

Helping Customers Innovate, Improve & Grow

## Description

Vectron's VCC1 Crystal Oscillator (XO) is a quartz stabilized square wave generator with a CMOS output. The VCC1 uses a fundamental or 3rd overtone crystal resulting in very low jitter performance, and a monolithic IC which improves reliability and reduces cost.

## Features

- Ultra Low Jitter, Fundamental or 3rd OT Crystal Design
- CMOS Output Crystal Oscillator
- Output Frequencies from 1.024 MHz to 190.000 MHz
- 5.0, 3.3, 2.5 or 1.8 V Operation
- Output Disable Feature
- Excellent 20ppm temperature stability
- -10/70°C, -40/85°C or -55/125°C operating temperature
- Small Industry Standard Package, 5x7mm
- Product is compliant to RoHS directive  and fully compatible with lead free assembly

## Applications

- SONET/SDH/DWDM
- Ethernet, GE, SynchE
- Storage Area Networking
- Fiber Channel
- Digital Video
- Broadband Access
- Base Stations, Picocells
- Driving A/D's, D/A's, FPGA's
- Test and Measurement
- COTS

## Block Diagram

**Table 1. Electrical Performance, 5V Option**

1] The power supply should have by-pass capacitors as close to the supply and to ground as possible, for example 0.1 and 0.01 uF

2] Parameters are tested with the test circuit shown in Figure 1.

3] See Standard Frequencies and Ordering Information tables for more specific information

4] Includes initial accuracy, operating temperature, supply voltage, shock and vibration (not under operation) and 10 years aging.

5] Duty Cycle is measured as On Time/Period, see Fig 2.

6] Broadband Period Jitter measured using a LeCroy Wavemaster 8600A, 90K samples, see Application Note for Typical Phase Noise and Jitter Performance

7] The Output is Enabled if the Enable/Disable is left open.

1] The power supply should have by-pass capacitors as close to the supply and to ground as possible, for example 0.1 and 0.01uF

2] Parameters are tested with the test circuit shown in Figure 1.

3] See Standard Frequencies and Ordering Information tables for more specific information

4] Includes initial accuracy, operating temperature, supply voltage, shock and vibration (not under operation) and 10 years aging.

5] Duty Cycle is measured as On Time/Period, see Fig 2.

6] Broadband Period Jitter measured using a LeCroy Wavemaster 8600A, 90K samples, see Application Note for Typical Phase Noise and Jitter Performance

7] The Output is Enabled if the Enable/Disable is left open.

1] The power supply should have by-pass capacitors as close to the supply and to ground as possible, for example 0.1 and 0.01uF

2] Parameters are tested with the test circuit shown in Figure 1.

3] See Standard Frequencies and Ordering Information tables for more specific information

4] Includes initial accuracy, operating temperature, supply voltage, shock and vibration (not under operation) and 10 years aging.

5] Output Frequencies > 35MHz

6] Duty Cycle is measured as On Time/Period, see Fig 2.

7] Broadband Period Jitter measured using a LeCroy Wavemaster 8600A, 90K samples, see Application Note for Typical Phase Noise and Jitter Performance

8] The Output is Enabled if the Enable/Disable is left open.

1] The power supply should have by-pass capacitors as close to the supply and to ground as possible, for example 0.1 and 0.01uF

2] Parameters are tested with the test circuit shown in Figure 1.

3] See Standard Frequencies and Ordering Information tables for more specific information

4] Includes initial accuracy, operating temperature, supply voltage, shock and vibration (not under operation) and 10 years aging.

5] Output Frequencies > 35MHz

6] Duty Cycle is measured as On Time/Period, see Fig 2.

7] Broadband Period Jitter measured using a LeCroy Wavemaster 8600A, 90K samples, see Application Note for Typical Phase Noise and Jitter Performance

8] The Output is Enabled if the Enable/Disable is left open.

Table 5. Pin Out

| Pin | Symbol   | Function                   |
|-----|----------|----------------------------|
| 1   | E/D      | Enable Disable             |
| 2   | GND      | Case and Electrical Ground |
| 3   | Output   | Output                     |
| 4   | $V_{DD}$ | Power Supply Voltage       |

Table 6. Enable Disable Function

| E/D Pin | Output         |
|---------|----------------|
| High    | Clock Output   |
| Open    | Clock Output   |
| Low     | High Impedance |

Alternate Package Design

## Reliability

Vectron qualification includes aging at various extreme temperatures, shock and vibration, temperature cycling, and IR reflow simulation. The VCC1 family is capable of meeting the following qualification tests:

**Table 7. Environmental Compliance**

| Parameter                  | Conditions                                  |
|----------------------------|---------------------------------------------|
| Mechanical Shock           | MIL-STD-883, Method 2002                    |
| Mechanical Vibration       | MIL-STD-883, Method 2007                    |
| Temperature Cycle          | MIL-STD-883, Method 1010                    |
| Solderability              | MIL-STD-883, Method 2003                    |
| Gross and Fine Leak        | MIL-STD-883, Method 1014                    |
| Resistance to Solvents     | MIL-STD-883, Method 2015                    |
| Moisture Sensitivity Level | MSL 1                                       |
| Contact Pads               | Gold (0.3 um min to 1.0 um max) over Nickel |
| Weight                     | 178 mg                                      |

Although ESD protection circuitry has been designed into the VCC1 proper precautions should be taken when handling and mounting. Vectron employs a human body model (HBM) and a charged device model (CDM) for ESD susceptibility testing and design protection evaluation.

**Table 8. ESD Ratings**

| Model                | Minimum | Conditions               |
|----------------------|---------|--------------------------|
| Human Body Model     | 1500V   | MIL-STD-883, Method 3015 |
| Charged Device Model | 1000V   | JESD22-C101              |

Stresses in excess of the absolute maximum ratings can permanently damage the device. Functional operation is not implied at these or any other conditions in excess of conditions represented in the operational sections of this datasheet. Exposure to absolute maximum ratings for extended periods may adversely affect device reliability. Permanent damage is also possible if E/D is applied before  $V_{DD}$ .

**Table 9. Absolute Maximum Ratings**

| Parameter           | Symbol   | Ratings    | Unit     |
|---------------------|----------|------------|----------|
| Storage Temperature | $T_S$    | -55 to 125 | °C       |
| Soldering Temp/Time | $T_{LS}$ | 260 / 30   | °C / sec |

# IR Reflow

The VCC1 is qualified to meet the JEDEC standard for Pb-Free assembly. The temperatures and time intervals listed are based on the Pb-Free small body requirements. The VCC1 device is hermetically sealed so an aqueous wash is not an issue.

## Solderprofile:

**Table 10. Reflow Profile**

| Parameter                        | Symbol      | Value                                     |

## Ordering Information

### VCC1- B3B- xxMxxxxxxx

**Product**

5x7 Crystal Oscillator

Frequency in MHz

**Power Supply**

A: +5.0 Vdc, 15pF  
B: +3.3 Vdc, 15pF  
C: +3.0 Vdc, 15pF  
E: +5.0 Vdc, 50pF  
F: +3.3 Vdc, 50pF  
G: +2.5 Vdc, 15pF  
H: +1.8 Vdc, 15pF

**Stability**

A: ±100ppm over -10/70°C  
B: ±50ppm over -10/70°C  
C: ±100ppm over -40/85°C  
D: ±50ppm over -40/85°C  
E: ±25ppm over -10/70°C  
F: ±25ppm over -40/85°C  
K: ±32ppm over -10/70°C  
O: ±32ppm over -40/85°C  
P: ±100ppm over -55/125°C  
R: ±50ppm over -55/125°C

**Electrical Options:****3: Tri-state 45/55% Duty Cycle**

*The following codes are not recommended for new designs*

- 0: No Tri-state, 40/60% Duty
- 1: Tri-state, 40/60% Duty
- 2: No tri-state, 45/55% Duty
- 5: Enable, 40/60% Duty
- 6: Enable, 45/55% Duty

### Example: VCC1-B3B-125M000000

*\*Note: not all combination of options are available.  
Other specifications may be available upon request.*

## 20ppm Stability Ordering Information

VCC1-105-frequency = ±20ppm over -10/70°C, +5.0Vdc, 45/55% Duty Cycle, 15pF load  
VCC1-103-frequency = ±20ppm over -10/70°C, +3.3Vdc, 45/55% Duty Cycle, 15pF load  
VCC1-118-frequency = ±20ppm over -10/70°C, +2.5Vdc, 45/55% Duty Cycle, 15pF load  
VCC1-119-frequency = ±20ppm over -10/70°C, +1.8Vdc, 45/55% Duty Cycle, 15pF load

**\* Add SNPB for tin lead solder dip**

**Example: VCC1-B3B-125M000000\_SNPB**

## Revision History

| Revision Date   | Approved | Description                                                      |
|-----------------|----------|------------------------------------------------------------------|
| August 10, 2018 | FB       | Update logo and contact information, add SNPBDIP ordering option |
| August 08, 2019 | FB       | Update logo and contact information, change to SNPB ordering     |

## Contact Information

### **USA:**

100 Watts Street  
Mt Holly Springs, PA 17065  
Tel: 1.717.486.3411  
Fax: 1.717.486.5920

### **Europe:**

Landstrasse  
74924 Neckarbischofsheim  
Germany  
Tel: +49 (0) 7268.801.0  
Fax: +49 (0) 7268.801.281

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
