

# 100-Tap Digitally Programmable Potentiometer (DPP™) with Buffered Wiper

## FEATURES

- 100-position linear taper potentiometer
- Non-volatile EEPROM wiper storage; buffered wiper
- Low power CMOS technology
- Single supply operation: 2.5V-6.0V
- Increment up/down serial interface
- Resistance values: 10kΩ, 50kΩ and 100kΩ
- Available in PDIP, SOIC, TSSOP and MSOP packages

## APPLICATIONS

- Automated product calibration
- Remote control adjustments
- Offset, gain and zero control
- Tamper-proof calibrations
- Contrast, brightness and volume controls
- Motor controls and feedback systems
- Programmable analog functions

For Ordering Information details, see page 10.

## DESCRIPTION

The CAT5111 is a single digitally programmable potentiometer (DPP™) designed as a electronic replacement for mechanical potentiometers. Ideal for automated adjustments on high volume production lines, they are also well suited for applications where equipment requiring periodic adjustment is either difficult to access or located in a hazardous or remote environment.

The CAT5111 contains a 100-tap series resistor array connected between two terminals  $R_H$  and  $R_L$ . An up/down counter and decoder that are controlled by three input pins, determines which tap is connected to the wiper,  $R_{WB}$ . The CAT5111 wiper is buffered by an op amp that operates rail to rail. The wiper setting, stored in non-volatile memory, is not lost when the device is powered down and is automatically recalled when power is returned. The wiper can be adjusted to test new system values without effecting the stored setting. Wiper-control of the CAT5111 is accomplished with three input control pins,  $\overline{CS}$ ,  $U/\overline{D}$ , and  $\overline{INC}$ . The  $\overline{INC}$  input increments the wiper in the direction which is determined by the logic state of the  $U/\overline{D}$  input. The  $\overline{CS}$  input is used to select the device and also store the wiper position prior to power down.

The digitally programmable potentiometer can be used as a buffered voltage divider. For applications where the potentiometer is used as a 2-terminal variable resistor, please refer to the CAT5113. The buffered wiper of the CAT5111 is not compatible with that application.

## FUNCTIONAL DIAGRAM

Electronic Potentiometer Implementation

## PIN CONFIGURATION

PDIP 8-Lead (L)  
 SOIC 8 Lead (V)  
 MSOP 8 Lead (Z)

TSSOP 8 Lead (Y)

## PIN DESCRIPTION

**$\overline{\text{INC}}$** : Increment Control Input

The  $\overline{\text{INC}}$  input (on the falling edge) moves the wiper in the up or down direction determined by the condition of the  $\text{U}/\overline{\text{D}}$  input.

**$\text{U}/\overline{\text{D}}$** : Up/Down Control Input

The  $\text{U}/\overline{\text{D}}$  input controls the direction of the wiper movement. When in a high state and  $\overline{\text{CS}}$  is low, any high-to-low transition on  $\overline{\text{INC}}$  will cause the wiper to move one increment toward the  $\text{R}_\text{H}$  terminal. When in a low state and  $\overline{\text{CS}}$  is low, any high-to-low transition on  $\overline{\text{INC}}$  will cause the wiper to move one increment towards the  $\text{R}_\text{L}$  terminal.

**$\text{R}_\text{H}$** : High End Potentiometer Terminal

$\text{R}_\text{H}$  is the high end terminal of the potentiometer. It is not required that this terminal be connected to a potential greater than the  $\text{R}_\text{L}$  terminal. Voltage applied to the  $\text{R}_\text{H}$  terminal cannot exceed the supply voltage,  $\text{V}_\text{CC}$  or go below ground, GND.

**$\text{R}_\text{WB}$** : Wiper Potentiometer Terminal (Buffered)

$\text{R}_\text{WB}$  is the buffered wiper terminal of the potentiometer. Its position on the resistor array is controlled by the control inputs,  $\overline{\text{INC}}$ ,  $\text{U}/\overline{\text{D}}$  and  $\overline{\text{CS}}$ .

**$\text{R}_\text{L}$** : Low End Potentiometer Terminal

$\text{R}_\text{L}$  is the low end terminal of the potentiometer. It is not required that this terminal be connected to a potential less than the  $\text{R}_\text{H}$  terminal. Voltage applied to the  $\text{R}_\text{L}$  terminal cannot exceed the supply voltage,  $\text{V}_\text{CC}$  or go below ground, GND.  $\text{R}_\text{L}$  and  $\text{R}_\text{H}$  are electrically interchangeable.

**$\overline{\text{CS}}$** : Chip Select

The chip select input is used to activate the control input of the CAT5111 and is active low. When in a

## PIN DESCRIPTIONS

Name	Function
$\overline{\text{INC}}$	Increment Control
$\text{U}/\overline{\text{D}}$	Up/Down Control
$\text{R}_\text{H}$	Potentiometer High Terminal
GND	Ground
$\text{R}_\text{WB}$	Buffered Wiper Terminal
$\text{R}_\text{L}$	Potentiometer Low Terminal
$\overline{\text{CS}}$	Chip Select
$\text{V}_\text{CC}$	Supply Voltage

high state, activity on the  $\overline{\text{INC}}$  and  $\text{U}/\overline{\text{D}}$  inputs will not affect or change the position of the wiper.

## DEVICE OPERATION

The CAT5111 operates like a digitally controlled potentiometer with  $\text{R}_\text{H}$  and  $\text{R}_\text{L}$  equivalent to the high and low terminals and  $\text{R}_\text{WB}$  equivalent to the mechanical potentiometer's wiper. There are 100 available tap positions including the resistor end points,  $\text{R}_\text{H}$  and  $\text{R}_\text{L}$ . There are 99 resistor elements connected in series between the  $\text{R}_\text{H}$  and  $\text{R}_\text{L}$  terminals. The wiper terminal is connected to one of the 100 taps and controlled by three inputs,  $\overline{\text{INC}}$ ,  $\text{U}/\overline{\text{D}}$  and  $\overline{\text{CS}}$ . These inputs control a seven-bit up/down counter whose output is decoded to select the wiper position. The selected wiper position can be stored in nonvolatile memory using the  $\overline{\text{INC}}$  and  $\overline{\text{CS}}$  inputs.

With  $\overline{\text{CS}}$  set LOW the CAT5111 is selected and will respond to the  $\text{U}/\overline{\text{D}}$  and  $\overline{\text{INC}}$  inputs. HIGH to LOW transitions on  $\overline{\text{INC}}$  will increment or decrement the wiper (depending on the state of the  $\text{U}/\overline{\text{D}}$  input and seven-bit counter). The wiper, when at either fixed terminal, acts like its mechanical equivalent and does not move beyond the last position. The value of the counter is stored in nonvolatile memory whenever  $\overline{\text{CS}}$  transitions HIGH while the  $\overline{\text{INC}}$  input is also HIGH. When the CAT5111 is powered-down, the last stored wiper counter position is maintained in the nonvolatile memory. When power is restored, the contents of the memory are recalled and the counter is set to the value stored.

With  $\overline{\text{INC}}$  set low, the CAT5111 may be de-selected and powered down without storing the current wiper position in nonvolatile memory. This allows the system to always power up to a preset value stored in nonvolatile memory.

**OPERATION MODES**

$\overline{INC}$	$\overline{CS}$	$U/\overline{D}$	Operation
High to Low	Low	High	Wiper toward $R_H$
High to Low	Low	Low	Wiper toward $R_L$
High	Low to High	X	Store Wiper Position
Low	Low to High	X	No Store, Return to Standby
X	High	X	Standby

**ABSOLUTE MAXIMUM RATINGS<sup>(1)</sup>**

Parameters	Ratings	Units
Supply Voltage $V_{CC}$ to GND	-0.5 to +7V	V
Inputs		
$\overline{CS}$ to GND	-0.5 to $V_{CC} + 0.5$	V
$\overline{INC}$ to GND	-0.5 to $V_{CC} + 0.5$	V
$U/\overline{D}$ to GND	-0.5 to $V_{CC} + 0.5$	V
$R_H$ to GND	-0.5 to $V_{CC} + 0.5$	V
$R_L$ to GND	-0.5 to $V_{CC} + 0.5$	V
$R_{WB}$ to GND	-0.5 to $V_{CC} + 0.5$	V

Parameters	Ratings	Units
Operating Ambient Temperature		
Commercial ('C' or Blank suffix)	0 to 70	°C
Industrial ('I' suffix)	-40 to +85	°C
Junction Temperature	+150	°C
Storage Temperature	-65 to 150	°C
Lead Soldering (10s max)	+300	°C

**RELIABILITY CHARACTERISTICS**

Symbol	Parameter	Test Method	Min	Typ	Max	Units
$V_{ZAP}^{(2)}$	ESD Susceptibility	MIL-STD-883, Test Method 3015	2000			V
$I_{LTH}^{(2)(3)}$	Latch-Up	JEDEC Standard 17	100			mA
$T_{DR}$	Data Retention	MIL-STD-883, Test Method 1008	100			Years
$N_{END}$	Endurance	MIL-STD-883, Test Method 1003	1,000,000			Stores

**DC ELECTRICAL CHARACTERISTICS**

$V_{CC} = +2.5V$  to  $+6V$  unless otherwise specified

**Power Supply**

Symbol	Parameter	Conditions	Min	Typ	Max	Units
$V_{CC}$	Operating Voltage Range		2.5	–	6	V
$I_{CC1}$	Supply Current (Increment)	$V_{CC} = 6V, f = 1MHz, I_W = 0$	–	–	200	$\mu A$
		$V_{CC} = 6V, f = 250kHz, I_W = 0$	–	–	100	$\mu A$
$I_{CC2}$	Supply Current (Write)	Programming, $V_{CC} = 6V$	–	–	1000	$\mu A$
		$V_{CC} = 3V$	–	–	500	$\mu A$
$I_{SB1}^{(3)}$	Supply Current (Standby)	$\overline{CS} = V_{CC} - 0.3V$ $U/\overline{D}, \overline{INC} = V_{CC} - 0.3V$ or GND	–	75	150	$\mu A$

**Notes:**

- (1) Stresses above those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions outside of those listed in the operational sections of this specification is not implied. Exposure to any absolute maximum rating for extended periods may affect device performance and reliability.
- (2) This parameter is tested initially and after a design or process change that affects the parameter.
- (3) Latch-up protection is provided for stresses up to 100mA on address and data pins from -1V to  $V_{CC} + 1V$
- (4)  $I_W$  = source or sink
- (5) These parameters are periodically sampled and are not 100% tested.

### Logic Inputs

Symbol	Parameter	Conditions	Min	Typ	Max	Units
$I_{IH}$	Input Leakage Current	$V_{IN} = V_{CC}$	–	–	10	$\mu A$
$I_{IL}$	Input Leakage Current	$V_{IN} = 0V$	–	–	-10	$\mu A$
$V_{IH1}$	TTL High Level Input Voltage	$4.5V \leq V_{CC} \leq 5.5V$	2	–	$V_{CC}$	V
$V_{IL1}$	TTL Low Level Input Voltage		0	–	0.8	V
$V_{IH2}$	CMOS High Level Input Voltage	$2.5V \leq V_{CC} \leq 6V$	$V_{CC} \times 0.7$	–	$V_{CC} + 0.3$	V
$V_{IL2}$	CMOS Low Level Input Voltage		-0.3	–	$V_{CC} \times 0.2$	V

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
