## GENERAL CHARACTERISTICS

### Main features

- Shell material
  - Aluminium alloy
  - Marine bronze
  - For composite, please consult us
- Finish
  - Olive drab cadmium plating
  - Electroless nickel plating
  - For others, please consult us
- 9 shell sizes per model
- Straight or right angled versions
- Working temperature
  - From - 65°C to + 175°C with olive drab cadmium plating
  - From - 65°C to + 200°C with electroless nickel plating
- French standard qualification capability (UTE 93422)

For specific backshells for marine applications and 217 backshells, please consult us.

### Description

You will find hereafter Amphenol Socapex backshells for LJT (MIL-DTL-38999 series I / HE308), RNJ (HE308), RNJ LP, TV-CTV (MIL-DTL-38999 series III), SC39 and SJT (VG96912) connectors, as well as specific light weight backshells for JT (MIL-DTL-38999 series II) connectors. These rear accessories enhance the performance capabilities of the connectors for both general duty and severe environment applications.

Different technologies are used in order to ensure the following functions:

- EMI shielding
- cable retention
- sealing

This large choice of rear accessories provides you with the right solution for your connector/backshell interconnection.

## Applications

Military and aeronautic applications: battlefields, ground vehicles, aircrafts.

Advanced industrial applications with specific climatic, mechanical or electrical requirements.

# BACKSHELLS

## BACKSHELLS FOR SHIELDING

These backshells, providing an electrical continuity between cable and connector, ensure a high level of EMI/RFI protection. The sealing is ensured by straight or right angled heat shrink moulded piece at the rear of the backshell.

### NSA and SA backshells

**LJT NSA (HE308-13)** suitable for LJT (MIL-DTL-38999 series I / HE308), RNJ (HE308) and SJT (VG96912) connectors.

**JT SA** suitable for JT (MIL-DTL-38999 series II) connectors.

**TV NSA** suitable for TV-CTV (MIL-DTL-38999 series III), SC39 and RNJ LP connectors.

NSA and SA backshells ensure the shielding by clamping the braid with a screwing system. The free inner ring avoids twisting of the braid during screwing. For straight or right angled heat shrink moulded pieces, please refer to page 17-18.

## ASSEMBLY INSTRUCTIONS FOR NSA and SA backsells

1. Prepare the cable for termination process and slide onto the cable the items in the order shown on figure 1.
2. Screw the backshell at the rear of the connector.
3. Fold back the braid on the outer jacket and fix it (figure 2)
4. Install the braid as shown on figures 3 and 4: Release the braid and cover the backshell (a) and the connector's shell. Slide the first ring (b) over the braid. Fold back the braid on the ring (b) and slide the second ring (c) over the braid and the first ring (b). Screw the last ring (d) at the rear of the backshell. If necessary, fix the extra braid on the outer jacket of the cable. If this installation (double folding of the braid) is not possible, refer to figure 5: Slide the first ring (b). Release the braid and cover the backshell (a) and the connector's shell. Cut the braid as shown. Slide the second ring (c) over the braid and the first ring (b). Screw the last ring at the rear of the backshell.
5. Install the heat-shrink moulded piece.

# BACKSHELLS

## BACKSHELLS FOR SHIELDING

### SQ backshells

LJT SQ suitable for SJT (VG96912) connectors.

SQ backshells ensure the shielding by clamping the braid with a screwing system. For straight or right angled heat shrink moulded pieces, please refer to page 17-18.

### ASSEMBLY INSTRUCTIONS FOR SQ backshells

1. Prepare the cable for termination process.
2. Screw the backshell at the rear of the connector.
3. Install the braid as shown on figure 1: Release the braid and cover the backshell conus. Maintain the braid on the conus with a small diameter wire in the groove. Fold back the braid on itself and cut it as shown. Screw the ring over the braid without twisting it.
4. Install the heat-shrink moulded piece.

Figure 1

For ordering information, please refer to page 18

## BACKSHELLS FOR SHIELDING

### NSB backshells

LJT NSB suitable for LJT (MIL-DTL-38999 series I / HE308), RNJ (HE308) and SJT (VG96912) connectors.

NSB backshells ensure the shielding by a tinned rear part to allow soldering of the braid. For straight or right angled heat shrink moulded pieces, please refer to page 17-18.

\* max permissible cable outside diameter  
\*\* dimension over the flats (4 flats)

### NSB backshells

1. Prepare the cable for termination process.
2. Screw the backshell at the rear of the connector.
3. If possible, protect the conductors with an insulating tube or tape (e) inserted between them and the backshell.
4. Install the braid as shown of figure 1.
5. Install the heat-shrink moulded piece.

Figure 2

Figure 3

For ordering information, please refer to page 18

# BACKSHELLS

## BAND BACKSHELLS FOR SHIELDING

These band backsells provide a full 360° shield termination. They are available with different cabling chamber lengths and exit diameters. The use of replaceable bands facilitates future maintenance or reparability. The sealing is ensured by straight or right angled heat shrink moulded piece at the rear of the backshell.

### HE308-35 and TV35 backsells

**HE308-35** suitable for LJT (MIL-DTL-38999 series I / HE308), RNJ (HE308) and SJT (VG96912) connectors.

**TV35** suitable for TV-CTV (MIL-DTL-38999 series III), SC39 and RNJ LP connectors.

**TVB35** suitable for TV bronze connectors.

These straight band backsells provide a full 360° shield termination with a quick, easy and cost effective cabling process. For straight or right angled heat shrink moulded pieces, please refer to page 17-18.

## BAND BACKSHELLS FOR SHIELDING

### SBC backshells

**LJT SBC** suitable for LJT (MIL-DTL-38999 series I / HE308), RNJ (HE308) and SJT (VG96912) connectors.

**TV SBC** suitable for TV-CTV (MIL-DTL-38999 series III), SC39 and RNJ LP connectors.

These right angled band backshells provide a full 360° shield termination with a quick, easy and cost effective cabling process. For straight heat shrink moulded pieces, please refer to page 17-18.

## ■ ■ ■ BAND BACKSHELLS FOR SHIELDING

### ASSEMBLY INSTRUCTIONS FOR HE308-35, TV35 and SBC backshells

1. Prepare the cable for termination process (figure 1).
2. Screw the backshell at the rear of the connector.
3. Push the braid over the backshell to the incline point. Milk the braid as required to remove the slack and insure a snug fit around the shield termination area (figure 2).
4. Prepare the band: Roll the band through the buckle slot twice (the band must be double-coiled). Pull on the band until the mark is within approximately 6.4 mm (.250 in) of the buckle slot (figure 3). The band may be tightened further if desired.
5. Squeeze the gripper release lever of the banding tool and insert the band into the front end opening of the tool as shown on figure 4 (the circular portion of looped band must always face downward).
6. Aligning the band and the tool with the shield termination area, squeeze the black pull-up handle repeatedly using short strokes until it locks against the tool body (this indicates the band is compressed to the tool precalibrated tension).
7. Complete the clamping process by squeezing the grey cut-off handle.
8. Remove the excess band from the tool.
9. Inspect shield termination (figure 5). If the alignment of the band and the shield is unsatisfactory, tension on the band can be relaxed by pushing on the slotted release lever on the top of the tool. Make adjustments as necessary and squeeze again the black pull-up handle.

## ■ ■ ■ BAND BACKSHELLS FOR SHIELDING

### HE 308 military designation – Backshells for HE 308 (LJT / MIL-DTL-38999 series I / RNJ) connectors

Series	HE308	-35	-11	-10	-08	-7	M
<b>Type of backshell</b>	35: band backshell accepting heat shrink moulded piece						
<b>Size of backshell</b>	09-11-13-15-17-19-21-23-25 (same as connector size)						
<b>Cabling chamber length</b>	10-20-25-30						
<i>Refer to page 9 – Dimension F (mm)</i>							
<b>Rear side diameter</b>	Refer to page 9 – Dimension Z (1/32 of inch)						
<b>Finish</b>	7: olive-drab cadmium plating 6: electroless nickel plating						
<b>Military standard</b>							

Note: Dashes are required in the P/N

### Amphenol designation - Backshells for LJT (MIL-DTL-38999 series I / HE308), RNJ (HE308) and SJT (VG96912) connectors

Series	LJT	SBC	11	08	014
<b>Type of backshell</b>	SBC: aluminium right angled band backshell accepting heat shrink moulded piece				
<b>Size of backshell</b>	09-11-13-15-17-19-21-23-25 (same as connector size)				
<b>Rear side diameter</b>	Refer to page 10 – Dimension Z (1/32 of inch)				
<b>Finish</b>	014: olive-drab cadmium plating 023: electroless nickel plating				

## TOOLING & ACCESSORIES

### Coupling tool

Coupling wrench for HE308-35 and TV(B) 35 backshells: **116.50** (Facom p/n)

### Clamping bands

Standard band: **072952**

Micro band (precoiled): **895693**

### Hand banding tools

Banding tool for standard band: **809952**

Banding tool for micro band: **809953**

Caution: Tools and bands should never be lubricated

## Integrated backshells

Suitable for LJT (MIL-DTL-38999 series I / HE308), JT (MIL-DTL-38999 series II), TV (MIL-DTL-38999 series III), SC39 and SJT (VG96912) connectors.

Available on plugs and receptacles, these 2 in 1 connectors/band backshells provide a high EMI protection with a quick, easy and cost effective cabling process. They are low profile, with enhance sealing level and allow the use of macro and micro bands, as well as straight or right angled heat shrink moulded pieces. The design of the shells make them compatible with over moulding process.

Do not hesitate to consult us.

## STRAIN RELIEFS

These backshells ensure a mechanical retention of the cable.

### SRD backshells

JT SRD suitable for JT (MIL-DTL-38999 series II) connectors.

# BACKSHELLS

## HOW TO ORDER

### Amphenol designation - Backshells for LJT (MIL-DTL-38999 series I / HE308), RNJ (HE308) and SJT\* (VG96912) connectors

Series	LJT	NSA	11	014	-
<b>Type of backshell</b>					
<b>NSA:</b> screened clamping braid backshell accepting heat shrink moulded piece					
<b>SQ:</b> simple screened clamping braid backshell accepting heat shrink moulded piece					
<b>NSB:</b> screened soldering braid backshell accepting heat shrink moulded piece					
<b>NSD:</b> backshell for heat shrink moulded piece					
<b>RPD:</b> straight backshell for potting					
<b>RPC:</b> 75° angled backshell for potting					
<b>Size of backshell</b> 09-11-13-15-17-19-21-23-25					
<i>for LJT connectors: same as connector size</i>					
<i>for SJT (G)06 and 00 connectors: greater than the connector size by 1</i>					
<i>for SJT07 sizes 8 to 22 connectors: greater than the connector size by 3</i>					
<i>Consult us for SJT07 size 24 connector</i>					
<b>Finish</b>					
<b>014:</b> olive-drab cadmium plating					
<b>023:</b> electroless nickel plating					
<b>Deviation</b>					
<b>F428:</b> backshells for SJT* connectors only					

\* : for NSA, NSB, NSD, SQ only

### Amphenol designation – Backshells for TV-CTV (MIL-DTL-38999 series III), SC39 and RNJ LP connectors

Series	TV	NSA	11	014
<b>Type of backshell</b>				
<b>NSA:</b> screened clamping braid backshell accepting heat shrink moulded piece				
<b>NSD:</b> backshell for heat shrink moulded piece				
<b>Size of backshell</b> 09-11-13-15-17-19-21-23-25 (same as connector size)				
<b>Finish</b>				
<b>014:</b> olive-drab cadmium plating				
<b>023:</b> electroless nickel plating				

### HE 308 military designation – Backshells for HE 308 (LJT / MIL-DTL-38999 series I / RNJ) connectors

Series	HE 308	13	15	7	M
<b>Type of backshell</b>					
<b>13:</b> screened clamping braid backshell accepting heat shrink moulded piece					
<b>14:</b> backshell for heat shrink moulded piece					
<b>15:</b> straight backshell for potting					
<b>Size of backshell</b> 09-11-13-15-17-19-21-23-25 (same as connector size)					
<b>Finish</b>					
<b>7:</b> olive-drab cadmium plating					
<b>6:</b> electroless nickel plating					
<b>Military standard</b>					

### Amphenol designation – Backshells for JT (MIL-DTL-38999 series II) connectors

Series	JT	SA	12	014
<b>Type of backshell</b>				
<b>SA:</b> screened clamping braid backshell accepting heat shrink moulded piece				
<b>SRD :</b> straight cable clamp				
<b>RPD:</b> straight backshell for potting				
<b>RPC:</b> 75° angled backshell for potting				
<b>Size of backshell</b> 08-10-12-14-16-18-20-22-24 (same as connector size)				
<b>Finish</b>				
<b>014:</b> olive-drab cadmium plating				
<b>023:</b> electroless nickel plating				

## TORQUES VALUES FOR REAR ACCESSORIES

According to the MIL-C-85049 standard

For LJT / RNJ / HE308 / MIL-DTL-38999 I connectors		For JT / MIL-DTL-38999 II connectors		For TV-CTV / MIL-DTL-38999 III connectors			For SJT / VG96912 connectors	
Shell size	Max torque value (N.m)	Shell size	Max torque value (N.m)	Shell size	Metal Max torque value (N.m)	Composite Max torque value (N.m)	Shell size	Max torque value (N.m)
09	5.0	08	5.0	09	7.2	5.0	08	5.0

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
