#### Notes:

- 5V output is adjustable with +/-10% range. Other output voltages available, consult factory.
- Measured with noise probe directly across output terminals, and load terminated with 0.1µF ceramic and 47µF low ESR capacitors. Ripple & Noise of V2 at no load is 2% maximum. All specifications are typical at 230Vac, full load, at 25°C ambient unless noted.
- Total Regulation is defined as the maximum deviation from the nominal voltage for all steady state conditions of initial voltage setting, input line voltage, and output load.
- Contact factory for availability of specific models.
