGEMENT SEE PAGES 2-5

Shell Size & Insert Arrangements are on pages 2-5. First number represents Shell Size, second number is the Insert Arrangement.

## 4. CONTACTS

|   |                 |
|---|-----------------|
| P | Pin Contacts    |
| S | Socket Contacts |

Hermetics are available only in pin contacts.

ALTERNATE POSSIBLE POSITION OF ROTATED MASTER KEYWAY (FACE OF AJ or AS RECEPTACLE SHOWN)

## 6. SPECIAL VARIATIONS

|       |   |
|-------|---|
| (168) | Rear Accessory Thread for Non-Hermetic Jam Nut Receptacle only. |
| (445) | Hex Coupling and Rear Accessory Threads for Straight Plug only. |

Consult Amphenol Aerospace for other options and special variations available. See how to order protection caps on page 161.

# Aquacon Series

## Installation Instructions, Application Tools

38999

### MOLDING

Suggested method of assembly to cable for Aquacon plugs and cable connecting receptacles is molding. The mold sealing diameter has been designed to use a common mold for both plug and receptacle in a given shell size.

### SEALING

In a mated condition, the red visual mating indicator band must be fully concealed by the plug coupling nut to assure a reliable, pressure rated sealed joint. Failure to fully tighten the coupling nut may allow leakage through the main joint seal. The red visual mating indicator is so located that only a full and proper mating of the plug and receptacle will cause the indicator to be fully hidden by the plug coupling nut.

Red Visual Mating Indicator Band

### MOUNTING SURFACES

The integrity of an "O" ring hydrostatic shell is dependent upon the flatness of the surface on which the receptacle is mounted. Surface finishes of 23 microns or less are recommended for "O" ring sealing areas when jam nut or through bulkhead receptacles are mounted.

MOUNTING CUTOUTS

Rear mount jam nut

| Shell Size | B<br>+.010<br>-.000 | R<br>+.010<br>-.000 |

### CONTACT INSTALLATION

#### WIRE AND CABLE PREPARATION

1. Cut wire or cable to desired length. Strip insulation from end of wire in accordance with the following table. Hot wire stripping methods are recommended. Avoid nicking or cutting wire strands.

#### WIRE STRIP LENGTH IN INCHES

| Contact Type | Contact Size |     |     |            |      |    |
|--------------|--------------|-----|-----|------------|------|----|
|              | 22M          | 22D | 22  | 20         | 16   | 12 |
| Solder       | 1/8          | -   | 1/8 | 5/32       | 5/32 |    |
| Crimp        | 1/8 - 5/32   |     |     | 7/32 - 1/4 |      |    |

#### SOLDER CONTACT TERMINATION

1. Clean conductors and pre-tin with a good grade 60/40 tin-lead solder to 1/16 inch.
2. Pre-tin contact solder well.
3. With connector in a suitable holding device, solder wells facing operator, and the cutaway portion of the wells up, insert pre-tinned conductor into contact well. Apply heat to closed side of wire well to make joint. Remove heat and allow joint to cool.
4. A resistance soldering unit of approximately 125 watts is recommended. If a soldering iron is used, do not exceed 20 watts for size 22M, 22D and 22 contacts; 80 watts for size 20; and 150 watts for size 16 and 12 contacts.
5. Wipe or brush excess flux from terminations.

#### CRIMP CONTACT TERMINATION

1. Select proper crimping tool and positioner from Application Tooling table on previous page.
2. Position wire in wire well. Wire must be visible in the inspection hole provided.
3. With the wire in place, insert the contact fully into the crimping tool. Squeeze the crimping tool handles to the full extent of their travel. The recommended crimping tools are the "full cycling" type and will not release until a complete crimp is made. Release pressure on handles and remove the completed crimped contact/wire assembly.

#### CONTACT INSERTION

1. Select proper insertion tool from Application Tooling table on previous page.
2. With contact/wire assembly properly positioned in the insertion tool, push forward, directly in line with the grommet hole, until the contact is felt to snap into place.
3. Remove insertion tool.  
All unused contact positions must be filled with uncrimped contacts. In addition, sealing plugs (see Application Tooling table) should be inserted in all unused grommet holes.

#### CONTACT REMOVAL

1. Select proper removal tool from Application Tooling table on previous page.
2. Carefully insert removal tool until contact to be removed is released. Aquacon contacts are rear release, rear removable.
3. Remove contact.

Amphenol offers a full range of accessories that are designed to enhance the performance of Amphenol 38999 connectors, both military and non-military.

Backshells are an integral part of any circular connector when it comes to reliable cable connections. Amphenol divisions team up globally to provide a very large assortment of backshells for use with 38999 Series of connectors, as well as other circular series.

This Accessories and Tools section covers what is offered from Amphenol Aerospace, Sidney, NY. For MIL-DTL-38999 Series III, II, I and SJT (reference table of contents on preceding page).

The section of this catalog called "Backshells" covers the backshell and adapters that are provided through the Amphenol PCD/Amphenol India divisions. Please refer to this section for:

- Backshells for Connector Family "L", which includes MIL-DTL-38999 Series III and Series IV
- Backshells for Connector Family "K", which includes MIL-DTL-38999 Series I and Series II
- Backshells for Connector Family "J", which includes MIL-DTL-24682 (Matrix, Series 2), MIL-DTL-5015 (Matrix, MS3400 Series), MIL-DTL-83723 (Series I & III), MIL-DTL-81703 (Series III)

The variety of types of backshells and adapters covered in the Backshells section of this catalog include:

- Non-environmental backshells
- Environmental backshells
- Non-environmental EMI/RFI backshells
- Environmental EMI/RFI backshells
- Shrink boot adapters
- Crimp ring adapters
- Band lock adapters
- Pre-shield adapters

Accessories

Amphenol offers a full range of accessories that are designed to enhance the performance of Amphenol Breakaway connectors.

## Low Profile Backshells in shell size 25 with the following features:

- Olive drab cadmium finish
- 90 degree termination
- Low profile design with three heights ranging from 1.010 to 1.660
- Rear access covers to help ease harness assembly and repairability
- Amphenol part numbers: 10-640000-XXX

BACKSHELLS ARE OFFERED FOR USE WITH BREAKAWAY FAIL SAFE CONNECTORS IN THREE HEIGHTS

## DUMMY CONTACTS

- Available in size 12 and size 8
- Provide a cost effective alternative for sealing unused contact cavities
- Size 8 part number: T3-4008-59P
- Size 12 part number: T3-4012-59P

## WIRE COMBS

- Available for the 25-20 insert pattern to help to stabilize and prevent contact side loading
- Amphenol part number: 21-33626-XXX

For information on how to order these accessory products for Breakaway Fail Safe connectors, consult Amphenol Aerospace.

## Universal “Header Assembly” for Flex Print or PC Board

### MOUNTS TO ALL MIL-DTL-38999

The universal header assembly from Amphenol provides for easy separation of the connector from the board.

The header assembly is comprised of a short pin/socket contact. The tail end of the contact is soldered to the through hole of the flex or printed circuit board. The socket is embedded in the insulator, making electrical contact with the printed circuit tail of the connector.

**HEADERS PROVIDE EASY SEPARATION OF THE CONNECTOR FROM THE PC BOARD.**

### FEATURES AND BENEFITS:

- Circular and square header assemblies available
- Cost and time savings in the manufacturing process
- Assemblies can be vapor phase or wave soldered to flex/printed circuit board
- Allows electrical testing when installed properly.
- Connector assemblies can be easily removed from and reattached to the header assembly.

### MOUNTING APPLICATIONS

- Amphenol **square** universal headers are slotted to allow mounting to all series of MIL-DTL-38999 or MIL-DTL-26482 connectors without special alterations.
- Amphenol **circular** universal headers are designed to accommodate the rear flange of PCB Board Mount shells, series MIL-DTL-38999 connectors without special alterations.
- The header assembly can be attached to connectors with standard flange placement or directly to the circuit board.
- Connectors with dual flange mounting hardware can be provided to allow easy mounting to the panel or the header assembly.
  - Forward flange would mount the connector to the panel
  - Rear flange would be used to mount to the header assembly.
- Various types of captivated or loose attaching screws can be utilized for unique applications.

\* For information on Header Assemblies for MIL-DTL-26482 connector, consult Amphenol Aerospace.

### MOUNTING TO RECTANGULAR ARINC CONNECTORS

- Headers for ARINC connector arrangements accommodate up to 150 pins
- Consult Amphenol Canada, Ontario for ARINC configurations.

### MATERIALS

- Body is molded or machined from FR-4.
- Electrical engagement areas of the header contact are plated with .00003 inches minimum of gold over .00005 inches minimum of nickel.

See drawing of standard header on next page.

## Application Tools

The following data includes information pertaining to the application tools which have been established for crimping, inserting, and removing contacts incorporated in the TV, CTV and MIL-DTL-38999 Series III connectors. For additional information on coax, twinax and triax contact tools, see High Speed Contact section of this catalog.

All crimping tools included are the “full cycling” type and when used as specified in the installation instructions L-624 covering the TV, CTV and MS series connectors, will provide reliable crimped wire to contact terminations. There is a possibility of additional crimping tools other than those included being available at present or in the future for this specific application.

### CRIMPING TOOLS

|  |   |   | 10 (Power)                      | TP-201423     |                               |

Where 2 or 3 tools are listed for a contact size, only one tool and its die or positioner are required to crimp the contact. The above crimping tools and positioners are available from the approved tool manufacturer.

### INSERTION TOOLS

For information about contacts see page 29. The M81969/8, 11-8674, 11-8675, and 11-8794 metal contact insertion and removal tools will accommodate wires having the maximum outside diameter as follows: Contact size 12: dia. is .155, size 16: dia. is .109, size 20: dia. is .077, size 22D: dia. is .050. When wire diameters exceed those specified, the plastic tools must be used.

\* Double end insertion/removal tool.

\*\* Twinax insertion tools are available only in a straight type, metal version.

† To be determined.

### WIRE STRIPPING

1. Strip wire to required length. (See Figure at right). When using hot wire stripping, do not wipe melted insulation material on wire strands; with mechanical strippers do not cut or nick strands.
  2. See Table 1 for proper finished outside wire dimensions.
  3. Twist strands together to form a firm bundle.
  4. Insert stripped wire into contact applying slight pressure until wire insulation butts against wire well. Check inspection hole to see that wire strands are visible. If there are strayed wire strands, entire wire end should be re-twisted.
- When wire is stripped and properly installed into contact, the next step is to crimp the wire inside the contact by using the proper crimping tool.

### STRIPPING DIMENSIONS

| Wire Size    | A           |
|--------------|-------------|
| 22, 22M, 22D | .125 (3.18) |
| 20           | .188 (4.77) |
| 16           | .188 (4.77) |
| 12           | .188 (4.77) |

Table 1

| Contact Size | Wire Dimension (inches)** |      |
|--------------|---------------------------|------|
|              | Min.                      | Max. |
| 10           | .135                      | .162 |
| 12           | .097                      | .142 |
| 16           | .065                      | .109 |
| 20           | .040                      | .077 |
| 22           | .034                      | .060 |
| 22M, 22D     | .030                      | .050 |

\*\* Min. diameters to insure moisture proof assembly; max. diameters to permit use of metal removal tools.

### CRIMPING

See table on preceding page for recommended M22520 series crimping tools, turret head or positioner selection settings according to contact size, part number and wire gauge size.

1. Insert stripped wire into contact crimp pot. Wire must be visible through inspection hole.
2. Using correct crimp tool and locator, cycle the tool once to be sure the indentors are open, insert contact and wire into locator. Squeeze tool handles firmly and completely to insure a proper crimp. The tool will not release unless the crimp indentors in the tool head have been fully actuated.
3. Release crimped contact and wire from tool. Be certain the wire is visible through inspection hole in contact.

Examples of M22520 Series Crimping Tools:  
Shown top: tool used for small size 22, 22D and 22M contacts.

Shown bottom: tool used for size 20, 16 or 12 contacts and has a positioner that can be dialed for each contact size.

### CONTACT INSERTION

1. First remove hardware from the plug and receptacle and slide the hardware over wires in proper sequence.

2. Use proper plastic or metal insertion tool for corresponding contact. (Consult Insertion Tool table on preceding page). Slide correct tool (with plastic tool use colored end) over wire insulation and slide forward until tool bottoms against rear contact shoulder.

Plastic tool with contact in proper position.

Metal tool with contact.

3. Next align the tool and contact up to the properly identified cavity at rear of connector plug. Use firm, even pressure; do not use excessive pressure. It is recommended to start at the center cavity. Contact must be aligned with grommet hole and not inserted at an angle. Push forward until contact is felt to snap into position within insert.

Continued on next page.

Note: All plastic tools are double-ended. The colored side is the insertion tool and the white side is the removal tool.

# 38999, Series I LJT, II JT, III TV, & SJT Installation Instructions, cont.

## CONTACT INSERTION, CONT.

4. Remove tool and pull back lightly on wire, making sure contact stays properly seated and isn't dragged back with the tool. Repeat operation with remainder of contacts to be inserted, beginning with the center cavity and working outward in alternating rows.

5. After all contacts are inserted, fill any empty cavities with wire sealing plugs. (Refer to sealing plug charts for Series III on page 29, for Series I & II and SJT see page 30-31.)

6. Reassemble plug or receptacle hardware - slide forward and tighten using connector pliers. Connector holding tools are recommended while tightening back accessories. When using strain relief, center wires at bar clamp. Slide clamp grommet into position and tighten clamp bar screws. When tightening screws, pressure should be applied in the same direction that clamp is threaded to rear threads of connector. When not using clamp grommet, build up wire bundle with vinyl tape so clamp bar will maintain pressure on wires.

**CAUTION**, when inserting or removing contacts, do not spread or rotate tool tips.

## CONTACT REMOVAL

1. Remove hardware from plug or receptacle and slide hardware back along wire bundle.

2. Use proper plastic or metal removal tool for corresponding contact. (Consult Removal Tool table on page 167). Slide correct size tool over wire insulation.

Use white end of plastic tool for removal of contacts.

3. Insert plastic or metal removal tool into contact cavity until tool tips enter rear grommet and come to a positive stop. Hold tool tip firmly against positive stop on contact shoulder. Grip wire and simultaneously remove tool and contact. (On occasion, it may be necessary to remove tool, rotate 90° and reinsert.)

Removal of contacts with metal tool.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,  
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
