

# 16-Channel, Low Harmonic Distortion, High Voltage Analog Switch with Bleed Resistors

## Features

- ▶ Low harmonic distortion
- ▶ Integrated bleed resistors on the outputs
- ▶ 3.3 or 5.5V CMOS input logic level
- ▶ 20MHz data shift clock frequency
- ▶ HVCMOS technology for high performance
- ▶ Very low quiescent power dissipation ( $\sim 10\mu\text{A}$ )
- ▶ Low parasitic capacitance
- ▶ DC to 50MHz small signal frequency response
- ▶ CMOS logic circuitry for low power
- ▶ Excellent noise immunity
- ▶ Cascadable serial data register with latches
- ▶ Flexible operating supply voltages

## Applications

- ▶ Medical ultrasound imaging
- ▶ NDT metal flaw detection
- ▶ Piezoelectric transducer drivers
- ▶ Optical MEMS modules

## General Description

The Supertex HV2733 is a low charge injection, 16-channel, low harmonic distortion, high voltage analog switch integrated circuit (IC) intended for use in applications requiring high voltage switching, controlled by low voltage control signals, such as medical ultrasound imaging, piezoelectric transducer drivers, and printers. The bleed resistors eliminate voltage built up on capacitive loads such as piezoelectric transducers.

The outputs are configured as single-pole double-throw analog switches. Data are shifted into a 8-bit shift register using an external clock. The  $\overline{\text{LE}}$  latches the shift register data into the individual switch latches. A logic high connects a switch common YX to SWX. A logic low connects YX to  $\overline{\text{SWX}}$ . A logic high in CLR resets all switches to  $\overline{\text{SWX}}$  simultaneously.

To reduce any possible clock feed-through noise, the latch enable bar ( $\overline{\text{LE}}$ ) should be left high until all bits are clocked in. Data are clocked in during the rising edge of the clock. Using HVCMOS technology, this device combines high voltage bilateral DMOS switches and low power CMOS logic to provide efficient control of high voltage analog signals.

## Block Diagram

## Ordering Information

Device	Package Option
	<b>48-Lead LQFP</b> 7.00x7.00mm body 1.60mm height (max) 0.50mm pitch
HV2733	HV2733FG-G

-G indicates package is RoHS compliant ('Green')

## Absolute Maximum Ratings

Parameter	Value
V <sub>DD</sub> logic supply	-0.5V to +7.0V
V <sub>PP</sub> - V <sub>NN</sub> differential supply	220V
V <sub>PP</sub> positive supply	-0.5V to +200V
V <sub>NN</sub> negative supply	+0.5V to -200V
Logic input voltage	-0.5V to V <sub>DD</sub> +0.3V
V <sub>SIG</sub> analog signal range	V <sub>NN</sub> to V <sub>PP</sub>
Peak analog signal current/channel	2.5A
Storage temperature	-65°C to 150°C
Power dissipation, 48-Lead LQFP	1.0W

Absolute Maximum Ratings are those values beyond which damage to the device may occur. Functional operation under these conditions is not implied. Continuous operation of the device at the absolute rating level may affect device reliability. All voltages are referenced to device ground.

## Recommended Operating Conditions

Sym	Parameter	Value
V <sub>DD</sub>	Logic power supply voltage	3.0V to 5.5V
V <sub>PP</sub>	Positive high voltage supply	+40V to V <sub>NN</sub> +200V
V <sub>NN</sub>	Negative high voltage supply	-40V to -160V
V <sub>IH</sub>	High level input voltage	0.9V <sub>DD</sub> to V <sub>DD</sub>
V <sub>IL</sub>	Low level input voltage	0V to 0.1V <sub>DD</sub>
V <sub>SIG</sub>	Analog signal voltage peak-to-peak	V <sub>NN</sub> +10V to V <sub>PP</sub> -10V
T <sub>A</sub>	Operating free air temperature	0°C to 70°C

### Notes:

- Power up/down sequence is arbitrary except GND must be powered-up first and powered-down last.
- V<sub>SIG</sub> must be within V<sub>NN</sub> and V<sub>PP</sub> or floating during power up/down transition.
- Rise and fall times of power supplies V<sub>DD</sub>, V<sub>PP</sub> and V<sub>NN</sub> should not be less than 1.0msec.

## DC Electrical Characteristics

(over recommended operating conditions unless otherwise noted)

Sym	Parameter	0°C		+25°C			+70°C		Units	Conditions	
		Min	Max	Min	Typ	Max	Min	Max

Notes:

1. Serial data is clocked in on the L to H transition of the CLK.
2. All switches go to a state retaining their latched condition at the rising edge of  $\overline{LE}$ . When  $\overline{LE}$  is low the shift registers data flow through the latch.
3.  $D_{OUT}$  is high when data in the shift register 7 is high.
4. Shift registers clocking has no effect on the switch states if  $\overline{LE}$  is high.
5. The CLR clear input overrides all other inputs.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
