

MAX14759/MAX14761/MAX14763

Above- and Below-the-Rails

Low On-Resistance Analog Switches

General Description

The MAX14759/MAX14761/MAX14763 analog switches are capable of passing bipolar signals that are beyond their supply rails. These devices operate from a single +3.0V to +5.5V supply and support signals in the -25V to +25V range.

The MAX14759 is a single-pole/single-throw (SPST) analog switch, while the MAX14761 is a dual-SPST analog switch. The MAX14763 is a single-pole/double-throw (SPDT) analog switch.

The MAX14759 features 1Ω (max) on-resistance with a ±200nA (max) on-leakage current. The MAX14761/MAX14763 feature 2Ω (max) on-resistance with a ±100nA (max) on-leakage current. The low on-resistance and high bandwidth allow use in digital- and analog-signal switching applications.

The MAX14759/MAX14763 are available in an 8-pin (3mm x 3mm) TDFN package. The MAX14761 is available in a 10-pin (3mm x 3mm) TDFN package. These devices are specified over the -40°C to +85°C extended temperature range.

Ordering Information/Selector Guide appears at end of data sheet.

Benefits and Features

- ◆ **Simplify Power-Supply Requirements**
 - ◇ +3.0V to +5.5V Supply Range
 - ◇ -25V to +25V Signal Range
- ◆ **High Performance**
 - ◇ Low 1Ω (max) or 2Ω (max) On-Resistance
 - ◇ Low 2.4mΩ (typ) and 5.1mΩ (typ) R_{ON} Flatness
 - ◇ 500mA (max) Switch Current for MAX14759
 - ◇ Thermal Shutdown Protection
 - ◇ -40°C to +85°C Operating Temperature Range
 - ◇ High Bandwidth: 100MHz (typ) Insertion Loss
 - ◇ High-ESD Protection Up to 2kV
- ◆ **Save Board Space**
 - ◇ Small 8-Pin and 10-Pin TDFN Packages

Applications

Industrial Measurement Systems
 Instrumentation Systems
 RS-485 Termination Switching
 CAN Bus Termination Switching
 Opto-Relay Replacement
 Medical Systems
 ATE Systems
 Audio Signal Routing and Switching

Pin Description (continued)

PIN			NAME	FUNCTION
MAX14759	MAX14761	MAX14763		
—	3	—	B1	Analog Switch 1 Common Terminal
—	6	5	A2	Analog Switch 2 Normally Open Terminal
—	5	—	B2	Analog Switch 2 Common Terminal
—	10	—	EN1	Switch 1 Control Input. Drive EN1 high to open switch 1 or drive EN1 low to close switch 1.
—	9	—	EN2	Switch 2 Control Input. Drive EN2 high to close switch 2 or drive EN2 low to open switch 2.
—	—	8	SEL	Switch Control Input. Drive SEL low to connect the COM terminal to A1 or drive SEL high to connect the COM terminal to A2.
—	—	—	EP	Exposed Pad. Connect EP to V_N . EP is not intended as an electrical connection.

Detailed Description

The MAX14759/MAX14761/MAX14763 are analog switches capable of handling signals above and below their rails. These devices operate from a single +3.0V to +5.5V supply and support signals in the -25V to +25V range. The low on-resistance and high bandwidth allow for use in digital- and analog-signal switching applications.

Integrated Bias Generation

The MAX14759/MAX14761/MAX14763 contain a total of three charge pumps to generate bias voltages for the internal switches: a 5V regulated charge pump, a positive high-voltage (+35V) charge pump, and a negative high-voltage (-27V) charge pump. When V_{DD} is above 4.7V (typ), the 5V regulated charge pump is bypassed, and V_{DD} provides the input for the high-voltage charge pumps, reducing overall supply current. An external 0.1 μ F capacitor is required for each high-voltage charge pump between V_P/V_N and GND.

Analog Signal Range

The devices switch signals in the range from -25V to +25V that are above and below their rails. The on-resistance for these devices exhibit a high degree of flatness of 2.4m Ω (MAX14759 typ) and 5.1m Ω (MAX14761/MAX14763 typ) over the whole input voltage range of -25V to +25V. The analog switches allow bidirectional current flow, so A, A1,

A2, B, B1, B2, and COM can be used as either inputs or outputs.

Bypass Capacitors

Bias stabilizing capacitors are required on the V_P and V_N pins. 1 μ F ceramic capacitors are suggested for effective operation. V_P and V_N are not intended as a power supply for other circuitry.

Applications Information

Nonpowered Condition

The MAX14759/MAX14761/MAX14763 can tolerate input voltages on the A, B, or COM pins in the $\pm 25V$ range when it is not powered. When $V_{DD} = 0V$, the DC input leakage current into the A, B, or COM pins is typically below 1 μ A. Some devices can have a larger leakage current up to the mA range due to technology spread.

With V_{DD} not powered, internal diodes between the analog pins and the V_P and V_N charge up the external capacitors on V_P and V_N when positive and/or negative voltages are applied to these pins. This causes transient input current flow.

Large dv/dt on the inputs causes large capacitive charging currents, which have to be limited to 300mA to avoid destroying the internal diodes. Hence, the 100nF capacitors on V_P and V_N , the dv/dt must be limited to 3V/ μ s. Once the capacitors reach their final voltage, the input current decays to the leakage current levels mentioned above.

MAX14759/MAX14761/MAX14763

Above- and Below-the-Rails

Low On-Resistance Analog Switches

Differential Termination Resistor Switch

The MAX14759 can be used to switch a differential termination resistor in or out. In RS-485 and CAN applications, both ends of high-speed transmission lines require termination. [Figures 8](#) and [9](#) show an application of RS-485 and CAN termination using two equal resistors. These switches support RS-485's high -7V to +12V common-mode range.

In RS-232/RS-485 multiprotocol applications, the MAX14759 can be used for switching in the line-terminating resistors for RS-485 usage, and can disable the termination resistor for RS-232 operation, as shown in [Figure 10](#).

The MAX14761 is ideal for switching in fail-safe biasing resistors in RS-485 applications, as shown in [Figures 11](#) and [12](#).

Audio Amplifier Switch

The MAX14763 is used for selecting between audio amplifier sources to drive loudspeaker applications ([Figures 13](#) and [14](#).)

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
