

Features

- Low I_R (<100nA @ 1V, <500nA @ 3V)
- Designed for High Volume, Low Cost Detector and Mixer Applications
- High Detector Sensitivity: -55 dBm TSS
- Low Capacitance: 0.30 pF
- Low 1/F Noise
- Single, Series Pair, and Unconnected Pair Configurations
- Lead Free (RoHS Compliant) Equivalents Available With 260 Deg. C Reflow Capability
- Tape and Reel

Description and Applications

The MA4E2054 series are low barrier n-type silicon Schottky diodes assembled in low cost surface mount plastic packages. They are designed for use as high performance mixer and detector diodes.

These parts are offered with Sn/Pb plating, as well as with 100 % matte Sn plating on the RoHS compliant part numbers.

The MA4E2054 -1141T (SOD-323), MA4E20541 -1279 (SC-79) and the MA4E2054A and MA4E2054C (available in both the SOT-23 and SOT-323 packages) are single element Schottky diodes characterized for use as single ended mixers and detectors. The MA4E2054B and MA4E2054D (available in both the SOT-23 and SOT-323 packages) incorporate two Schottky chips in series pair configurations. The MA4E2054E-1068T consists of two Schottky chips in the SOT-143 package in an unconnected pair configuration. These diodes are useful for balanced mixer and detector voltage doubler circuits. Applications for the MA4E2054 series include VSAT and DBS mixers. The small diode package size and low cost make them attractive for use in RF tag applications for identification and toll collection.

The part number consists of the base chip (MA4E2054), followed by the wiring configuration (A, B, C, D, E, omit for SOD-323), the package style (287, 1068, 1141, 1146) and a "T" for tape and reel.

Configurations (Topviews)

SINGLE

Maximum Ratings

Parameter	Unit	Maximum Ratings
Operating Temperature	°C	-65 to +125
Storage Temperature	°C	-65 to +125
Incident RF Power (CW)	mW	75*
Reverse Voltage @ 25 °C	V	3
Forward Current	mA	20
Soldering Temperature (Standard Part #)	°C	+235 for 5 sec.
Soldering Temperature (Lead Free Part #)	°C	+260 for 5 sec.

* At 125 °C case temperature. Derate linearly to zero watts at 125 °C case temperature.

Electrical Specifications @ +25 °C

Parameter	Condition	Symbol	Specification
Breakdown Voltage	$I_R = 10 \mu A$	V_B	3.0 V min.
Reverse Leakage Current	$V_R = 1 V$	I_R	100 nA max.
Reverse Leakage Current	$V_R = 3 V$	I_R	500 nA max.
Total Capacitance	$V_R = 0 V$ $f = 1 MHz$	C_T	0.30 pF max.
Dynamic Resistance ²	$I_F = 10 mA$	R_D	17 Ohms max.
Forward Voltage	$I_F = 1 mA$	V_F	250 mV min. 350 mV min.
Forward Voltage Difference ¹	$I_F = 1 mA$	V_F	20 mV max.

1. Applies to MA4E2054B, MA4E2054D and MA4E2054E configurations.

2. $R_D = R_S + R_J$ where $R_J = \frac{26}{I_F}$ (in mA)

Typical RF Performance @ +25 °C in Chip Form, Mounted on a Microstrip Fixture

Parameter	Conditions	Typical Value
Mixer Noise Figure ¹	$f = 9.375 GHz$ $LO = 0 dBm$	5.7 dB (SSB)
IF Impedance	$I_F = 30 MHz$	200 ohms
Tangential Signal Sensitivity ²	$I_F = 20 mA$ $BW = 2 MHz$ Video NF = 1.5 dB	-55 dBm
Detector Output, Voltage at -30 dBm ²	$R_L = 100K Ohms$ $I_F = 20 \mu A$	20 mV
Detector Output, Voltage at -30 dBm ²	$R_L = 1M Ohm$	20 mV

1. Fixture tuned to 9.375 GHz.

2. Fixture tuned to 2.5 GHz. See figures on page 3 for untuned fixture performance.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
