

## Features

- Available in a variety of pin-out configurations
- Virtually infinite electrical circuit isolation
- Metal or plastic shaft options
- RoHS compliant\*

## Model 91, 92, 93, 94 & 95 - 5/8 " Square Single-Turn Panel Control

| Initial Electrical Characteristics <sup>1</sup>                                   | Conductive Plastic Element                     | Cermet Element                        |
|-----------------------------------------------------------------------------------|------------------------------------------------|---------------------------------------|
| Standard Resistance Range                                                         |                                                |                                       |
| Linear Tapers (A, B, E, & H).....                                                 | (B & E) 1 K ohms to 1 megohm.....              | (A & H) 100 ohms to 1 megohm          |
| Audio Tapers (C, D, F, G, S, & T).....                                            | (D, G, S, & T) 1 K ohms to 1 megohm.....       | (C & F) 1 K ohms to 1 megohm          |
| Total Resistance Tolerance.....                                                   | 10 % or 20 %.....                              | 5% or 10%                             |
| Independent Linearity.....                                                        | ±5 %.....                                      | ±5 %                                  |
| Absolute Minimum Resistance.....                                                  | 2 ohms maximum.....                            | 2 ohms maximum                        |
| Effective Electrical Angle.....                                                   | (Linear tapers) 240 ° ± 5 °.....               | (Linear tapers) 240 ° ± 6 °           |
|                                                                                   | (Audio tapers) 225 ° ± 5 °.....                | (Audio tapers) 225 ° ± 6 °            |
| Contact Resistance Variation.....                                                 | ±1 %.....                                      | ±1 % or 3 ohms (whichever is greater) |
| Dielectric Withstanding Voltage (MIL-STD-202, Method 301)                         |                                                |                                       |
| Sea Level.....                                                                    | 1,500 VAC minimum.....                         | 1,500 VAC minimum                     |
| 70,000 Feet.....                                                                  | 500 VAC minimum.....                           | 500 VAC minimum                       |
| Insulation Resistance (500 VDC).....                                              | 1,000 megohms minimum.....                     | 1,000 megohms minimum                 |
| Power Rating (Voltage Limited By Power Dissipation or 350 VAC, Whichever Is Less) |                                                |                                       |
| +70 °C Single Section Assembly.....                                               | (Linear tapers) 1 watt.....                    | (Linear tapers) 2 watts               |
|                                                                                   | (Audio tapers) 0.5 watt.....                   | (Audio tapers) 1 watt                 |
| +70 °C Multiple Section Assembly.....                                             | (Linear tapers) 0.5 watt/section.....          | (Linear tapers) 1 watt/section        |
|                                                                                   | (Audio tapers) 0.25 watt/section.....          | (Audio tapers) 0.5 watt/section       |
| +125 °C.....                                                                      | 0 watt.....                                    | 0 watt                                |
| Theoretical Resolution.....                                                       | Essentially infinite.....                      | Essentially infinite                  |
| Environmental Characteristics <sup>1</sup>                                        |                                                |                                       |
| Operating Temperature Range.....                                                  | -40 °C to +125 °C.....                         | -40 °C to +125 °C                     |
| Storage Temperature Range.....                                                    | -55 °C to +125 °C.....                         | -55 °C to +125 °C                     |
| Temperature Coefficient Over Storage                                              |                                                |                                       |
| Temperature Range.....                                                            | ±1,000 ppm/°C.....                             | ±150 ppm/°C                           |
| Vibration (Single Section).....                                                   |                                                |                                       |
| Total Resistance Shift.....                                                       | ±2 % maximum.....                              | ±2 % maximum                          |
| Voltage Ratio Shift.....                                                          | ±5 % maximum.....                              | ±5 % maximum                          |
| Shock (Single Section).....                                                       |                                                |                                       |
| Total Resistance Shift.....                                                       | ±2 % maximum.....                              | ±2 % maximum                          |
| Voltage Ratio Shift.....                                                          | ±5 % maximum.....                              | ±5 % maximum                          |
| Load Life.....                                                                    |                                                |                                       |
| Total Resistance Shift.....                                                       | ±10 % maximum.....                             | ±5 % maximum                          |
| Rotational Life (No Load).....                                                    | 100,000 cycles.....                            | 100,000 cycles                        |
| Total Resistance Shift.....                                                       | (Linear tapers) 10 ohms or ±15 % TRS max. .... | (All tapers) ±5 % TRS max.            |
|                                                                                   | (whichever is greater)                         |                                       |
|                                                                                   | (Audio tapers) ±20 % maximum                   |                                       |
| Contact Resistance Variation                                                      |                                                |                                       |
| @ 50,000 cycles.....                                                              | (Linear tapers) ±2 %.....                      | ±2 %                                  |
|                                                                                   | (Audio tapers) ±3 %.....                       | ±3 %                                  |
| Moisture Resistance (MIL-STD-202, Method 103, Condition B)                        |                                                |                                       |
| Total Resistance Shift.....                                                       | (Linear tapers) ±10 % TRS maximum.....         | (All tapers) ±5 % TRS maximum         |
|                                                                                   | (Audio tapers) ±20 % TRS maximum               |                                       |
| Insulation Resistance (500 VDC).....                                              | 100 megohms minimum.....                       | 100 megohms minimum                   |
| IP Rating.....                                                                    | IP 40.....                                     | IP 40                                 |

| Mounting .....                                 | 1.7-2.0 N-m (15-18 lb.-in.) maximum                                                                            |
| Variation.....                                 | 0.35 N-cm (0.5 oz.-in.) maximum in 45 ° shaft travel                                                           |
| Weight (Single Section, Metal Bushing).....    | 12.7 grams nominal                                                                                             |
| (Each Additional Section) .....                | 4 grams nominal                                                                                                |
| Terminals .....                                | Printed circuit terminals, J-Hooks or solder lugs                                                              |
| Soldering Condition .....                      | Recommended hand soldering using Sn95/Ag5 no clean solder, 0.025 " wire diameter.                              |
|                                                | Maximum temperature 399 °C (750 °F) for 3 seconds. No wash process to be used with no clean flux.              |
| Marking .....                                  | Manufacturer's trademark, date code, resistance, manufacturer's part number                                    |
| Ganging (Multiple Section Potentiometers)..... | 2 cups maximum                                                                                                 |
| Hardware.....                                  | One lockwasher and one mounting nut is shipped with each potentiometer, except where noted in the part number. |

NOTE: Performance specifications do not apply to units subjected to printed circuit board cleaning procedures.

<sup>1</sup>At room ambient: +25 °C nominal and 50 % relative humidity nominal, except as noted.

# How to Order Model 91, 92, 93, 94 & 95 Panel Controls

**BOURNS®**

91 A 2 A - A 28 - A 15 / A15 L

Part number for multiple section potentiometers must have a taper and resistance value for each section.

**ANTI-ROTATION LUG**

|   |                                 |
|---|---------------------------------|
| A | Single .305" (7.8 mm) R, 90 °CW |
| D | No Lug                          |

**# SECTIONS**

|   |        |
|---|--------|
| 1 | Single |
| 2 | Dual   |

**BUSHING**

|   |                                                 |
|---|-------------------------------------------------|
| A | Metal Plain 3/8" (9.53 mm) D x 3/8" (9.53 mm) L |
| C | Metal Plain 1/4" (6.35 mm) D x 1/4" (6.35 mm) L |
| R | Metal Plain 10 mm D x 9 mm L                    |
| U | Metal Plain 7 mm D x 9 mm L                     |

**MODEL**

|    |                                           |
|----|-------------------------------------------|
| 91 | Single-Turn, In-Line PC Pins              |
| 92 | Single-Turn, In-Line J-Hooks              |
| 93 | Single-Turn, L-Pattern PC Pins            |
| 94 | Single-Turn, L-Pattern J-Hooks            |
| 95 | Single-Turn, Triangle-Pattern Solder Lugs |

**SHAFT LENGTH (FMS)**

| Code | Description | AVAILABLE ONLY IN BUSHING Code |
|------|-------------|--------------------------------|
| 16   | 1/2" L      | A, C                           |
| 20   | 5/8" L      | A, C                           |
| 24   | 3/4" L      | A, C                           |
| 28   | 7/8" L      | A                              |
| 32   | 1" L        | A                              |

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,  
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
