

# Push-Pull connectors

## Introduction

This catalog presents the push-pull connectors ranges for industrial applications.

These products are particularly suitable for high reliability and high quality applications where a simple yet fast method to connect/disconnect is required. Also suitable for high endurance and ease of operation in very limited spaces. The aesthetics of the product allows for perfect integration on front panel equipments.

SOURIAU offers 3 main series of metallic circular connectors :

- **JBX series** : basic push-pull series for signal transmission
- **JKX series** : environmental version of the JBX series sealed to IP68
- **JAX series** : complementary range including coaxial contact layouts.

## Where and Why **push-pull ?**

**Medical**

- Extremely fast and easy to use
- A thousand matings/unmatings.
- Quality aesthetics for more value added on the equipment
- Space saving

**Professional audio-video**

**GPS**

**Instrumentation**

**Telecommunications**

## Push-pull locking system

The locking of the plug into the receptacle is achieved by a simple axial push on the outer shell.

Connection cannot be broken by pulling the cable or any other parts of the plug than the outer shell.

To unmate the plug from the receptacle, just pull axially the outer shell.

# JBX Series

## Key features

- Mechanically keyed : ensures correct polarisation and alignment.
- Contact layouts from 2 to 30 contacts.
- Wire gauges range from 30 AWG to 12 AWG.
- High contact density in a small space.
- Contact termination in either crimp, solder or PCB contacts.

## User advantages

### Blister packaging

### 6-collet cluster

Allows a wide range of cable diameter applications for a single connector.  
Reduces inventory variations

### Removable contacts

Available crimp versions allow easier wiring and maintenance.

## Part number system

## Dimensions

### • Special custom shells

**FN** : Straight plug,  
shell 0 with a lanyard

**FM** : 90° elbow plug,  
shell 0 with a lanyard

**FF** : Straight plug,  
with no latching, size 1

**SA** : fixed receptacle with cable clamping,  
front or back panel mounting

# JBX Series

## Keying

### • Keying angles

JBX Series are mechanically keyed to ensure correct alignment of the inserts before the contacts mate.

«G» : standard keying

«J» : standard reverse gender keying ; plugs with socket contacts, receptacles with pin contacts.

\*G & J are standard keying, but all keying configurations can use standard or reverse gender.

| Key          | G  | J           |             | A   | B   |

Inserts with fixed contacts (non removable contacts).

\* For receptacles with female contacts.

**Note :** Contacts are numbered counter clock wise in the plug and clock wise in the receptacle.

### • Voltage Test Procedure

- **The testing voltage** corresponds to the maximum voltage the connector is able to withstand in normal climatic conditions. The value is about 75% of the electrical breakdown voltage. The testing voltage level can be reached several times in connectors life, but never applied for a continuous duration.
- **The working voltage** corresponds to the maximum voltage the connector is able to withstand continuously during its life time, in real environmental conditions, even with high temperature. The value is around 1/3 of the testing voltage.

### • Maximum current rating

- This indicated maximum current rating corresponds to the maximum current that can be continuously applied to the connector mated pair, in normal climatic conditions.

Remark : If the current is applied on only one contact of the layout, then an increased current value can be achieved over a long duration.

#### Material :

ELASTOLLAN (PUR)

#### Working temperature :

- 40°C ; + 80°C  
- 40°F ; + 176°F

Parts that require a protective boot need to be ordered with an M suffix, see page 5. Protective boots are ordered separately.

With each JBX connector, one protective boot can accept multiple cable diameters thus the end-user can use various cable diameters without the need of multiple part numbers.

### • Receptacle caps : an effective protection against dust

| Part number | Ø     |
|-------------|-------|
| JBX BR0     | 12 mm |
| JBX BR1     | 14 mm |
| JBX BR2     | 17 mm |
| JBX BR3     | 20 mm |

## Wiring and assembly instructions : STRAIGHT PLUG

### • Connector preparation

- 1 - Select the proper collet. (see page 19)
- 2 - Slide the protective boot ③ the backnut ② and the collet ① over the cable. Strip end of cable (see pg. 17).
- 3 - If a shielded cable is used fold the braid back over the collet.

### • Contacts wiring : crimp contacts

- 1 - Select the proper crimping tool and locator. (see page 48)
- 2 - Adjust the crimping tool based on wire size "AWG". (See wire size and crimp tool settings on the back of the locator)
- 3 - Crimp the contacts ④ then insert the contact into the insulator until the clip is fully seated and cannot be removed.

### • Contacts wiring : solder contacts

| Fixed solder contacts 0.5 mm and 0.7 mm     | Removable solder contacts from 0.9 mm to 2 mm  |
|---|--|
| 1 - Insert wire into solder cup and solder. | 1 - Insert wire into solder cup and solder.<br>2 - Insert contact into the insulator until the clip is fully seated and cannot be removed. |

### • Connector assembly

- 1 - Position 2 half bushings ⑥ on either side of the insulator.
- 2 - Confirm that the key on the insulator ⑤ appears through the window in the one half bushing.
- 3 - Align the key slot on the collet with the keys on the half bushings.
- 4 - Insure the cable shield is still folded back and under the collet.
- 5 - Insert the insulator subassembly ① ④ ⑤ & ⑥ into the connector housing ⑦.
- 6 - Make sure the window on the half bushing ⑥ is aligned with the key way on the connector housing ⑦.
- 7 - Apply thread lock to back nut ②.
- 8 - Attach the back nut to the connector housing ⑦
- 9 - Use the correct size wrench, see page 19.
- 10 - Place the wrenches on the flats A and B. Tighten the back nut ② per the torque spec on page 19.
- 11 - Install the protective boot if applicable.

# JBX Series

## Wiring and assembly instructions : 90° ELBOW PLUG

### • Connector preparation

- 1 - Select the proper collet (see page 19).
- 2 - Slide the protective boot ④, the backnut ③, the collet ② and the elbow outlet ① over the cable. Strip end of cable (see pg. 17).
- 3 - If a shielded cable is used, fold the braid back over the collet ②.
- 4 - Align the keys in the elbow outlet ① with the key slot in the collet.
- 5 - Apply thread lock to the backnut ③.
- 6 - Install the back nut ③ and tighten until it bottoms.

### • Contacts wiring : crimp contacts

- 1 - Select the proper crimping tool and locator. (see page 48)
- 2 - Adjust the crimping tool based on wire size "AWG". (See wire size and crimp tool settings on the back of the locator)
- 3 - Crimp the contacts ④ then insert the contact into the insulator until the clip is fully seated and cannot be removed.

### • Contacts wiring : solder contacts

| Fixed solder contacts 0.5 mm and 0.7 mm     | Removable solder contacts from 0.9 mm to 2 mm  |
|---|--|
| 1 - Insert wire into solder cup and solder. | 1 - Insert wire into solder cup and solder.<br>2 - Insert contact into the insulator until the clip is fully seated and cannot be removed. |

### • Connector assembly : 90 degree plug

- 1 - Position the ring ⑦ over the insulator.
- 2 - Align the key on the insulator ⑤ with the key way on the spacer ⑧ and insert the insulator into the spacer.
- 3 - Insert the insulator sub-assembly into the connector housing ⑨ insuring the flats on the elbow outlet ① are facing the retaining nut ⑩.
- 4 - Apply thread lock to retaining nut ⑩.
- 5 - Tighten the retaining nut ⑩ to the recommended torque on page 19.

## Wiring and assembly instructions

### • Collet selection according to cable diameters

4 or 6 collets per shell size are supplied to allow the use of a wide range of cable diameters for each connector. The cable diameters given on this chart are the minimum and maximum diameters of cable jacket.

| Collet number | Cable diameter |              |              |              |              |
|---------------|----------------|--------------|--------------|--------------|--------------|
|               | Shell size 00  | Shell size 0 | Shell size 1 | Shell size 2 | Shell size 3 |
| 1             | 1.1 - 1.9      | 1.5 - 2.5    | 2.0 - 2.5    | 3.5 - 4.7    | 4.9 - 6      |
| 2             | 2 - 2.8        | 2.6 - 3.5    | 2.6 - 3.5    | 4.8 - 5.7    | 6.1 - 7.2    |
| 3             | 2.9 - 3.5      | 3.6 - 4.5    | 3.6 - 4.5    | 5.8 - 6.7    | 7.3 - 8.4    |
| 4             | -              | 4.6 - 5.5    | 4.6 - 5.5    | 6.8 - 7.7    | 8.5 - 9.6    |
| 5             | -              | -            | 5.6 - 6.6    | 7.8 - 8.7    | 9.7 - 10.8   |
| 6             | -              | -            | 6.7 - 7.5    | 8.8 - 9.7    | 10.9 - 12.0  |

\*Cable jacket must be inserted at least halfway through the collet.

**Metal collets are available as an option in size 0, 1, 2, & 3.**

### • Coupling torques

| Tools<br>(jaw dimensions) | 7 x 0.5 | 9 x 0.6 | 12 x 1 | 15 x 1 | 18 x 1 | Advised torques* in Nm |            |     |            |   |
|---------------------------|---------|---------|--------|--------|--------|------------------------|------------|-----|------------|---|
|                           | 00      | 0       | 1      | 2      | 3      | 00                     | 0          | 1   | 2          | 3 |

|                           | 6       | 8       | 10     | 13     | 15     | 0.7                    | 0.8        | 1   | 1.5        | 2 |
|                           | 6       | 9       | 11     | 14     | 16     | 0.7                    | 0.8        | 1   | 1.5        | 2 |
|                           | -       | 10      | 12     | 15     | 17     | -                      | 0.4 to 0.5 |     | 0.5 to 0.7 |   |
|                           | -       | 10      | 13     | 17     | 20     | 0.5                    | 0.7        | 1.3 | 1.7        | 2 |
|                           | -       | 9       | 13     | 15     | -      | -                      | -          | -   | -          | - |

Torque values are the maximum allowable for each connector size.

Torque values will vary due to the type and size of the cable used

\*Apply thread lock to back nut prior to assembly.

Note : All the tooling numbers refer to the drawings pages 7 and 8.

### • Shielding

Tested according to MIL-STD 1344 A, method 3007

| Shell size | Electrical continuity (mΩ) |
|------------|----------------------------|
| 00         | 4.5                        |
| 0          | 4                          |
| 1          | 3                          |
| 2          | 2.5                        |
| 3          | 2.5                        |

**Metal collet available for all sizes**

Discreet application based on cable diameter.

# JAX Series

## Key features

- Hermaphroditic insert : prevents mismatings.
- Multipin connectors : contact layouts from 1 to 14.
- Wire gauges range from 26 AWG to 16 AWG.
- High contact density in a small space.
- Coaxial contacts : 50  $\Omega$  and 75  $\Omega$  impedance.

## User advantages

Large range of blind mate coaxial connectors

## Part number system

# JAX Camac Series

These 2 pages describe the JAX Camac series, size 00. These connectors are often used on jumpers for delay lines in Nuclear Physics due to their size and simple handling in congested areas. For Nuclear Physics, our connectors meet the standard NIM-CAMAC\*. Moreover, JAX coaxial connectors are suitable for many other industrial and scientific applications such as medical, microwave communications, pocket transmitters, input/output on electronic modules.

## NIM-CAMAC\* configuration (4 GHz - 50 Ω)

\* NIM-CAMAC : Nuclear Instrumentation Module / Computer Automated Measurement and Control

## Dimensions and part-numbers

**P/N : JAX F 00 C50 RG 174 US**  
Straight plug for RG174U cable

Weight : 3.5 g

**P/N : JAX RA 00 C50S**  
Fixed front flange receptacle, solder contacts

Weight : 2.5 g

**P/N : JAX 00 MDPN**  
Protective boot

Cable  $\varnothing$  =  
min = 1  
max = 3.8

Weight : 0.2 g  
Temperature = - 40°C ; + 80°C

**P/N : JAX RA 0018**  
RF screening cap

Weight : 1.5 g

## Technical data

| Specific characteristics | Values                               |
|--------------------------|--------------------------------------|
| Endurance                | 5000 cycles                          |
| Operating temperature    | - 70°C ; + 200°C<br>- 94°F ; + 392°F |
| Plating on metal shell   | Ni = 3 - 7 μm                        |
| Insert                   | PTFE                                 |

# JAX Camac Series

## Delay lines

- **Cable Nr 96-CEI-50-2-1 (RG 174U)**  
fitted with NIM-CAMAC connectors at both ends

L : Length which defines delay in ns of cable jumpers

| P/N                   | Delay (ns) | Tolerance (%) | L *  |
|-----------------------|------------|---------------|------|
| JAX L 00 C50 C11 R005 | 0.5        | 5             | 100  |
| JAX L 00 C50 C11 R010 | 1          | 5             | 200  |

# JAX Series

## Wiring and assembly instructions : MULTIPIN PLUGS SIZES 0, 1, 2, 3

• **Cable stripping** : see page 27

• **Connector preparation and contacts wiring**

1 - Slide the backnut and the collet onto the cable.

2 - Terminate the bucket contacts using solder method.

• **Connector assembly**

3 - For shielded cable : pull back the collet up to external sheath extremity.

4 - Comb out the screen and fold back over the collet end.

5 - Position two half bushes on the insert, taking care of a proper positioning of the key.

6 - Slide in the insert assembly into the plug (or the free receptacle) shell.

Note : the collet key may be properly set into shells key ways.

7 - Install the backnut and screw it.

## Wiring and assembly instructions : COAXIAL PLUGS

• **Cable stripping** : see page 27

• **Connector assembly**

**Note :**

- Take care to align cone key inside the sub-assembly rear key way.
- The stripped core end may be visible inside pin contact front window.

**Remark :** For size 00, no cone existing : sub-assembly directly onto collet.

## Wiring and assembly instructions : SINGLE PIN PLUGS

• **Cable stripping** : see page 27

• **Connector assembly**

Monolithic insert is directly soldered onto the inner core.

- 1 - Slide the backnut and the collet onto the cable.
- 2 - Position the intermediate cone in abutment on external sheath extremity
- 3 - Brush back the screen around the cone
- 4 - Pull back the collet onto the cone
- 5 - Position the rear insulator sub-assembly on the cone

- 6 - Solder inner core thru the pin window
- 7 - Set in place the front insulator, taking care of the key/keyway positioning between the two half insert sub-assembly

- 8 - Slide in the insert assembly into the plug (or free receptacle shells)
- 9 - Install the nut and screw it

# JAX Camac Series

## Wiring and assembly instructions : Crimp contact (NIM-CAMAC configuration)

### • Wiring preparation

- 1 - Slide the protective boot and the crimping ferrule onto the cable

### • Coaxial cable stripping

- 1 - Strip the coaxial cable according to the lengths given on the drawing

### • Contact crimping

- 1 - Take the crimping tool P/N : JX2 W 1010 A9
- 2 - Crimp the contact

### • Connector assembly

- 1 - Position the crimp contact then engage the insert cavity until it bottoms
- 2 - Fold the screen over the connector outlet
- 3 - Position the ferrule on the screen then crimp it

- 4 - Slide the protective boot and then position on the connector outershell

# JKX Series

## Key features

- Sealed IP 68 (mated connectors)
- Mechanically keyed : ensures correct polarization and alignment.
- Contact arrangements : from 2 to 10 contacts.
- Wire gauge range from 28 AWG to 14 AWG.
- High contact density in a small space.
- Contact termination in either crimp, solder or PCB contacts.

## User advantages

### Temporary immersion IP 68

### 6-collet cluster

Allows a wide range of cable diameter applications for a single connector.  
Reduces inventory variations.

### Removable contacts

Crimp versions allow easier wiring and maintenance.

## Part number system

### Material :

ELASTOLLAN (PUR)

### Working temperature :

- 40°C ; + 80°C

- 40°F ; + 176°F

With each JKX connector, one protective boot can accept diverse cable diameters thus the end-user can manage various cable diameters without bothering with multiple part numbers.

### • Caps : an efficient protection until 2 bars

| Part number | Ø  |
|-------------|----|
| JKX BR0     | 15 |
| JKX BR1     | 17 |

### • Watertightness design (mated connectors)

- ① : O-ring for sealing between receptacle and plug shell
- ② : O-ring for sealing between receptacle and panel
- ③ : O-ring for sealing between plug body and backshell
- ④ : seals to accomodate variety of cable diameters

# JKX Series

## Wiring and assembly instructions : STRAIGHT PLUG

- **Cable stripping** : see page 37

### • Connector preparation

- 1 - Select the proper collet ④ and the cable seal ③ (see page 39).
- 2 - Slide protective boot ⑥, the backnut ⑤, the collet ④, the cable seal ③, the outershell ② and the taper seat ① onto the cable. Strip end of cable (see pg. 16)

### • Contacts wiring : crimp contacts

- 1 - Select the proper crimping tool (see page 48)
- 2 - Adjust the crimping tool based on the wire size "AWG". (See wire size and crimp tool settings on the back of this locator.)
- 3 - Crimp the contacts ④ then insert the contact into the insulator until the clip is fully seated and cannot be removed.

### • Contacts wiring : solder contacts

| Fixed solder contacts 0.5 mm and 0.7 mm    | Removable solder contacts from 0.9 mm to 1.3 mm   |
|--|---|
| 1 - Insert wire into solder cup and solder | 1 - Insert wire into solder cup and solder  |
|  | 2 - Insert the contact into the insulator until the clip is fully seated and cannot be removed. |

### • Connector assembly

- 1 - In case of shielded cable, comb out the shield and fold back over the taper seat ①.
- 2 - Position 2 half bushes ⑨, making sure that the insert key appears through the windows of one bush.
- 3 - Position the taper seat ① on the half bushes ⑨.
- 4 - Position all the sub-assembly in connector housing ⑩, making sure to keep the sub-assembly well aligned.
- 5 - Screw the outershell ② following the torque values on page 39. Install the cable seal ③ and the collet ④ into the outershell ② then screw the backnut ⑤ till bottoming. Use 2 wrenches well positioned on the flats A and B. Place a wrench to grip flats B, use the other wrench to tighten the backnut at the flats A following the torque values on page 39.
- 6 - Install the protective boot ⑥ if applicable.

## Wiring and assembly instructions

### • Collets selection according to cable diameters

3 or 5 collets per shell size allow a wide range of cable diameters for a single connector. Cable out diameters are for information only, since values will change with each cable construction.

| Collet number | Cable diameter |                  |              |                  |
|---------------|----------------|------------------|--------------|------------------|
|               | Shell size 0   | Size 0, option G | Shell size 1 | Size 1, option G |
| 1             | 1.5 - 2.5      | -                | 2 - 2.5      | -                |
| 2             | 2.6 - 3.5      | -                | 2.6 - 3.5    | -                |
| 3             | 3.6 - 4.5      | -                | 3.6 - 4.5    | 6.1 - 6.7        |
| 4             | -              | 4.6 - 5.5        | 4.6 - 5.5    | 6.8 - 7.7        |
| 5             | -              | 5.6 - 6          | 5.6 - 6      | 7.8 - 8          |

Collet number 4 in shell size 0 and collet number 6 in shell size 1 are not used.

### • Cable seal selections according to cable size

Discreet application based on cable diameter

| Cable gland<br>Ø A | Cable diameter |                  |              |                  |

Tool numbers can be found on page 32

# JBX Series sealed version size 2

## Key features

- Sealed IP 67 (mated connectors)(FE, EC, SE, & PC)
- Watertight receptacles IP68 (HC & HH)
- Mechanically keyed : ensure correct polarisation and alignment.
- Contact arrangements : from 2 to 19 contacts.
- Wire gauge range from 26 AWG to 12 AWG.
- High contact density in a small space.
- Contact termination in either crimp, solder or PCB contacts.

## User advantages

### Wet environment IP67

### 6-collet cluster

Allows a wide range of cable diameter applications for a single connector.  
Reduces inventory variations.

### Removable contacts (EC, FE, SE & PE)

Crimp versions allow easier wiring and maintenance.

## Part number system

Inserts with fixed contacts (non removable contacts).

\* For EC and HC receptacles with female contacts only.

HH & HC fixed contacts only.

# JBX Series sealed version size 2

## Technical characteristics

The technical characteristics are the same as for the standard JBX series except the following ones:

### • Material - Specific additional elements

| Component       | Material         | Color               | Working temperature |                  |
|-----------------|------------------|---------------------|---------------------|------------------|
| Seals           | Nitrile          | O'ring seal = black | - 30°C ; + 250°C    | - 58°F ; + 482°F |
| Protective boot | Elastollan (PUR) | Black               | - 40°C ; + 80°C     | - 40°F ; + 176°F |

### • Mechanical and climatic - Specific additional elements

| Characteristics       | Values  |                  |
|-----------------------|---|------------------|
| Protection index      | IP 67 (Splashproof - 1/2 hour under 1 m of water) |                  |
| Operating temperature | - 40°C ; + 80°C                                   | - 40°F ; + 176°F |

## Options

- **Cap: Part-number = JBX BR2 022** : an efficient protection against water

## Wiring and assembly instructions

### • Panel cutout

The panel cutout is the same as for the JBX size 2 shells except for the HC.

### • Operation to add during the plug assembly:

Deposit of watertight thread glue between the backnut (Ⓒ on the drawing p17) and the connection shell (Ⓓ on the drawing p17).  
Advised glue = Loctite 542.

### • Sealed Panel cutout

# Push-Pull connectors

## Accessories JAX - JBX

### • Insulating washer

| Part number | Shell size | Ø A | B    | L   | M   | N   | T    | E    |
|-------------|------------|-----|------|-----|-----|-----|------|------|
| JBX 00 RIN  | 00         | 10  | 8.8  | 1.8 | 1   | 0.8 | 8    | 4.4  |
| JBX 0 RI*   | 0          | 12  | 10.8 | 1.8 | 1   | 0.8 | 9.9  | 6.4  |
| JBX 1 RI*   | 1          | 16  | 13.8 | 1.8 | 1   | 0.8 | 12.2 | 8.4  |
| JBX 2 RI*   | 2          | 21  | 17.8 | 2.2 | 1.2 | 0.8 | 16.2 | 8.2  |
| JBX 3 RI*   | 3          | 25  | 21.8 | 2.2 | 1.2 | 0.8 | 20.2 | 10.1 |

\* Washer colors as protective boots.  
In size 00, available only in black.

**Material :** PA 6/6

**Working temperature :** - 40°C ; + 125°C  
- 40°F ; + 257°F

Using 2 washers for receptacle / panel insulating

Be careful : usable for the JAX and JBX series but not for sealed connectors (JKX and sealed JBX size 2).

### • Grounding washer

| Part number   | Shell size | Dimensions |      |     |      |
|---------------|------------|------------|------|-----|------|
|               |            | Ø A        | Ø B  | L   | N    |
| JAX RA 00 251 | 00         | 10         | 7.2  | 0.3 | 21.5 |
| JAX RA 0 251  | 0          | 13         | 9.1  | 0.3 | 24   |
| JAX RA 1 251  | 1          | 16         | 12.2 | 0.3 | 24   |
| JAX RA 2 251  | 2          | 21         | 15.1 | 0.8 | 35   |
| JAX RA 3 251  | 3          | 25         | 18.1 | 0.8 | 37   |

**Material :** - Brass  
- Nickel plated (3 µm)

Be careful : usable for the JAX and JBX series but not for sealed connectors (JKX and sealed JBX size 2).

## Toolings JBX - JKX

### • Manual extraction tools

#### Contacts automatically extracted

The extraction tool is similar for both male and female contacts.

| Shell size | ∅ Contacts | SOURIAU Part number | ASTRO Part number |
|------------|------------|---------------------|-------------------|
| 0          | 0.7        | JBX OUT DC 07       | ATJP 2045         |
|            | 0.9        | JBX OUT DC 09       | ATJP 2057         |
| 1          | 0.7        | JBX OUT DC 07       | ATJP2045          |
|            | 0.9        | JBX OUT DC 09       | ATJP 2057         |
|            | 1.3        | JBX OUT DC 13       | ATJP 2077         |
| 2          | 0.7        | JBX OUT DC 07       | ATJP 2045         |
|            | 0.9        | JBX OUT DC 09       | ATJP 2057         |
|            | 1.3        | JBX OUT DC 13       | ATJP 2077         |
|            | 1.6        | JBX OUT DC 16       | ATJP 2095         |
|            | 2.0        | JBX OUT DC 20       | ATJP 2115         |
| 3          | 0.7        | JBX OUT DC 07       | ATJP 2045         |
|            | 0.9        | JBX OUT DC 09       | ATJP 2057         |
|            | 1.3        | JBX OUT DC 13       | ATJP 2077         |
|            | 1.6        | JBX OUT DC 16       | ATJP 2095         |
|            | 2.0        | JBX OUT DC 20       | ATJP 2115         |

The contact is automatically extracted without the need of pulling onto the cable.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,  
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
