

LT4276, LT4321, LT4320

High Efficiency PoE PD Interface with Integrated Switching Regulator and 9-57VDC/24VAC AUX Support

DESCRIPTION

Demonstration circuit 2047A-A is an IEEE802.3at compliant Power over Ethernet (PoE) Powered Device (PD) with support for 9-57VDC and 24VAC auxiliary supply input. It features the [LT®4276](#) PD interface and switching regulator controller, the LT4321 PoE ideal diode bridge controller, and the LT4320 ideal diode bridge controller.

The LT4276 provides IEEE802.3af (PoE, Type 1) and IEEE802.3at (PoE+, Type 2) compliant interfacing and power supply control. It utilizes an external, low $R_{DS(ON)}$ (57mΩ typical) N-channel FET for the hot swap function to improve efficiency. The LT4276 also provides a DC-DC converter configured as a highly efficient flyback topology with synchronous rectification.

The LT4321 controls eight low $R_{DS(ON)}$ (57mΩ typical) N-channel FETs to further improve end-to-end power delivery efficiency and ease thermal design. This solution replaces the eight diodes typically found in a passive PoE rectifier bridge.

The LT4320 controls four N-channel FETs (9.6mΩ typical) to replace a diode bridge typically found at the auxiliary supply input. AC rectification and DC polarity correction are provided. This solution reduces voltage drop associated with the diode bridge and enables the power supply operation as low as 9VDC at the auxiliary supply input. This improves end-to-end efficiency and reduces heat.

The DC2047A-A accepts up to 25.5W of delivered power from a Power Sourcing Equipment (PSE) via the RJ45 connector (J1) or a local AC/DC power supply using the auxiliary supply input. When both supplies are connected, the auxiliary supply input has priority over the PoE input. The DC2047A-A supplies a 12V output at up to 1.9A.

Design files for this circuit board are available at <http://www.linear.com/demo/DC2047A-A>

PERFORMANCE SUMMARY Specifications are at $T_A = 25^\circ\text{C}$

PARAMETER	CONDITIONS	VALUE
Port Voltage (V_{PORT})	At RJ45	37V to 57V
Auxiliary Voltage (V_{AUX})	From AUX+ to AUX- Terminals	9V to 57VDC/24VAC
Output Voltage (V_{OUT})		12V (Typical)
Output Current (I_{OUT})		1.9A (Max)
Output Voltage Ripple	$V_{PORT} = 42.5\text{V}$, $I_{OUT} = 1.9\text{A}$	90mV _{p-p} (Typical)
Load Regulation		±0.6% (Typical)
Efficiency	$V_{PORT} = 42.5\text{V}$, $I_{OUT} = 1.9\text{A}$, End-to-End	88% (Typical)
Switching Frequency		250kHz (Typical)

CROSSOVER FREQUENCY	GAIN MARGIN	PHASE MARGIN
3.5kHz	12dB	58°

QUICK START PROCEDURE

Power over Ethernet (PoE) Input

1. Disconnect auxiliary supply if it is connected to AUX+ and AUX- inputs of the DC2047A-A.
2. Place and connect test equipment (voltmeter, ammeter, oscilloscope, and electronic load) as shown in Figure 7.
3. Turn down the electronic load to a minimum value and turn off the electronic load.
4. Connect the DC power supply to the DC1567A. Turn on the DC power supply and set its current limit to 1A. Then increase its output voltage to 57V.
5. Connect the output of the DC1567A to the RJ45 connector (J1) of the DC2047A using a CAT5e or CAT6 Ethernet cable.

6. After the LED (D4) on the DC2047A is lit, check the output voltage using a voltmeter. Output voltage should be within $12.0V \pm 0.2V$.
7. Turn on the electronic load and increase its load current up to 1.9A. Observe the output voltage regulation, efficiency, and other parameters.
8. Verify $\overline{T2P}$ response with a voltmeter as shown in Figure 7. The $\overline{T2P}$ response to the type of PSE connected to the DC2047A-A is provided in Table 1.

Figure 7. Setup Diagram for PoE Input

Table 1. $\overline{T2P}$ Response vs PSE Type

PSE	$\overline{T2P}$ RESPONSE	NEGOTIATED PD INPUT POWER
IEEE	Logic High	13W
	Logic Low	25.5W

QUICK START PROCEDURE

Auxiliary Supply Input

1. Place and connect test equipment (voltmeter, ammeter, oscilloscope, and electronic load) as shown in Figure 8.
2. Turn down the electronic load to a minimum value and turn off the electronic load.
3. Connect the output of the auxiliary supply to the DC2047A as shown in Figure 8. Turn on the auxiliary supply and set its current limit to 1A. Then increase its output voltage to 48V.
4. Once the LED (D4) on the DC2047A is lit, check the output voltage using a voltmeter. Output voltage should be within $12.0V \pm 0.2V$.
5. Turn on the electronic load and increase its load current up to 1.9A. Observe the output voltage regulation, efficiency, and other parameters.
6. Verify $\overline{T2P}$ response with a voltmeter as shown in Figure 8. The $\overline{T2P}$ response during auxiliary power operation is: Logic Low.

DEMONSTRATION BOARD IMPORTANT NOTICE

Linear Technology Corporation (LTC) provides the enclosed product(s) under the following **AS IS** conditions:

This demonstration board (DEMO BOARD) kit being sold or provided by Linear Technology is intended for use for **ENGINEERING DEVELOPMENT OR EVALUATION PURPOSES ONLY** and is not provided by LTC for commercial use. As such, the DEMO BOARD herein may not be complete in terms of required design-, marketing-, and/or manufacturing-related protective considerations, including but not limited to product safety measures typically found in finished commercial goods. As a prototype, this product does not fall within the scope of the European Union directive on electromagnetic compatibility and therefore may or may not meet the technical requirements of the directive, or other regulations.

If this evaluation kit does not meet the specifications recited in the DEMO BOARD manual the kit may be returned within 30 days from the date of delivery for a full refund. **THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY THE SELLER TO BUYER AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. EXCEPT TO THE EXTENT OF THIS INDEMNITY, NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.**

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user releases LTC from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge. Also be aware that the products herein may not be regulatory compliant or agency certified (FCC, UL, CE, etc.).

No License is granted under any patent right or other intellectual property whatsoever. **LTC assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or any other intellectual property rights of any kind.**

LTC currently services a variety of customers for products around the world, and therefore this transaction **is not exclusive**.

Please read the DEMO BOARD manual prior to handling the product. Persons handling this product must have electronics training and observe good laboratory practice standards. **Common sense is encouraged.**

This notice contains important safety information about temperatures and voltages. For further safety concerns, please contact a LTC application engineer.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
