### TEST BUTTONS Type T

# Test Buttons (no latching) and Plugs

**Test buttons** are available for R2...WT, R3...WT, R4...WT, R15...WT DPDT, R15...WT 3PDT, relays - **for applications that do not require permanent contact latching**. By manual operation (pressing the button, see figures 1A and 1B) relay contacts can get switched for as long time as long the button is pressed. Contacts return to initial position as soon as pressure is released from the button. Those operations can be done while the coil is deenergized. Button R4P-0001 or R15-M404 can be easily inserted by the Customer after removal of button type T (see figure 1B).

Button type T can be removed with screwdriver as shown in figure 2.

**Dimensions - test button R4P-0001**  
for relays **R2...WT, R3...WT, R4...WT**

**Dimensions - test button R15-M404**  
for relays **R15...WT - DPDT, 3PDT**

**Plugs R4W-0003 or R15-M203 can substitute button type T if manual operation (latching and testing) is not allowed.** Changing button type T for plug can be done by Customer themselves in the same way as changing button type T for button (no latching).

**Dimensions - plug R4W-0003**  
for relays **R2...WT, R3...WT, R4...WT**
