

# Push-Pull Connectors

## HR10 Series

### ■ Overview

The HR10 series connectors are push-pull coupling type micro-connectors. They have been developed in response to customers' needs for miniaturization, high density, and easy handling. The HR10 series connectors offer light weight and assure high reliability and durability as well as easy "push-pull" operation.

You may apply the HR10 series connectors to all kinds of small-sized electronic equipment requiring high reliability. However, these simple but refined connectors are most suitable for portable electronic equipment which requires good appearance.

### ■ Features

#### 1. "A LITTLE GIANT"

The most compact HR10 series is as slender as a cigarette but it fits every application with well-balanced, simplified layout in limited space.

#### 2. Easy "PUSH-PULL" OPERATION

One touch "push-pull" coupling mechanism assures easy and quick connecting and disconnecting. You can couple it accurately just by pushing any part of the connector housing.

#### 3. Polarization

Five-key system permits only one way of coupling so that you can find right position to connect even when blind mating.

#### 4. Protection of connection pin

A connector pin is located to avoid any damage which may be caused when blind mating.

#### 5. High density

The space-saving "push-pull" mechanism facilitates multi-installation of connectors.

#### 6. Easy wiring and mounting

No use of screws makes wiring and mounting easier.

#### 7. Simple and refined appearance

Simple and well designed connectors with matte finish enhance the appearance of the equipment.

## ■ Materials

Part	Material	Finish
Shell	Zinc alloy and Brass	Satin-finished nickel plate
Insulator	Polyamide / PBT	(Blue or Black)
Male terminal	Brass / Bronze	Silver or Gold plating
Female terminal	Beryllium / Phosphor bronze	Silver or Gold plating

## HR10B Type Connector

The HR10B connector combines 10 signal lines and one coaxial contact in the standard number 10 shell. Electrical performance are same as HR10A connector except coaxial contacts. Performance specifications for the coaxial contacts are on the next page.

## ■Coaxial contacts

The coaxial contacts shown here are for use with the HR10B connector. These contacts have locking barbs and are inserted from the rear of connector. Please use the following information to select the correct terminals.

## ■Material

Part	Material	Finish
Plug shell	Brass	Gold plating
Jack shell	Brass	Gold plating
Insulator	Tetrafluoride resin	
Male pin	Phosphor bronze	Gold plating
Female pin	Beryllium copper	Gold plating

## ■Performance

## ■ Cable connecting methods

### HR10B-2.5CP HR10B-2.5CJ

#### 1. Cable end treatment

Fig.1

1. Dimensions for cable end treatment are shown in Fig 1.
2. Termination is described below.
  - (1). Strip cable outer jacket as indicated.
  - (2). Slit outer jacket on both sides per Fig.1.
  - (3). Fold back outer cover.
  - (4). Remove insulator from cable.

#### 2. Soldering male pin to cable center conductor.

Fig.2

1. Solder male pin to cable center conductor as indicated in Fig.2.
  - (1). Pre-solder the solder pot of pin with  $\phi 0.5$ mm string solder.
  - (2). Male pin should fit flush against the cable insulator as shown.
  - (3). Remove any excess solder from the pin with a knife. This surface must be smooth.
  - (4). A properly soldered terminal will yield 500gf when stretched.

#### 3. Crimping cable outer conductor

Fig.3

Table 1 dimension A

2.5CP	2.5CJ
1.5±0.2mm	0 <sup>+0.3</sup> <sub>0</sub> mm

1. Insert cable prepared per PROCESS 2 into the connector. The cable should be inserted until it comes to a full stop. This may be verified by checking the dimension from the side of the connector to the top of the contact (as indicated in Fig 3). This dimension should be A.
2. Crimp this installed metal clamp with tool HR10-TC-01 per Fig.3 and remove excess insulation with a knife.
 

It is possible to pull back the contact. Hold cable when crimping metal clamp and keep the dimension to show in Fig 3. after crimping metal clamp.

## HR10A-[ ]T Type (Threaded Coupling Type)

HR10A-( )T connector is a new product having a threaded coupling locking mechanism. Electric performance is same as HR10 and HR10A push-pull locking type connector.

1	Use cables with a nominal sectional area of 0.129 mm <sup>2</sup> (AWG#26) at the finish outside diameters applicable for each size.	
2	After processing the cable ends according to the dimensions in the above drawings, fit the parts to the cable as shown in the drawings.	
3	Fit the parts to the cable in the following order: tightener, clamp washer, and plug body.	Fit the parts to the cable in the following order: cord bushing and plug body.
4	(solder type) Insert the P shell unit into the assembly tool stand and solder it. (crimp type) After crimping the appropriate crimp terminal to the cable core, insert the crimp terminal into the terminal hole in the P shell unit.	
5	Assemble the connector in the following steps. 1.Screw the plug body into the thread in the P shell unit with the tightening force shown in Table 1 using a torque wrench with a fixed torque. Before tightening the plug body,slacken part C so that no load is applied to the soldered wires. 2.Apply the clamp washer to the bifurcated part of the plug body, and then tighten the tightener until surface B touches the plug body surface A.	1.Fix by caulking the clamp accompanying the cable with the cable crimping tool(HR10A-TC-02) 2.Screw the plug body into the thread in the P shell until with a tightening force shown in Table 1 using a torque wrench with a fixed torque. Before tightening the plug body, slacken the part D so that no load is applied to the soldered wires. 3.Tighten the set screw so that the tip of the screw presses one of the two bosses on the clamp. Fix the set screw with a tightening torque of 0.3N(3kg·cm) 4.Attach the cord bushing to the plug body.
6	This completes the work.	

For any question on using the plugs, contact our sales or engineering department.

Remarks : Loctite 242, Henkel Japan or equivalent is recommend to prevent the male thread section of the P shell unit and the set screw for loosening.

## ■ Connector

### Notes

- 1 : When using a plug with male terminal, be sure to use a receptacle or jack fitted with female terminal.
- 2 : Standard finish of the terminal is gold plating for the HR10, and silver plating for the HR10A and HR10G.  
Be sure to use male and female connectors of the same plating.

## Precautions

1. Switch off the power of the circuit before disconnecting or plugging-in the connector.
2. Use a connector with socket contacts at the power side of the circuit.
3. Make sure that the coupling is in completely cocked position.
4. The cable pull and twisting strength and other characteristics may differ, depending on the cable structure. Please confirm before the use.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
