General Description

Aeroflex's ACT8505 is a radiation hardened, multi-chip 64 channel multiplexer MCM (multi-chip module) for use in space applications.

The ACT8505 has been specifically designed to meet exposure to radiation environments. The multiplexer is available in a 96 lead High Temperature Co-Fired Ceramic (HTCC) Quad Flatpack (QFP) and is guaranteed operational from -55°C to +125°C. Available screened in accordance with MIL-PRF-38534, the ACT8505 is ideal for demanding military and space applications.

ACT8505 64 Channel Analog MUX Block Diagram

Organization and Application

The ACT8505 consists of four 16 channel muxes arranged as shown in the Block Diagram. The muxes channels 0-63 are controlled by address lines A_0 - A_3 . The mux output monitor is controlled by address lines C_0 , C_1 .

The ACT8505 design is inherently Radiation Hard due to the HS1840RH Multiplexers as well as Microsemi Corp. Transient Suppressors (Reference Microsemi MicroNotes Series 050 - page 14).

NOTE: It is recommended that all "NC or "no connect pin", be grounded. This eliminates or minimizes any ESD or static buildup.
