

Overview

These electrolytic capacitors contain a radial crown which allows them to be mounted in a standing position. They feature outstanding electrical performance, a polarized, all-welded design, tinned copper wire leads and a negative pole connected to the case. The winding is housed in a cylindrical aluminium can with a high purity aluminium lid and a high quality rubber gasket. Low ESR is a result of a low resistive electrolyte/paper system and an all-welded design. Thanks to its mechanical robustness, these capacitors are suitable for use in mobile and aircraft installations, with operation up to +150°C. KEMET automotive grade capacitors meet the demanding Automotive Electronics Council's AEC-Q200 qualification requirements.

Applications

The KEMET PEH126, PEH220, PEH225, and PEH226 are high performance electrolytic capacitors. They are designed for automotive applications with high demands for resistance to vibrations and high ambient temperature.

Benefits

- AEC-Q200 automotive qualified
- Up to 2,000 hours at +150°C
- Resistance to vibrations
- Resistance to high ambient temperature
- High ripple current
- Low ESR
- Polarized all-welded design
- Outstanding electrical performance
- Radial crown which allows mounting in a standing position

Part Number System

| PEH126 | H | F | 368 | E | Q | E4 |

Performance Characteristics – PEH126

| Item | Performance Characteristics | | |
|-------------------------------|---|-------------------------------|---|
| Capacitance Range | 250 – 4,000 μ F | | |
| Rated Voltage | 25 – 63 VDC | | |
| Operating Temperature | -40 to +150°C | | |
| Capacitance Tolerance | -10/+30% at 100 Hz/+20°C | | |
| Operational Lifetime | D (mm) | Rated voltage, +125°C (hours) | Rated voltage, +150°C (hours) |
| | 16 | 6,300 | 1,500 |
| | 20 | 8,400 | 2,000 |
| Shelf Life | 5,000 hours at +105°C or 10 years at +40°C 0 VDC | | |
| Leakage Current | $I = 0.003 CV + 4.0 (\mu A)$ | | |
| | C = rated capacitance (μ F), V = rated voltage (VDC). Voltage applied for 5 minutes at +20°C. | | |
| Vibration Test Specifications | Procedure | | Requirements |
| | 1.5 mm displacement amplitude or 20 g maximum acceleration. Vibration applied for three 2-hour sessions at 10 – 2,000 Hz (capacitor clamped by body). | | No leakage of electrolyte or other visible damage. Deviations in capacitance from initial measurements must not exceed: $\Delta C/C < 5\%$ |
| Standards | IEC 60384-4 long life grade 40/125/56, AEC-Q200 | | |

Performance Characteristics – PEH220

| Item | Performance Characteristics | | |
|-------------------------------|---|-------------------------------|---|
| Capacitance Range | 250 – 4,700 μ F | | |
| Rated Voltage | 25 – 63 VDC | | |
| Operating Temperature | -40 to +150°C | | |
| Capacitance Tolerance | -10/+30%, ($\pm 20\%$ select values) at 100 Hz/+20°C | | |
| Operational Lifetime | D (mm) | Rated voltage, +125°C (hours) | Rated voltage, +150°C (hours) |
| | 16 | 6,300 | 1,500 |
| | 18 and 20 | 8,400 | 2,000 |
| Shelf Life | 5,000 hours at +105°C or 10 years at +40°C 0 VDC | | |
| Leakage Current | $I = 0.003 CV + 4.0 (\mu A)$ | | |
| | C = rated capacitance (μ F), V = rated voltage (VDC). Voltage applied for 5 minutes at +20°C. | | |
| Vibration Test Specifications | Procedure | | Requirements |
| | 1.5 mm displacement amplitude or 20 g maximum acceleration. Vibration applied for three 2-hour sessions at 10 – 2,000 Hz (capacitor clamped by body). | | No leakage of electrolyte or other visible damage. Deviations in capacitance from initial measurements must not exceed: $\Delta C/C < 5\%$ |
| Standards | IEC 60384-4 long life grade 40/125/56, AEC-Q200 | | |

Performance Characteristics – PEH225

| Item | Performance Characteristics | | |
|-------------------------------|---|-------------------------------|---|
| Capacitance Range | 470 – 6,300 μ F | | |
| Rated Voltage | 25 – 63 VDC | | |
| Operating Temperature | –40 to +125°C (–40 to +150°C at derated voltage) | | |
| Capacitance Tolerance | –10/+30%, (\pm 20% select values) at 100 Hz/+20°C | | |
| Operational Lifetime | D (mm) | Rated voltage, +125°C (hours) | Rated voltage, +150°C (hours) |
| | 16 | 6,300 | 1,500 |
| | 18 and 20 | 8,400 | 2,000 |
| Shelf Life | 5,000 hours at +105°C or 10 years at +40°C 0 VDC | | |
| Leakage Current | $I = 0.003 CV + 4.0$ (μ A) | | |
| | C = rated capacitance (μ F), V = rated voltage (VDC). Voltage applied for 5 minutes at +20°C. | | |
| Vibration Test Specifications | Procedure | | Requirements |
| | 1.5 mm displacement amplitude or 20 g maximum acceleration. Vibration applied for three 2-hour sessions at 10 – 2,000 Hz (capacitor clamped by body). | | No leakage of electrolyte or other visible damage. Deviations in capacitance from initial measurements must not exceed: $\Delta C/C < 5\%$ |
| Standards | IEC 60384–4 long life grade 40/125/56, AEC–Q200 | | |

Performance Characteristics – PEH226

| Item | Performance Characteristics | | |
|-------------------------------|---|-------------------------------|---|

Compensation Factor of Ripple Current (RC) vs. Frequency

| | | | | | |
|-------------|--------|--------|-------|-------|---------|
| Frequency | 100 Hz | 300 Hz | 1 kHz | 5 kHz | 100 kHz |
| Coefficient | 0.35 | 0.57 | 0.80 | 1.00 | 1.04 |

Test Method & Performance

| Endurance Life Test | |
|------------------------------|--|
| Conditions | Performance |
| Temperature | +150°C |
| Test Duration | 1,500 hours (D = 16 mm) |
| | 2,000 hours (D = 18 and 20 mm) |
| Ripple Current | Maximum ripple current specified in table |
| Voltage | The sum of DC voltage and the peak AC voltage must not exceed the rated voltage of the capacitor |
| Performance | The following specifications will be satisfied when the capacitor is tested at +20°C: |
| Capacitance Change | Within 15% of the initial value |
| Equivalent Series Resistance | Does not exceed 200% of the initial value |
| Leakage Current | Does not exceed leakage current limit |

Ordering Options Table

| Packaging Kind | Lead Length (mm) | Lead and Packaging Code |

| L | 20.0 | 43.7 | 1.0 | 3.3 | 24 |

Shelf Life

The capacitance, ESR and impedance of a capacitor will not change significantly after extended storage periods, however, the leakage current will very slowly increase. KEMET products are particularly stable and allow a shelf life in excess of ten years at 40°C. See sectional specification under each product for specific data.

Failure Rate

Estimated field failure rate: ≤ 0.15 ppm (failures per year/produced number of capacitors per year).

The expected failure rate for this capacitor range is based on field experience for capacitors with structural similarity. As per PEG Equivalents.

Environmental Compliance

As an environmentally conscious company, KEMET is working continuously with improvements concerning the environmental effects of both our capacitors and their production. In Europe (RoHS Directive) and in some other geographical areas like China, legislation has been put in place to prevent the use of some hazardous materials, such as lead (Pb), in electronic equipment. All products in this catalog are produced to help our customers' obligations to guarantee their products and fulfill these legislative requirements. The only material of concern in our products has been lead (Pb), which has been removed from all designs to fulfill the requirement of containing less than 0.1% of lead in any homogeneous material. KEMET will closely follow any changes in legislation world wide and make any necessary changes in its products, whenever needed.

Some customer segments such as medical, military and automotive electronics may still require the use of lead in electrode coatings. To clarify the situation and distinguish products from each other, a special symbol is used on the packaging labels for RoHS compatible capacitors.

Because of customer requirements, there may appear additional markings such as lead-free (LF) or lead-free wires (LFW) on the label.

|-----------|----------------------|
| | Tray |
| F | 528 |
| G | 352 |
| M | 480 |
| N | 320 |
| V | 320 |
| H | 432 |
| J | 288 |
| L | 288 |

Marking

PEH 126, +150°C

PEH 220, +150°C, PEH 225, +125°C and +150°C, and PEH226, +150°C

Construction

PEH 126, +150°C

PEH 220, +150°C, PEH 225, +125°C and +150°C, and PEH226, +150°C

Construction Data – PEH 126, +150°C

The manufacturing process begins with the anode foil being electrochemically etched to increase the surface area and then “formed” to produce the aluminum oxide layer. Both the anode and cathode foils are then interleaved with absorbent paper and wound into a cylinder. During the winding process, aluminum tabs are attached to each foil to provide the electrical contact.

The winding is assembled to the capacitor Al-can and to the Al-lid. The can is filled with electrolyte and the winding is impregnated during a vacuum treatment. The capacitor is sealed. Throughout the process, all materials inside the housing must be maintained at the highest purity and be compatible with the electrolyte.

Each capacitor is aged and tested before being packed. The purpose of aging is to repair any damage in the oxide layer and thus reduce the leakage current to a very low level. Aging is carried out at elevated temperature and is accomplished by applying voltage to the device while carefully controlling the supply current. The process takes between 2 and 20 hours, depending on voltage rating.

Damage to the oxide layer can occur due to a variety of reasons:

- Slitting of the anode foil after forming
- Attaching the tabs to the anode foil
- Minor mechanical damage caused during winding

The following tests are applied for each individual capacitor.

Electrical:

- Leakage current
- Capacitance
- ESR
- Tan Delta

Mechanical/Visual:

- Pull strength test of wire terminals
- Print detail
- Box labels
- Packaging, including packed quantity

Construction Data – PEH 220, +150°C, PEH 225, +125°C and +150°C, and PEH226, +150°C

The manufacturing process begins with the anode foil being electrochemically etched to increase the surface area and then “formed” to produce the aluminum oxide layer. Both the anode and cathode foils are then interleaved with absorbent paper and wound into a cylinder. Disclaimer

All product specifications, statements, information and data (collectively, the "Information") in this datasheet are subject to change. The customer is responsible for checking and verifying the extent to which the Information contained in this publication is applicable to an order at the time the order is placed.

All Information given herein is believed to be accurate and reliable, but it is presented without guarantee, warranty, or responsibility of any kind, expressed or implied.

Statements of suitability for certain applications are based on KEMET Electronics Corporation's ("KEMET") knowledge of typical operating conditions for such applications, but are not intended to constitute – and KEMET specifically disclaims – any warranty concerning suitability for a specific customer application or use. The Information is intended for use only by customers who have the requisite experience and capability to determine the correct products for their application. Any technical advice inferred from this Information or otherwise provided by KEMET with reference to the use of KEMET's products is given gratis, and KEMET assumes no obligation or liability for the advice given or results obtained.

Although KEMET designs and manufactures its products to the most stringent quality and safety standards, given the current state of the art, isolated component failures may still occur. Accordingly, customer applications which require a high degree of reliability or safety should employ suitable designs or other safeguards (such as installation of protective circuitry or redundancies) in order to ensure that the failure of an electrical component does not result in a risk of personal injury or property damage.

Although all product-related warnings, cautions and notes must be observed, the customer should not assume that all safety measures are indicated or that other measures may not be required.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «**JONHON**», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «**FORSTAR**».

JONHON

«**JONHON**» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«**FORSTAR**» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
