

## FASTON Tabs

### 312 and 250 Series (High Temperature 700° F / 371° C Max.)

TE offers a variety of FASTON tabs in an assortment of configurations. The product line includes various weld type tabs, stud mounted tabs and wire crimp tabs. Also included in the product offering are high temperature tabs and test tabs.

The TE high-temperature tab is designed to crimp to heating element wire. The tab end protrudes through a ceramic/high-temperature housing for mating with either a standard 250 or 312 FASTON receptacle.

The mechanical tab is mounted onto TE gauge 100505 for testing of receptacle insertion/extraction requirements. Double-ended test tabs are also available for electrical and temperature rise testing. TE has readily available a variety of UL 310 constructed tabs for mechanical testing of FASTON, Ultra-Fast FASTON and Positive Lock receptacles. These tabs are designed for electrical test setups as outlined in UL 310 (See instruction sheet 408-7432 for recommended procedure mechanical test).
