

## ADCMP350/ADCMP352/ADCMP354/ADCMP356

### FEATURES

Comparators with 0.6 V on-chip references

Output stages:

Open-drain active-low (ADCMP350)

Push-pull active-low (ADCMP352)

Open-drain active-high (ADCMP354)

Push-pull active-high (ADCMP356)

High voltage (up to 22 V) tolerance on  $V_{IN}$  and open-drain output pins

Low power consumption (10  $\mu$ A)

10 nA input bias current

15 mV hysteresis

5  $\mu$ s propagation delay

Specified over  $-40^{\circ}\text{C}$  to  $+125^{\circ}\text{C}$  temperature range

4-lead SC70 package

### APPLICATIONS

Voltage detectors

Microprocessor systems

Computers

Battery monitors

Intelligent instruments

Portable equipment

### FUNCTIONAL BLOCK DIAGRAMS

Figure 1.

04745-001

### GENERAL DESCRIPTION

The ADCMP350/ADCMP352/ADCMP354/ADCMP356 parts are comparator and reference circuits suitable for use in general-purpose applications. The high voltage input and output structures will allow voltages of up to 22 V on the input of all devices and the output of the open-drain devices. High performance over the  $-40^{\circ}\text{C}$  to  $+125^{\circ}\text{C}$  temperature range makes them suitable for use in automotive and other thermally harsh applications, while low power consumption and space-efficient SC70 packaging make them ideal for battery-powered portable equipment.

Table 1. Selection Table

Part No.	Reference Voltage (V)	Input Connection	Output
ADCMP350	0.6	Inverting	Open Drain
ADCMP352	0.6	Inverting	Push-Pull
ADCMP354	0.6	Noninverting	Open Drain
ADCMP356	0.6	Noninverting	Push-Pull

## ABSOLUTE MAXIMUM RATINGS

$T_A = 25^\circ\text{C}$ , unless otherwise noted.

Table 3.

Parameter	Rating
$V_{CC}$	-0.3 V to +6 V
$V_{IN}$	-0.3 V to +25 V
OUT (Open Drain)	-0.3 V to +25 V
OUT (Push-Pull)	-0.3 V to ( $V_{CC} + 0.3$ V)
Operating Temperature Range	-40°C to +125°C
Storage Temperature Range	-65°C to +150°C
$\theta_{JA}$ Thermal Impedance, SC70	146°C/W
Lead Temperature	
Soldering (10 sec)	300°C
Vapor Phase (60 sec)	215°C
Infrared (15 sec)	220°C

Stresses above those listed under Absolute Maximum Ratings may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or any other conditions above those indicated in the operational section of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

## ESD CAUTION

ESD (electrostatic discharge) sensitive device. Electrostatic charges as high as 4000 V readily accumulate on the human body and test equipment and can discharge without detection. Although this product features proprietary ESD protection circuitry, permanent damage may occur on devices subjected to high energy electrostatic discharges. Therefore, proper ESD precautions are recommended to avoid performance degradation or loss of functionality.

## PIN CONFIGURATION AND FUNCTION DESCRIPTIONS

Figure 2. Pin Configuration

Table 4. Pin Function Descriptions

Pin No.	Mnemonic	Description
1	V <sub>IN</sub>	Monitors Analog Input Voltage. Connected to inverting or noninverting input, depending on model number.
2	GND	Ground.
3	OUT	Digital Output. Open-drain or push-pull options, depending on model number.
4	V <sub>CC</sub>	Power Supply.

## APPLICATIONS

### ADDING HYSTERESIS

To prevent oscillations at the output caused by noise or slowly moving signals passing the switching threshold, positive feedback can be used to add hysteresis to the noninverting parts (ADCMP354 and ADCMP356).

For the noninverting configuration shown in Figure 19, two resistors are used to create different switching thresholds, depending on whether the input signal is increasing or decreasing in magnitude. When the input voltage is increasing, the threshold is above  $V_{REF}$ , and when it's decreasing, the threshold is below  $V_{REF}$ .

The upper input threshold level is given by

$$V_{IN\_HI} = \frac{V_{REF}(R1 + R2) - V_{CC}R1}{R2}$$

where  $V_{REF} = 0.6$  V.

The lower input threshold level is given by

$$V_{IN\_LO} = \frac{V_{REF}(R1 + R2)}{R2}$$

The hysteresis is the difference between these voltage levels and is given by

$$\Delta V_{IN} = \frac{V_{CC}R1}{R2}$$

Figure 19. Noninverting Comparator Configuration with Hysteresis

### VOLTAGE DETECTOR

The ADCMP35x parts can be used to monitor voltages, such as battery monitoring or threshold detectors. Using a resistor divider at the input to select the appropriate trip voltage, the comparator can be configured to give a logic output when the input passes that threshold. Figure 20 shows the typical configuration of the ADCMP354 for monitoring a supply to indicate that the voltage is above a certain level.

**NOTES**

**NOTES**

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
