Description

The CPL-WB-02D3 is a wide-band directional coupler designed to measure RF antenna output power. This CPL has been customized for wide band operating frequencies (2G/5G WLAN) with low insertion losses in the transmit bandwidth (2400 MHz to 5850 MHz).

The CPL-WB-02D3 has been designed using STMicroelectronics IPD (integrated passive device) technology on non-conductive glass substrate to optimize RF performance. The device is delivered 100% tested in tape and reel.
