Catalog Number Code

OPTIONAL TERMINAL IDENTIFICATION

Select the desired version from the list below and add the CODE NUMBER (11, 12, 15 or 16) to the end of the catalog number of the connector or header.

- CODE
 11 = 1 2 3 4 . . .
 12 = . . . 4 3 2 1
 15 = . . . † 3 5 †
 16 = † 5 3 † . . .

*"First Number In Series" Designator**

- | | |
|-------|-------|
| A = 1 | F = 6 |
| B = 2 | G = 7 |
| C = 3 | H = 8 |
| D = 4 | J = 9 |
| E = 5 | K = 0 |

* Letters in this position designate the first number to be used in the consecutive sequence. Ex.: "A" would start the sequence with the number 1. "EK" would start the sequence with the number 50. "BKK" would start the series with 200. For non-sequential numbering and special characters, consult Technical Support.

Note: Some catalog number combinations are not valid. Check appropriate catalog pages before ordering. Catalog numbering code applies only to the catalog numbers on pages 125, 148-151, 164-169.

Note: All part numbers are RoHS Compliant.

Catalog Number Code (Continued)

6 PCV-04-XXX

Contact Spacing

- 3 = 0.250"
- 4 = 0.325"
- 6 = 0.375"
- 8 = 0.4375"

Suffix (if applicable)

Number of Circuits
02 through XX

Terminal Style

- DBL** = Double Printed Circuit Pin
- PCR** = Printed Circuit, Right Angle
- PCV** = Printed Circuit Pin, Vertical
- QCR** = Quick Connect Tab, Right Angle
- QCV** = Quick Connect Tab, Vertical
- STR** = Solder Turret, Right Angle
- STV** = Solder Turret, Vertical
- TBV** = Non Feed Thru
- WWR** = Solderless Wire Wrap, Right Angle
- WWV** = Solderless Wire Wrap, Vertical

Note: Some catalog number combinations are not valid. Check appropriate catalog pages before ordering. Catalog numbering code applies only to the catalog numbers on pages 119-124, 127-129, 134-136.

Barrier Strips – Overview

Two Types of Barrier Strips and a Line of Sockets:

Tri-Barrier

Three walls or barriers surround each terminal screw. The back wall safeguards field wiring.

Dual-Barrier

Two walls or barriers are molded on each side of the terminal screw.

Sockets

Mounted directly to the PC board, the Barrier Strip is plugged into the socket. The socket expedites field maintenance. (Below, a tri-barrier is about to be mounted in a socket.)

Wire Clamp Screws

The lower surface and edges of the clamping-plates are carefully designed to securely clamp the wire—even combinations of different wire sizes—without severing stranded wire. Extra care has been taken to produce these components without burrs on any critical clamping surface or edges.

Resilient Plastic Barriers

Flexible thermoplastic material for terminal blocks was an especially important feature at the time of its introduction, since many earlier blocks were molded of more rigid, brittle thermosetting plastic compounds.

Wire-Ready Raised Screws

Wire-ready raised screws are standard on BUCHANAN terminal blocks. No need to back off the screw first. Just insert the wire and drive down the screw. Wire installation time and effort are virtually cut in half.

Integral Standoffs

Standoffs help rid your PCB of any remaining corrosive agents during rinsing operations. Helps prevent trapped solutions in the immediate PC pin area. Significantly reduces the risk of postwave corrosion problems.

Gas-Tight Connections

The acid-tin plating on our terminals means more than just improved shelf-life and superior solderability. It is to provide the very basis for the heart of your wire connections.

Quality Plating

Tyco Electronics Corporation has been known for its plating, especially on the tin-plated components, and has maintained stringent plating specifications to provide a better performing, more reliable product. (Terminals meet or exceed Tyco Electronics Specification 109-11-1.)

UL Recognition and CSA Certification

Terminal blocks and interconnect components are Recognized under the Component Recognition Program of Underwriters Laboratories Inc. and Certified by Canadian Standards Association. (Consult individual sections of this catalog for status of a specific series.)

Typical Application

Pictured below is a PC board with barrier strips and sockets wave soldered to it.

Tri-Barrier Strips

Product Facts

- n Industrial controls and automation
- n Machine tools
- n HVAC/R
- n Power supplies
- n Security/Irrigation
- n Transformers

Design Advantages

- n Back barriers to safeguard field wiring
- n Fast wiring – backed-out wire-ready screws
- n Interrupted thread designed to prevent screws from falling out
- n Standoffs allow flux and solvents to drain during cleaning
- n Molded-to-length or cut-to-length versions available
- n Phil-slot screws are standard
- n RoHS compatible

Tri-Barrier blocks help contain stray or frayed wire ends. This helps prevent electrical shorts — not only between positions on the same block, but also between other components immediately adjacent to the block. With today’s high-density PCB designs, this has become an increasingly important feature.

Connector Index

0.250" Pitch, Series #3	120-123

Material & Finish

Housing Material—Polypropylene

Flammability—UL94V-0

Color—Black

Terminals—Bright acid tin over copper alloy

Screws—#6-32 steel, zinc plating with clear chromate coating. Wire clamping screws and binding head screws available.

Mechanical Properties

Pitch (Terminal Spacing)—0.375" [.525]

Recommended PCB Hole Dia.—1.8mm [.073"]

Electrical Properties

Ratings—UL Class C 20 Amps, 300V
 UL Class D 5 Amps, 600V
 CSA Type C 20 Amps, 300V

Wire Range—12-22 AWG

Environmental Properties

Operating Temperature Range—105°C [221°F] max.

Circuit Identification—See page 179

Hardware Options

TC2—Safety covers, see page 174

QC2x—.250 Quick connects, see page 176

QC4x—.187 Quick connects, see page 176

ST80—Single sided solder tabs, see page 176

1437661-7—Retaining clip, Insulating turret, see page 178

J6—Jumpers, see page 177

1437651-2—Wire clamp screw, steel, see page 178

1437651-5—Wire clamp screw, brass, see page 178

1437651-8—Binding head screw, steel, see page 178

L03—Binding head screw, stainless, see page 178

A Terminal Style

P=Printed Circuit (available with 1,2,5 block style only)

T=Solder Turret

Q=Quick Connect .250

W=Solderless Wrap

E=Extended Circuit Board

F=Quick Connect .187

B Block Style

1=Flat, all positions filled (standard)

2=Flat, end mounting ears with holes (required for cover option)

3=Insulating turret, end mounting ears with holes (required for cover option)

4=Insulating turret, all positions filled

5=Flat, end positions open with mounting bushings

6=Insulating turret, end positions open with mounting bushings

C Screw Hardware

07=Steel binding combo head screw

08=Steel wire-clamp combo head screw (standard)

05=Brass binding combo head screw

06=Brass wire-clamp combo head screw

D No. of Circuits (Not Positions)

02 to 25 circuits

Note: All part numbers are RoHS Compliant.

Solder Turret

Wire Wrap

Quick Connect

Non-Feed Thru

Dual-Barrier Strips

Product Facts

- Industrial controls and automation
- Machine tools
- HVAC/R
- Power supplies
- Security/Irrigation
- Transformers

Design Advantages

- Fast wiring – backed-out wire-ready screws
- Interrupted thread designed to prevent screws from falling out
- Standoffs allow flux and solvents to drain during cleaning
- Molded-to-length or cut-to-length versions available

The Dual-Barrier design provides a more cost-effective solution than the Tri-Barrier Strips while still supplying many of the design advantages.

Engineering Notes

High-Density, Dual-Barrier Strips, .250" [6.35] Centerline

Product Facts

- High density accommodates today's compact PCB layouts

Material & Finish

- Insulator Body**—UL 94V-0 thermoplastic, black
- Terminal**—Brass, tin-plated
- Screw**—M3, Steel, nickel-plated

Mechanical Properties

- Recommended Tightening Torque**—10 in-lbs
- Combination drive screws with #2 Phillips recess and standard slot

Electrical Properties

- Current Rating**—10 A
- Voltage Rating**—300 VAC/DC per UL and CSA standards
- Wire Range**—16-30 AWG Copper, Solid or Stranded

Environmental Properties

- Operating Temperature**—40°F to +221°F [-40°C to +115°C]
- Circuit Identification**—See page 179

Hardware Options

- TC8**—Safety cover, see page 174
- QC8**—Quick connects, see page 176
- J8**—Jumpers, see page 177
- 1437425-1**—Wire clamp screw, see page 178
- 1437429-1**—Binding head screw, steel, see page 178

Note: All part numbers are RoHS Compliant.

LR30811 E54800

0.375" [9.53] Pitch, NC6 Series, Low Profile

NC6-P108-03

Material & Finish

Housing Material—Thermoplastic polyamide

Flammability—UL94V-0

Color—Black

Terminals—Bright acid tin over copper alloy

Screws—#6-32 steel, zinc plating with clear chromate coating. Wire clamping screws and binding head screws available.

Mechanical Properties

Pitch (Terminal Spacing)—
.375" [9.525]

Screw Size—#6-32 steel

Recommended PCB Hole Dia.—
1.8mm [.073"] dia.

Electrical Properties

Ratings—UL Class C 20 Amps, 300V
CSA Type C 20 Amps, 300V

Wire Range—12-22 AWG

Environmental Properties

Operating Temperature Range—
105°C [221°] max.

Circuit Identification—See page 179

Hardware Options

1437651-2—Wire clamp screw, steel, see page 178

1437651-5—Wire clamp screw, brass, see page 178

1437651-8—Binding head screw, steel, see page 178

L03—Binding head screw, stainless, see page 178

0.4375" [11.1] Pitch, Series SSB7 (Continued)

Contact Spacing Options:

.4375 in (7/16") Spacing

Extra thick barriers provide higher voltage rating. Up to 27 ckts. (25 circuits for end mounted blocks)

Base Options:

Closed Base

Catalog Letter Code: C. For terminal junction-blocks requiring top connections only. Useful in applications requiring single point circuit terminations or circuit completion via top mounted, single- and two-sided quick-connects. Replace double-row barrier strips.

Flat Base

Catalog Letter Code: F. Lends itself most readily to applications where direct top-to-bottom feed-through is required with no special requirement for circuit isolation on the bottom side. The most common example of this is printed circuit board mounting.

Raised Base

Catalog Letter Code R. Standoffs between each circuit raise block .030" above mounting surface to allow flux and solvents to drain during soldering operations. Available only with 02 and 04 bottom terminals.

Turret Base

Catalog Letter Code: T. Combines top-to-bottom feed-through with bottom-side circuit isolation for panels up to .126" thick. Turret bases are available with the following terminals: solder tail, quick connect, machine wrap, extended circuit board terminal, and right-angle.

Mounting Options:

End Position Mounting

Catalog Letter Codes: E, F, G or M. Supplied without contacts in end sections to allow installer to mount blocks with screws in end section holes. Base of block will support mounting screws (Codes F & M). Also available with mounting inserts installed in end mounting holes to raise mounting screw heads to the level of other top hardware (Codes E & G).

Without End Barriers

Catalog Letter Codes: F, G & H. Facilitates mounting-screw access when end sections are used for mounting.

Direct Mounting

Catalog Letter Codes: P & H. SSBs may be solder-mounted using the bottom terminals themselves, as in the case of printed circuit board applications.

Direct mounting is also possible with turret base models using press-on retaining clips (Catalog No. L97, Part Number 1437661-7) on turrets.

Hardware Options

- 7C1xx**—Safety cover, see page 175
- QC2x**—.250 Quick connects, see page 176
- QC4x**—.187 Quick connects, see page 176
- ST80**—Single sided solder tabs, see page 176
- 1776090-x**—Extra long Quick connects, see page 176
- J7**—Jumpers, see page 177
- L91**—Mounting insert, see page 178
- L92**—Angle bracket, see page 178

Terminal Style:

Solder Tail

Catalog Number Code: 01. For applications requiring a wrapped solder connection.

Printed Circuit Pin

Catalog Number Code: 02. Designed specifically for mounting on .063" thick circuit board. Special, readily solderable plating permits good fillet development in automated soldering processes.

Non-Feed-Through

Catalog Number Code: 03. With closed base option only.

Extended Printed Circuit Pin

Catalog Number Code: 04. Useful where extra length is needed, as in thicker printed circuit boards or single-wrap connections.

Quick Connect

Catalog Number Code: 05. .250 in. wide x .032" thick blades accept .250" female quick connects.

Note: All part numbers are RoHS Compliant.

0.4375" [11.1] Pitch, Series SSB7 (Continued)

**Mounting Position:
Right-Angle**

Catalog Number Codes: 06, 08, 12, 13, 14, 15, 16.

Seven variations of right-angle contacts are available. Designed for circuit board and panel applications, this option saves space when printed circuit boards are stacked closely together. It provides access to top connections in restricted spaces. Mount with angle brackets. (Catalog No. L92).

Catalog No. Code	A in.	B in.
06*	0.46	0.11
08*	0.75	0.11
12	0.21	0.65
13	0.36	0.50
14*	0.41	0.16
15	0.51	0.35
16*	0.32	0.25

*Not available with turret base

Wire Wrap

Catalog Number Code: 07. Longer than extended circuit board terminals. Post alignment is compatible with tolerances required for automatic wire wrapping equipment. Post dimensions are compatible with standard wire wrapping bits.

Top Hardware Options:

Binding Head Screws

In most applications, binding head screws will provide excellent wire retention because of exclusive wire locking tabs. These binding head screws are available in 3 materials identified by codes 01, 02, and 03.

Catalog Number Code:

- 01 Bright Zinc and Chromate Plated Steel
- 02 Stainless Steel
- 03 Nickel Plated Brass

Captive Clamp

For applications requiring extra security, captive clamps under the screw heads augment the locking tabs on each contact. Screws have a unique Phil-slot design accepting either Phillips-head or straight screwdriver. Code 02 screw is Bright Zinc and Chromate plated steel. Code 09 screw is Nickel plated Brass.

Catalog Number Code:

- 02 Bright Zinc and Chromate Plated Steel
- 09 Nickel Plated Brass

Catalog Number Codes: 20 through 56.

A complete selection of .187" and .250" quick-connect blades are available for connecting wire terminated with female quick connects. Single and double-sided types in flat, 45° and 90° angle bends can be supplied. Material is brass with tin plating. All blades supplied with 01 screws. Various quick-connects can be combined.

Solder Tabs

Catalog Number Code: 80. Single-sided, slotted solder tabs are available for making wrapped solder connections on the top side of SSBs.

Circuit Identification Options:

Catalog Number Codes: 11 through 16.

SSB blocks may be ordered with circuit identification numbers in white on the molding in six different variations. Custom markings are available on special order.

Molding Material Options:

The standard SSB molding material is UL94V-2 polypropylene. Consult Technical Support for other materials available on special order.

Molding Color Options:

SSB blocks are stocked in black. Consult Technical Support for availability of other colors.

Double-Row, Dual-Barrier Strips

Product Facts

- Double-row, dual barrier strips for wire-to-wire applications. These parts also allow end users to complete the wiring to a separate screw without disturbing the factory wiring.
- Available with either binding head screws or wire clamp
- Increased current-carrying capability

Applications

- Industrial Controls
- Test Equipment
- HVAC
- Power Supplies
- Traffic Signals
- Telecom

Key Features

- Closed bottom design allows for mounting direct to sheet metal panel
- Molded to length
- Accessories such as Quick-Connect Tabs and Jumpers available
- Wire-to-wire termination:
 - .374 [9.5] centerline:
Up to 30 positions
 - .433 [11.0] centerline:
Up to 26 positions
 - .437 [11.1] centerline:
Up to 26 positions
 - .563 [14.3] centerline:
Up to 18 positions
- RoHS Compliant

Note: All part numbers are RoHS Compliant.

Barrier Strip Sockets

Mateability for the socket line is given below:

Socket Series	Connector Series
USB	RSB3, SSB3
RSB6B	RSB6

Product Facts

- n End-to-end mounting of USB sockets maintain circuit spacing: Two 12-circuit USB sockets can mate with one 24-circuit SSB3 or RSB3.
- n Secure mating with built-in locking arms

This unique plug-in socket line allows quick connection of circuits simultaneously without the use of tools.

They are designed to be wave-soldered to a PC board, after which the connector is plugged into the socket.

Note: All part numbers are RoHS Compliant.

0.325" [8.26] Pitch, Series USB Socket (for Series RSB3 and SSB3)

USB3B08S & SSB3FP080202

Material & Finish

Housing Material—Polyamide, Type 6/6

Flammability—UL94V-2

Color—Black

Terminals Contact—Copper alloy, bright tin plating

Pin—Copper alloy, bright tin plating

Mechanical Properties

Pitch (Terminal Spacing)—0.325" [8.26]

Recommended PCB Hole Dia.—.055" [1.40]

Pullout Force—5-7 lbs.

Electrical Properties

Ratings—UL Class B 10 Amps, 300V
CSA Type B 15 Amps, 300V
CSA Type D 10 Amps, 300V

Dielectric Withstand—3500V

Environmental Properties

Operating Temperature Range—-60°C to +105°C [-76°F to +221°F]

Recommended PCB Hole Pattern

Note: RSB6 Tri-Barrier Blocks should be ordered with Number 12 Terminal Style (printed circuit pin, V mounting) when used in combination with this plug-in socket. See page 172 for ordering information.

Note: All part numbers are RoHS Compliant.

0.325" [8.26] Pitch, Series RSB3

RSB3VP061202

Material & Finish

Housing Material—Polypropylene

Flammability—UL94V-2

Color—Black

Terminals—Brass w/bright Tin plating

Screws—Steel w/Zinc + Chromate plating

Mechanical Properties

Pitch (Terminal Spacing)—

.325 in [8.26]

Screw Size—6-32

Recommended PCB Hole Dia.—0.062"

Wire Strip Length—.31 in [7.87]

Recommended Tightening Torque—9 in-lbs.

Recommended Screwdrivers—Stanley 1006-4, Sears Craftsman 41581, Any #2 Phillips-Head

Wire Lug Width (Max.)—.265 in [6.73]

Electrical Properties

Maximum Current—15A

Operating Voltage—300V

Wire Range—#14-26 AWG

Dielectric Withstand—4000V

Environmental Properties

Operating Temperature Range—-60°C to +105°C [-76°F to +221°F]

For mating socket, see pg. 162.

Computing Barrier Block Lengths

Direct Mounting—Use C1 and L1 for Mounting Option "P".

End Position Mounting—Use C2 and L2 for Mounting Option "M".

Note: All part numbers are RoHS Compliant.

0.325" [8.26] Pitch, Series RSB3 (Continued)

Mounting Position

Vertical Mounting

Catalog Letter Code: V. Used where direct top-to-bottom feed-through is required with no need for circuit isolation on the bottom side. The most common example of this is printed circuit board mounting.

End Contact Mounting Options

End Position Mounting

Catalog Letter Code: M. Supplied without contact in end sections to allow installer to mount blocks with screws in end section holes. Base of block will support #6 mounting screws.

Direct Mounting

Catalog Letter Code: P. RSB3 may be solder-mounted using the bottom terminals themselves, as in the case of printed circuit board applications.

Terminal Style

Printed Circuit Pin

Catalog Number Code: 12. Designed specifically for use with our USB3 socket, page 162

Hardware Options

Note: All part numbers are RoHS Compliant.

0.325" [8.26] Pitch, Series SSB3

SSB3FP##0202

Material & Finish

- Housing Material**—Polypropylene
- Flammability**—UL94V-2
- Color**—Black
- Terminals**—Brass, bright acid tin over copper plating
- Screw**—Steel w/ Zinc + Chromate plating

Mechanical Properties

- Pitch (Terminal Spacing)**— .325" [8.26]
- Screw Size**—6-32
- Recommended PCB Hole Dia.**— .062" [1.57]
- Wire Strip Length**— .31" [7.87]
- Recommended Tightening Torque**—9 in.-lbs.
- Recommended Screwdrivers**— Stanley 1006-4, Sears Craftsman 41581, Any #2 Phillips Head.
- Wire Lug Width (Max.)**— .265" [6.73]

Electrical Properties

- Ratings**—UL Class B 20 Amps, 300V
UL Class C 20 Amps, 300V
UL Class D 10 Amps, 300V
CSA Type B 10 Amps, 300V
CSA Type D 10 Amps, 300V

- Wire Range**—#14-26 AWG
- Dielectric Withstand**—4500V

Environmental Properties

- Operating Temperature Range**— 60°C to +105°C [-76°F to +221°F]

Computing Barrier Block Lengths

- Direct Mounting**— Use C1 & L1 for Mounting Option "P".
- End Position Mounting**— Use C2 & L2 for Mounting Options "F" and "M".

For mating socket, see pg. 162.

0.325" [8.26] Pitch, Series SSB3, Options

Base

Catalog Letter Code: F. Lends itself most readily to applications where direct top-to-bottom feed-through is required with no special requirement for circuit isolation on the bottom side. The most common example of this is printed circuit board mounting.

Mounting Options

End Position Mounting

Catalog Letter Code: M. Provides a printed circuit board mounting option with top-side wire entry.

End Position Mounting Without Barriers

Catalog Letter Code: F. Facilitates mounting-screw access when end sections are used for mounting.

Direct Mounting:

Catalog Letter Code: P. SSBs may be solder-mounted using the bottom terminals themselves, as in the case of printed circuit board applications.

Printed Circuit Pin:

Catalog Number Code: 02.

Designed specifically for mounting on .063" thick circuit board. Special, readily solderable plating permits good fillet development in automated soldering processes.

Extended Printed Circuit Pin:

Catalog Number Code: 04. Useful where extra length is needed, as in thicker printed circuit boards or single-wrap connections.

Quick Connects

Catalog Number Codes: 10 through 75.

A complete selection of .187" and .110" quick-connect blades are available for connecting wire terminated with female quick connects. Single- and double-sided types in flat, 45° and 90° angle bends can be supplied. Material is brass with tin plating. All blades supplied with O1 screws. Various quick-connects can be combined.

Top Hardware Options

Binding Head Screws

Catalog Number Code: 01. In most applications, binding head screws will provide excellent wire retention because of exclusive wire locking tabs. Screws are bright zinc and chromate plated steel.

Captive Clamp

Catalog Number Code: 02.

For applications requiring extra security, captive clamps under the screw heads augment the locking tabs on each contact. Screws have a unique Phil-slot design accepting either Phillips-head or straight screwdriver. Code 02 screw is bright zinc and chromate plated steel.

Note: All part numbers are RoHS Compliant.

0.375" [9.53] Pitch, Series RSB6

RSB6RP##1102

Material & Finish

Housing Material—Polypropylene

Flammability—UL94V-2

Color—Black

Terminals—Brass, bright acid tin over copper plating

Screw—Steel w/Zinc + Chromate plating

Mechanical Properties

Pitch (Terminal Spacing)—.375" [9.53]

Screw Size—6-32

Recommended PCB Hole Dia.—.062" [1.57]

Wire Strip Length—.38" [9.65]

Recommended Tightening Torque—12 in.-lbs.

Recommended Screwdrivers—Stanley 1006-4, Sears Craftsman 41581, Any #2 Phillips-Head

Wire Lug Width (Max.)—8.1mm [.320"]

Electrical Properties

Ratings—UL Class B 20 Amps, 300V
CSA Type C 15 Amps, 150V
CSA Type D 10 Amps, 300V

Wire Range—12-22 AWG

Dielectric Withstand—3500V

Environmental Properties

Operating Temperature Range—60°C to +105°C [-76°F to +221°F]

Computing RSB Block Lengths

Direct Mounting — Use C1 & L1 for VP, SP, RP mounting options

End Position Mounting — Use L2 & C2 for VM, SM, RM, VE, SE, RE mounting options

For mating socket, see pg. 163.

0.375" [9.56] Pitch, Series RSB6, Features/Options

Terminal Style

Vertical Terminal

Catalog Number Code 12: Designed specifically for use with our RSB6B Socket, page 163.

Mounting & Contact Position Options

Vertical, Direct Mounting

Catalog Code VP: This configuration is frequently used on printed circuit boards where solder connections are used to fasten the block to the board.

Vertical, End Position Mounting

Catalog Code VM:

Used where end sections are needed for mounting. Thickness of base is sufficient to support mounting screws.

High Rise, All Positions Filled with Contacts

Catalog Code HP:

Designed for high density; two rows deep when used in conjunction with a VP configuration.

Top Hardware Options:

Binding Head Screws

Four Styles Available.

Captive Clamp

Catalog Number Code: 02 & 09.

For applications requiring extra security, captive clamps under the screw heads augment the locking tabs on each contact. Screws have #8 pan head with a unique Phil-slot design accepting either Phillips-head or straight screwdriver. The body is #6 to allow use of larger wire.

Quick Connects

Catalog Code below: A selection of .187" and .250" quick connect blades with tin plated brass are available for connecting wire terminated with female quick-connects. They are available individually or in combination. See ordering information.

High Rise, Mounting Standoffs

Designed for high density; allows two rows of contacts on two levels when used with a VP mounting configuration.

Barrier Strips
2

Note: All part numbers are RoHS Compliant.

Accessories — Barrier Strip Safety Covers (Continued)

Safety Covers

Dead front protection designed to prevent accidental contact with energized circuits. Access holes for test probes are provided over each terminal. Nylon clips are included with each cover. Covers meet UL94V-0, with 50°C temperature index. Blank circuit identification optional.

For SSB3, RSB3, RSB6 and SSB7 Series.

Spade Jumper

Catalog Number Part No.
J3140 (for 0.325" Pitch) 5-1437418-3

Spade Jumper

J6140 (for 0.375" Pitch and #6 Screw) 5-1437418-4

Flanged Spade Jumper

J6240 (for 0.375" Pitch and #6 Screw) 5-1437418-5

Spade Jumper

Catalog Number Part No.
J7140 (for 0.4375" Pitch and #6 Screw) 5-1437418-7

Flanged Spade Jumper

J7240 (for 0.4375" Pitch and #6 Screw) 5-1437418-8

Ring Tongue Jumper

J6340 (for 0.375" Pitch and #6 Screw) 5-1437418-6

Ring Tongue Jumper

J7340 (for 0.4375" Pitch and #6 Screw) 5-1437418-9

Over-the-Barrier Two Circuit (Brass, Tin Plated)

Spade Jumper

J74 (for 0.375" Pitch, Series RSB6 & SSB6; 0.4375" Pitch, SSB7) 6-1437418-0

J76 (0.4375" and 0.375" Double-Row) 1776058-1

Ring Tongue Jumper

J75 (for 0.375" Pitch, Series RSB6 & SSB6; 0.4375" Pitch, SSB7) 6-1437418-1

J77 (0.563" Double-Row) 1776058-1

Order Number

JX X

A B

A Block Series

- J3** = #3 Series
- J4** = #4 Series, 4DB
- J6** = #6 Series, JC6, BC6, NC6, MB6
- J8** = #8 Series, 1546670, 1546671

B No. of Circuits (Not positions)
2 through 16

Jumpers J4, J6 and J8

Jumpers J3

Block Series	Centerline Spacing A
J3	6,4 (0.250")
J4	8,3 (0.325")
J6	9,5 (0.375")
J8	11,1 (0.438")

Note: All part numbers are RoHS Compliant.

Accessories — Hardware & Brackets

		Catalog Number	Part Number	Description	Series
Binding Head Screws		3L01	1437402-2	#6-32 Steel w/clear chromate	RSB3, SSB3
		L01	2-1437402-4	#6-32 Steel w/clear chromate	SSB6, SSB7, RSB6
		—	8-1437649-4	#4-40 Steel w/clear chromate	Series #4
			1437651-8	#6-32 Steel w/clear chromate	Series #6, BC6, NC6, JC6
		L03	2-1437402-6	#6-32 Stainless Steel	SSB6, SSB7, RSB6 Series #6, JC6
		L04	2-1437402-7	#6-32 Brass w/nickel plate	SSB6, SSB7, RSB6
		—	1447429-1	#8-32 Steel w/clear chromate	Series #8
Wire Clamp Screws		3L02	1437402-3	#6-32 Steel w/clear chromate	RSB3, SSB3
		L02	2-1437402-5	#6-32 Steel w/clear chromate	SSB6, SSB7, RSB6
		L09	2-1437402-8	#6-32 Brass w/nickel plate	SSB6, SSB7, RSB6
		—	8-1437649-0	#4-40 Steel w/clear chromate	Series #4
		—	1437651-5	#6-32 Brass w/nickel plate	Series #6, BC6, JC6, NC6, MB6
		—	1437651-2	#6-32 Steel w/clear chromate	Series #6, BC6, JC6, NC6, MB6
		—	1447425-1	#8-32 Steel w/clear chromate	Series #8
		—	9-1437667-9	#6-32 Steel w/clear chromate	4DB

		Catalog Number	Part No.
MOUNTING INSERTS (Nylon) for mounting RSBs with blank end sections		L91	5-1437402-1
PRESS-ON RETAINING CLIPS (Stainless Steel) for mounting turret base SSBs, JC6, and BC6		JC/BC-Retaining	1437661-7
Angle Bracket for mounting SSBs with right angle terminals, copper alloy, tin plated		L92	5-1437402-2

Note: All part numbers are RoHS Compliant.

Accessories — Standard and Custom Legends

Product Facts

- n Permanent markings, impervious to cleaning solvents per MIL-STD 202, Method 215
- n Alphabetical and numerical legending
- n Numbers and characters can be in any order
- n Size and spacing of characters may be tailored to your application
- n White markings standard
- n Custom legends available on special request

Custom legending can lend a personal touch to your product...helps in circuit identification and makes wiring faster and easier. Alphabetical and numerical markings are available in either standard or custom styles to best suit your specific applications. Legending is available to the styles depicted below.

Engineering Notes

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
