# TLE9844-2QX Appkit

- › The TLE9844-2QX is part of our Embedded Power products and belongs to the relay driver IC family. The TLE9844-2QX Appkit is designed to evaluate relay driven DC Motor applications. The two layers PCB is space and cost optimized to demonstrate an application near solution.

## Target Applications

- › Automotive Body & Comfort applications such as sunroof and window lift

## Summary of Features

- › Automotive qualified relay driver IC (TLE9844-2QX) with integrated high-side switches
- › 2-channel relay
- › Onboard debug interface

# Infiniteon Embedded Power IC: TLE9844-2QX Application Board

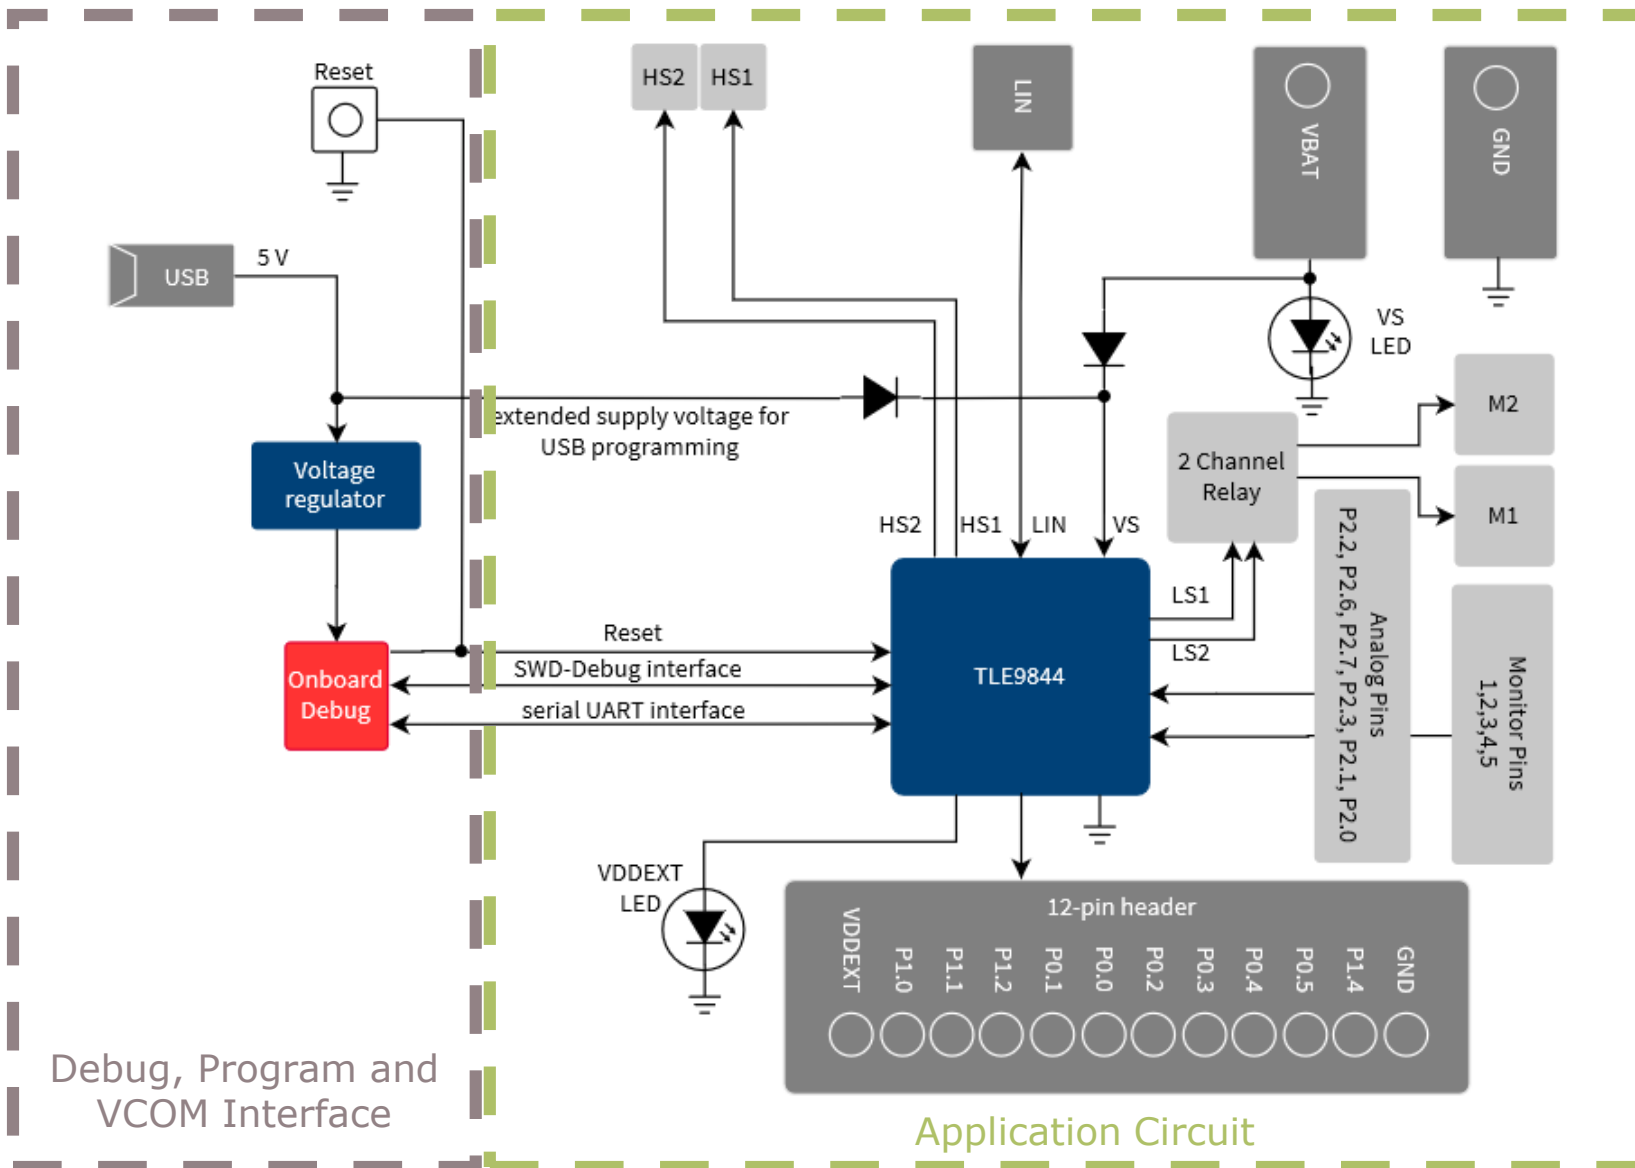

## TLE9844-2QX Application Kit

- › Voltage supply: typ. 12 V
- › Motor current: max. 20 A
- › Infineon Relay Driver IC (ARM® Cortex® M0 MCU)
- › J-Link OB-Debugger with Serial COM Port
- › LIN Interface

# Support Online tools and services

The screenshot shows the Infineon website interface. At the top, the Infineon logo is on the left, followed by navigation links: Products, Applications, Tools (highlighted with a red box and number 3), About Infineon, and Careers. On the right, there are links for Newsletter (highlighted with a red box and number 1), Contact, Where to Buy (highlighted with a red box and number 2), English, and Login. A search bar is also present. The main content area features a large image of a city skyline at night, with the word "Lighting" overlaid. Below the image, there is a headline: "New LED controller enables low-wattage luminaire designs August 26th 17:00 CEST" and a "Register Now!" button. At the bottom, there is a navigation menu with three columns: Products, Power, and Power Overview. The "Support" link in the Products column is highlighted with a red box and number 4.

# Toolchain installation: General Overview

Infineon Embedded Power ICs are supported by a complete development tool chain provided by Infineon and third party vendors. The tool chain includes compilers, debuggers, evaluation boards, LIN low level drivers and configuration tools as well as variety of example software code.

ARM Keil µVision is an integrated development environment which consists of code editor, compiler and debugger.

Infineon provides the ConfigWizard which is designed for configuration of chip modules. ConfigWizard supports easy configuring of Embedded Power peripherals.

SEGGER J-Link is a widely used driver for "on-board" or "stand-alone" debugger.

The Embedded Power Software Development Kit (SDK) is a low level driver library which can be downloaded within "Keil µVision" via the "Pack Installer".

# Toolchain installation: 1/4

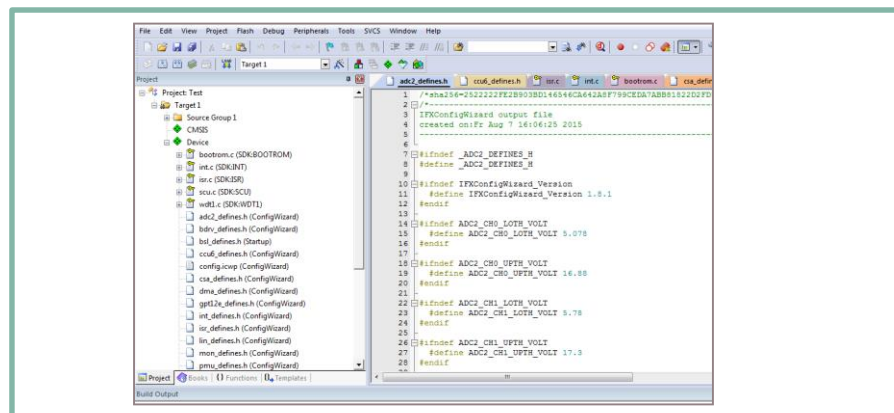

## Keil μVision5

- > Code Editor & Online Debugger
- > Evaluation version can handle up to 32K

Download from:  
<https://www.keil.com/demo/eval/arm.htm>

Set up your example project step by step

# Getting Started: How to create a new project

## 1) Create a new Project

- › Open Keil mdk
- › Go to → Project  
→ new  $\mu$ Vision Project
- › Name project: ('relay\_click')
- › Select Device:
  - › Infineon
    - › TLE98xx Series
      - › TLE984x Series
        - › TLE9844-2QX

# Getting Started: How to configure your run-time environment

## 2) Configuration of Run-Time Environment

- › Expand: 'Device'
  - › Check: Startup
  - › Check: Config Wizard
- › 'Sel.' window background is **orange**
- › Press: 'Resolve'
- › 'Sel.' window background is now **green**
- › Expand 'SDK' and activate 'LS' Module

The top screenshot shows the 'Manage Run-Time Environment' dialog box. The 'Sel.' column for the 'Device' component is highlighted in orange. The 'Startup' and 'ConfigWizard' sub-components are checked. The 'Resolve' button is circled in red. A large grey arrow points from the 'Resolve' button to the bottom screenshot.

The bottom screenshot shows the same dialog box after clicking 'Resolve'. The 'Sel.' column for the 'Device' component is now highlighted in green. The 'Startup' and 'ConfigWizard' sub-components are still checked. The 'Resolve' button is no longer circled.

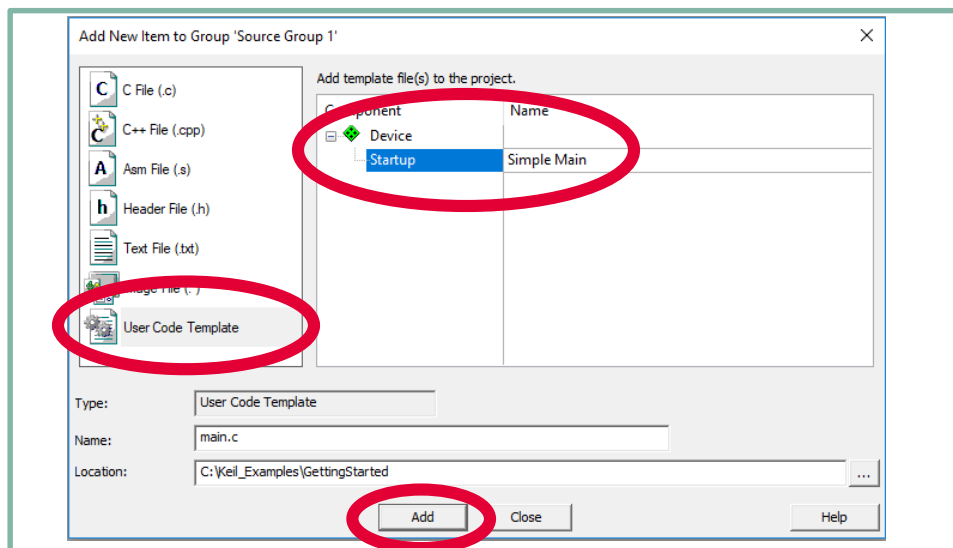

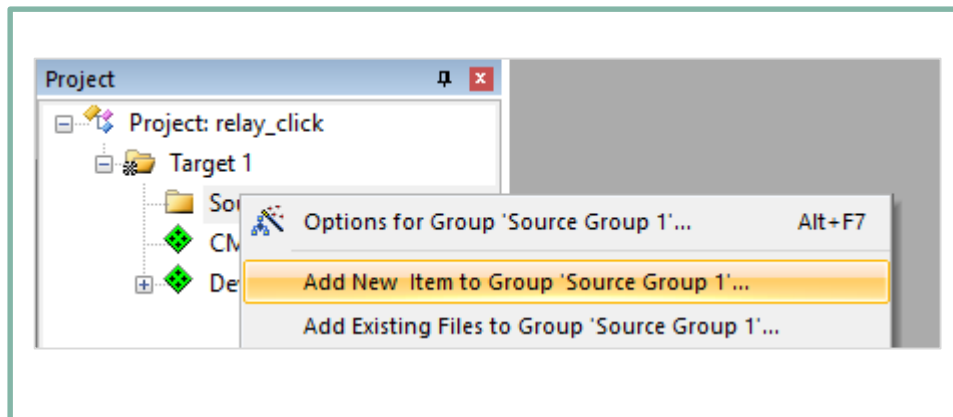

Software Component	Sel.	Variant	Version	Description
CMSIS				<a href="#">Cortex Microcontroller Software Interface Components</a>
CMSIS Driver				<a href="#">Unified Device Drivers compliant to CMSIS-Driver Specifications</a>
Compiler		ARM Compiler	1.4.0	<a href="#">Compiler Extensions for ARM Compiler 5 and ARM Compiler 6</a>
Device				<a href="#">Startup_System Setup</a>
Startup	<input checked="" type="checkbox"/>		1.0.1	System Startup for Infineon TLE984x device series
ConfigWizard	<input checked="" type="checkbox"/>		1.8.7	Infineon ConfigWizard Configuration File
SDK				
File System		MDK-Plus	6.10.0	<a href="#">File Access on various storage devices</a>
Graphics		MDK-Plus	5.46.5	<a href="#">User Interface on graphical LCD displays</a>
Network		MDK-Plus	7.8.0	<a href="#">IPv4 Networking using Ethernet or Serial protocols</a>
USB		MDK-Plus	6.12.4	<a href="#">USB Communication with various device classes</a>

Validation Output: Infineon::Device:Startup require Device:SDK:SCU  
Description: Additional software components required. Select component from list. Infineon::Device:SDK:SCU System Control Unit (SCU) driver for TLE984x.

# Getting Started: Use standard templates

## 3) Using easy 'Main' template

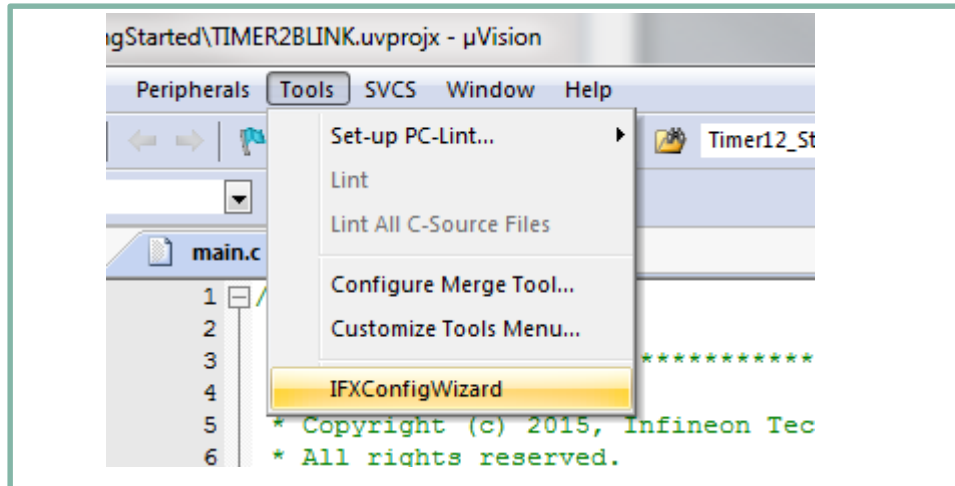

1. Expand: 'Target 1'
2. Right click on: 'Source Group 1'
3. Choose: Add New Item to Group 'Source Group 1'
4. Choose 'User Code Template'
5. Expand 'Device'
6. Choose: 'Startup'
7. Continue with 'Add'

# Getting Started: How to use the Config Wizard

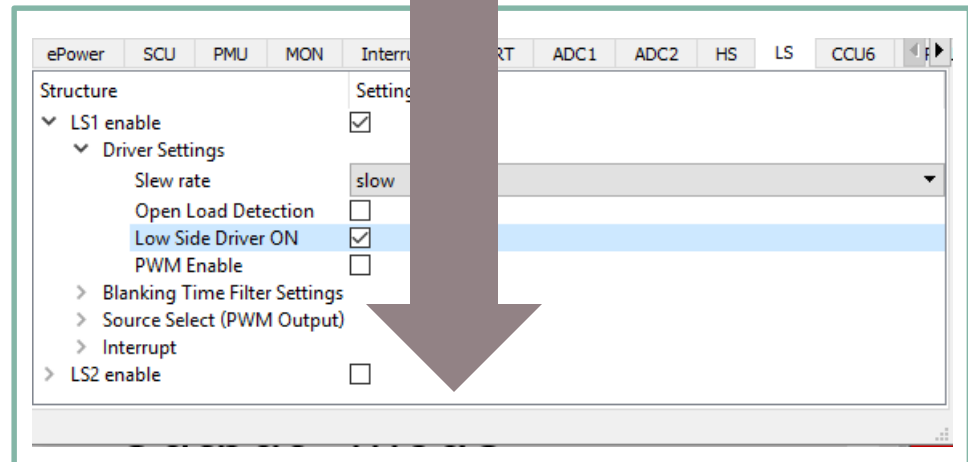

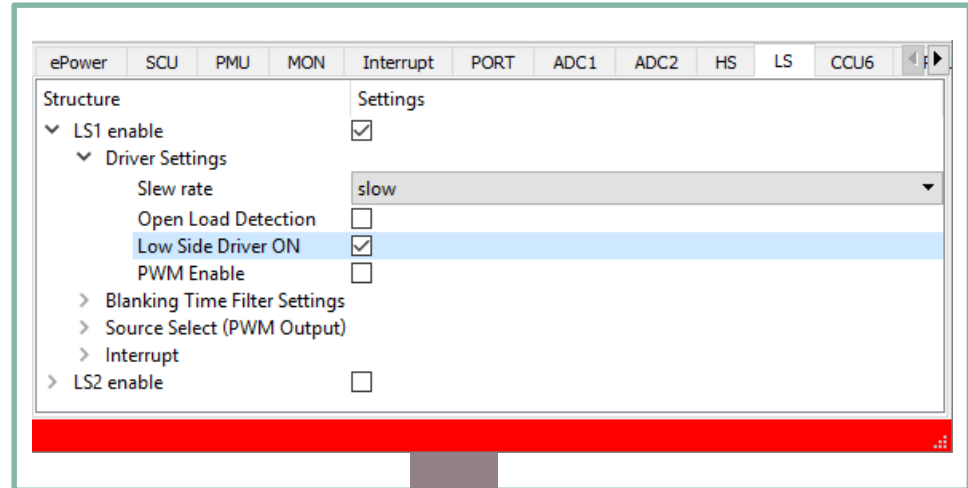

## 4a) Using Config Wizard

- > Open Config Wizard by choosing:  
'Tools → Config Wizard'
- > Config Wizard will open in a separate window
- > **orange** status bar indicates a new project
- > **red** status bar indicates unsaved changes
- > **white** status bar indicates saved project

## 4b) Using Config Wizard: Low Side Switch Configuration

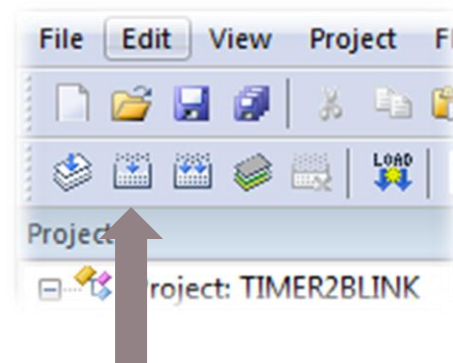

- › Select: 'LS' Chapter
  - › Enable 'LS1'
  - › Expand 'LS1'
  - › Expand 'Driver Settings'
  - › Check Low Side Driver ON
- 
- › Save with 'File' -> 'Save Project'
  - › After Saving, status bar turns to **white** color

# Getting Started: How to compile your projects

## 4) Compile Project

- > Compile Project:
  - > Press "Build" Button or press "F7"
- > Project "Build Output" window shows  
0 Error(s) , 0 Warning(s)

```

Build Output
compiling main.c...
compiling port.c...
compiling timer2x.c...
linking...
Program Size: Code=1512 RO-data=164 RW-data=16 ZI-data=608
".\Objects\Getting_Started.axf" - 0 Error(s), 0 Warning(s).
Build Time Elapsed: 00:00:02
    
```

# Getting Started: Power up your board and connect the debugger

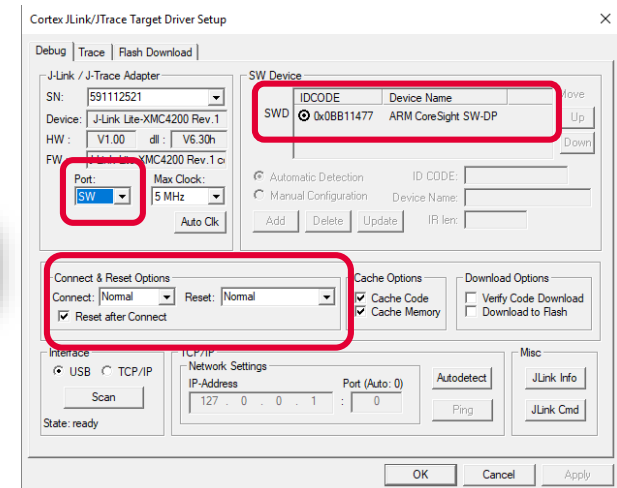

## 6) Power up Evaluation board

- › Connect micro USB cable
- › Supply board via 12V power supply (VBAT, GND)
- › Debug LED and VBAT LED light up

## 7) Connect Debugger

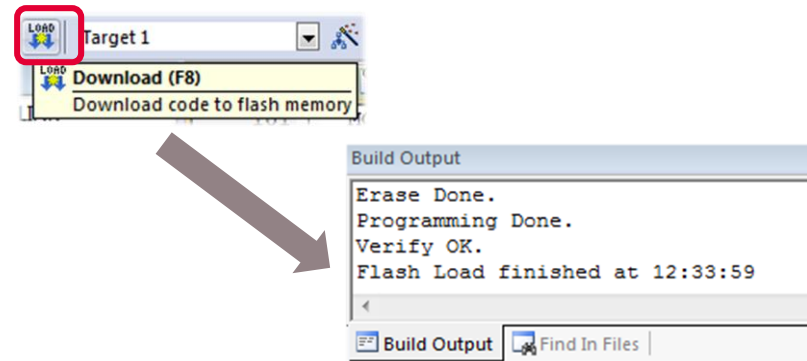

- › Go to
- › Choose:
  - › Debug->use: J-Link
  - › Go to Settings
- › SWD connection established when 'IDCODE' is visible

# Getting Started: How to download and run your code

## 8) Download and run code

- › Press: 'Load'- button or Press: 'F8'
- › 'Flash Load finished' is shown in 'Build Output' window

- › Press: 'Reset' button on Application Kit
- › LS1 activate first relay coil
- › Ticking noise occur

# Getting Started: Available example code

## Infineon Example Code available in "Pack Installer"

The screenshot displays the Pack Installer application window. The left pane shows a tree view of device packs, with the Infineon TLE9879QXA40 pack selected. The right pane shows a list of example code items with their actions and descriptions.

Example	Action	Description
-ADC1_POTI_EIM (TLE9879 EvalKit)	Copy	ADC1 with Exceptional Interrupt Mode reading in the Poti at Channel 4
-ADC1_POTI_ESM (TLE9879 EvalKit)	Copy	ADC1 with Exceptional Sequencer Mode reading in the Poti at Channel 4
-ADC1_POTI_SEQ (TLE9879 EvalKit)	Copy	ADC1 in Sequencer Mode reading in the Poti at Channel 4
-ADC2_VS (TLE9879 EvalKit)	Copy	ADC2 VS Measurement
BLDC_Block_Commution_HALL (TLE9879 E...	Copy	BLDC Motor Drive with Block Commutation with HALL Sensor
BLDC_Block_Commution_HALL + LIN (TLE...	Copy	BLDC Motor Drive with Block Commutation with HALL Sensor controlled over LIN
BLDC_Sensorless_FOC (TLE9879 EvalKit)	Copy	BLDC Motor Drive with Sensorless FOC
BLDC_Sensorless_FOC + LIN (TLE9879 EvalKit)	Copy	BLDC Motor Drive with Sensorless FOC controlled over LIN
Blinky (TLE9879 EvalKit)	Copy	Blinky - blinks LED1
Blinky - Running Lights (TLE9879 EvalKit)	Copy	Blinky - Running Lights
CCU6_ADC1 (TLE9879 EvalKit)	Copy	PWM synchronous ADC measurement, the Poti at Channel 4 adjusts the PWM
CCU6_PWM (TLE9879 EvalKit)	Copy	CCU6 generates PWM signals
CCU6_SIN_PWM (TLE9879 EvalKit)	Copy	CCU6 generates Sinus with PWM signals
DMA ADC1 Sequence (TLE9879 EvalKit)	Copy	ADC1 triggers DMA after sequence is done
DMA SPI (TLE9879 EvalKit)	Copy	Sends data through SPI using DMA
DMA UART TTY (TLE9879 EvalKit)	Copy	UART2 sends data triggered by DMA
GPT12E_T3_CONCAT (TLE9879 EvalKit)	Copy	Timer2 and Timer3 as 32bit Timer
GPT12E_T3_RELOAD (TLE9879 EvalKit)	Copy	GPT12E Timer3 reloaded by Timer2
LIN Master (TLE9879 EvalKit)	Copy	running the IHR LIN LLD in a LIN Master configuration
LIN Slave (TLE9879 EvalKit)	Copy	running the IHR LIN LLD in a LIN Slave configuration
PMU Data Flash Handling (TLE9879 EvalKit)	Copy	NVM Data Flash page write with error handling
NVM Prog (TLE9879 EvalKit)	Copy	NVM Page Programming
NVM_Prog_RAM_BRANCH (TLE9879 EvalKit)	Copy	NVM Programming with RAM Branch
NVM_Protection (TLE9879 EvalKit)	Copy	Flash Page Write Protection
PMU_PowerSaving_SleepMode (TLE9879 Eval...	Copy	Power Saving Modes - Sleep Mode
PMU_PowerSaving_SleepMode_CyclicWake (...)	Copy	Power Saving Modes - Sleep Mode with cyclic wake
PMU_PowerSaving_StopMode (TLE9879 EvalK...	Copy	Power Saving Modes - Stop Mode
PMU_ResetStatus (TLE9879 EvalKit)	Copy	PMU Reset Status Evaluation
PMU_VDDEXT (TLE9879 EvalKit)	Copy	VDDEXT handling
SCU_PLL (TLE9879 EvalKit)	Copy	PLL adjustment
SCU_PLL_XTAL (TLE9879 EvalKit)	Copy	PLL with external XTAL
SDK (TLE9879 EvalKit)	Copy	Software Developer Kit
SSC1_2_SSC2 (TLE9879 EvalKit)	Copy	SSC1 sends to SSC2
SSC1_SEND (TLE9879 EvalKit)	Copy	SSC1 sends data as SPI Master
TIMER2_BLINK (TLE9879 EvalKit)	Copy	TIMER2 Blinking
TIMER2_PWM_CAPTURE (TLE9879 EvalKit)	Copy	TIMER2 PWM Duty Cycle and Period Measurement
UART1_SEND (TLE9879 EvalKit)	Copy	UART1 sends data over LIN Transceiver
UART2_TTY (TLE9879 EvalKit)	Copy	UART2 sends printf messages

Part of your life. Part of tomorrow.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,  
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
