

## FEATURES

- 2.1  $\Omega$  on resistance
- 0.5  $\Omega$  maximum on-resistance flatness at 25°C
- Up to 390 mA continuous current
- Fully specified at +12 V,  $\pm 15$  V,  $\pm 5$  V
- No  $V_L$  supply required
- 3 V logic-compatible inputs
- Rail-to-rail operation
- 8-lead MSOP and 8-lead, 3 mm  $\times$  2 mm LFCSP

## APPLICATIONS

- Automatic test equipment
- Data acquisition systems
- Battery-powered systems
- Relay replacements
- Sample-and-hold systems
- Audio signal routing
- Video signal routing
- Communication systems

## GENERAL DESCRIPTION

The [ADG1419](#) is a monolithic *i*CMOS® device containing a single-pole/double-throw (SPDT) switch. An EN input on the LFCSP is used to enable or disable the device. When disabled, all channels are switched off.

The industrial CMOS (*i*CMOS) modular manufacturing process combines high voltage, complementary metal-oxide semiconductor (CMOS) and bipolar technologies. It enables the development of a wide range of high performance analog ICs capable of 33 V operation in a footprint that no other generation of high voltage parts has achieved. Unlike analog ICs using conventional CMOS processes, *i*CMOS components can tolerate high supply voltages while providing increased performance, dramatically lower power consumption, and reduced package size.

The on-resistance profile is very flat over the full analog input range, ensuring excellent linearity and low distortion when switching audio signals. The *i*CMOS construction ensures ultralow power dissipation, making the part ideally suited for portable and battery-powered instruments.

## FUNCTIONAL BLOCK DIAGRAMS

SWITCHES SHOWN FOR A LOGIC 0 INPUT.

Figure 1. 8-Lead LFCSP (CP-8-4)

SWITCHES SHOWN FOR A LOGIC 0 INPUT.

Figure 2. 8-Lead MSOP (RM-8)

Each switch conducts equally well in both directions when on and has an input signal range that extends to the supplies. In the off condition, signal levels up to the supplies are blocked. The [ADG1419](#) exhibits break-before-make switching action for use in multiplexer applications.

## PRODUCT HIGHLIGHTS

1. 2.4  $\Omega$  maximum on resistance at 25°C.
2. Minimum distortion.
3. 3 V logic-compatible digital inputs:  $V_{INH} = 2.0$  V,  $V_{INL} = 0.8$  V.
4. No  $V_L$  logic power supply required.
5. 8-lead MSOP and 8-lead, 3 mm  $\times$  2 mm LFCSP.

## ABSOLUTE MAXIMUM RATINGS

$T_A = 25^\circ\text{C}$ , unless otherwise noted.

Table 5.

Parameter	Rating
$V_{DD}$ to $V_{SS}$	35 V
$V_{DD}$ to GND	-0.3 V to +25 V
$V_{SS}$ to GND	+0.3 V to -25 V
Analog Inputs <sup>1</sup>	$V_{SS} - 0.3\text{ V}$ to $V_{DD} + 0.3\text{ V}$ or 30 mA, whichever occurs first
Digital Inputs <sup>1</sup>	GND - 0.3 V to $V_{DD} + 0.3\text{ V}$ or 30 mA, whichever occurs first
Peak Current, S or D (Pulsed at 1 ms, 10% Duty-Cycle Maximum)	
8-Lead MSOP (4-Layer Board)	400 mA
8-Lead LFCSP	600 mA
Continuous Current per Channel, S or D	Data in Table 4 + 15% mA
Operating Temperature Range	
Industrial	-40°C to +125°C
Storage Temperature Range	-65°C to +150°C
Junction Temperature	150°C
Reflow Soldering Peak Temperature, Pb Free	260°C

<sup>1</sup> Over voltages at IN, S, or D are clamped by internal diodes. Current should be limited to the maximum ratings given.

Stresses at or above those listed under Absolute Maximum Ratings may cause permanent damage to the product. This is a stress rating only; functional operation of the product at these or any other conditions above those indicated in the operational section of this specification is not implied. Operation beyond the maximum operating conditions for extended periods may affect product reliability.

## THERMAL RESISTANCE

Table 6. Thermal Resistance

Package Type	$\theta_{JA}$	$\theta_{JC}$	Unit
8-Lead MSOP (4-Layer Board)	206	44	°C/W
8-Lead LFCSP	50.8		°C/W

## ESD CAUTION

**ESD (electrostatic discharge) sensitive device.** Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

### PIN CONFIGURATIONS AND FUNCTION DESCRIPTIONS

NOTES  
1. EXPOSED PAD TIED TO SUBSTRATE, V<sub>SS</sub>.

Figure 3. 8-Lead LFCSP Pin Configuration

NC = NO CONNECT

Figure 4. 8-Lead MSOP Pin Configuration

Table 7. Pin Function Descriptions

Pin No.		Mnemonic	Description
LFCSP	MSOP		
1	1	D	Drain Terminal. This pin can be an input or output.
2	2	SA	Source Terminal. This pin can be an input or output.
3	3	GND	Ground (0 V) Reference.
4	4	V <sub>DD</sub>	Most Positive Power Supply Potential.
5	Not applicable	EN	Active High Digital Input. When this pin is low, the device is disabled and all switches are turned off. When this pin is high, the IN logic input determines which switch is turned on.
Not applicable	5	NC	No Connect.
6	6	IN	Logic Control Input.
7	7	V <sub>SS</sub>	Most Negative Power Supply Potential.
8	8	SB	Source Terminal. This pin can be an input or output.
0	Not applicable	EPAD	Exposed Pad. Exposed pad tied to substrate, V <sub>SS</sub> .

## TERMINOLOGY

<b>I<sub>DD</sub></b>	The positive supply current.	<b>t<sub>ON</sub> (EN)</b>	Delay time between the 50% and 90% points of the digital input and switch on condition. See Figure 27.
<b>I<sub>SS</sub></b>	The negative supply current.	<b>t<sub>OFF</sub> (EN)</b>	Delay time between the 50% and 90% points of the digital input and switch off condition. See Figure 27.
<b>V<sub>D</sub> (V<sub>S</sub>)</b>	The analog voltage on Terminal D and Terminal S.	<b>t<sub>TRANSITION</sub></b>	Delay time between the 50% and 90% points of the digital inputs and the switch on condition when switching from one address state to another.
<b>R<sub>ON</sub></b>	The ohmic resistance between Terminal D and Terminal S.	<b>T<sub>BBM</sub></b>	Off time measured between the 80% point of both switches when switching from one address state to another. See Figure 26.
<b>R<sub>FLAT</sub> (ON)</b>	Flatness is defined as the difference between the maximum and minimum value of on resistance as measured over the specified analog signal range.	<b>Charge Injection</b>	A measure of the glitch impulse transferred from the digital input to the analog output during switching. See Figure 28.
<b>I<sub>S</sub> (Off)</b>	The source leakage current with the switch off.	<b>Off Isolation</b>	A measure of unwanted signal coupling through an off switch. See Figure 29.
<b>I<sub>D</sub> (Off)</b>	The drain leakage current with the switch off.	<b>Crosstalk</b>	A measure of unwanted signal that is coupled through from one channel to another as a result of parasitic capacitance. See Figure 30.
<b>I<sub>D</sub>, I<sub>S</sub> (On)</b>	The channel leakage current with the switch on.	<b>Bandwidth</b>	The frequency at which the output is attenuated by 3 dB. See Figure 31.
<b>V<sub>INL</sub></b>	The maximum input voltage for Logic 0.	<b>On Response</b>	The frequency response of the on switch.
<b>V<sub>INH</sub></b>	The minimum input voltage for Logic 1.	<b>Insertion Loss</b>	The loss due to the on resistance of the switch. See Figure 31.
<b>I<sub>INL</sub> (I<sub>INH</sub>)</b>	The input current of the digital input.	<b>THD + N</b>	The ratio of the harmonic amplitude plus noise of the signal to the fundamental. See Figure 32.
<b>C<sub>S</sub> (Off)</b>	The off switch source capacitance, measured with reference to ground.	<b>AC Power Supply Rejection Ratio (ACPSRR)</b>	ACPSRR measures the ability of a part to avoid coupling noise and spurious signals that appear on the supply voltage pin to the output of the switch. The dc voltage on the device is modulated by a sine wave of 0.62 V p-p. The ratio of the amplitude of signal on the output to the amplitude of the modulation is the ACPSRR. See Figure 21.
<b>C<sub>D</sub> (Off)</b>	The off switch drain capacitance, measured with reference to ground.		
<b>C<sub>D</sub>, C<sub>S</sub> (On)</b>	The on switch capacitance, measured with reference to ground.		
<b>C<sub>IN</sub></b>	The digital input capacitance.		

# OUTLINE DIMENSIONS

Dimensions shown in millimeters

Figure 34. 8-Lead Lead Frame Chip Scale Package [LFCSP\_WD] 3 mm x 2 mm Body, Very Very Thin, Dual Lead (CP-8-4)  
Dimensions shown in millimeters

## ORDERING GUIDE

Model <sup>1</sup>	Temperature Range	Package Description	Package Option	Branding
ADG1419BRMZ	-40°C to +125°C	8-Lead Mini Small Outline Package [MSOP]	RM-8	S1L
ADG1419BRMZ-REEL7	-40°C to +125°C	8-Lead Mini Small Outline Package [MSOP]	RM-8	S1L
ADG1419BCPZ-REEL7	-40°C to +125°C	8-Lead Lead Frame Chip Scale Package [LFCSP_WD]	CP-8-4	1C

<sup>1</sup> Z = RoHS Compliant Part.

**NOTES**

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
