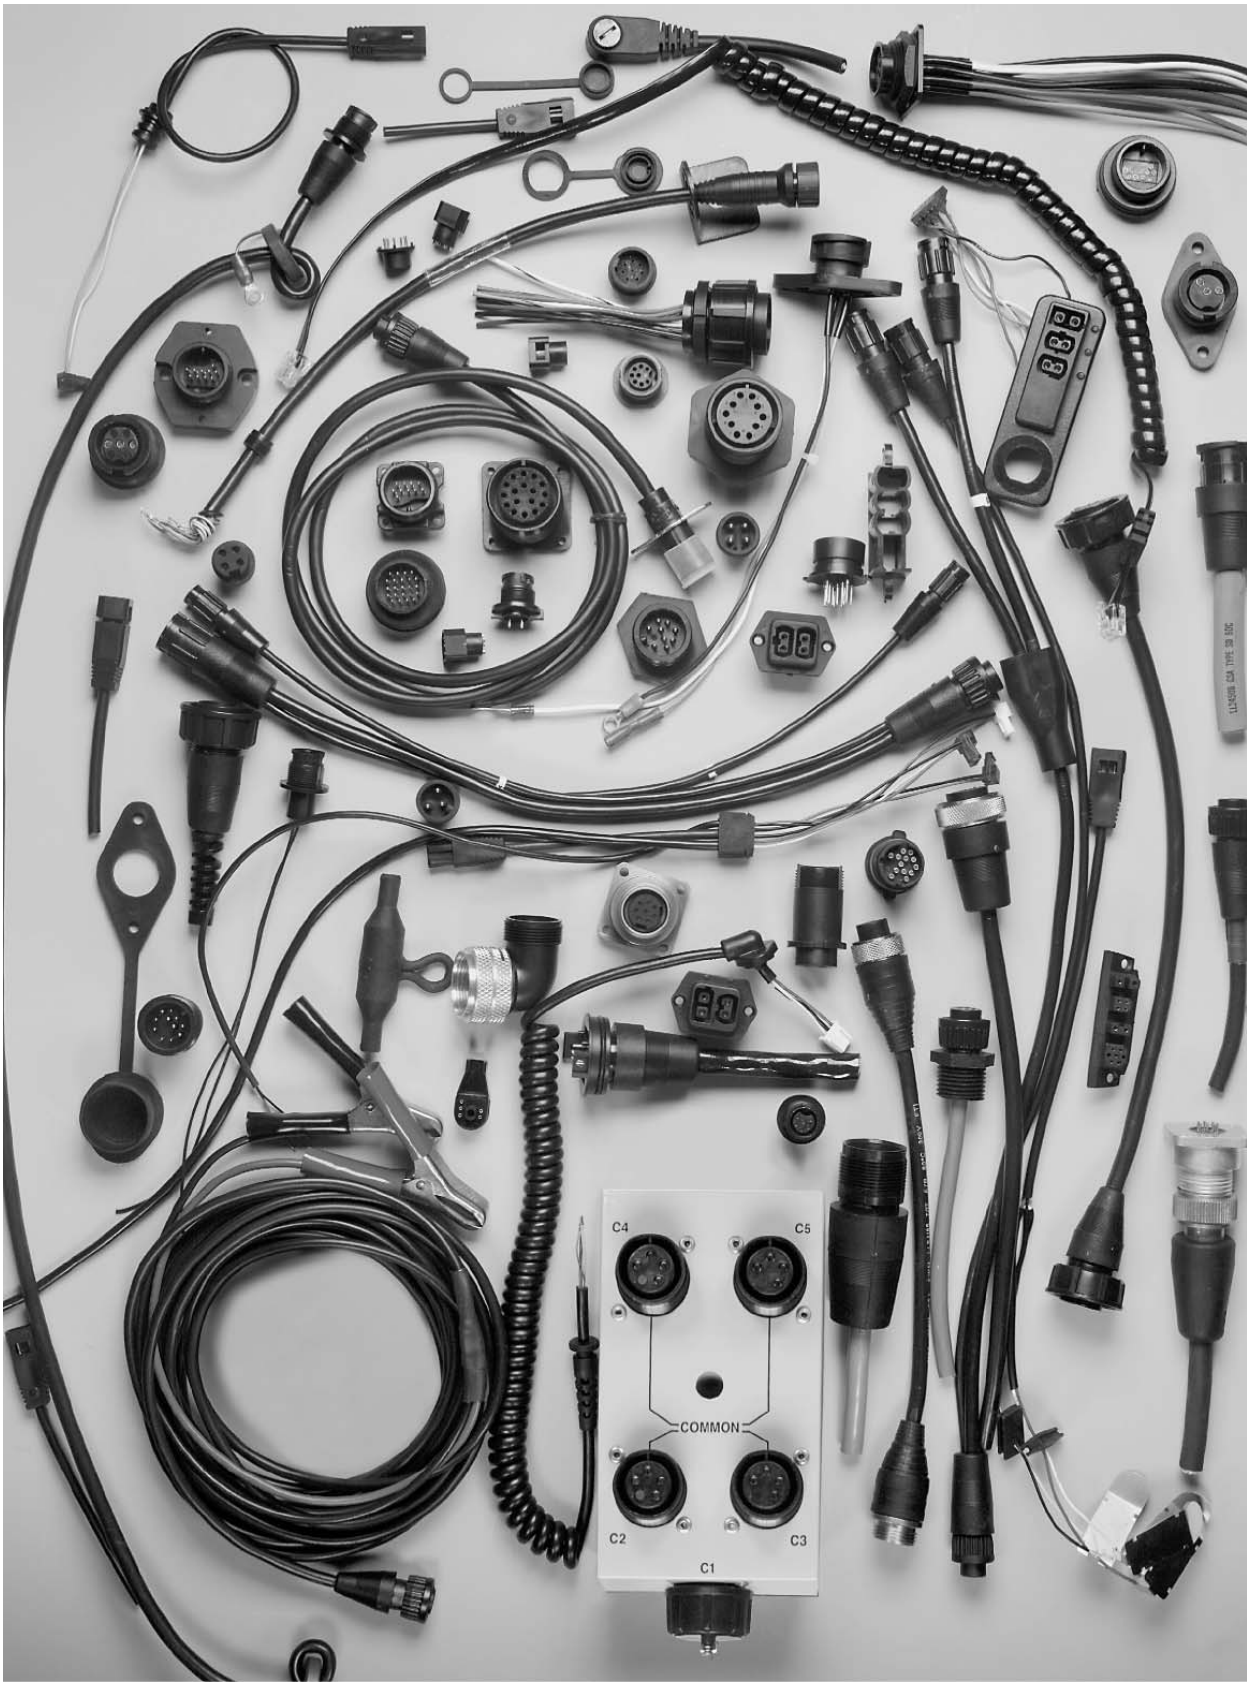
# Custom Molded Cable Assemblies and Connectors



# Custom Molded Cable Assemblies and Connectors

## Conxall History

Conxall was founded in 1971 as a manufacturer of custom designed connectors and cable assemblies for the Marine and Industrial Markets. Since that time our custom designed products have become the standard for many other industries and Conxall's family of products has grown to include waterproof, watertight and submersible connectors and assemblies. In recent years, Conxall has expanded its all plastic product lines to include metal shell, shielded connectors and cable assemblies designed to meet or exceed U.S., Canadian, and European shielding standards.

## Connectors

Conxall was an innovator in the design of all plastic cylindrical connectors. The all plastic connector provides for substantial savings in cost without sacrificing performance and quality. The all plastic connector is corrosion resistant, non-conductive and withstands substantial abuse, hostile environments, and heavy impacts that would otherwise cause metal connectors to corrode, deform or become electrically conductive and thus become unusable or unsafe. Our standard lines of all plastic connectors covers a wide range of shell styles and insert configurations including the all plastic Mil-C-5015 Connector series which is intermateable with, and provides a high quality replacement for, expensive, all metal, military standard connectors.

## Assembly Capabilities

Conxall has specialized in custom molded cable assemblies and connectors for a wide variety of applications including: Industrial, Automotive, Marine, Transportation, Medical, Communication, Sensor and Factory Automation. The Conxall exclusive molded cable assembly process affords the additional advantages of reduced cost and weather tight reliability plus the added benefits of permanent and service free termination without the risk of cable pull out. Our SENSOR-LINK, Mini, Micro, and Nano style connectors and cable assemblies are NEMA rated, available in shielded and standard styles and are UL and CSA certified for many applications. For additional information on SENSOR-LINK products please contact your Conxall Representative.

## Custom Designs

Conxall remains dedicated to providing High Quality, Low Cost solutions to your interconnect problems. Our Service Teams will work with you from the initial design to the finished product to insure your complete satisfaction. We offer a full line of standard and weather tight connectors. But perhaps your needs are unique. If so, Conxall has the capability to create original designs to meet your needs. Our team of engineers and research and development personnel will work side by side with your staff to custom design a solution for your needs.

Contact Conxall for your Interconnection Solutions. Our quick response and personalized service set Conxall apart from any other company in the industry.

# Standard Connector Products

## Low-cost Standard and Weathertight Connectors for Industrial and Marine Applications.

A completely indoor/outdoor connector system that offers performance and reliability features of MIL-Spec connectors at the cost of a commercial type product.

**Economical**…The all molded nylon construction provides for substantial savings in cost that helps hold the line on cost objectives without sacrificing performance.

### Standard Assemblies

Ideally satisfies power connections for test instruments, calibration or measuring equipment, communications systems, data processing, entertainment devices and a wide range of non-environmental applications where economy and maintenance-free reliability are essential. Especially suited to laboratory instruments, medical analysis devices, automotive test equipment, computer peripherals, recording instruments, etc.…

**Style**…Designed for demanding service although attractive and modern in appearance to complement the most sophisticated equipment.

**Lightweight/Strong**…50% weight savings over similar metal construction yet has tough, high-impact strength to withstand hard abuse both indoors and outdoors.

### Weathertight Assemblies

Optional panel connector gaskets and interfacial "O" ring seals maintain a weathertight connection for outdoor use. The non-corrosive, high impact, all molded construction is perfect for recreational, agricultural or on/off the road vehicle connections. Hazards of electrical shock are minimized in addition to resistance to hostile outdoor environment. Frequently specified for depth sounders, metal detectors, marine/aircraft electronics, boat trailers, electronic farm implements, food processing equipment, etc.

## Molded Cable Assemblies (See pages 3 & 26)

## Complete Facilities to Assemble and/or Mold All Connector Styles to Many Cable Constructions

**Permanently Molded**...Cable and connectors are molded together in a choice of attractive boot shapes to add functional improvements to your product.

**Accident Proof**...Molded encapsulation between cable and connector prevents pull-out or breakage of internal wires for maintenance free operation.

**Weathertight**...This construction prevents ingress of moisture into contact areas.

**Saves Time and Money**...Avoids setting up new production line and training personnel plus cost of maintaining inventories.

# Standard Connector Features

**Panel Connector** mounts from behind in round or "D" shaped hole and are securely fastened with hex nut on the front of the panel. Standard assembly include weathertight gasket.

**Premium Quality** The standard screw-machine socket contact has premium design features at low cost. The closed entry prevents probe damage or accidental loss of spring retention due to misaligned or bent pins.

**Reverse Contact Options** are available providing pin or socket contacts in all styles.

**Locking Type** coupling ring prevents accidental disconnect. Quick 90 degree connect/disconnect rotation or threaded.

**Cable Splices** and/or extension cables can be easily made using the cable to cable connectors.

**Unassembled Cable Connectors** without mold-on cables are available. This option provides for field installation or replacement service on existing cable assemblies.

**Dimensions and Specifications** are for reference only and may change without notice where it does not affect form, fit or function.

**Electrical Rating Tables** are for reference only and are based on continuous current carrying capacity of the connector with all contacts carrying current.

## Packaging and Warranty

### Packaging

| | |
|---|---|
| Connectors: | Standard Con-X series components are packaged unassembled and individually bulk packed. Kitted packaging, one complete connector per bag, available upon request for an additional cost. Mil-E-Qual components are assembled and individually kitted in plastic bags. |
| Cable Assemblies: | Assemblies less than 3 ft., including connector head, are bundled and boxed. Assemblies over 3 ft., including connector head, are coiled, secured with cable tie and boxed. |

### Warranty

CONXALL Corp. manufactures the finest quality product available to the marketplace. However, these products are intended to be used in accordance with the specifications described in this catalog. Any use or application that deviates from the stated operating specifications is not recommended and **may be unsafe**. A limited warranty applies to all CONXALL Corp. products. Except for obligations specifically assumed by CONXALL Corp. under warranty, CONXALL Corp. will not be liable for any loss, damage, cost of repairs, incidental or consequential damages of any kind whether or not based upon expressed or implied warranty, contract, negligence, or strict liability arising in connection with the design, manufacture, sale, use or repair of the products.

# MICRO-CON-X® FIELD INSTALLABLE CONNECTORS

## Specifications

### Typical Specifications

| | |
|---|---|
| Manufacturers Identifications | Micro-Con-X® |
| Description | Field Installable Connector & Custom Cable Assemblies |
| Rating | 3.0 thru 7.5A, 600V |
| Conductor Size | 20 thru 24 AWG |
| Configuration | 2 & 3 #20 Contacts |
| Certification | UL Recognized File #E150822 - 250V |
| | CSA Certified File #181200 - 600V |

### Material Specifications

| | |
|---|---|
| **Cable Pin/Socket** | |
| Backshell (Non-Removable Snap Lock) | Nylon, UL Recognized, Black |
| Grommet | Santoprene Rubber, Black |
| Coupling Ring | Nylon, UL Recognized, Black |
| Contacts | Brass, Gold over Nickel |
| Connector Body | Nylon, UL Recognized, Black |
| O-Ring | Neoprene Rubber, Black |
| **Cable to Cable** | |
| Backshell (Non-Removable Snap Lock) | Nylon, UL Recognized, Black |
| Grommet | Santoprene Rubber, Black |
| Contacts | Brass, Gold over Nickel |
| Connector Body | Nylon, UL Recognized, Black |
| **Panel Mount** | |
| Contacts | Brass, Gold over Nickel |
| Panel Body | Nylon, UL Recognized, Black |
| Gasket | Neoprene Rubber, Black |
| Hex Nut | Nylon, UL Recognized, Black |
| **Optional** | |
| Dust Cap | Santoprene Rubber, Black (Part No. 16295) |

Gasket, O-Ring, & Grommet materials are suitable for -40ºC to +90ºC (-40ºF to +194ºF). Consult factory for higher temperature requirements.

### Mechanical Specifications

| | |
|---|---|
| Durability | Minimum 300 mate/unmate cycles without mechanical or electrical failure |
| Vibration | Coupling rings have overriding locking feature to prevent loosening or separation of connector |
| Hex Nut Torque | All series hex nut to withstand 10-12 inch/lb tightening torque. |

### Electrical Specifications

| | |
|---|---|
| Voltage | 600 V |
| Current | See Electrical Current Rating Chart (Page 27) |

### Environmental Specifications

| | |
|---|---|
| Temperature Rating | -40ºC to +115ºC (-40ºF to +239°F) |
| Corrosion | 300 Hr salt spray contacts |
| Weathertight | Consult factory with specific application |

### Molded Cable Assemblies

| | |
|---|---|

**Connector Type:**
**13** - Cable End
**14** - Panel Mount
**15** - Cable to Cable

**Contact Size:**
**1** - #12 (7 Contacts)
**2** - #20 (18 & 20 Contacts)
**3** - #16 (10 Contacts)

**Contact Style:**
**80** - Crimp (Supplied loose)
**81** - P/C Tail .187" (4.7) (Supplied assembled)
**82** - Solder Cup (Supplied assembled)
**91** - P/C Tail .280" (7.1) (Supplied assembled)*
**92** - P/C Tail .335" (8.5) (Supplied assembled)*

**Number of Contacts:**
**7, 10, 18** & **20**

**Type of Contact:**
**P** - Pin
**S** - Socket

**Contact Plating:**
**G** - Gold over Nickel (Standard)

**Grommet Code – Cable O.D. Range:**
Back Shell Style 3
**21** - .21 - .25 (5.3-6.3)
**26** - .26 - .30 (6.6-7.6)
**31** - .31 - .38 (7.8-9.6)

**Back Shell Style:**
**3** Mechanical screw-down cable clamp with grommet seal and (1) interfacial "O" ring for cable end.

**300** - Panel mount with hex nut & gasket.
**3ES** - 300 with Epoxy

**EMI/RFI shielded assemblies available - consult factory.**
*Available in #20 size contact only.
**Consult factory for optional threaded coupling.**
**Consult factory for your custom design cable assemblies and connectors. (See pages 3 & 26)**

# CON-X MOLDED CABLE ASSEMBLY CHECK LIST

Company Name: _____ Customer Name: _____

Address: _____

City _____ State: _____ Zip: _____

Phone: _____ Fax: _____

Website: _____ E-mail: _____

Annual Usage Quantity: _____ Monthly Usage Quantity: _____

Does the assembly need to be RoHS compliant? Yes: _____ No: _____

Cable Vendor and Part Number (if available):_____

Cable Outer Jacket - Color: _____ Material:_____ OD: _____

Number of Conductors: _____ Conductor AWG: _____ Stranding: _____

Conductor Colors: _____

Is there a drain wire? _____ Is the drain wire terminated? _____

*If the drain wire is terminated, be sure to indicate where on pin-out diagram.

Is the cable shielded? _____ How? Foil _____ Braid _____ %

*If the shield is braided, be sure to indicate where on the pin-out diagram.

Will the Customer supply the cable for production? _____

Cable Cut Length: _____ Overall Assembly Length: _____

Does the Cable Assembly have Environmental Requirements? _____

If yes, please list them: _____

Must overmold have a moisture bond to the cable's outer jacket? _____

Is the Cable Assembly: Single ended: _____ Double Ended: _____

Do the connectors need to be shielded? _____

If yes, do they need to be: 180º shield: _____ OR Shield thru pin: _____

End "A" Connector Part Number: _____ Right Angle? _____

End "B", will that end need processing? _____ If yes, indicate below: _____

Outer jacket strip length: _____ Inner Conductor strip length: _____ Tinned? _____

Does end "B" have any special inclusions? If yes, please list them: _____

_____

_____

Note: Please submit a diagram of the color code pin-out, showing which conductors are wired to which pin position. Be sure to show drain and shield terminations, if needed. Indicate empty pins or spaces to be molded closed where required. If a drawing assembly is available, please send it also.

| **Optional** | |
| Connector Cap | Nylon, UL Recognized, Black with UV Inhibitor (4XX96) |
| O-Ring | Neoprene Rubber, Black |
| Different Keyways Available | |
| Gold Contacts | Brass, Gold over Nickel |
| **Box Receptacle** | |
| Contacts | Brass, Standard Silver Plated, Gold Plated Optional |
| Receptacle Body | Nylon, UL Recognized, Black with UV Inhibitor |
| **Optional** | |
| Receptacle Cap | Nylon, UL Recognized, Black with UV Inhibitor (4XX95) |
| Gasket | Neoprene Rubber, Black |
| Gold Contacts | Brass, Gold over Nickel |
| Extended Bosses | |
| Different Keyways Available | |
| | Gasket, O-Ring, & Grommet materials are suitable for -40ºC to +90ºC (-40ºF to +194ºF). Consult factory for higher temperature requirements. |

### Electrical Specifications

| | |
|---|---|
| Voltage | 500 V |
| Current | See Electrical Current Rating Chart (Page 34) |

### Environmental Specifications

| | |
|---|---|
| Temperature Rating | -40ºC to +125ºC (-40ºF to +257ºF) |
| Corrosion | 48 Hr salt spray contacts |
| Durability | 300 mate/unmate cycles minimum |
| Weathertight | Consult factory with specific application |

### Molded Cable Assemblies

| | |
|---|---|
| | (See Pages 3 & 33) |
| Watertight | NEMA 6P, 13: IEC IP67 |

# MIL-E-QUAL® Molded Cable Assembly Check List Equivalent to MIL-C-5015

Company Name: _____ Customer Name: _____

Address: _____

City _____ State: _____ Zip: _____

Phone: _____ Fax: _____

Website: _____ E-mail: _____

Annual Usage Quantity: _____ Monthly Usage Quantity: _____

Does the assembly need to be RoHS compliant? Yes: _____ No: _____

Cable Vendor and Part Number (if available): _____

Cable Outer Jacket - Color: _____ Material: _____ OD: _____

Number of Conductors: _____ Conductor AWG: _____ Stranding: _____

Conductor Colors: _____

Is there a drain wire? _____ Is the drain wire terminated? _____

*If the drain wire is terminated, be sure to indicate where on pin-out diagram.

Is the cable shielded? _____ How? Foil _____ Braid _____ % ___

*If the braid is terminated, be sure to indicate where on the pin-out diagram.

Will the Customer supply the cable for production? _____

Cable Cut Length: _____ Overall Assembly Length: _____

Does the Cable Assembly have Environmental Requirements? _____

If yes, please list them: _____

Must overmold have a moisture bond to the cable's outer jacket? _____

Is the Cable Assembly: Single ended: _____ Double Ended: _____

Do the connectors need to be shielded? _____

If yes, do they need to be: 180º shield: _____ OR Shield thru pin: _____

End "A" Connector Part Number: _____ Right Angle? _____

End "B" Connector Part Number: _____ Right Angle? _____

If no conductor on end "B", will that need processing? _____ If yes, indicate below:

Outer jacket strip length: _____ Inner Conductor strip length: _____ Tinned? _____

Does end "B" have any special inclusions? If yes, please list them: _____

Note: Please submit a diagram of the color code pin-out, showing which conductors are wired to which pin position. Be sure to show drain and shield terminations, if needed. Indicate empty pins or spaces to be molded closed where required. If a drawing assembly is available, please send it also.

## Contact Insertion/Removal Tools

| Con-X Series | Connector Size | Contact Size | Insertion Bits Pins or Sockets | Handle for Bits |
|---|---|---|---|---|
| | 2-7 contacts | #12 .093" (2.4) | 356-12 | 356-1 |
| | 2-10 contacts | #16 .062" (1.6) | 356-16 | 356-1 |
| | 2-31 contacts | #20 .040" (1) | 356-20 | 356-1 |

| MIL-E-QUAL Series | Connector Size | Contact Size | Insertion Bits Pins or Sockets | Handle for Bits |
|---|---|---|---|---|
| All Mil-E-Qual Connector Sizes | | #12 .093" (2.4) | 356-12 | 356-1 |
| | | #16 .062" (1.6) | 356-16 | 356-1 |

Product not designed to remove contacts after insertion. Consult factory for removal tools.

## Manual Contact Crimping Tools

| Con-X Series | Contact Size | Handle for Tool | Description | Contact Positioners for Tools |
|---|---|---|---|---|
| | #12, #16, & #20 | 359-24 | Multi Contact Tool | 357-124 |
| | #20 Only | 359-21 | Single Purpose Tool | 357-122 |

| MIL-E-QUAL Series | Contact Size | Handle for Tool | Description | Contact Positioners for Tools |
|---|---|---|---|---|
| | #12 .093" (2.4) | 359-24 | Hand Crimp Tool | 358-112 |
| | #16 .062" (1.6) | 359-24 | Hand Crimp Tool | 358-112 |

## Pneumatic Crimping Tools - Consult Factory

### Contact Crimping and Assembly Procedures:

A. Push cable through connector components, i.e. backshell, grommet, sleeve, and coupling ring.

B. Wire preparation: Strip cable to dimensions shown. Make all cuts square and sharp being careful not to nick wires when cutting. To prevent stranded wires from fraying it is recommended that ends be tightly twisted and not solder dipped.

### Conductor Strip Lengths

| CON-X | MIL-E-QUAL |
|---|---|
| #20 -3/16<br>#16 -7/32<br>#12 -7/32 | #16 -9/32<br>#12 -7/32 |

Cable Stripping

C. Contact crimping tools, use as follows:

- ☐ Assemble contact locator to tool.
- ☐ Check tool setting for wire gage to be crimped.
- ☐ Drop contacts, mating end first into locator so that it rests fully on bottom. Insert stripped lead into contact barrel until it stops.
- ☐ Close tool handles completely in one stroke. (The ratchet will not release jaws until tool has completed cycle.)
- ☐ Inspect crimp to be sure there are no loose strands outside the contact which may short out to an adjacent contact.

D. Contact insertion tools. Place wired contact into proper connectors cavity. Guide tip of the insertion tool so that it starts at the contact and slides down against the stop. Apply a steady force perpendicular to the contact until it snaps into position.

# NOTES

# OCEAN CHIPS
## Океан Электроники
## Поставка электронных компонентов

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «**JONHON**», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «**FORSTAR**».

AVIC JONHON

**«JONHON»** (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

**«FORSTAR»** (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
