

HCPL-2533

Dual Channel, High Speed Logic Interface Optocoupler

Data Sheet

 **Lead (Pb) Free**
RoHS 6 fully compliant

RoHS 6 fully compliant options available;
-xxxE denotes a lead-free product

Description

The HCPL-2533 is a dual channel optocoupler which is specified for use in LSTTL-to-LSTTL and TTL-to-LSTTL logic interfaces. A nominal 8 mA LSTTL sink current through the input LED will provide enough output current for proper operation of 1 LSTTL gate under worst-case conditions when used in the recommended circuits. The CTR of the HCPL-2533 is 15% minimum at $I_F = 8$ mA.

The HCPL-2533 contains a pair of light emitting diodes and integrated photon detectors with a 3000 Vdc withstand test between input and output. Separate connection for the photodiode bias and output transistor collector reduce the base-collector capacitance, giving improved speed compared with conventional phototransistor couplers.

Features

- Data rates to 250 kb/s NRZ
- LSTTL compatible
- High common mode transient immunity: > 1000 V/ μ s
- High density packaging
- Open collection outputs
- Guaranteed performance from temperature: 0°C to 70°C
- Safety approval
 - UL Recognized - $3750V_{\text{rms}}$ for 1 min ($5000V_{\text{rms}}$ for 1 min Option 020 devices) per UL1577.
 - IEC/EN/DIN EN 60747-5-2 Approved
 - $V_{\text{ORM}} = 630 V_{\text{peak}}$ for option 060

Schematic

USE OF A $0.1 \mu\text{F}$ BYPASS CAPACITOR CONNECTED BETWEEN PINS 5 AND 8 IS RECOMMENDED.

Applications

- High speed logic ground isolation
 - LSTTL-to-LSTTL and TTL-to-LSTTL
- High voltage isolation
- Analog signal ground isolation

CAUTION: It is advised that normal static precautions be taken in handling and assembly of this component to prevent damage and/or degradation which may be induced by ESD.

Ordering Information

HCPL-2533 is UL Recognized with 3750 Vrms and 5000 Vrms (Option 020) for 1 minute per UL1577 and are approved under CSA Component Acceptance Notice #5, File CA 88324.

Notes:

5. Each channel.
6. Current Transfer Ratio is defined as the ratio of output collector current, I_O , to the forward LED input current, I_F , times 100%.
7. Device considered a two-terminal device: Pins 1, 2, 3, and 4 shorted together and Pins 5, 6, 7, and 8 shorted together.
8. Measured between pins 1 and 2 shorted together, and pins 3 and 4 shorted together.
9. Common mode transient immunity in Logic High level is the maximum tolerable (positive) dV_{CM}/dt on the leading edge of the common mode pulse V_{CM} , to assure that the output will remain in a Logic High state (i.e., $V_O > 2.0\text{ V}$). Common mode transient immunity in Logic Low level is the maximum tolerable (negative) dV_{CM}/dt on the trailing edge of the common mode pulse signal, V_{CM} , to assure that the output will remain in a Logic Low state (i.e., $V_O < 0.8\text{ V}$).
10. The 7.5 k load represents 1 LSTTL unit load of 0.36 mA and a 20 k Ω pull-up resistor.
11. The 4.7 k load represents 1 LSTTL unit load of 0.36 mA and an 8.2 k Ω pull-up resistor.

Recommended Operation

The HCPL-2533 optocoupler is specified for use in LSTTL-to-LSTTL and TTL-to-LSTTL interfaces. The recommended circuits show the interface design and give suggested component values. The input current I_F is given as both a nominal value and a range. The range in I_F results from the tolerances in V_{CC} and the input resistor R_{IN} . The CTR of the optocoupler is given as the minimum

initial value over temperature, taken directly from the Electrical Specifications. The value given for $I_{OL}(\min)$ is based on the minimum CTR and the minimum I_F using worst case values for R_L and V_{CC} . The resulting $I_{OL}(\min)$ has ample design margin, allowing more than 20% for CTR degradation even under these worst case conditions. For additional information on CTR degradation see *Application Note 1002*.

Notes:

12. The inverting circuit has higher power consumption and must use open collector gates on the input.
 13. The load resistor R_L must be large enough to guarantee logic LOW and small enough to guarantee logic HIGH under worst case conditions:

$$\frac{V_{CC(max)} - V_{OL}}{I_{OL(2533)} - I_{IL(B)}} \leq R_L \leq \frac{V_{CC(min)} - V_{IH(B)}}{I_{OH(2533)} - I_{IH(B)}}$$

The selection of R_L is the same for both inverting and non-inverting circuits.

14. The maximum current sink required for logic LOW is:

$$I_{OL(max)} = I_{IL(B)(max)} + I_R(max)$$

where I_R is the current through R_L .

15. The ratio of $I_{OL(min)}$ to $I_{OL(max)}$ gives the design margin for CTR degradation. See Application Note 1002.
 16. The maximum data rate is defined as:

$$f_D = \frac{1}{t_{PHL} + t_{PLH}} \text{ bits/second NRZ}$$

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».
