

# FAN3852

## Microphone Pre-Amplifier with Digital Output

### Description

The FAN3852 integrates a pre-amplifier, LDO, and ADC that converts Electret Condenser Microphone (ECM) outputs to digital Pulse Density Modulation (PDM) data streams. The pre-amplifier accepts analog signals from the ECM and drives an over-sampled sigma delta Analog-to-Digital Converter (ADC) and outputs PDM data. The PDM digital audio has the advantage of noise rejection and easy interface to mobile handset processors.

The FAN3852 features an integrated LDO and is powered from the system supply rails up to 3.63 V, with low power consumption of only 0.85 mW and less than 20  $\mu$ W in Power-Down Mode.

### Features

- Optimized for Mobile Handset and Notebook PC Microphone Applications
- Accepts Input from Electret Condenser Microphones (ECM)
- Pulse Density Modulation (PDM) Output
- Standard 5-Wire Digital Interface
- Low Input Capacitance, High PSR, 20 kHz Pre-Amplifier
- Low-Power 1.5  $\mu$ A Sleep Mode
- Typical 420  $\mu$ A Supply Current
- SNR of 62 dB (A) for 16 dB Gain
- Total Harmonic Distortion 0.02%
- Input Clock Frequency Range of 1–4 MHz
- Integrated Low Drop-Out Regulator (LDO)
- Small 1.242 mm  $\times$  0.842 mm 6-Ball, 0.400 mm pitch standard WLCSP Package
- 1.5 kV HBM ESD on MIC Input

### Typical Applications

- Electret Condenser Microphones with Digital Output
- Mobile Handset
- Headset Accessories
- Personal Computer (PC)

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.

1. This device is fabricated using CMOS technology and is therefore susceptible to damage from electrostatic discharges. Appropriate precautions must be taken during handling and storage of this device to prevent exposure to ESD.

# FAN3852

**Table 3. RELIABILITY INFORMATION**

| Symbol            | Rating  | Min. | Typ. | Max. | Unit |
|-------------------|---|------|------|------|------|
| T <sub>J</sub>    | Junction Temperature  |      |      | +150 | °C   |
| T <sub>STG</sub>  | Storage Temperature Range   | -65  |      | +125 | °C   |
| T <sub>RFLW</sub> | Peak Reflow Temperature   |      |      | +260 | °C   |
| θ <sub>JA</sub>   | Thermal Resistance, JEDEC Standard, Multilayer Test Boards, Still Air |      | 90   |      | °C/W |

2. T<sub>A</sub> = 25°C unless otherwise specified

**Table 4. RECOMMENDED OPERATING CONDITIONS**

| Symbol              | Rating                      | Min. | Typ. | Max. | Unit |
|---------------------|-----------------------------|------|------|------|------|
| T <sub>A</sub>      | Operating Temperature Range | -400 |      | +85  | °C   |
| V <sub>DD</sub>     | Supply Voltage Range        | 1.64 | 1.80 | 3.63 | V    |
| T <sub>RF-CLK</sub> | Clock Rise and Fall Time    |      |      | 10   | ns   |

Functional operation above the stresses listed in the Recommended Operating Ranges is not implied. Extended exposure to stresses beyond the Recommended Operating Ranges limits may affect device reliability.

Product parametric performance is indicated in the Electrical Characteristics for the listed test conditions, unless otherwise noted. Product performance may not be indicated by the Electrical Characteristics if operated under different conditions.

4. Pseudo-random noise with triangular probability density function. Bandwidth up to 10 MHz.
5. Guaranteed by characterization. Not production tested.
6. Assuming that 120 dB (SPL) is mapped to 0 dBFS.
7. Assuming an input of -45 dBV.
8. Guaranteed by design. Not production tested.
9. All parameters are tested at 2.4 MHz. Frequency range guaranteed by characterization.
10. Device wakes up when  $f_{CLK} \geq 300\text{ kHz}$ .
11. Device falls asleep when  $f_{CLK} \leq 70\text{ kHz}$ .

Figure 8. Stereo Microphone Application Circuit

# FAN3852

## APPLICATIONS INFORMATION (continued)

**Figure 9. MIC Element Drawing**

A 0.1  $\mu\text{F}$  decoupling capacitor is required for VDD. It can be located inside the microphone or on the PCB very close to the VDD pin.

Due to high input impedance, care should be taken to remove all flux used during the reflow soldering process.

A 100  $\Omega$  resistance is recommended on the clock output of the device driving the FAN3852 to minimize ringing and improve signal integrity.

For optimal PSR, route a trace to the VDD pin. Do not place a VDD plane under the device.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,  
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
