

Improved, 8-Channel/Dual 4-Channel, CMOS Analog Multiplexers

DG408/DG409

General Description

Maxim's redesigned DG408 and DG409 CMOS analog multiplexers now feature guaranteed matching between channels (8Ω max) and flatness over the specified signal range (9Ω max). These low on-resistance muxes (100Ω max) conduct equally well in either direction and feature guaranteed low charge injection (15pC max). In addition, these new muxes offer low input off-leakage current over temperature—less than 5nA at +85°C.

The DG408 is a 1-of-8 multiplexer/demultiplexer and the DG409 is a dual 4-channel multiplexer/demultiplexer. Both muxes operate with a +5V to +30V single supply and with ±5V to ±20V dual supplies. ESD protection is guaranteed to be greater than 2000V per Method 3015.7 of MIL-STD-883. These improved muxes are pin-compatible plug-in upgrades for the industry standard DG408 and DG409.

Applications

- Sample-and-Hold Circuits
- Test Equipment
- Guidance and Control Systems
- Communications Systems
- Data-Acquisition Systems
- Audio Signal Routing

Pin Configurations

Features

- ◆ Pin-Compatible Plug-In Upgrades for Industry Standard DG408/DG409
- ◆ Guaranteed Matching Between Channels, 8Ω Max
- ◆ Guaranteed On-Resistance Flatness, 9Ω Max
- ◆ Guaranteed Low Charge Injection, 15pC Max
- ◆ Low On-Resistance, 100Ω Max
- ◆ Input Leakage, 5nA Max at +85°C
- ◆ Low Power Consumption, 1.25mW Max
- ◆ Rail-to-Rail Signal Handling
- ◆ Digital Input Controls TTL/CMOS Compatible
- ◆ ESD Protection >2000V per Method 3015.7

Ordering Information

| PART | TEMP RANGE | PIN-PACKAGE |
|----------|----------------|----------------|
| DG408CUE | 0°C to +70°C | 16 TSSOP |
| DG408CJ | 0°C to +70°C | 16 Plastic DIP |

ABSOLUTE MAXIMUM RATINGS

| | | | |
|---|---|---|-----------------|
| Voltage Referenced to V- | | Plastic DIP (derate 10.53mW/°C above +70°C) | 842mW |
| V+ | -0.3V, 44V | Narrow SO (derate 8.70mW/°C above +70°C) | 696mW |
| GND | -0.3V, 25V | CERDIP (derate 10.00mW/°C above +70°C) | 800mW |
| Digital Inputs, S, D (Note 1)..... | (V- - 2V) to (V+ + 2V) or 30mA, (whichever occurs first) | Operating Temperature Ranges | |
| Continuous Current (any terminal) | 30mA | DG408/DG409C_ | 0°C to +70°C |
| Peak Current, S, D (pulsed at 1ms, 10% duty cycle max) | 100mA | DG408/DG409D,E_ | -40°C to +85°C |
| Continuous Power Dissipation (T _A = +70°C) | | DG408/DG409AK | -55°C to +125°C |
| TSSOP (derate 9.4mW/°C above +70°C) | 755mW | Storage Temperature Range | -65°C to +150°C |
| | | Lead Temperature (soldering, 10sec) | +300°C |

Note 1: Signals on S₋, D₋, EN, A0, A1, or A2 exceeding V₊ or V₋ are clamped by internal diodes. Limit forward current to maximum current ratings.

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

ELECTRICAL CHARACTERISTICS—Dual Supplies

(V₊ = 15V, V₋ = -15V, GND = 0V, V_{AH} = +2.4V, V_{AL} = +0.8V, T_A = T_{MIN} to T_{MAX}, unless otherwise noted.)

ELECTRICAL CHARACTERISTICS—Single Supply

(V+ = 12V, V- = 0V, GND = 0V, VAH = +2.4V, VAL = +0.8V, TA = TMIN to TMAX, unless otherwise noted.)

| PARAMETER | SYMBOL | CONDITIONS | | MIN | TYP (Note 2) | MAX | UNITS |
|----------------------------------|----------|--|------------|-----|-----------------|-----|-------|
| SWITCH | | | | | | | |
| Analog Signal Range | VANALOG | (Note 3) | | 0 | | 12 | V |
| Drain-Source On-Resistance | rDS(ON) | IS = -1.0mA VD = 3V or 10V | TA = +25°C | | 120 | 175 | Ω |
| DYNAMIC | | | | | | | |
| Transition Time (Note 3) | tTRANS | VS1 = 8V, VS8 = 0V, VA = 0V, Figure 2 | TA = +25°C | | 115 | 450 | ns |
| Enable Turn-On Time (Note 3) | tON(EN) | VAL = 0V, VS1 = 5V, Figure 3 | TA = +25°C | | 100 | 600 | ns |
| Enable Turn-Off Time (Note 3) | tOFF(EN) | VAL = 0V, VS1 = 5V, Figure 3 | TA = +25°C | | 75 | 300 | ns |
| Charge Injection | Q | CL = 1.0nF, VS = 0V, RS = 0Ω | TA = +25°C | | 2 | | pC |

Note 2: The algebraic convention where the most negative value is a minimum and the most positive value a maximum is used in this data sheet.

Note 3: Guaranteed by design.

Note 4: $\Delta R_{ON} = R_{ON(MAX)} - R_{ON(MIN)}$. On-resistance match between channels and flatness are guaranteed only with specified voltages. Flatness is defined as the difference between the maximum and minimum value of on-resistance as measured at the extremes of the specified analog signal range.

Note 5: Leakage parameters are 100% tested at the maximum rated hot temperature and guaranteed by correlation at +25°C.

Note 6: Off isolation = $20 \log V_D/V_S$, where V_D = output and V_S = input to off switch.

| — | 10-13 | S4B-S1B | Bidirectional Analog Inputs |
| 13 | 14 | V+ | Positive Supply Voltage Input |
| 14 | 15 | GND | Ground |

Applications Information

Operation with Supply Voltages Other than 15V

Using supply voltages less than $\pm 15V$ reduces the analog signal range. The DG408/DG409 switches operate with $\pm 5V$ to $\pm 20V$ bipolar supplies or with a $+5V$ to $+40V$ single supply. Connect V- to GND when operating with a single supply. Both device types can also operate with unbalanced supplies, such as $+24V$ and $-5V$. The *Typical Operating Characteristics* graphs show typical on-resistance with 20V, 15V, 10V, and 5V supplies. (Switching times increase by a factor of two or more for operation at 5V.)

Overvoltage Protection

Proper power-supply sequencing is recommended for all CMOS devices. Do not exceed the absolute maximum ratings, because stresses beyond the listed ratings may cause permanent damage to the devices. Always sequence V+ on first, then V-, followed by the logic inputs, S or D. If power-supply sequencing is not possible, add two small signal diodes in series with supply pins for overvoltage protection (Figure 1). Adding diodes reduces the analog signal range to 1V below V+ and 1V above V-, but does not affect the devices' low switch resistance and low leakage characteristics. Device operation is unchanged, and the difference between V+ and V- should not exceed +44V.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
