TOSHIBA CMOS Linear Integrated Circuit Silicon Monolithic

TCK304G

28 V, Single input – Single Output Load Switch IC with Over Voltage Protection

The TCK304G is 28 V high input voltage Single Inputs-Single Output load switch ICs. It has Over Voltage

Protection function featuring low switch ON resistance, high output current and wide input voltage operation. Switch ON resistance is only 73 m Ω at 4.5 V, - 1.0 A load conditions. And these feature a slew rate control driver, thermal shutdown and Flag function. Also it can block reverse current if switch turned off. Output current is available up to 3 A. Thus this is suitable for power management such as Battery Charge application.

This device is available in 0.5mm pitch ultra small package WCSP9 (1.5 mm x 1.5 mm, t: 0.5 mm (Typ.)). Thus this devices is ideal for portable applications that require high-density board assembly such as cellular phone.

Weight: 3.5 mg (Typ.)

Feature

- High input voltage: V_{IN} (Max) = 28 V
- High output current: I_{OUT} (DC) = 3.0 A
- Low ON resistance : $R_{ON} = 73 \text{ m}\Omega$ (Typ.) at $V_{IN} = 4.5 \text{ V}$, $I_{OUT} = -1.0 \text{ A}$
- Over Voltage Lockout : 6.6 V (Typ.)
- Under Voltage Lockout: 2.9 V (Typ.)
- · FLAG indicates
- Internal 15ms startup hold
- · Reverse current blocking (SW OFF state)
- · Inrush current reducing circuit
- · Thermal Shutdown function
- Small package: 0.5 mm pitch WCSP9 (1.5 mm x 1.5 mm, t: 0.5 mm(Typ.)) , P_D = 1.65 W

Top marking

Start of commercial production 2015-09

Absolute Maximum Ratings (Ta = 25°C)

Characteristics	Symbol	Rating			Unit			
Input voltage	VIN	-0.3 to 30		-0.3 to 30		-0.3 to 30		
Control voltage	VCT, VCE		-0.3 to 6			-0.3 to 6		V
Output voltage	Vout		-0.3 to 18					
Flag voltage	VFLAG	-0.3 to 6		-0.3 to 6		V		
Output current	lout	DC	3.0		^			
		Pulse	4.0	(Note 1)	Α			
Power dissipation	PD	1.65 (Note 2)		W				
Operating temperature range	Topr	-40 to 85		−40 to 85		°C		
Junction temperature	Tj	150		150		150		°C
Storage temperature	T _{stg}	−55 to 150		-55 to 150		°C		

Note: Using continuously under heavy loads (e.g. the application of high temperature/current/voltage and the significant change in temperature, etc.) may cause this product to decrease in the reliability significantly even if the operating conditions (i.e. operating temperature/current/voltage, etc.) are within the absolute maximum ratings. Please design the appropriate reliability upon reviewing the Toshiba Semiconductor Reliability Handbook ("Handling Precautions"/"Derating Concept and Methods") and individual reliability data (i.e. reliability test report and estimated failure rate, etc).

Note1: 1 ms pulse, 1% duty cycle

Note2: Rating at mounting on a board: FR4 board. ($40 \text{ mm} \times 40 \text{ mm} \times 1.6 \text{ mm}$, Cu 4 layer)

Pin Assignment (Top view/Bottom bump)

С	V _{IN}	GND	V _{OUT}

Product list

Part number	Over voltage lockout	CE function	VCT function	VCT resistance
TCK304G	6.6 V (Typ.)	Active High	Active Low	Pull down

Please ask your local retailer about the devices with other OVLO, logic function and pull down resistance.

Block Diagram

PIN Description

PIN	Name	Description
A1	FLAG	Open drain acknowledge signal output. When input voltage is in regular range (V_{UVL} < V_{IN} < V_{OVL}), Q_2 turn ON. FLAG output turn to be high impedance in irregular input voltage range, \overline{CE} Low state and thermal shutdown operation.
A2	V _{CT}	Switch Control function. It is internally connected to GND (Pull down).
A3	CE	Chip Enable function. It is internally connected to GND(Pull down)
B1, C1	V _{IN}	Input. It has Over Voltage Lock Out (OVLO) and Under Voltage Lock Out function (UVLO).
B2, C2	GND	Ground
B3, C3	V _{OUT}	Output

Operation Logic Table

TCK304G

		CE "Low"	CE " High"
	Q₁ (Main Switch)	OFF	OFF
V _{CT} "HIGH"	Q₂ (FLAG out)	OFF	ON (When $V_{UVL} < V_{IN} < V_{OVL}$), OFF (When $V_{UVL} > V_{IN}$, or $V_{IN} > V_{OVL}$), OFF (Thermal shut down = active)
	Reverse current block	Active	Active
	Q ₁ (Main Switch)	OFF	ON
V _{CT} "LOW"	Q₂ (FLAG out)	OFF	ON (When V _{UVL} < V _{IN} < V _{OVL}), OFF (When V _{UVL} > V _{IN} , or V _{IN} > V _{OVL}), OFF (Thermal shut down = active)
	Reverse current block	Active	Disable

Application Note

1. Application circuit example (top view)

1) Input and Output capacitor

An input capacitor (C_{IN}) and an output capacitor (C_{OUT}) are necessary for the stable operation of TCK304G. And it is effective to reduce voltage overshoot or undershoot due to sharp changes in output current and also for improved stability of the power supply. When used, place C_{IN} and C_{OUT} more than $1.0\mu F$ as close to V_{IN} pin to improve stability of the power supply.

2) Control pin

Control pins for TCK304G is operated by the control voltage and Schmitt trigger. It can be used even if the control voltage is higher than the input voltage.

2. Reverse current blocking

Reverse current blocking (SW OFF state) function is designed in this product. This function is active at output n-ch MOSEFT turned off.

However these does not assure for the suppression of uprising device operation. In use of these products, please read through and understand dissipation idea for absolute maximum ratings from the above mention or our 'Semiconductor Reliability Handbook'. Then use these products under absolute maximum ratings in any condition. Furthermore, Toshiba recommend inserting failsafe system into the design.

3. Thermal shut down function

Thermal shutdown function is designed in these products, but these does not assure for the suppression of uprising device operation. In use of these products, please read through and understand dissipation idea for absolute maximum ratings from the above mention or our 'Semiconductor Reliability Handbook'. Then use these products under absolute maximum ratings in any condition. Furthermore, Toshiba recommend inserting failsafe system into the design.

4. Power Dissipation

Board-mounted power dissipation ratings for TCK304G are available in the Absolute Maximum Ratings table.

Power dissipation is measured on the board condition shown below.

[The Board Condition]

Board material: Glass epoxy (FR4)

Board dimension: 40 mm x 40 mm (Cu 4 layer)

Please allow sufficient margin when designing a board pattern to fit the expected power dissipation. Also take into consideration the ambient temperature, input voltage, output current etc and applying the appropriate derating for allowable power dissipation during operation.

Representative Typical Characteristics

1) ON resistance

2) Quiescent current

RESTRICTIONS ON PRODUCT USE

- Toshiba Corporation, and its subsidiaries and affiliates (collectively "TOSHIBA"), reserve the right to make changes to the information in this document, and related hardware, software and systems (collectively "Product") without notice.
- This document and any information herein may not be reproduced without prior written permission from TOSHIBA. Even with TOSHIBA's written permission, reproduction is permissible only if reproduction is without alteration/omission.
- Though TOSHIBA works continually to improve Product's quality and reliability, Product can malfunction or fail. Customers are responsible for complying with safety standards and for providing adequate designs and safeguards for their hardware, software and systems which minimize risk and avoid situations in which a malfunction or failure of Product could cause loss of human life, bodily injury or damage to property, including data loss or corruption. Before customers use the Product, create designs including the Product, or incorporate the Product into their own applications, customers must also refer to and comply with (a) the latest versions of all relevant TOSHIBA information, including without limitation, this document, the specifications, the data sheets and application notes for Product and the precautions and conditions set forth in the "TOSHIBA Semiconductor Reliability Handbook" and (b) the instructions for the application with which the Product will be used with or for. Customers are solely responsible for all aspects of their own product design or applications, including but not limited to (a) determining the appropriateness of the use of this Product in such design or applications; (b) evaluating and determining the applicability of any information contained in this document, or in charts, diagrams, programs, algorithms, sample application circuits, or any other referenced documents; and (c) validating all operating parameters for such designs and applications. TOSHIBA ASSUMES NO LIABILITY FOR CUSTOMERS' PRODUCT DESIGN OR APPLICATIONS.
- PRODUCT IS NEITHER INTENDED NOR WARRANTED FOR USE IN EQUIPMENTS OR SYSTEMS THAT REQUIRE
 EXTRAORDINARILY HIGH LEVELS OF QUALITY AND/OR RELIABILITY, AND/OR A MALFUNCTION OR FAILURE OF WHICH
 MAY CAUSE LOSS OF HUMAN LIFE, BODILY INJURY, SERIOUS PROPERTY DAMAGE AND/OR SERIOUS PUBLIC IMPACT
 ("UNINTENDED USE"). Except for specific applications as expressly stated in this document, Unintended Use includes, without
 limitation, equipment used in nuclear facilities, equipment used in the aerospace industry, medical equipment, equipment used for
 automobiles, trains, ships and other transportation, traffic signaling equipment, equipment used to control combustions or explosions,
 safety devices, elevators and escalators, devices related to electric power, and equipment used in finance-related fields. IF YOU USE
 PRODUCT FOR UNINTENDED USE, TOSHIBA ASSUMES NO LIABILITY FOR PRODUCT. For details, please contact your
 TOSHIBA sales representative.
- · Do not disassemble, analyze, reverse-engineer, alter, modify, translate or copy Product, whether in whole or in part.
- Product shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable laws or regulations.
- The information contained herein is presented only as guidance for Product use. No responsibility is assumed by TOSHIBA for any infringement of patents or any other intellectual property rights of third parties that may result from the use of Product. No license to any intellectual property right is granted by this document, whether express or implied, by estoppel or otherwise.
- ABSENT A WRITTEN SIGNED AGREEMENT, EXCEPT AS PROVIDED IN THE RELEVANT TERMS AND CONDITIONS OF SALE
 FOR PRODUCT, AND TO THE MAXIMUM EXTENT ALLOWABLE BY LAW, TOSHIBA (1) ASSUMES NO LIABILITY
 WHATSOEVER, INCLUDING WITHOUT LIMITATION, INDIRECT, CONSEQUENTIAL, SPECIAL, OR INCIDENTAL DAMAGES OR
 LOSS, INCLUDING WITHOUT LIMITATION, LOSS OF PROFITS, LOSS OF OPPORTUNITIES, BUSINESS INTERRUPTION AND
 LOSS OF DATA, AND (2) DISCLAIMS ANY AND ALL EXPRESS OR IMPLIED WARRANTIES AND CONDITIONS RELATED TO
 SALE, USE OF PRODUCT, OR INFORMATION, INCLUDING WARRANTIES OR CONDITIONS OF MERCHANTABILITY, FITNESS
 FOR A PARTICULAR PURPOSE, ACCURACY OF INFORMATION, OR NONINFRINGEMENT.
- Do not use or otherwise make available Product or related software or technology for any military purposes, including without limitation, for the design, development, use, stockpiling or manufacturing of nuclear, chemical, or biological weapons or missile technology products (mass destruction weapons). Product and related software and technology may be controlled under the applicable export laws and regulations including, without limitation, the Japanese Foreign Exchange and Foreign Trade Law and the U.S. Export Administration Regulations. Export and re-export of Product or related software or technology are strictly prohibited except in compliance with all applicable export laws and regulations.
- Please contact your TOSHIBA sales representative for details as to environmental matters such as the RoHS compatibility of Product.
 Please use Product in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. TOSHIBA ASSUMES NO LIABILITY FOR DAMAGES OR LOSSES
 OCCURRING AS A RESULT OF NONCOMPLIANCE WITH APPLICABLE LAWS AND REGULATIONS.

Toshiba:
TCK304G,LF

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«**FORSTAR**» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
