Note 1:	<p>DC load meters require an external shunt and potentiometer (not supplied). Use 8 to 10Ω, 2 watt wire-wound potentiometer.</p> <p>The appropriate shunt should be selected from accessory section and ordered separately.</p> <p>To select the proper shunt, first obtain the full load current rating of your motor from the name plate, manufacturer's specifications or N.E.C. listing. Multiply that rating by 1.25 and select and order the shunt with an amps rating as large or slightly larger than the calculated value.</p> <p>Installation and calibration instructions are included with the meter .</p>				
Note 2:	<p>AC load meters must be used with external donut transformers. Complete instructions for proper selection are included with each AC load meter.</p> <p>Advance assistance in selecting the appropriate transformer and determining the correct primary / secondary turns ratio can be obtained from a Simpson technical service representative or authorized service center.</p>
