

SPECIFICATIONS
FOR

PRODUCT NAME : Automatically small horizontal vibration detection switch

TYPE NAME : D7A-2

ISSUED : S. Iwada April 21, 1999

CHECKED : S. Mori April 22, 1999

APPROVED : R. Yamada Apr. 22, '99

OMRON Corporation

1. Mechanism parameter

(1) Dimensions

DRWG. No. 6421443-2

(2) Structure

The contact of the built-in switch is mechanically opened and closed by the vibration of the earthquake wave and it is the mechanism which takes out the signal.

(3) Protection structure

The switch is assumed to be IP40.

(4) Set sensitivity

90-170 cm/s^2 (Gal) (Depend on the horizontal, continuous excitation method of 0.3, 0.5, and 0.7 cycle seconds).

The above-mentioned sensitivity is a value by which it is set to operate by the earthquake waves (80-250 cm/s^2).

(5) Return mechanism

Automatic return type

(6) Installation level allowance value

The installation level allowance value of the device which builds in this item while installed normal is assumed ± 5 degrees or less.

(7) Point of contact form

Excite horizontally and turn ON in the range of set sensitivity.

(8) The horizontal return time

Time from the fixation of the device which builds in this item in the installation level allowance value to the normal return of the switch circuit is made within 20 seconds.
(However, 10°C or more)

(9) Circuit return time

Time until the switch circuit returns original after the vibration stops is made within one minute.

(10) Installation method

Please install this item on the PCB ($t=1.6\text{mm}$).
(See right picture.)

(11) Soldering

Dip soldering: temperature 270°C 4sec MAX.
Soldering iron: temperature $350 \pm 10^\circ\text{C}$ 3sec MAX.

2. Electric specification

(1) Electric ratings

DC3V, 5 μA ~ DC3V, 1mA

(2) Insulation resistance

100M Ω or more (DC250VMegger).
Between each terminal and earth terminal,
between the same pole terminals.

- (3) Dielectric strength
AC250V, 50/60Hz 1 minute (between each terminal and earth between the same pole terminals).
- (4) Contact resistance
Below initial 1Ω (terminal)
3. Mechanical specification
- (1) Transportation vibration
Satisfy an initial value after exciting in half amplitude 2.5mm, the vibration frequency 10Hz, and the direction of three axes for 20 minutes or more.
- (2) Endurance impact
⚠ Do not provide the obstacle as a function after impressing the acceleration of 980m/s^2 in the direction of three axes continuousness three times.
- (3) Transportation impact
Satisfy an initial value after 1 corner, 3 arrises, 3 surfaces and 7 times in total are dropped from the height of 60cm to a concrete side freely while packed.
- (4) Terminal strength
Satisfy an initial value after impressing the load of 9.8N in the direction of compression for one minute.
4. Environmental performance
- (1) Use surroundings temperatures $-30\text{--}70^\circ\text{C}$ (However, there must be neither be dewy nor freezing)
- (2) Use surroundings humidity. 25~95%RH.
- (3) Preservation surroundings temperatures $-40\text{--}70^\circ\text{C}$ (However, there must be neither be dewy nor freezing)
- (4) Preservation surroundings humidity. 25~95%RH.
5. Business-proof Business
- (1) Salt-fog test
Do not generate rust on corrosion and externals remarkable depending on the salt-fog test which builds in and provides for the meter of the gas to JIS Z 2371 after testing for 100 hours.
insulation resistance: $5\text{M}\Omega$ or more.
Dielectric strength: AC250V 1 minute (50/60Hz).
However, measures under the dry state after the examination ends.
- (2) Wetproofing
Do not provide the obstacle as a function after leaving for continuousness 96 hour in atmosphere of $40\pm 2^\circ\text{C}$ and 90-98%RH.
Insulation resistance $10\text{M}\Omega$ or more.
However, measures under the dry state after the examination ends.
- (3) Heat-humidity cycle
Do not provide the obstacle as a function by 10 cycles at each heat-humidity of showing in Figure 2 of regulations of the check of the meter of the gas.
Insulation resistance $10\text{M}\Omega$ or more.
Moreover, do not expose the final cycle in the state of the low temperature.
However, measures under the dry state after the examination ends.

- (4) High temperature leaving
Do not provide the obstacle as a function after leaving in the constant temperature tank of $70 \pm 2^\circ\text{C}$ for 96 hours.
- (5) Heatproof impact
Do not provide the obstacle as a function after leaving for 10 cycles. (onecycle: -30°C 30 minutes $\rightarrow 70^\circ\text{C}$, 30 minutes).
- (6) Electrical service life
Do not provide the obstacle as a function after 10,000 operations under the rated load of 3VDC 1mA at a frequency of 10 to 20 operations per minute.
Insulation resistance : $10\text{M}\Omega$ or more.
- (7) Corrosive gas
 $\text{H}_2\text{S} \pm 1\text{ppm}$, 40°C and 65%RH and leaving for 96 hours.
The contact resistance after examining is assumed to be $1\text{k}\Omega$ or less.

Note 1. Among the judgment standards, the meaning of 'Satisfy an initial value' is as follows.

- ① Operation characteristic operates by $90\text{--}170\text{ cm/s}^2$ (0.3, 0.5, and 0.7 cycle seconds).
 - ② Contact resistance Below 1Ω .
 - ③ Insulation resistance $100\text{M}\Omega$ or more.
 - ④ Dielectric strength AC250V 50/60Hz 1 minute.
- Moreover, the meaning of 'Do not provide the obstacle as function' is as follows.
- ① Operation characteristic Operate by $80\text{--}250\text{ cm/s}^2$ (0.3, 0.5, and 0.7 cycle seconds).
 - ② Contact resistance Below 100Ω .
 - ③ Insulation resistance $100\text{M}\Omega$ or more.
 - ④ Dielectric strength AC250V 50/60Hz 1 minute.

Note 2. Guaranteed term and range of guarantee

- (1) Guaranteed term
It will be assumed one year after the commodity is delivered.
- (2) Range of guarantee
Only when the breakdown is caused during the above-mentioned guaranteed term by the responsibility of our company, the breakdown part of this commodity is exchanged or is repaired.
The guarantee is a guarantee of the delivery goods units and pardon expenditure (work pay and damage amends, etc.) because of the exchange work, please.

Note 3. The terms of validty of this specifications

One year after the day of issue.
If we have not had any orders for one year, we will make this specifications invalid.

OMRON

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
