

PERFORMANCE SPECIFICATION SHEET

CIRCUIT BREAKERS, MAGNETIC, PANEL SEAL,  
TRIP-FREE, SERIES TRIP, THREE POLE  
(0.2 TO 30 AMPERES)

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The requirements for acquiring the product described herein shall consist of this specification sheet and [MIL-PRF-55629](#).

FIGURE 1. Dimensions and configurations (configuration 1).

## NOTES:

1. Dimensions are in inches.
2. Metric equivalents are given for general information only.
3. Unless otherwise specified, tolerance is  $\pm 0.031$  (0.79 mm).
4. Lockwasher, split, No. 8 [NASM35338-137](#) or equivalent.
5. Terminal screw, No. 8, .164-32 UNC-2A, .187  $\pm 0.015$  long, material: Brass, tin plated ([ASTM-B545](#) or equivalent).
6. Passivated - corrosion resisting steel screw, slotted head with integral O-ring, may be replaced by the [NASM3212-12](#) with cross-recessed head or equivalent.
7. Hex mounting nut .500-32 UNF-2B thread, .625  $\pm 0.010$  across flats, .120/.125 thick, brass nickel plated, [SAE-AMS-QQ-N-290](#) nonglare; may be replaced with [MS25082-B22](#) or equivalent.
8. Internal tooth lockwasher, .625  $\pm 0.005$  O.D., .510  $\pm 0.005$  I.D., .028  $\pm 0.005$  thick, stainless steel.
9. O-ring, material: Material shall be selected to enable the O-ring to meet the performance requirements of this specification. Butadiene acrylonitrile has been successfully used in the past and should be considered for meeting the O-ring requirements of the specification.
10. Auxiliary switch terminals shall provide for soldered connections.
11. Physical item marking of the words "LOAD" and "CB CONT OPEN" is optional.

## NOTES:

- Dimensions are in inches.
- Metric equivalents are given for general information only.
- Unless otherwise specified, tolerance is  $\pm .015$  (0.38 mm).
- Lockwasher, split, No. 8 [NASM35338-137](#) or equivalent.
- Terminal screw, No. 8, .164-32UNC-2A, .187  $\pm$ .015 long. Material: Brass, tin plated ([ASTM B545](#) or equivalent).
- Passivated - corrosion resisting steel screw - slotted head with integral O-ring, may be replaced by the [NASM3212-12](#) with cross-recessed head or equivalent.
- Hex mounting nut: .500 - 32 UNF-2B thread, .625  $\pm$ .010 across flats, .120/.125 thick, brass nickel plated, [SAE-AMS-QQ-N-290](#) nonglare or equivalent; may be replaced with [MS25082-B22](#) or equivalent.
- Internal tooth lockwasher, .625  $\pm$ .005 O.D., .510  $\pm$ .005 I.D., .028  $\pm$ .005 thick, stainless steel.
- O-ring, material: Material shall be selected to enable the O-ring to meet the performance requirements of this specification. Butadiene acrylonitrile has been successfully used in the past and should be considered for meeting the O-ring requirements of the specification.
- Auxiliary switch terminals shall provide for soldered connections.
- Physical item marking of the words "LOAD" and "CB CONT OPEN" is optional.

FIGURE 2. Dimensions and configurations (configuration 2) - Continued.

## REQUIREMENTS

Dimensions and configuration: See figure 1 and figure 2.

Current ratings: See table I.

High Inrush: Applies unless otherwise specified. 1/

Voltage ratings: See table II. Ratings are maximum; the minimum operating voltage is limited by the internal resistance or impedance of the circuit breaker (see table I).

Auxiliary contacts:

Contact capacity shall be 10 amperes to 250 volts 60/400 Hz and 2 amperes resistive, 1 ampere inductive to 50 V dc.

Tripping-time delays: See table I and table II.

Terminal and mounting hardware: See figure 1.

Terminals: See figure 1. Solderability is applicable to auxiliary contact terminals.

Actuator strength: 25 pounds.

Actuator operating force: 12 pounds, maximum.

Terminal strength:

Applied load: 30 pounds.

Applied torque: 10 inch-pounds.

Interrupting capacities:

2,000 amperes at 50 V dc.

2,000 amperes at 120 V ac, 60 Hz.

1,500 amperes at 120 V ac, 400 Hz.

1,000 amperes at 240 V ac, 60 and 400 Hz.

Seal: Panel seal test applies.

MIL-PRF-55629/22G

Part or Identifying Number (PIN): The PIN to be cataloged and stocked by the Government consists of the prefix M55629/22 and six succeeding code letters as follows: 1/, 2/

For pole identification, see figure 1

When circuit breakers without auxiliary contacts, are installed in new equipment, replacement spares should possess this feature since it is more economical for the DoD to stock one version of this item instead of two. Therefore, stock numbers should not be requested (or assigned) for this special PIN.

- 
- 1/ Special PINs for equipment manufacturers use only. Equipment manufacturers who do not require the auxiliary contacts in specific production applications may order circuit breakers without this feature by modifying the prefix as follows: M55629/22XXXXXX. Replace slash with A for items without auxiliary contacts (M55629A22XXXXXX).
  - 2/ Replace slash with D for items requiring configuration 2 (M55629D22XXXXXX). Replace slash with E for items requiring configuration 2 without auxiliary contacts (M55629E22XXXXXX). Replace slash with F for items requiring configuration 2 without the high-inrush feature (M55629F22XXXXXX). Replace slash with G for items requiring configuration 2 without the high-inrush feature or auxiliary contacts (M55629G22XXXXXX).
  - 3/ If all poles have identical ratings, code letters will repeat for each pole. If all poles are not identical, poles 1, 2, and 3, respectively (see figure 1) shall be coded in ascending order of the current rating code letter. If all poles have identical current ratings but different voltage, frequency, and time delay code letters, then these code letters shall be coded in ascending order.

<sup>1/</sup> Circuit breakers shall not trip at 100 percent rated current but must trip at 125 or 150 percent of rated current. Between 100 percent and 125 or 150 percent, they may trip. Instantaneous is defined as less than 15 milliseconds.

<sup>2/</sup> Items without the high-inrush feature (for use in production only) are not subject to this requirement. High-inrush test shall be performed using one alternation which has a peak value of 1800 percent of rated current. 400 Hz and dc delays shall be subjected to a 400 Hz waveform, 60 Hz delays shall be subjected to a 60 Hz waveform.

<sup>3/</sup> High and low test temperature tolerances are  $\pm 2^{\circ}\text{C}$ .

<sup>1/</sup> Circuit breakers shall not trip at 100 percent rated current but must trip at 125 or 150 percent of rated current. Between 100 percent and 125 or 150 percent, they may trip. Instantaneous is defined as less than 15 milliseconds.

<sup>2/</sup> High-inrush test shall be performed using one alternation, which has a peak value of 1,800 percent of rated current. 400 Hz and dc delays shall be subjected to a 400 Hz waveform, 60 Hz delays shall be subjected to a 60 Hz waveform.

<sup>3/</sup> High and low test temperature tolerances are  $\pm 2$  degree Celsius.

Circuit breakers covered by this specification replace commercial types as specified in table III providing they have equivalent current, voltage, frequency, and time delay ratings.

Circuit breakers without either auxiliary contacts or the high-inrush feature should be replaced by equivalently rated military items with both of these features.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
